In Great Britain, the last bulwark of democracy in the old world, the organized workers have accepted freely, spontaneously, and in common accord with their employers, compulsory arbitration and the outlawing of strikes and lockouts for the duration of the war. Their action is based on their knowledge that to-day with them all things depend on the strength of national defence. Without sacrificing their autonomy or independence, the British trade union workers sharing the responsibilities of Government through their chosen representatives, have themselves recommended the adoption of the Emergency Powers Defence Act which grants the most drastic authority a free people has ever conferred upon its government. This authority includes power to control all persons and all property, to conscript labour and regulate conditions of employment, to control banking and finance and to impose an excess profit tax of 100 per cent. The Secretary of Labour and National Service has been charged with the creation of a new arbitration board to adjudicate disputes on working conditions.

On the outcome of the present struggle between Great Britain and Nazi Germany depends the future of labour and the labour movement in Europe. If Britain falls, the whole of Western and Central Europe will pass under a totalitarian rule that will obliterate the gains made in one hundred and fifty years of struggle and sacrifice, and place the American worker in the front line of defence.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, AUGUST, 1940

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on September 1 was 12,247, the employees on their pay-rolls numbering 1,289,385 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for August was 1,963 having an aggregate membership of 256,482 persons, 5·2 per cent of whom were without employment on September 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of September, 1940, as Reported by Employers

According to returns tabulated by the Dominion Bureau of Statistics, industrial employment at the beginning of September showed record expansion, the number of persons added to the reported staffs being considerably larger than in any other September in the twenty years during which the monthly surveys of employment have been made; the 12,247 establishments co-operating for the latest date employed 1,289,385 men and women, an increase of 36,168, or 2·9 per cent over their working forces at August 1, 1940.

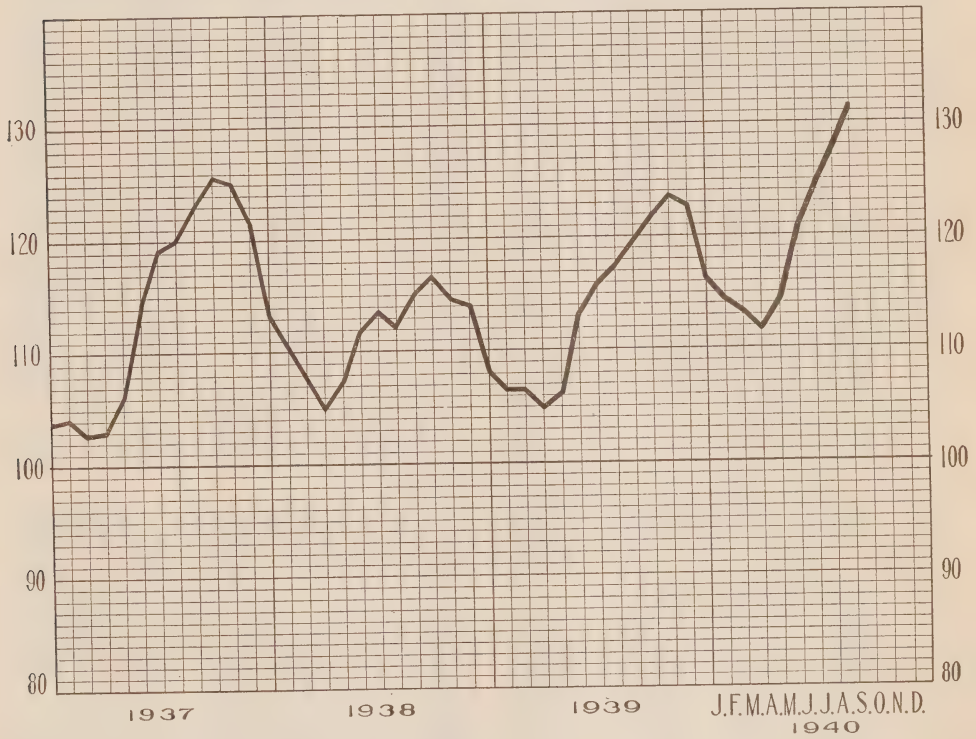
Based on the 1926 average as 100, the crude index rose from 127·9 in the preceding month to a new all time high of 131·6. The highest index for September in earlier years since 1920 had been 126·8 in 1929, while the figure for September 1, 1939, was 119·6.

After correction for seasonal movement, the index advanced, standing at 126·5 at the date under review, as compared with 124·4 at August 1; these figures were higher than the seasonally adjusted index for any other month for which statistics have been prepared.

The following are the crude indexes for September 1 in recent years, the figures being calculated on the 1926 average as 100:—1940, 131·6; 1939, 119·6; 1938, 115·1; 1937, 123·2; 1936, 107·1; 1935, 102·7; 1934, 98·8; 1933, 88·5; 1932, 86·0; 1931, 107·1; 1930, 116·6; 1929, 126·8; 1928, 119·1 and 1927, 111·0.

An analysis of the returns by industries shows unusually marked expansion in manufacturing, the establishments furnishing data enlarged their staffs by over 20,800 persons. This increase of three per cent greatly exceeded the average advance recorded at September 1 in the years since 1920, being substantially larger than that reported in any other September in this period, with the exception of that of 1938, when the gain involved a smaller number of workers, but the percentage increase was fractionally higher. The index of employment in manufacturing established a new maximum at September 1, when the figure was 138·4, four points higher than the previous all time peak of August 1, 1940.

The greatest improvement in manufacturing at the date under review took place in the iron and steel industries, in which the reporting plants absorbed over 5,700 additional workers, and in textiles, which showed an increase of nearly 3,900. Leather, lumber, animal and vegetable foods, pulp and paper, rubber, chemical, electrical apparatus and non-ferrous metals also recorded important increases.



In the non-manufacturing industries, logging, coal-mining, communications, construction and maintenance, services and trade showed considerably heightened activity. The increase in construction was most extensive, and was especially interesting because the average change in employment at September 1 in the experience of past years has been a decline. On the other hand, railway transportation was rather quieter.

An analysis by industries is given in greater detail, following the text dealing with the situation in the economic areas and the leading cities.

The employers furnishing data for September 1, 1939, had numbered 11,856 and their employees had aggregated 1,165,631, which was an increase of 1·8 per cent over their August 1, 1939, payrolls. The improvement then had also been widespread, extending to communications, construction, service and trade industries bring the total number of employees included in the September 1 survey of employment to 1,323,195 in 12,652 establishments, and slightly lowers the index of 131·6 in the industries above enumerated, to 131·0; when the employees of the co-operating financial organizations were added to the general figures for August 1, 1940, the index was lowered from 127·9 to 127·4. The

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

each of the five economic areas and to the main industrial divisions, with the exception of logging and trade.

Employment in Financial Institutions

For some months, statistics of employment have been collected from banks, trust companies and stock market operators. For September 1, 405 firms and branches in these lines of business reported staffs aggregating 33,810 persons, compared with 33,763 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, September 1, 1939, index had stood at 119·6 without the figures from financial institutions, and at 119·2 when they were included.

Estimates of Total Number of Wage Earners in Employment and Unemployed

The Social Analysis Branch of the Dominion Bureau of Statistics prepares monthly estimates of the total number of wage-earners, of those in employment and those unemployed throughout the Dominion. The estimates are based upon the census definition of wage-earner as one who has or has had a job from an employer in any field of work, including the

following and all other classes of industry: agriculture, fishing, trapping, forestry, mining, manufacturing, construction, transportation, communications, trade, finance and services—professional, public, domestic, personal, etc., etc. Also according to the definition given in the census volumes the unemployed are those who have at one time had gainful employment but are no longer employed. This definition automatically excludes young persons just leaving school and others who have never had a job; persons who have retired; those living on income; those reporting themselves at the census in the class, "No occupation"; employers and persons working on their own account are also excluded.

It may be noted that the estimated number of wage-earners shows some variation from month to month, the figure expanding or contracting in response to season, secular and cyclical influences. The variation is largely at the expense of the workers classed as "on their own account"; it is, however, also true that when employment is active, either generally or in a particular industry, persons not normally belonging to the wage-earning class (in the broad sense of the word), will take positions, later to retire therefrom without actively seeking work at other periods, and without experiencing the privations frequently associated with unemployment. An illustration of such cases may be found during the canning season, when work of this nature will call forth a considerable body of workers who do not ordinarily look for employment outside their homes in other parts of the year; another example is the employment of students and others in summer hotels during the active season, and in retail trade during the Christmas rush.

It should be noted that the information available does not permit allowance to be made in these calculations for enlistments in the armed forces since the outbreak of war. Thus the estimates of the total number of wage-earners include some enlisted men who were unemployed wage-earners prior to enlistment. The estimates of wage-earners in employment are entirely exclusive of enlisted men, but the estimates of unemployed wage-earners include a considerable number of previously unemployed wage-earners who have now enlisted. Since enlisted men are not included as wage-earners, there is in these figures an overstatement of the total number of wage-earners and also a corresponding overstatement of the number of unemployed wage-earners. Accordingly, the estimates of unemployment in recent months are exaggerated by the number of enlisted wage-earners who were without jobs when they joined the active forces. Such factors as unrecorded emigration within the last year or two may have an effect on figures based on the Census, which is now nine years away; no adjustment can be made for these factors.

The following table shows, in thousands, the estimated number of wage-earners, and of those employed and those unemployed in recent months, together with figures for July in the period, 1928-1939:—

Month	Total Estimated Number of Wage-earners (in thousands)	Estimated Number of Wage-earners in employment (in thousands)	Estimated Number of Wage-earners unemployed (in thousands)
July			
1928.	2,469	2,442	27
1929.	2,667	2,619	48
1930.	2,782	2,440	342
1931.	2,594	2,166	428
1932.	2,463	1,820	643
1933.	2,463	1,845	618
1934.	2,532	2,056	476
1935.	2,555	2,082	473
1936.	2,585	2,174	411
1937.	2,747	2,470	277
1938.	2,715	2,308	407
1939.	2,771	2,419	352
1940.	2,872	2,634	238
Jan. 1940..	2,732 1/	2,355 2/	377 3/
Feb..	2,725 1/	2,338 2/	387 3/
Mar.	2,695 1/	2,304 2/	391 3/
Apr.	2,720 1/	2,353 2/	367 3/
May.	2,794 1/	2,489 2/	305 3/
June.	2,843 1/	2,568 2/	275 3/
July.	2,872 1/	2,634 2/	238 3/

1/ Includes enlisted men who were previously unemployed wage-earners.
2/ Exclusive of enlisted men.
3/ Including a considerable number of enlisted men who were previously unemployed wage-earners.

The total estimated number of wage-earners increased by 29,000 between June and July; the figure for the latter, (2,872,000) was higher than in any other month for which an estimate has been made. The estimated number in employment, at 2,634,000, was also greater than in June, 1940, or any earlier month for which an estimate has been made.

The estimated number unemployed was 238,000, a decrease of 37,000 from the preceding month, and of 114,000 from July, 1939; the latest figure was the lowest for July in any year since 1929.

Employment by Economic Areas

Firms in Saskatchewan showed a slight slowing up in industrial activity, while the situation in the other provinces continued to improve. The gains ranged from 1·5 per cent in Ontario, to 6·5 per cent in British Columbia, but the largest expansion was in Quebec, where the co-operating employers increased their working forces by over 16,600 persons, or 4·4 per cent. In all provinces except Saskatchewan, the employment afforded by

industrial establishments was at a higher level than at September 1 of last autumn. In the Maritime Provinces, the index was higher than in any other month since the latter part of 1937; in the Prairie area, the favourable comparison goes back to November, 1931, while in Quebec, Ontario and British Columbia, employment was at the peak for any month in the twenty years for which statistics are available.

Maritime Provinces.—Activity in Prince Edward Island and Nova Scotia showed a moderate increase, and there was a larger gain in New Brunswick. The considerable improvement in the Maritime Provinces as a unit was contra-seasonal, there being, on the average, a contraction between August 1 and September 1 in the experience of the years since 1920. Most of the expansion at the date under review took place in building, while work on the roads, in shipping, mining, communications and services recorded small advances. On the other hand, manufacturing reported curtailment, mainly in iron and steel; the losses in that group, however, were partly offset by gains in food, pulp and paper and some other divisions.

Statistics were received from 859 firms in the Maritime Provinces, whose staffs aggregated 94,585 workers at September 1, 1940, compared with 92,520 in the preceding month. A much smaller increase had been indicated at the beginning of September of last year, when the 829 employers furnishing data had reported 85,972 persons on their payrolls. The index then was nearly eleven points lower than at the latest date, when it stood at 127·3.

Quebec.—Greatly increased employment was noted in Quebec, the expansion largely exceeding the usual seasonal up-swing at the first of September in the years since 1920. There were pronounced gains in logging, manufacturing and construction and maintenance, with smaller advances in transportation and some other divisions. General improvement was shown in manufacturing; that in textiles was most marked, but there was also heightened activity in leather, lumber, musical instrument, rubber, chemical, iron and steel, non-ferrous metal and other plants. For factories, on the other hand, were slacker, and among the non-manufacturing groups, mining also reported a small reduction. The working forces of the 3,077 establishments co-operating in Quebec included 390,973 employees, as against 374,362 at August 1.

Employment at the latest date was in greater volume than in any other month in the twenty years during which the current surveys have been made, the index standing at 136.4, as compared with 128.5 at the beginning of September, 1939; the previous maximum figure was that of 131.5 at November 1, 1939.

Statements for September 1 of last year had been tabulated from 2,943 firms employing

Wholesale	2·8	130·7	129·8	124·1
ALL INDUSTRIES	100·0	131·6	127·9	119·6

† The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

366,824 men and women, compared with 360,718 in the preceding month.

Ontario.—In Ontario, 5,305 businessmen reported considerable additions to their staffs, which were enlarged from 530,414 at the first of August, to 538,252 at September 1. Rather greater expansion had been noted at the same date last year, but the index then, at 116·2, was many points lower than the latest figure of 134·8.

Manufacturing recorded a substantial advance, over 10,400 persons being taken on in such establishments; there was marked improvement over August 1, 1940, in the iron and steel group, together with smaller gains in the leather, vegetable food, pulp and paper, textile, rubber, non-ferrous metal, electrical apparatus and some other classes, while the working forces of lumber mills slightly declined. In some of these industries, the increases were

seasonal in character. Among the non-manufacturing divisions, trade, building construction, hotels and restaurants and local transportation showed heightened activity, while logging, highway and railway construction and maintenance and steam railway operation reduced their personnel.

The 5,184 employers co-operating at the same date in 1939 had reported a working force of 461,854 persons, as compared with 453,840 at August 1 of last year.

Prairie Provinces.—Further important advances, on the whole, were indicated in industrial employment in the Prairie Provinces at the beginning of September; there was a slowing down in Saskatchewan, but decided improvement was shown in Manitoba and Alberta. The general index, at 117·0, was three points above that of September 1, 1939; it was also higher than in any other month since late in 1931. Data for the date under review were tabulated from 1,718 firms with 153,223 employees, as compared with 150,382 in the preceding month. This increase of 1·9 per cent substantially exceeded the average gain at September 1 in earlier years for which information is on record, although it was on a smaller scale than at that date in 1939.

Manufacturing, mining, building and trade afforded more employment, the increases in manufacturing taking place mainly in food, lumber, textile and iron and steel plants. On the other hand, transportation and railway construction and maintenance work were slacker. For September 1, 1939, 1,674 establishments had reported a staff of 148,534 persons, a gain of 4·1 per cent over the preceding month.

British Columbia.—Employment in British Columbia showed continued expansion at September 1; the improvement, which was on a scale rarely exceeded in any month in the nearly twenty years of the record, resulted in the highest level of employment ever indicated. Transportation and construction reported a falling-off, but in other industries the trend was upward. Trade, mining, logging and manufacturing showed greater activity, the largest additions to the personnel being in the lumber, food and metal divisions.

The working force of the 1,288 employers in British Columbia furnishing data rose from 105,539 in the preceding month, to 112,352 at the beginning of September. At the same date last year, 1,226 firms had made returns, showing an aggregate staff of 102,447. The index then stood at 116·6, many points below the latest index, which was 126·7.

Table 1 gives index numbers by economic areas.

Employment by Cities

Employment advanced in seven of the eight cities for which statistics are segregated, firms in Montreal, Quebec City, Toronto, Hamilton, Windsor, Winnipeg and Vancouver showing improvement since August 1, while moderate curtailment was indicated in Ottawa. The staffs reported by employers in all these cities were decidedly larger than at September 1, 1939. In Ottawa, industrial employment was more active than in any other month since October, 1931, except August 1, 1940; in Winnipeg, the latest index was higher than at any date in the years since 1930; in Montreal, Hamilton and Windsor the favourable comparison goes back to 1929, while the September 1, 1940, indexes for Quebec, Toronto and Vancouver were at the peak for the period in which statistics are available.

Montreal.—Employment in Montreal increased substantially at the beginning of September, 4,536 persons having been added since August 1 to the paylists of the 1,797 co-operating firms, who employed 183,489. Considerable improvement was noted in manufacturing, particularly of textile products, but tobacco, leather, musical instruments, iron and steel, non-ferrous metal and many other factories were also busier. Among the non-manufacturing industries, shipping, building and road construction showed heightened activity, while little general change took place in other industrial divisions. A smaller advance, on the whole, had been made at September 1, 1939, when data were received from 1,711 employers of 169,423 men and women; the index was then 8½ points lower. The latest figure of 117·8 was the highest indicated in any month since November, 1929.

Quebec.—A further gain was indicated in Quebec, according to 216 establishments having 19,302 workers, as compared with 18,749 in the preceding month. The index, at 138·9, was slightly above the previous maximum of 138·5 at September 1, 1930. Manufacturing showed an important increase at the date under review, mainly in leather, textile, chemical and iron and steel plants. Slight improvement was reported in building and trade, but transportation was quieter. Employment was decidedly more active than at the beginning of September of a year ago, when a smaller advance had been reported by the 212 concerns making returns, whose staffs had aggregated 17,920.

Toronto.—There was substantial improvement in manufacturing, chiefly in the textile and iron and steel divisions, while leather, food, printing and publishing, electrical apparatus and non-ferrous metals also showed an upward movement. Building was considerably more active, but there was little general change in

other non-manufacturing industries. Statements were received from 1,819 employers of 166,533 men and women, or 5,352 more than at August 1. Expansion on a smaller scale had been indicated at the same date of a year ago, when employment was decidedly below its present level; the September 1, 1940, index was the highest yet indicated in these surveys of employment. The firms furnishing information for the beginning of September of last year had numbered 1,758, and their employees, 141,950.

Ottawa.—Reduced activity was noted in Ottawa, chiefly in construction, while manufacturing, trade and services were more brisk. The 238 establishments making returns reported 16,878 workers, compared with 17,111 in the preceding month. At September 1, 1939, a similar decrease had been indicated by the 230 co-operating employers, who had provided jobs for 14,706 workers; the index was then many points lower.

Hamilton.—Manufacturing showed considerable improvement, chiefly in iron and steel, electrical apparatus and textiles. Building and transportation were also rather busier, but there were losses in road work and in trade. Three hundred and thirty-five concerns in Hamilton had 42,301 persons on their payrolls, as compared with 41,389 at August 1. A slight decline had been indicated at the beginning of September of a year ago, when industrial employment had been at a much lower level, according to information from 330 firms with 33,159 employees.

Windsor.—Heightened activity was reported in Windsor, where the 193 establishments making returns had 23,386 men and women on their staffs, as against 20,631 in the preceding month. Textile, vegetable food and iron and steel plants afforded more employment, the gain in the last-named being substantial. The changes in the non-manufacturing industries were slight. A much smaller increase had been noted at the same date of last year, and the general index was then many points lower; a personnel of 15,928 had been indicated by the 197 employers furnishing statistics for September 1, 1939.

Winnipeg.—Employment in Winnipeg showed its fifth successive advance; manufacturing, communications, construction, services and trade recorded improvement, that in construction and trade being most pronounced; transportation, however, was not quite so active. An aggregate staff of 46,221 men and women was reported by the 536 co-operating establishments, which had employed 45,000 in the preceding month. A smaller increase had been indicated at the same date in 1939 by the 525 firms whose statements were received, and whose employees had numbered 42,842; the latest index of 105·6 was the highest recorded since November of 1930.

Vancouver.—There was an upward movement in industrial activity in Vancouver, according to information received from 559 employers of 43,788 persons, as against 43,260 at August 1. Manufacturing plants reported larger payrolls, the most pronounced gains being in the lumber and iron and steel divisions; building, shipping and retail trade were quieter, but improvement was recorded in the other non-manufacturing divisions. A rather larger increase had been indicated by the 521 establishments co-operating at September 1, 1939, when they had 39,151 workers. The latest index, of 128·9, was the maximum so far recorded in the period for which data are available for Vancouver; this figure was nearly twelve points higher than that at September 1 of last year.

Employment by Industries

Manufacturing.—Employment in manufactures showed important expansion at September 1, the 6,743 co-operating employers enlarging their payrolls from 691,348 at August 1, to 712,177 at the date under review. This increase of 20,839 persons, or three per cent, was the largest indicated in any September since the record was commenced, with the exception of September, 1938, when the percentage gain was fractionally greater, although the number of employees added to the working forces was smaller. The index rose to a new all-time maximum of 138·4 at the latest date, as compared with 134·4 at August 1, 1940. At September 1, 1939, it had been 115·3, while at the previous high for September, in 1929, the unadjusted figure was 119·8.

Reflecting the unusually pronounced improvement recorded at September 1, 1940, the seasonally-corrected index rose from 131·4 at August 1 to 134·6 at the date under review, when it, (like the crude index), was higher than in any other month in the record of almost twenty years.

An analysis of the returns from manufacturers shows particularly large contra-seasonal increases in iron and steel, most branches of which were decidedly busier; however, the largest gains took place in the machinery, boiler, engine and tank, automobile, aeroplane, heating appliance, wire pipe, foundry and structural iron and steel groups. The general increase of 5,715 workers, or 33 per cent, reported in this division raised the index to 136·6 at September 1, 1940, a figure which in the years since 1920 has only once been exceeded by that of 137·6 at May 1, 1929. Textile factories also showed an advance that

was much greater than usual for September in the experience of the years since 1920; in this industry, employment was at its maximum to date. Animal and vegetable food, leather, lumber, musical instrument, rubber, pulp and paper, chemical, tobacco, electrical apparatus, non-ferrous metal and miscellaneous non-metallic mineral products also reported decided improvement, although on a smaller scale than that in iron and steel and textiles. The trend in factory employment was favourable in all provinces except Nova Scotia and New Brunswick, the gains of 10,409 employees reported in Ontario and of 5,362 in British Columbia being most pronounced.

The unadjusted indexes of employment in manufacturing at September 1 in recent years, based on the 1926 average as 100, are as follows:—1940, 138·4; 1939, 115·3; 1938, 113·8; 1937, 121·2; 1936, 105·9; 1935, 100·8; 1934, 94·3; 1933, 86·8; 1932, 83·1; 1931, 94·7; 1930, 108·2; 1929, 119·8; 1928, 115·9 and 1927, 106·8.

For September 1, 1939, 6,457 manufacturing establishments had reported 591,113 men and women on their staffs, compared with 577,984 in the preceding month.

Animal Products, Edible.—Curtailment was indicated in dairies, while fish and meat packing plants were busier. The payrolls of the 339 co-operating factories included 34,318 employees, as compared with 30,726 in the preceding month. Employment at September 1, 1939, had declined, and the index number then was decidedly lower than at the date under review.

Leather and Products.—A further increase took place in the leather industries, chiefly in the footwear division; the general gain in the group was on much the same scale as that noted at the beginning of September of last year, when employment was not quite so active. Statements were received from 339 manufacturers having 24,466 men and women in their employ, as against 23,804 at August 1, 1940. Quebec and Ontario firms reported the greatest advances.

Lumber and Products.—Sawmills, furniture and other wood-using factories showed improvement, which resulted in an increase of 705 persons in the staffs of the 994 lumber establishments furnishing data, whose payrolls aggregated 58,278. A decline had been indicated at September 1, 1939, when the index was fifteen points lower.

Musical Instruments.—A large increase was reported in musical instrument plants, 36 of which employed 2,161 workers at the date under review, compared with 1,834 in the preceding month. A small gain had been made at the beginning of September, 1939; the index of employment was then many points lower.

Plant Products, Edible.—Confectionery and chocolate, bread and bakery and fruit and vegetable preserving factories reported heightened activity, the additions to staffs in canneries being particularly pronounced. The general improvement, however, was on a much smaller scale than at the same date last year, when the index stood at 143·7, compared with 140·9 at September 1, 1940. Data were compiled from 563 firms in the vegetable food division, whose payrolls rose from 41,524 at August 1, 1940, to 43,445 at the date under review. Ontario and British Columbia recorded the most marked advances.

Pulp and Paper Products.—Employment in this group showed a further expansion, there being slight losses in printing and publishing plants, with much greater increases in pulp and paper mills and paper product manufacturing. A downward movement had been noted at September 1 of last year, when the index, at 110·1, was over eleven points lower than at the date under review. The forces of the 719 co-operating establishments included 75,418 persons at the beginning of September, as compared with 74,839 in the preceding month.

Rubber Products.—The trend was again favourable in rubber factories, 53 of which employed 14,747 workers, compared with 13,857 at August 1. The situation at September 1, 1939, had also shown a betterment as compared with the preceding month, although this was not so extensive as that recorded at the date under review. Employment was then at a lower level, the index standing at 112·2, as against 118·0 at September 1, 1940.

Textile Products.—Large increases in personnel were reported in textile factories, 1,248 of which had 127,456 employees, as against 123,564 at August 1. Most of the advance, which was seasonal, took place in Quebec and Ontario. Garment and personal furnishing, headwear, hosiery and knitting, silk, and other textile plants were decidedly busier. The general gain indicated at the same date of last year had involved a rather smaller number of workers; employment was then in much smaller volume.

Beverages.—Moderate improvement was noted in these industries at September 1 as compared with August 1, 127 persons being added to the payrolls of the 150 co-operating factories, which employed 10,187 operatives. The level of employment was slightly higher than at the beginning of September, 1939, when a small gain had been indicated in the group as a whole.

Tobacco factories were busier; 47 of these employed 8,735 workers, compared with 8,525 in the preceding month. Additions to staffs on a larger scale had been recorded at

September 1, 1939; but the index was then rather lower.

Chemical Products.—For the eighth consecutive month, there was an increase in this division, according to statistics from 324 employers of 24,807 persons, compared with 24,265 at August 1. The chemical industries were decidedly more active than at any other date for which statistics are available.

Clay, Glass and Stone Products.—These classes of building materials reported moderately lowered activity; statements were received from 222 plants, having 12,696 employees, as against 12,829 in the preceding month. A loss had also been noted at the beginning of September last year, when the index was many points lower.

Electric Light and Power.—Further expansion was shown in electric current plants, 103 of which provided work for 18,578 persons, or 282 more than at August 1. Employment was more brisk than at September 1, 1939, although greater improvement had then been indicated.

Electrical Apparatus.—Activity in this group again increased at the beginning of September, 607 workers having been added since August 1 to the forces of the 129 co-operating establishments, which had 21,918 employees. The gain was mainly in Ontario. A smaller advance had been noted at the corresponding date in 1939, and the index then was much lower.

Iron and Steel Products.—The crude, rolled and forged, agricultural implement, railway locomotive and shipbuilding divisions of the iron and steel group recorded contractions in employment, while the boiler, engine and tank, machinery, automobile, aeroplane, heating appliance, structural iron and steel fabrication, wire, pipe, tool, foundry and machine shop and other divisions were busier. On the while, there was an increase of 5,715 in the forces of the 965 co-operating iron and steel manufacturers, who employed 179,082 men and women at the beginning of September. The greatest expansion was in Ontario. The trend at September 1, 1939, had also been upward, but the index number then was many points lower than at the date under review, when it stood at 136·6; this is the highest figure indicated in any month in the years for which data are available, except that of 137·6 at May 1, 1929.

Non-Ferrous Metal Products.—The precious metal and the lead, tin, zinc and copper product divisions reported heightened employment, while there was a falling-off in some other branches; 208 manufacturers of non-ferrous metal products provided work for 32,707 employees, as against 32,001 at August 1. Improvement had also been indicated at the corresponding date last year, when the index in these industries was some 43 points lower.

Non-metallic Mineral Products.—Employment in this group showed a further gain, according to statements from 100 establishments with 14,205 persons on their payrolls, as against 13,937 at the beginning of August. Activity was much greater than at September 1, 1939, when the trend had been downward.

Logging

Logging operations afforded decidedly more employment at the beginning of September. Data were received from 380 firms, whose employees aggregated 37,483 workers, compared with 33,181 in the preceding month. The increase, which was seasonal in character, took place mainly in Quebec and British Columbia. The number engaged in bush work at September 1 was much larger than at the same date in 1939, or of any other autumn of the record, except 1937.

Mining

Coal.—Statistics were tabulated from 104 operators having 25,038 men on their payrolls, as compared with 23,982 at the beginning of August. Most of the improvement was in Alberta. A somewhat larger gain had been made at the same date a year ago, but the index number then was a few points lower than at the date under review.

Metallic Ores.—Employment in metallic ore mines showed a decrease, according to returns from 208 firms whose forces declined from 43,805 persons at August 1, to 43,600 at the beginning of September. A reduction had also been indicated at September 1, 1939; activity was then at a slightly higher level.

Non-Metallic Minerals (other than Coal).—Further improvement was reported in this group, in which 104 firms enlarged their staffs by 121 workers to 10,697 at September 1. A smaller gain had been noted at the corresponding date of last year, and employment was then not so brisk.

Communications

The trend was again upward in the communications division, in which the co-operating companies reported a personnel of 24,608, as compared with 24,292 in the preceding month. The level of employment was higher than in any other month since September, 1932.

Transportation

Street and Electric Railways and Storage.—A marked advance was shown by 307 local transportation companies, whose staffs aggregated 32,000, or 411 more than in the preceding month. The increase took place chiefly in Ontario and the Prairie Provinces. Employment has also gained at the beginning of September, 1939, but the index was then some seven points lower.

Steam Railways.—There was a falling-off in employment in steam railway operation at September 1, according to the 102 organizations from which returns were received, and which had 64,977 employees, compared with 65,965 at August 1. Employment was decidedly more active than at the corresponding date last year, although an advance had then been indicated. The curtailment reported at the beginning of September, 1940, took place mainly in Ontario and the Prairie Provinces.

Shipping and Stevedoring.—An upward trend was noted in the water transportation group, in which the index was nearly six points higher than at the same date in 1939. The tendency had then also been favourable. Statements were received from 124 employers of 18,328 workers, as against 17,990 at August 1, 1940.

Construction and Maintenance

Building.—Continued expansion was shown in building construction, in which employment was more brisk than in any other month since September, 1931. Data were received from 910 contractors, whose payrolls stood at 50,100 at September 1, 1940, as compared with 42,047 at the beginning of August. The trend was generally favourable, but Ontario reported the greatest gains.

Highway.—There was a further though smaller increase in this group, 1,669 men being added to the forces of the 426 co-operating organizations, which had 64,128 workers. There were advances in all provinces except Ontario, Alberta and British Columbia. The number employed on road work was much smaller than at September 1 of last year, the additions to the staffs then reported having been on a decidedly larger scale.

Railway.—Curtailment was recorded by the 29 employers furnishing data in this division, who employed 32,753 persons, as against 34,233 in the preceding month. Improvement was noted in Quebec, but in Ontario and the Western Provinces there was reduced activity. A gain, on the whole, had been reported at the corresponding date in 1939, but the index number was 4½ points lower.

Services

Further expansion was shown in the service group, in which the general level of employment was rather higher than that indicated last autumn. The 599 firms furnishing information for September 1, 1940, reported 34,737 assistants, or 370 more than at August 1. The gain took place mainly in hotels and restaurants.

Trade

Employment in retail and wholesale trade increased as compared with August 1, 1940, and was also in greater volume than in September of last year, when a falling-off from the preceding month had been reported. Statistics for September 1, 1940, were received from 2,125 trading establishments employing 138,759 persons, compared with 137,383 in their last report.

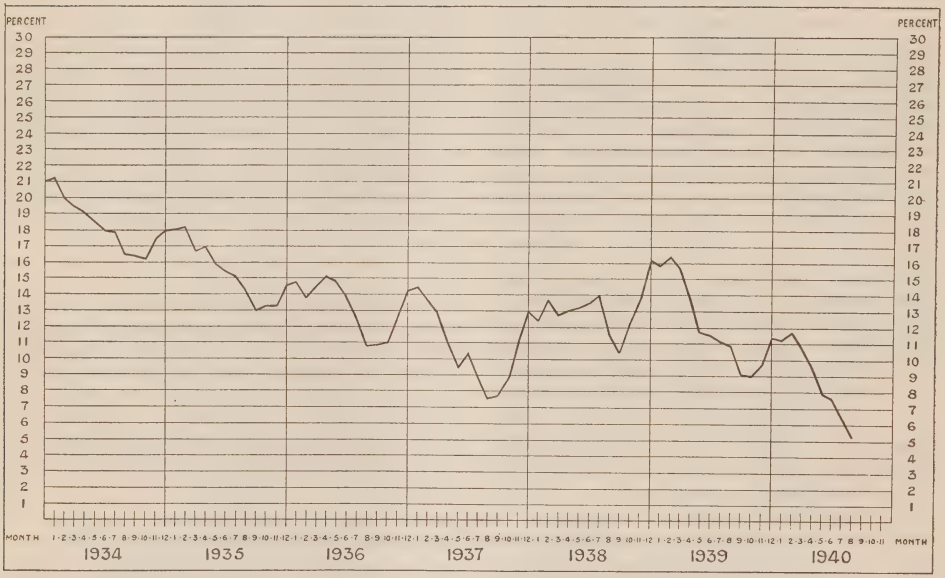
Tables

Index numbers of employment by economic areas and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of August, 1940

The term unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are engaged at work in other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was a slightly better volume of activity afforded local trade union members at the close of August from the preceding month according to the returns compiled from a total of 1,963 labour organizations, with a membership involving 256,482 persons. Of these, 13,330 or a percentage of 5·2 were without employment on the last day of the month in contrast with 6·4 per cent of idleness in July. Accumulative evidence of improved conditions is now visible, the more favourable situation obtaining during August marking the sixth consecutive month of employment advancement during the year and reflecting a higher level of activity than in the corresponding period of any year since 1929. A considerably greater prevalence of available work was noted from August last year when unemployment stood at 10·9 per cent. In comparing with the July returns, advances of 4 per cent shown in Alberta during August were the most pronounced and due almost entirely to recovery in coal mining operations. Activity for Quebec locals increased by nearly 3 per



cent, the determining factor in this favourable movement being the expansion evident in the garment trades and among hat, cap and millinery workers. In Ontario and British Columbia the tendency was in a better direction though the variations from July were quite slight. Fractional employment recessions only, occurred in the remaining provinces. Distinctly more favourable conditions than in August last year prevailed for Quebec, Ontario, Alberta, British Columbia and New Brunswick locals during the month surveyed, and in Nova Scotia the gains recorded were small. From Saskatchewan improvement of less than one per cent was manifest. Manitoba unions alone showed retarded activity on a very small scale.

Each month the reports on unemployment from the largest city in each province, with the exception of Prince Edward Island, are tabulated separately. Increased activity on a moderate scale was reflected from Montreal during August when compared with the July returns, attributable mainly to the employment expansion recorded in garment establishments and among hat, cap and millinery workers, while in Toronto and Vancouver a slightly upward movement was manifest. From Edmonton the gains recorded were almost negligible. Fair-sized recessions in work afforded, however, were reported from Halifax, and in Winnipeg and Regina the trend of activity was adverse, though the changes were very slight. Saint John members, however, maintained the same level of employment as in July. When a comparison is made with the returns for August last year Montreal and Halifax members were much more busily engaged during the month reviewed, and a substantially better volume of work was afforded Toronto, Saint John and Vancouver members. Gains of minor importance were reflected by Regina and Edmonton unions. Winnipeg members alone showed retarded activity from August a year ago, which was but nominal.

The chart which appears with this article illustrates the trend of unemployment from January, 1934, to date. From the close of February this year the projection of the curve has been steadily downward, denoting a gradual improvement in conditions, and continued in this favourable movement throughout August, resting at a level below that which has been attained in any month of our records since September, 1929.

From organizations in the manufacturing industries 588 reports were received for August, involving a membership of 102,527 persons, 5,223 of whom, or a percentage of 5·1 were unemployed at the end of the month in contrast with percentages of 6·9 in July and 11·9 in August a year ago. Pronounced employment recovery from July was indicated by hat, cap and millinery workers, and noteworthy advancement was apparent among general labourers, leather and garment work-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

ers. In addition the situation improved slightly for meat cutters and butchers, bakers and confectioners, glass, jewellery, wood and brewery workers. Fur, rubber, gas, and cigar and tobacco workers, and mill and smelter men all were reported busily engaged as in the preceding month. The employment trend for papermakers, printing tradesmen, iron and steel, and textile and carpet workers, and metal polishers was in a less favourable direction from July though the changes were less than one per cent. Contrasted with the returns for August, 1939, decidedly better conditions prevailed for hat, cap and millinery, glass, wood and leather workers, and metal polishers during the month reviewed, and impressive employment gains were indicated by papermakers, iron and steel workers, and general labourers. Among garment workers more moderate advances occurred, and activity for bakers and confectioners, printing tradesmen, textile and carpet, and brewery workers improved slightly. Adequate work was provided for rubber, gas, and cigar and tobacco workers, and mill and smelter men as in August last year, while fur workers reported no unemployment during the month under survey, compared with a rather small percentage of inactivity in August, 1939. Meat cutters and butchers were the only tradesmen to show curtailed activity, which was of slight degree.

The coal mining industry reported a more favourable situation during August than in either the previous month or August last year, the improvement in the latter comparison being the more pronounced. This was apparent from the returns compiled from 56 associations of these workers, with 21,467 members, 1,384 or 6·4 per cent of whom were idle in comparison with percentages of 9·3 in July and 11·7 in August, 1939. Alberta unions indicated marked employment expansion during August, both when contrasted with the reports for the previous month and August last year, and from Nova Scotia and British Columbia slight gains in activity only were recorded in each comparison. In New Brunswick all members were busily occupied as compared with moderate unemployment percentages in both the preceding month and August a year ago.

Continued improvement was reflected in building and construction operations during August, the 225 associations making returns with a membership total of 27,168 persons showing that 3,023 or 11·1 per cent were unemployed in contrast with a percentage of 11·9 in July. Steam shovelmen were decidedly busier during August than in July, but as their membership was small they little affected the situation in the building trades as a whole. Granite and stonecutters, and bridge and structural iron workers reported noteworthy employment expansion viewed from a percentage basis, and more moderate gains occurred among carpenters and joiners, and plumbers and steamfitters. Painters, decorators and paperhangers also, showed a slight rise in activity. Bricklayers, masons and plasterers, on the other hand, suffered rather severe losses in employment from July, and among hod carriers and building labourers the situation declined slightly. Fractionally retarded activity only was evident among tile layers, lathers and roofers, and electrical workers. Large scale employment advancement was apparent in the building and construction trades during the month reviewed from August last year when 28·1 per cent of the members reported were without work. All trades participated in this more favourable movement, decided employment advancement being recorded by bricklayers, masons and plasterers, carpenters and joiners, painters, decorators and paperhangers, plumbers and steamfitters, steam shovelmen, hod carriers and building labourers, and bridge and structural iron workers. Improvement of considerably lesser importance was recorded by

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1929	4·0	1·6	7·7	4·3	7·1	5·3	6·4	5·9	**5·7**

electrical workers and granite and stonecutters. Tile layers, lathers and roofers showed but slightly increased activity.

The situation in the transportation industries varied but slightly during August from July, according to the reports tabulated from 826 organizations involving a membership of 71,147 persons. Of these, 2,295 or a percentage of 3·2 were unemployed compared with 3·1 per cent in July. Somewhat improved conditions were reflected from August last year when 4·8 per cent of inactivity was recorded. Steam railway employees, who comprised over 80 per cent of the entire group membership reported in the transportation industries showed a slight tendency toward reduced activity from July, though gains on a small scale were indicated from August last year. Navigation workers were afforded a considerably better volume of employment, both over the previous month and August, 1939, the improvement in the latter comparison being quite extensive. Teamsters and chauffeurs showed a nominal increase in available employment from July, and moderate advancement from August a year ago. Activity for street and electric railway employees was maintained in much the same volume during the three months used for comparison.

A fully engaged situation was shown by retail shop clerks during August compared with a fractional percentage of unemployment in July. In August last year adequate work was also accorded the members reported. Making returns for the month under review were 4 associations of retail shop clerks with a membership aggregate of 1,860 persons.

The 80 unions of civic employees from which reports were compiled during August with 8,687 members showed that only 21 or a percentage of 0·2 were idle on the last day of the month contrasted with percentages of 1·4 in July and 1·1 in August a year ago.

The trend of employment in the miscellaneous group of trades during August was in a more favourable direction than in July though the variation was but nominal, unemployment standing at 3·3 per cent as compared with a percentage of 3·6 in July. For the month under review reports were furnished by 144 local unions in these trades with 10,632 members, 356 of whom were idle on the last day of the month. A greater measure of improvement was indicated from August last year when 8·1 per cent of the members reported were out of work. The changes in the various groups of trades were very slight when compared with July conditions, theatre and stage, and hotel and restaurant employees, and stationary engineers and firemen showing a tendency toward increased employment, and barbers and unclassified workers an almost imperceptible downward movement. All trades contributed a share to the total expansion noted in the group as a whole from August last year, when 8·1 per cent of unemployment was reported, unclassified workers, and hotel and restaurant employees particularly, showing considerably improved conditions, and theatre and stage employees, stationary engineers and firemen, and barbers increased activity on a rather small scale.

Fishermen were slightly better engaged during August than in either the previous month or August last year, the 5 unions from which reports were received with 2,792 members showing that 60 were unemployed at the end of the month, a percentage of 2·1 as compared with percentages of 3·7 in July and 3·3 in August, 1939.

There was a moderate rise in activity for lumber workers and loggers during August from the previous month, the 6 unions forwarding reports with a membership numbering 2,751 persons indicating that 359, or a percentage of 13·0 were idle, as compared with 17·4 per cent of inactivity in July. More decided gains were evident from August last year when 23·0 per cent of the members reported were without employment.

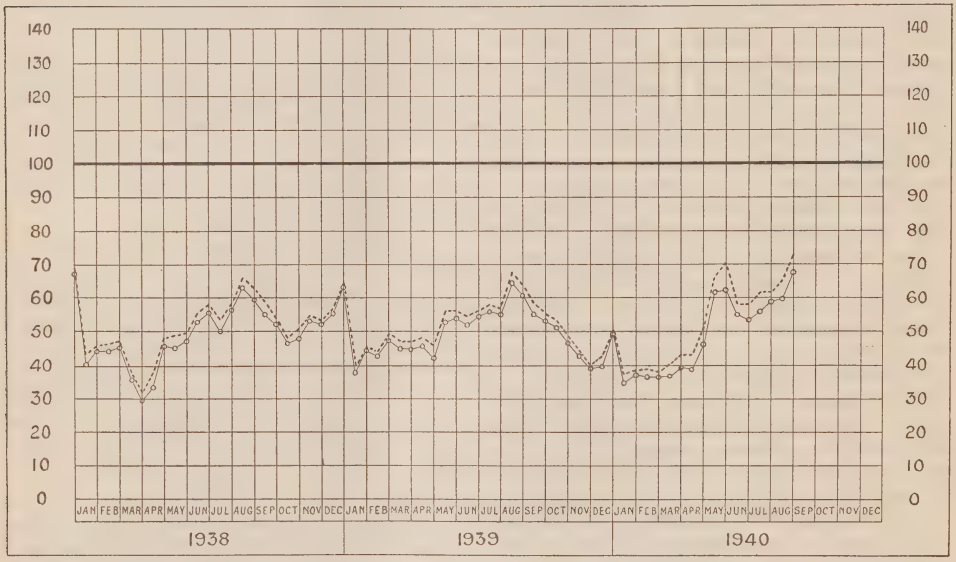
Table I shows by provinces the percentage of members who were on an average unemployed, each year, from 1929 to 1939 inclusive, and also the percentages of unemployment for August of each year from 1929 to 1938 inclusive, and for each month from August, 1939, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for August, 1940

During August, 1940, reports from the offices of the Employment Service of Canada showed gains of 9 per cent and 21 per cent, respectively, in the average daily placements over those of the preceding period and also those of the corresponding month last year. When compared with work transacted in July, 1940, a very substantial gain was reported in farming, with others of more moderate importance in services, trade and transportation, also minor advances in manufacturing and logging. A fair loss was shown in construction and maintenance, but only a fractional one in mining. In comparison with August, 1939, all groups, except farming, which recorded a substantial decline, registered increased placements, very marked gains being noted in manufacturing, services, construction and

maintenance, logging and transportation, one of smaller proportions in trade and a nominal one only in mining.

The accompanying chart shows the trend of employment since January, 1938, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed a marked upward course throughout August and at the end of the period had attained levels 9 and 7 points higher, respectively, than those recorded at the close of the corresponding month a year ago. The ratios of vacancies to each 100 applications was 65·3 during the first half and 73·1 during the second half of August, 1940, in contrast with ratios of 67·6 and 63·8 during the corresponding periods of 1939. The ratios of placements to each 100 applications during the periods under review were 59·8 and 67·6 as compared with 64·5 and 60·7 during the corresponding month of 1939.



The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during August, 1940, was 2,065, as compared with 1,872 during the preceding month and with 1,650 in August a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,969 in comparison with 3,034 in July, 1940, and with 2,515 during August last year.

The average number of placements made daily by the offices of the Service during August, 1940, was 1,903, of which 1,414 were in regular employment and 489 in work of one week's duration or less, as compared with a total daily average of 1,745 during the preceding month. Placements for August a year ago averaged 1,573 daily, consisting of 1,174 placements in regular and 399 in casual employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

During the month of August, 1940, the offices of the Service referred 52,826 persons to vacancies and effected a total of 51,368 placements. Of these, the placements in regular employment were 38,161, of which 32,490 were of men and 5,671 of women, while placements in casual work totalled 13,207. The number of vacancies reported by employers was 41,381 for men and 14,366 for women, a total of 55,747, while applications for work numbered 80,147, of which 60,415 were from men and 19,732 from women. Reports for July, 1940, showed 48,658 positions available, 78,864 applications made and 45,352 placements effected, while in August, 1939, there were recorded 44,549 vacancies, 67,901 applications for work,

and 42,470 placements in regular and casual employment.

The following table gives the placements effected by offices of the Employment Service of Canada, each year, from January, 1930, to date:—

Year	Placements		
	Regular	Casual	Totals
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	266,134	126,161	382,295
1939	242,962	141,920	384,882
1940 (8 months)	184,056	94,534	278,590

Nova Scotia

During August, 1940, positions offered through employment offices in Nova Scotia were over 67 per cent higher than in the preceding month and nearly 236 per cent above the corresponding month of last year. There was an increase also in placements of nearly 67 per cent when compared with July and of 229 per cent in comparison with August, 1939. The substantial increase in placements over August of last year was mainly due to the construction of hutments and other National Defence projects, although there was also a fair gain in services and moderate improvement in logging and manufacturing. The changes in all other groups were small. Placements by industrial divisions included manufacturing 58; logging 146; construction and maintenance 2,748 and services 945, of which 699 were of household workers. During the month 2,885 men and 174 women were placed in regular employment.

New Brunswick

The demand for workers, as indicated by orders received at employment offices in New Brunswick during August was over 15 per cent less than in the preceding month and over 6 per cent below the corresponding month of last year. Similar percentages of loss were reported in placements under both comparisons. The decline in placements from August, 1939, was due to a decrease in the highway division of construction and maintenance, as very little work of this kind is now being undertaken. This loss was partly offset by gains in all other groups, the largest being in the building division of construction and maintenance, with somewhat smaller increases in services, trade and manufacturing. Industrial divisions in which most of the placements were effected during the month were manufacturing 68; construction and maintenance 359; trade 81 and services 687, of which 541 were of household workers. There were 329 men and 82 women placed in regular employment.

Quebec

There was an increase of nearly 12 per cent in the number of positions offered through employment offices in the Province of Quebec during August when compared with the preceding month and of nearly 66 per cent in comparison with the corresponding month of last year. Placements were nearly 1 per cent fewer than in July, but over 55 per cent above August, 1939. All industrial divisions participated in the increase in placements over August of last year, the most important gains being in logging, transportation, services and manufacturing. Placements by industrial divisions included manufacturing 807; logging 1,661; farming 153; transportation 935; construction and maintenance 3,068 and services 3,876, of which 3,375 were of household workers. Placements in regular employment numbered 5,687 of men and 2,083 of women.

Ontario

During August, orders received at employment offices in Ontario called for 10 per cent fewer workers than in the preceding month, but 54 per cent more than during the corresponding month of last year. There was a decrease of nearly 7 per cent in placements when compared with July, but an increase of nearly 50 per cent in comparison with August, 1939. Increased placements were recorded in all industrial divisions during the month under review when compared with the corresponding month of 1939, the most important gains being in construction and maintenance and manufacturing, with somewhat smaller advances in services, farming, logging and trade. Placements by industrial divisions included manufacturing 2,405; logging 787; farming 2,762; mining 186; transportation 252; construction and maintenance 7,700; trade 445 and services 4,265; of which 2,392 were of household workers. During the month 12,157 men and 1,707 women were placed in regular employment.

* 129 Placements effected by offices now closed

Manitoba

Opportunities for employment, as indicated by orders received at employment offices in Manitoba during August were over 72 per cent better than in the preceding month, but nearly 34 per cent less favourable than in the corresponding month of last year. There was an increase of over 69 per cent in placements when compared with July, but a decrease of over 33 per cent in comparison with August, 1939. The decline in placements from August of last year was entirely due to the curtailment of work in the highway division of construction and maintenance, as small gains in farming and manufacturing were offset by reductions in logging and services. Small changes only were reported in all other groups. Industrial divisions in which most of the placements were effected during the month were manufacturing 131; farming 3,489; construction and maintenance 519 and services 775, of which 578 were of household workers. There were 4,118 men and 299 women placed in regular employment.

Saskatchewan

Orders received at employment offices in Saskatchewan during August called for 115 per cent more workers than in the preceding month, but over 33 per cent fewer than during the corresponding month of last year. Similar percentages of change were reported in placements under both comparisons. Farm placements were considerably fewer than in August, 1939, and there was a fairly substantial decline in construction and maintenance, but moderate gains were reported in services, trade and transportation. The changes in all other groups were unimportant. Placements by industrial divisions included farming 2,592; transportation 73; construction and maintenance 457; trade 112 and services 971, of which 632 were of household workers. During the month 3,120 men and 487 women were placed in regular employment.

Alberta

There was a gain of nearly 76 per cent in the number of positions offered in employment offices in Alberta when compared with the preceding month and of 23 per cent in comparison with the corresponding month of last year. There were increases also in placements of nearly 75 per cent when compared with July and of over 20 per cent in comparison with August, 1939. An increase in the building division of construction and maintenance due to work on National Defence projects accounted for the gain in placements over August of last year, although placements were also higher in services, manufacturing, transportation and mining. The increases in the four latter groups, however, were offset by a substantial decline in logging and a smaller loss in farming. Placements by industrial divisions included manufacturing 138; logging 133; farming 1,728; construction and maintenance 799 and services 713, of which 511 were of household workers. Placements in regular employment numbered 2,779 of men and 412 of women.

British Columbia

Employment opportunities, as indicated by orders received at employment offices in British Columbia during August were over 5 per cent better than in the preceding month and also in the corresponding month of last year. Placements also were about 5 per cent higher under both comparisons. When comparing placements by industrial divisions with August of last year the most important gains were in services and manufacturing and the largest loss in construction and maintenance. There was, however, a more moderate decline in logging, while trade and transportation showed minor improvement and there was a small reduction in farm placements. Placements by industrial divisions included manufacturing 454; logging 121; farming 158; construction and maintenance 1,601 and services 1,182, of which 789 were of household workers. During the month 1,415 men and 427 women were placed in regular employment.

Movement of Labour

During the month of August, 1940, the offices of the Employment Service of Canada effected 38,161 placements in regular employment, 13,806 of which were of persons for whom the employment found was outside the immediate district of the offices at which they were registered. Of the latter, 694 were granted the Employment Service reduced transportation rate, 530 proceeding to centres within the same province as the despatching office and 164 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Offices in Quebec during August issued 146 certificates for reduced transportation, all to points outside the province. From Hull the movement was entirely of bushworkers, 103 going to Sudbury, 15 to Port Arthur and 7 to Pembroke. The Rouyn office was instru-

mental in the despatch of 21 carpenters to North Bay. Taking advantage of the reduced rate in Ontario during August 428 persons went to provincial employment The Port Arthur office transferred 139 bush workers, 63 building construction workers for National Defence projects, one sawmill labourer and one cook within its own zone. In addition, the Port Arthur zone received 35 bushmen from Ottawa and 9 bushmen from Sudbury. For points within their respective zones also, the Sudbury office transferred 83 bush workers and the Fort William office 80 bush workers and one housekeeper. From Toronto 13 construction workers went to Parry Sound and one hotel porter to Kingston. The Niagara Falls zone was the destination of one aircraft machinist travelling from North Bay and the Hamilton zone of one saw filer sent from Pembroke. In Manitoba during August, 17 workers profited by the reduced transportation rate, one of whom travelled to a provincial situation and 16 outside the province. The former, a farm hand, was conveyed from Winnipeg to a point within the same zone. The interprovincial movement was also from Winnipeg and included 5 sawmill labourers, 3 restaurant workers, 4 mine cookees, 2 bricklayers, one boilermaker and one coppersmith bound for the Port Arthur zone. One transfer only was effected in Saskatchewan during August, which was of a coppersmith transported from Regina to Port Arthur. Reduced rate certificates issued in Alberta during August numbered 81, of which 80 were provincial and one interprovincial. The latter was of a boilermaker conveyed from Calgary to Port Arthur. Provincially the Edmonton office despatched 17 bush workers, 15 mine workers, 5 fish company employees, 4 sawmill workers, 4 carpenters, 2 hotel employees, one labourer and one construction cook to various sections of the same zone. In addition, from Edmonton 27 carpenters went to Calgary and one carpenter to Medicine Hat. Journeying from Calgary 2 farm hands and one cook were destined to employment at centres within the Calgary zone. Transfers at the reduced rate in British Columbia during August were entirely provincial and totalled 21. Proceeding from Prince George 15 carpenters went to Prince Rupert, while from New Westminster 2 apple packers were despatched to Penticton and from Vancouver 3 miners and one cook were bound for employment within the Vancouver zone.

Of the 694 persons who benefited by the Employment Service reduced rate during August 181 were conveyed by the Canadian National Railways, 491 by the Canadian Pacific Railway, 21 by the Temiskaming and Northern Ontario Railway and one by the Northern Alberta Railway.

In order to facilitate the movement of harvest labour within the Prairie Provinces there was in addition to the 2·5 cent rate referred to in the above, a special harvest rate afforded by the railway companies, becoming effective on August 1 this year and terminating October 15. Under this arrangement the railway companies granted a special rate of 1·5 cents per mile to all applicants upon presentation of a certificate supplied by the offices of the Employment Service in Manitoba and Alberta, the movement of labour being confined entirely to regions within their respective provinces. Transferred under this plan during August were 154 harvest workers in Manitoba and 229 in Alberta, a total of 383, of whom 148 travelled over the Canadian National Railways and 235 over the Canadian Pacific Railway.

(4) Building Permits Issued in Canada during August, 1940

The August report of building permits compiled by the Dominion Bureau of Statistics, includes returns from 152 of the 204 municipalities in Canada which have systems for issuing such permits and of this number 142 reported detailed operations. The remaining 10 advised that no permits had been issued during the month of August while 52 municipalities had failed to report at the close of September 10.

The total value of permits reported as issued in the month of August is $10,103,306. Revised values for the month of July include returns from 189 municipalities and aggregate $11,145,709. Reports were received from 50 of the original 58 municipalities and show a value of $6,819,076 for the last month. The corresponding revised value for July includes 56 returns and is $8,089,916, while the July, 1939, value was $6,178,212.

The total value of permits issued by all municipalities during the eight elapsed months of the current year is $68,550,380. The value for the 58 municipalities for the same period is $49,291,987, while their corresponding value in 1939 was $39,807,093.

During the month of August new construction of all types amounted to 72·5 per cent of the total value, while the percentage of new residential construction was 40·0.

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF SEPTEMBER, 1940

Reports of Superintendents of the Employment Service of Canada

THE employment situation at the end of September, 1940, was reported by the Superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busy harvesting late crops. Heavy destruction to produce in general was reported from the Miramichi valley, owing to a storm which wrought havoc there, much grain and many root crops having been lost. Blueberries were abundant and all markets were well supplied with various types of vegetables, fruit and poultry. Fishing, also, had been hampered by storms and catches were light, lobster fishermen in particular having suffered most, as many of their traps had been carried out to sea. In logging there was little change, some enquiries having been made for pulpwood cutters; storm damage had been reported by contractors in this industry too, for lumber had drifted great distances from landings and this necessitated the sending out of men to sack the shores. Mines in the New Glasgow area operated 5 and 6 days per week, while those in Cape Breton and vicinity worked 5 days. Manufacturing concerns were fully employed, steel plants being especially busy. At Saint John, 80 boys, who recently had completed work in classes designed to train them in trades connected with war industries, had already been placed in employment, the majority with a large airplane manufacturing concern. The R.C.A.F. also had a number of boys training for ground trades of the air service. Little new construction was under way, although contracts had been let for

extensive work at Saint John, which was expected to start shortly. National Defence projects were progressing steadily. Little highway work was reported. Transportation was very brisk and trade was good. In the Women's Division the call for domestics greatly exceeded the supply.

Fewer farm vacancies were listed in the Province of Quebec, as nearly all crops had been harvested, but lumbering was very active. At La Tuque over 2,000 woodsmen had been hired by various companies and it was impossible to fill all orders. Chicoutimi and Hull, likewise, recorded improvement and at Matane numerous requests had been received for bushmen, but applicants were scarce. Nearly all shops and manufacturing plants were operating at full capacity and in some centres were running day and night shifts. Experienced labour was in great demand, particularly at Montreal and the number of employees in iron, cotton and wool industries at Sherbrooke was increasing. Great activity continued in building, owing to National Defence projects, as well as the construction of reservoirs, dams, power stations, etc., and few skilled tradesmen were idle. Transportation was active and trade was good. Numerous calls also were listed for female household help, many of which were not filled owing to dearth of suitable applicants.

Although the demand for farm help in Ontario was not so great, there was still some harvesting and corn cutting to be done and fruit to be picked. A few men also had been requested for the winter season, but experienced farm hands were scarce. Some boys had responded to the call for help and had assisted in the fields for short periods. Logging camps were increasing steadily and experienced men were easily placed. Where there was a lack of suitable applicants it was attributable, in part, to distance involved and the dislike of the 16-foot pulp. Mining was steady, with no shortage of employable men available. Nearly all manufacturing industries were working on full schedules. Canning factories were at their peak and wineries had started pressing. Firms handling war orders gave satisfactory reports of labour conditions and where special types of mechanics were requested and were not available locally these were secured from outside points. Sugar companies at Chatham were opening for sugar beet delivery on September 30 and would start operating a few days later. The crop was good and would last, approximately, until Christmas. Printing plants, auto factories, food concerns and nearly all textile mills were busy, but several box factories were slack. Some female candy workers also had found employment, replacing men who had enlisted, or boys called up for military training, while other women sought work in munition factories, some of which are not yet open. Building continued active, for besides National Defence projects, which absorbed numerous skilled tradesmen, many alteration, extension and repair jobs were under way. Good weather had also made it possible for outside construction to proceed swiftly and considerable overtime was in evidence on airports. There were few calls for highway labour and contractors had all necessary help and were rapidly finishing roads under construction. Several railway maintenance gangs also had finished for the season, but many running crews had resumed work, although the fall rush might not be so heavy as in previous years. Trade was brisk. A heavy demand continued for domestic help of all classes, particularly those with experience and capable of taking charge, but many applicants preferred hotel, store, muntions or factory employment, the latter being more readily available than formerly. A marked improvement was also noted in positions offered for office workers.

Harvesting in Manitoba and Saskatchewan was nearing the end, but in Alberta only about 60 per cent completed, as rains had delayed operations. At Lethbridge, the sugar beet harvest was well under way and estimates given stated that the 1940 sugar crop was expected to reach 90,000,000 pounds. Labour was plentiful, both for field work and factories, about 3,000 men being employed in the former and 500 or 600 men in the latter group. In the vicinity of Winnipeg, however, the beet yield was light and reflected adverse conditions during the thinning and hoeing period. Logging was fair, with indications pointing to a busy season and sawmills were running steadily. Mining was quiet, but manufacturing industries were working well. Building was very active, due to National Defence projects, such as hutments and airport construction; the completion of some projects, however, had been held back through lack of material. Increased activity was noted in the drilling of new wells and the shipment of crude oil had been heavy, a record yield in this product being expected in Alberta for 1940, as during the first eight months of this year 5,279,235 barrels of oil had been produced. Transportation was active and railways were still sending out extra gangs. Trade was fair, but collections were slow. City domestics were greatly in demand, with experienced applicants difficult to obtain; country work was slacker.

Farming was quiet in British Columbia. Apple picking, however, was general and packing houses were working to capacity. The movement of labour in logging was normal and sawmills, shook mills and box factories

were operating with full crews. Salmon fishing of all types, including trolling, had closed in some areas, while remaining open in others, but recent landings, particularly of halibut, had been lighter than usual. Mining was fair. Building construction was very active, National Defence projects providing the major portion of work in that line. All shipyards were busy and there was still a demand for experienced ships' platers and coppersmiths at Vancouver. Longshore work at all points also had been plentiful and, at Prince Rupert, extra men had been engaged to cope with the increased activity occasioned by the arrival of loads of halibut and salmon for transhipment by rail. Trade was fair. Enquiries for household domestics continued, but there existed the usual shortage of capable cooks-general.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

(At the time of going to press, information concerning the employment situation in Great Britain had not been received. Consequently, and in order to maintain the continuity of the record, United Kingdom employment figures for two months will be given in this article in the next issue of the LABOUR GAZETTE.*)*

United States

Miss Frances Perkins, United States Secretary of Labor, reported in a press release issued on September 25, that total non-agricultural employment in August, 1940, had topped all preceding August levels since 1929, with the single exception of August, 1937. The increase of over 430,000 workers in non-agricultural occupations from July to August brought the August, 1940, employment to nearly 36,000,000, an increase of 1,130,000 over a year ago, the report stated.

The following paragraphs taken from the official report indicate the employment situation in the United States to be as follows:

The gains in factory employment and pay rolls were widespread, 75 of the 90 manufacturing industries surveyed reporting increased employment and 80 reporting larger pay rolls. Total factory employment rose 4 per cent, indicating the return of 310,000 workers to jobs, more than double the usual seasonal gain. Weekly factory pay rolls were 7·5 per cent or more than $13,600,000 greater than in the preceding month. The usual July-August increases are 1·8 per cent in employment and 3·1 per cent in pay rolls.

Employment expansion in National Defence Industries.—As in the immediately preceding months, expansion in industries manufacturing materials for national defence continued to highlight the employment picture. New highs in employment were registered in shipbuilding, aircraft, engines, aluminum manufactures, machine tools, and explosives. Estimated employment in these industries in August, 1940, and the gains over the month interval and in comparison with 1937, the most recent year of peak employment, were as follows:

Industry	Estimated number of wage earners August 1940	Gains in aggregate employment between July 1940 and August 1940	Gains in aggregate employment between Average 1937 and August 1940
Shipbuilding	98,000	5,500	35,700
Aircraft	80,400	4,700	56,400
Engines	55,800	2,400	22,900
Aluminum manufactures	28,600	900	4,900
Machine tools	67,300	700	20,100
Explosives	8,300	500	2,900

Manufacturing and Factory Employment.—Other manufacturing industries stimulated directly or indirectly by war orders and in which large employment gains were shown included: steel, 12,600; sawmills, 10,500; foundries, 9,900; men's clothing, 8,400; electrical machinery, 7,100; and woollen and worsted goods, 6,600. Canning and preserving firms showed a seasonal employment increase of 60,700 wage earners and women's clothing factories, a seasonal gain of 33,500. Factories manufacturing automobiles and automobile parts expanded their forces by 21,800 workers, reflecting the production of new models. The meat packing industry reported a larger-than-seasonal lay-off of 5,600 workers and the baking industry, a reduction of 1,000 workers.

In addition to the substantial gain in factory employment, more than 40,000 additional workers were employed on Federal and private construction projects in August. In the field of transportation and public utilities, about 17,000 workers were added and in the group of mining industries a net gain of 8,000 workers was shown. Employment in the Federal, State, and local government service increased by 50,000. In wholesale and retail trade combined, employment declined by about 4,000, reflecting the mid-summer recession in retail-trade activity. Wholesale trade firms reported a small seasonal gain. In the group of financial and service industries, a loss of approximately 5,000 workers was shown between July and August.

Employment in Mines.—The net gain of 8,000 workers in the group of mining industries was due largely to the employment gain of 2·0 per cent in bituminous coal mines, which also reported an increase in pay rolls of 10·8 per cent, stepping up production in response to increased industrial demand. In anthracite coal mining, an employment decline of 1 per cent was accompanied by a pay-roll loss of 9·3 per cent which reflected decreased production, due in part to the observance of a religious holiday during the first half of August. Metal mines reported employment and pay-roll gains of 0·7 per cent and 8·5 per cent which raised the levels of this industry to the highest point since November, 1937. Quarries increased their working forces by 1·4 per cent while oil wells curtailed employment by 0·5 per cent.

Public Utilities.—In the public utilities, slight employment declines in telephone and telegraph and street railways and buses were offset by an employment gain of 0·7 per cent in electric light and power which was accompanied by a pay-roll increase of 1·7 per cent.

Employment on Public Works.—The accelerated pace of the national defense program was reflected in employment figures on construction projects financed by regular Federal appropriations. Large gains on the construction of naval vessels and public roads together with appreciable increases on many other types of projects brought the number of workers employed up to 335,000 for the month ending August 15. Pay-roll disbursements amounted to $37,936,000.

In the month ending August 15, only 60,000 men were working on construction projects financed by the Public Works Administration. Pay rolls were $6,093,000. Employment on low-rent projects of the United States Housing Authority showed a gain of about 500 during the same period. Preliminary figures indicate that employment on State-financed road projects increased 11,000 in August, bringing the number of workers up to 209,000.

Increased non-agricultural employment was felt on work relief projects of the Work Projects Administration where the number of persons at work decreased 4,000 in August. Pay-roll disbursements to the 1,647,000 workers on these projects totalled $94,580,000, Employment on Federal Agency projects under the Work Projects Administration fell from 108,000 in July to 71,000 in August.

The National Youth Administration furnished employment to an additional 52,000 persons on the out-of-school work program in August.

Employment in camps of the Civilian Conservation Corps rose from 317,000 in July to 325,000 in August. Pay rolls for the month were $14,381,000.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the Labour Gazette for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair

Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935", which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages:

The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for government supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

War Contracts

All contracts awarded by the Department of Munitions and Supply are subject to labour conditions for the protection of the workpeople concerned.

In the case of building and construction contracts, the labour conditions included fair wages schedules based on the rates current in the particular district where the work is being performed, and provide that the working hours shall not exceed eight per day and forty-four per week.

In the case of contracts for the manufacture and overhaul of aircraft, the labour conditions include one scale of minimum wage rates which has been approved for all work of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and a separate and higher scale for all such contracts undertaken in Western Canada (comprising the area from Fort William to the Pacific Coast). These contracts are subject also to a working week of not more than forty-eight hours, provision being made that any necessary and authorized overtime work shall be paid for at a rate of not less than one and one-half times the regular rate.

Contracts for shipbuilding and repair are all subject to labour conditions including fair wages schedules based on the rates current in the district where the work is being executed. Provision is made for the observance of working hours of not more than forty-eight per week and for a wage rate of not less than one and one-half times the regular rate for any overtime that is necessary and authorized by the Dominion Government inspector in the plant.

Contracts for the manufacture of equipment and supplies for the defence forces are subject to the "B" labour conditions of the Fair Wages Order in Council referred to in the introduction to this article.

As complete lists of the contracts awarded by the Department of Munitions and Supply are being issued weekly through the office of the Director of Public Information, and are being published in the press, this information will not be duplicated here. Particulars of the contracts which have been awarded recently by various other departments of the Government of Canada, however, appear hereunder:—

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note.—The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

Department of Transport

Erection of administration building at the airport at Windsor, Ont. Name of contractors, Dinsmore-McIntire Ltd., Windsor, Ont. Date of contract, August 27, 1940. Amount of contract, $26,627.86. A fair wages schedule was included in the contract as follows:—

	Per hour
Bricklayers	$1.15
Bricklayers' helpers (mixing and tempering mortar)	0 55
Carpenters and joiners	0 95
Cement finishers	0 65
Cement and concrete mixer operators:	
Steam	0 80
Gas or electric	0 60
Drivers	0 55
Driver, horse and cart	0 65
Driver, team and wagon	0 90
Electricians (inside wiremen)	1 15
Labourers	0 55
Lathers—metal	0 80
Linoleum layers	0 60
Motor truck drivers	0 55
Motor truck driver and truck	1 55
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 55
Plumbers and steamfitters	1 00
Roofers—felt and gravel; patent; composition	0 55
Roofers—sheet metal	0 85
Rodmen—reinforced steel	0 60
Sheet metal workers	0 85
Watchmen	0 40
Waxers and polishers (floor)	0 55

Development of aerodrome at Cap de la Madeleine, P.Q. Name of contractors, E. Massicotte & Fils, Cap de la Madeleine, P.Q. Date of contract, August 31, 1940. Amount of contract, $58,108.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Drivers	0 40
Drivers, horse and cart	0 50
Drivers, team and wagon	0 60
Labourers	0 40
Motor truck drivers	0 45
Motor truck drivers and trucks	1 40
Road grader operators (horse drawn)	0 45
Road grader operators (including team)	0 65
Road grader operators (gasoline)	0 45
Tractor operators	0 45
Watchmen	0 35

Construction of water supply works at aerodrome at Jarvis, Ont. Name of contractors, The Grant Contracting Co., Ltd., Toronto, Ont. Date of contract, August 10, 1940. Amount of contract, $21,695. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Compressor operators—gas or elec.	0 50
Cement finishers	0 60
Cement and concrete mixer operators—	
Steam	0 65
Gasoline or electric	0 50
	Per day
*Divers	14 00
*Divers' tenders	5 00
	Per hour
Drivers	0 40
Driver, team and wagon	0 75
Driver, horse and cart	0 55
Drill runners	0 50
Electricians (inside wiremen)	0 70
Engineers, crane (steam, gas., elec.)	0 70
Firemen, stationary	0 45
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Painters and glaziers	0 60
Plumbers and steamfitters	0 75
Powdermen	0 50
Pumpmen	0 50
Riggers (general)	0 55
Shovel engineers—steam or gas.	1 00
Shovel cranemen	0 75
Steam shovel oilers	0 50
Steam shovel firemen	0 60
Trenching machine operator (gas.)	1 00
Watchmen	0 35

* Full day's pay to be allowed whether employed full or part time.

Development of aerodrome at Scoudouc, N.B. Name of contractors, Dexter Construction Co., Ltd., Fairville, N.B. Date of contract, September 3, 1940. Amount of contract, $242,652.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 50
Asphalt tampers, smoothers, spreaders	0 40
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Concrete mixer operators:	
Gas or elec.	0 45
Steam	0 60
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 40
Road grader operators:	
Horse drawn	0 40
Including team	0 70
Gas	0 45
Road roller operators (gas and steam)	0 60
Shovel operators (gas)	0 90
Steam shovel:	
Engineers	0 90
Cranemen	0 70
Firemen	0 55
Oilers	0 50
Tractor operators	0 45
Watchmen	0 30

Development of an aerodrome at Oberon, Man. Name of contractors, Baragar Bros., Elm Creek, Man. Date of contract, September 3, 1940. Amount of contract, $31,315. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 40
Drivers	0 35
Drivers, team and wagon	0 65
Labourers	0 35
Motor truck drivers	0 40
Motor truck drivers and truck	1 40
Road grader operators:	
Horse drawn	0 40
Including team	0 70
Gas	0 50
Tractor operators	0 45
Watchmen	0 30

Development of aerodrome at Mountain View, Ont. Name of contractors, H. J. McFarland Construction Co., Picton, Ont. Date of contract, September 5, 1940. Amount of contract, $175,157.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 60
Blacksmiths' helpers	0 45
Concrete mixer operators—gas. or elec.	0 50
Concrete mixer operators—steam	0 65
Drivers—team and wagon	0 75
Drivers	0 40
Labourers	0 40
Motor truck drivers	0 45
Motor truck and driver	1 45
Road grader operators—gas.	0 50

	Per hour
Road roller operators—gas. and steam	0 65
Shovel operators—gas.	1 00
Steam shovel:	
Engineers	1 00
Cranemen	0 75
Firemen	0 60
Oilers	0 50
Tractor operators	0 50
Watchmen	0 35

Additional development at the airport at Edmonton, Alta. Name of contractors, Crown Paving and Construction Co., Ltd., Edmonton, Alta. Date of contract, September 9, 1940. Amount of contract, $66,290. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 60
Asphalt tampers, smoothers, spreaders	0 50
Driver	0 45
Driver with team and wagon	0 75
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	0 50
Road grader operators (gas.)	0 60
Tractor operators	0 67½
Watchmen	0 40

Construction of cast iron pipe line for airport at Moose Jaw, Sask. Name of contractors, Bird Construction Co., Ltd., Regina, Sask. Date of contract, September 10, 1940. Amount of contract, $9,887.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 65
Blacksmiths' helpers	0 45
Carpenters and joiners	0 75
Cement finishers	0 60
Concrete mixer operators—gas. or elec.	0 50
Cement and concrete mixer operators—steam	0 70
Drivers	0 40

GROUP "B" CONTRACTS

Manufacture and Supply of Equipment, Supplies, Interior Fittings, Etc.

Note.—Each of the contracts noted under this heading contains the "B" Labour Conditions referred to in the introduction to this article.

Royal Canadian Mounted Police

Nature of Contract	Contractor
Brown drill	Dominion Textile Co., Ltd., Montreal, P.Q.
Brown serge trousers	S. Rubin, Limited, Sherbrooke, Que.
Blue cloth caps	The Hamilton Uniform Cap Co., Hamilton, Ont.
Wool cardigan jackets	Bates & Innes Ltd., Carleton Place, Ont.
Blue serge overalls	The Freedman Company, Montreal, Que.
Gymnasium shoes	Dominion Rubber Co., Ltd., Ottawa, Ont.
Blue web waist belts	Hugh Carson Co., Ltd., Ottawa, Ont.
Moccasins	Acme Glove Works, Ltd., Ottawa, Ont.
Blanket straps	J. E. Lortie Co., Ltd., Montreal, Que.
Batons	Hugh Carson Co., Ltd., Ottawa, Ont.

Post Office Department

Metal dating stamps & type cancellers, etc.	Pritchard-Andrews Co. Ltd., Ottawa, Ont.
Rubber stamps, daters, etc.	Pritchard-Andrews Co. Ltd., Ottawa, Ont.
Letter carriers' uniforms	Barrymore Cloth Co., Ltd., Toronto, Ont.
Letter carriers' uniforms	Jay Wolfe Inc., Montreal, P.Q.
Scales	Pritchard-Andrews Co. Ltd., Ottawa, Ont.
Satchels	Hugh Carson Co. Ltd., Ottawa, Ont.
Stamping machine parts, etc.	Machine Works Ltd., Montreal, P.Q.
Mail bag fittings	Northern Bolt, Screw & Wire Co., Ltd., Owen Sound, Ont.
Mail bag fittings	Vallance Broom Co., Ltd., Hamilton, Ont.
Mail bag fittings	D. K. McLaren, Ltd., Toronto, Ont.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Textiles and Clothing

St. Jerome, Quebec.—A Certain Knitting Mill Company and Le Syndicat Des Employés du Textile de Saint Jerome. (The Textile Employees Union of St. Jerome).

Agreement to be in effect from March 4, 1940, with wage adjustments retroactive to January 1, 1940, to be in effect to December 31, 1940, and thereafter from year to year, subject to notice.

The Company recognizes the union, which is composed only of employees of the company, with one exception. Employees are free to join or not to join the union.

Hours: 50 per week, except certain maintenance men at 55 hours, engineers, firemen and watchmen 72 hours, warehouse and shipping 49 hours.

Overtime: time and one fifth.

Hourly wage rates for some classes: worsted mill—spinning 24 and 26 cents, doffers 19 cents; woolen mill—mixing machine 31 cents, feeders (carding) 25 cents, spinning 32 cents; dyehouse—dyeing operators 22 to 38 cents; fulling 30, 33 and 48 cents; drying 25 to 30 cents; knitting and finishing—knitters 35 cents, sewing 22 to 32 cents, examining 22 and 25 cents, steaming and pressing 35 and 36 cents; weaving—22 to 35 cents, cloth finishing 25 to 40 cents. Night work is to be paid at 5 per cent over day rates.

The number of apprentices not to exceed 10 per cent of the total number of employees. The wage scale for apprentices is included, with a minimum of 13 cents per hour.

Seniority is recognized.

A joint committee to discuss all questions submitted to it and if unable to reach a settlement, a joint arbitration board to be formed whose decision will be final.

Montreal, Quebec.—Associated Clothing Manufacturers of the Province of Quebec, Inc. and the Montreal Joint Board, Amalgamated Clothing Workers of America (Men's and Boys Clothing Factory Workers).

This agreement which was in effect from July 1, 1938 to July 1, 1940, was renewed from September 24, 1940 to July 1, 1941, and thereafter from year to year, subject to notice.

Only members of the union to be employed, if available.

Overtime, that is work done before or after regular working hours to be paid at time and one half.

The manufacturers to have the privilege of developing workers through the apprenticeship system on a basis to be determined by representatives of the manufacturers and the union.

In slack seasons, equal division of work to be observed as far as possible.

All disputes and grievances which cannot be settled by the parties will be referred to the Impartial Chairman who is named in the agreement.

In the amendment renewing this agreement from September 24, 1940, provision is made for the setting up of committees as may be necessary to study the problems of the industry.

Montreal, Quebec.—Certain Manufacturers of Men's and Boys' Clothing and the Montreal Joint Board, Amalgamated Clothing Workers of America.

Agreements with certain clothing manufacturers not members of the employers' association were made on various dates between July 26 and August 6, 1940, all to be effective until July 1, 1941, and thereafter from year to year, subject to notice.

Only union members to be employed, if available. The employers to deduct union dues and assessments from the employees' wages and hand over to the union.

Overtime, that is work done before or after regular working hours, to be paid at time and one half.

Wage rates for time and piece work to be fixed by a representative of the union and the firms. The wage rates in effect at the time the agreement was made were not to be changed.

In slack seasons, equal division of work to prevail, as far as possible.

Disputes which cannot be settled between the parties will be referred to the Impartial Chairman.

Brockville, Ontario.—A certain Hat Manufacturing Establishment and the United Hatters, Cap and Millinery Workers, Local 74.

The agreement which came into effect May 16, 1938, was renewed with certain changes from May 1, 1939, and again with certain other changes from May 1, 1940 to April 30, 1941.

Neither the Company nor the employees to discriminate against any employee on account of membership or non-membership in the union or union activities. From May 1, 1939, under the provisions of the amended agreement it is provided that those then members of the union or all who later joined the union were to remain union members during the term of the agreement.

Hours for production workers: 45 per week, not more than 9 hours in any one day.

Overtime: on 15 days during each half year, overtime not exceeding 2 hours in any one day may be worked at regular rates; all other overtime for production workers to be paid at time and one third. From May 1, 1939, under the amended agreement it was provided that all overtime for production workers, including work on Saturdays, Sundays and seven holidays to be paid at time and one third. Under the 1940 amendment, work on the same seven holidays is to be paid at time and one half.

A schedule of piece rates forms part of the agreement. Any new rates are to be mutually

agreed on. Under the 1940 amendment, an increase of 5 per cent to be granted from May 1 to October 31, 1940, and wage rates to be reveiwed one week before October 31, 1940, to determine any adjustments required owing to war conditions.

Productive work is to be distributed as equally as possible among the workers.

A joint committee is to be set up for the settlement of questions of wages, prices and any disputes. Any matter which cannot be settled by this committee will be referred to arbitration.

Toronto and Hamilton, Ontario.—Associated Clothing Manufacturers and Other Manufacturers and the Amalgamated Clothing Workers of America.

Agreement to be in effect from May 1, 1940 to April 30, 1943, but either party may give notice 90 days before May 1 of any year requesting a change in wages.

The employers agree to operate preferential union shops, to apply to the union when requiring new workers. If no union members available others may be employed and the union will admit such new employees, if eligible.

Hours: 44 per week, either 8 per day and 4 on Saturdays, or 9 per day, 8 on Fridays and no work on Saturdays. At some time during the term of this agreement the employers agree to confer with other Canadian manufacturers on the question of reducing the hours to 40 per week.

Overtime: time and one half for all overtime and for work on federal legal holidays.

Wages are on a piece work basis. It is agreed that workers have the right to ask for wage increases to compensate for any increases in the cost of living, and in view of any such advances the manufacturers' assocation similarly may ask for decreases when cost of living is lower.

The manufacturers to have the privilege of developing workers through the apprenticeship system to be determined by the manufacturers and the union.

The employers and the union to co-operate in organizing an employment office.

During slack seasons, work to be divided as equally as possible.

For the settlement of disputes which cannot be settled by the shop steward or the union with the employers, a joint arbitration board to be selected with two representatives of each party and the fifth (the chairman) to be selected by both parties.

Winnipeg, Manitoba.—Certain Cap Manufacturers and the United Hatters, Cap and Millinery Workers Interational Union, Local 35.

Agreement to be in effect from August 19, 1939, to August 19, 1941, and renews the previous agreement which came into effect July 2, 1937.

Only union members to be employed, if available. If no members available, others employed are to join the union. The union undertook to organize the unorganized part of the industry. The parties to the agreement may use the union label.

Hours: from July 2, 1937 to December 31, 1937, 44 per week; from January 1, 1938, 42 per week. It was provided that in February, 1940, negotiations were to take place, and if necessary arbitration over the question of a 40 hour week, but in June, 1940, the hours were still 42 per week.

Overtime only permitted when all unemployed members of the union have been employed, and may never exceed 10 hours in any week, to be divided equally into the first four days of the week. The first four hours overtime in any week to be paid at regular rate and all other overtime at time and one quarter.

In the 1937 agreement, an increase of $1 per week for all employees was provided for. In the 1939 agreement, the parties agreed to negotiate individual increases for employees according to merit.

In slack season, the work in a shop to be divided as equally as possible.

Disputes are to be settled by a joint arbitration board.

Manufacturing: Pulp, Paper and Paper Products

Kenogami, Quebec.—Price Brothers and Company, Limited, and the Quebec Provincial Council of Paper Mill Unions, the International Brotherhood of Paper Makers (Local No. 50) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local No. 83).

Agreement covering the manufacture of groundwood and sulphite pulp and newsprint paper to be in effect from May 15, 1940 to May 15, 1941, and thereafter from year to year, subject to notice.

When hiring new employees, preference to be given to union members when available. Any others hired are to join one of the unions parties to the agreement. The company recognizes the unions as the sole agencies representing the employees for collective bargaining.

Hours: the normal operation of the mills to be six days per week, with 24 hours shutdown on Sunday; for day workers, regular hours 8 per day, and only necessary work to be done on Sundays; tour workers to be organized into shifts, the length of which will depend on local conditions.

Overtime: time and one half for all work between midnight Saturday and midnight Sunday or on the four holidays. Tour workers required to work longer than their regular tour hours to be paid straight time only for such time worked. In the general mill rules forming part of the agreement, time and one half is to be paid to all hourly paid day workers for all work over 8 hours in any one day. In a rider to the agreement, however, dated July 17, 1940, it is agreed that since due to war conditions making it difficult to secure qualified help in the mechanical and electrical trades, this time and one half payment for overtime on week days for day workers is suspended for the present, with further discussion to take place not later than November 1, 1940.

In promotions and in lay-offs, the management will take into consideration, first, ability and second, length of service. If necessary to materially curtail operations of the plant, the management will also consider the cases of employees with dependents, if capable and efficient, as against employees without dependents.

A mutual interest board to be formed for the regular discussion of employee welfare, apprentice system, etc.

Disputes which cannot be settled by the mill officials and the adjutsment committee will be referred to arbitration.

The schedule of wages forming part of the agreement is to remain in effect unless changed by mutual consent at a meeting called on 30 days' notice by either party.

Minimum hourly wage rates for a few classes: wood rooms—knife grinders 47 cents, sawyers 47 to 55 cents, labourers, chippers, etc. 45 cents; groundwood—decker man 52 cents, wet machine man 48 cents, screen man 45 cents; grinder room—grinder men 52 cents, oilers 54 and 57 cents, repairmen 62 to 73 cents, labourers, etc. 45 cents; sulphite—acidmakers 75 cents, cooks 96 cents, cooks' helpers 49 to 63 cents, blow pit men 55 cents, blow pit helpers 51 cents; paper mill beaters—beater engineers $1.08, beater tank men 62 cents, broke beater foreman 58 cents, broke beater helpers 47 cents; paper machine room—machine tenders $1.32 and $1.62, back tenders $1.15 and $1.44; third hands 90 cents and $1.09, fourth hands 68 and 74 cents, fifth hands 64 and 69 cents, sixth hands 55 cents, clothing man 75 cents, oilers 60 cents, paper testers 57 cents, finishers 57 and 59 cents, shippers 60 cents, coremakers 56 and 65 cents, core room 45 to 54 cents; cardboard mill and wrapper mill—beater engineer 65 cents, beater man 55 cents, machine tender $1, back tenders 75 cents, third hands 60 cents, fourth hands 56 cents, finishers and shippers 54 cents; steam plant—firemen 62 cents, repair man 70 cents, paper mill engineer 80 cents; electrical department—generator man 70 cents, motor men 65 cents, generator and motorman helpers 54 cents, repairman 50 to 74 cents, pumphouse operator 60 cents; yard and locomotive—locomotive engineer 83 cents, locomotive fireman 67 cents, brakemen 65 cents, conductor 79 cents, truck driver 57 cents, labourers 45 cents; repair crew—millwrights and carpenters 65 to 82 cents, millwright helpers 55 cents, machinists and tinsmiths 50 to 95 cents, machinist helpers 36 to 45 cents, pipers 50 to 82 cents, blacksmiths 82 cents, blacksmith helpers 54 cents, pattern makers 72 and 82 cents, moulders 55 to 72 cents, painters 55 to 66 cents, general labour 47 and 50 cents; apprentices from 20 cents during first six months to 35 cents during fourth six months and thereafter according to occupation.

Riverbend, Quebec.—Price Brothers and Company, Limited, and the Quebec Provincial Council of Paper Mill Unions, the International Brotherhood of Paper Makers (Local No. 246) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local 398).

Agreement, covering the manufacture of groundwood and sulphite pulp and newsprint paper, to be in effect from May 15, 1940, to May 15, 1941, and thereafter from year to year, subject to notice.

This agreement including a rider of July 17, 1940, *re* overtime, is similar to the agreement between the company and the unions at Kenogami, as summarized above, except for the wage scale in some classes.

Minimum hourly wage rates for a few classes: wood room—knife grinders 47 cents, sawyers 47 to 55 cents, labourers, etc. 45 cents; groundwood—grinderman 52 cents, decker man 49 cents, screen man 52 cents; sulphite—digester cooks 96 cents, cooks' helpers 52 and 63 cents, acid makers 75 cents, blow pit men 55 cents, blow pit helpers and labourers 45 cents; sulphite wet machine operators 48 cents; paper mill—beater engineers 98 cents, beatermen 47 cents, machine tenders $1.62, back tenders $1.44, third hands $1.09, fourth hands 74 cents, fifth hands 69 cents, sixth hands 55 cents, clothing man 66 cents, paper testers 57 cents, finishers 59 cents, shippers 59 cents, core foreman 62 cents, core room helpers 47 cents; mechanical—carpenters 52 to 64 cents, millwrights 49 to 83 cents, repairmen 45 and 70 cents, machinists 52 to 82 cents, pipefitters 56 to 73 cents, pipefitters' helpers 47 and 50 cents, blacksmith 70 cents, painters 58 cents, pump men 67 and 72 cents, oilers 52 to 60 cents, labourers 45 cents; steam plant—fireman and electric boiler operators 62 cents, cleaners 45 cents; electricians 62 to 80 cents, pumphouse operators 52 cents; pulp testers 52 cents; yard labourers 45 cents.

Jonquiere, Quebec.—Price Brothers and Company, Limited and the Quebec Provincial Council of Paper Mill Unions, the International Brotherhood of Paper Makers (Local 143) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local 93).

Agreement covering the manufacture of groundwood, boxboard and specialties, to be in effect from May 15, 1940, to May 15, 1941 and thereafter from year to year, subject to notice.

This agreement, including the rider *re* suspension of extra pay for overtime on week days, is similar to the agreement summarized above between the Company and the unions at Kenogami, with the exception of the wage scale.

Hourly wage rates for a few classes: wood room—knife grinder 49 cents, sawyer 49 cents, barkers 45 cents; groundwood—grindermen 52 cents; machine room—machine tenders 98 cents, back tenders 79 cents, third hands 70 cents, reel tenders 63 cents, fourth hands 63 cents, fifth hands 47 cents, oilers 57 cents; beater room—beater men 54 cents, cleaners 47 cents; bleach plant—operators 63 cents, helpers 50 cents; pulp lapping and storing—wet press operators 48 cents, scalers 53 cents, pulp handlers 45 cents; finishing—finishers 51 to 57 cents, finishers' assistants 48 cents; shippers 55 cents; mechanical—blacksmith 77 cents, patternmaker 79 cents, machinists 76 and 79 cents, pipefitters 58 cents, millwrights 69 to 80 cents; electricians 80 cents, motormen 75 cents, steam plant firemen 58 to 71 cents; pulp testers 52 cents; labourers 45 cents.

Three Rivers, Quebec.—St. Lawrence Paper Mills Company Limited and the International Brotherhood of Paper Makers and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local No. 136).

Agreement to be in effect from May 1, 1940 to April 30, 1941, and thereafter from year to year, subject to notice.

This agreement is the same as the one previously in effect and summarized in the Labour Gazette, July, 1937, page 813, with the exception of the wage schedule.

Wages per hour for certain classes of work: machine room—machine tenders $1 to $1.40, back tenders 90 cents to $1.23, third hands 75 to 94 cents, fourth hands 64 cents, fifth hands 60 cents, sixth hands 46 and 48 cents, clothing men 49 to 55 cents, rewinder men 60 cents, rewinder helpers 53 cents, oilers 55 cents, millwrights 79 cents, piper 71 cents, machine operators 79 and 84 cents, beater men 45 cents; sulphite mill—cooks 91 cents, cooks' helper 58 cents, blow pit men 48 cents, piper 71 cents; grinder room—grindermen 50 cents, millwrights 69 cents, oilers 53 cents; screen room—mixermen 63 cents; boiler house—engineers 74 cents, firemen 63 cents, metermen 58 cents; electricians 74 and 79 cents, electricians' helpers 46 to 60 cents; yard—truck driver 48 cents, labourers 45 cents; wood handling—chipper men 46 cents, millwright 69 cents, conveyor men 45 cents; wood pile—wood handlers 45 cents; sulphite testers 53 cents, laboratory helpers 52 cents; pipers 71 cents; millwrights 47 to 74 cents, pump men 55 and 60 cents; machinists 52 to 73 cents, blacksmith 75 cents; painters 48 and 53 cents; tinsmiths 65 cents; lapping—wet machine operators 45 cents, truckers 45 cents.

Temiskaming, Three Rivers and Gatineau, Quebec.—Canadian International Paper Company, International Fibre Board Limited, Masonite Company of Canada Limited and the Quebec Provincial Council of Paper Mill Unions, the International Brotherhood of Paper Makers (Locals No. 163 at Three Rivers and No. 251 at Gatineau) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Locals No. 163 at Three Rivers, No. 233 at Temiskaming and No. 142 at Gatineau).

This agreement is similar to the agreement previously in effect and summarized in the Labour Gazette, November, 1938, page 1294, with this exception:

When men are being employed, preference will be given to former employees, considering their record while in the company's employ.

The mill rules and wage scales have been received in the Department of Labour only for the Temiskaming mill and the Three Rivers mill.

Temiskaming Mill

Hours: 8 per day for both day workers and tour workers.

Overtime for day workers: for inside day workers, time and one half for all work over 8 hours in any one week day; for outside day workers, time and one half for all work in excess of 10 hours in any one week day. For all hourly paid employees, time and one half for all work between midnight Saturday and midnight Sunday and for work on four specified holidays.

Hourly wage rates for some classes at Temiskaming: filter plant—screen men 46 cents; boiler house—engine men 73 cents, firemen 63 cents, repairman 68 cents, ashmen 45 cents; woodroom—runners 65 cents, grinder 50 cents, repairman 66 cents, oiler 48 cents, others 46 cents; wood handling—crane operators 76 cents, locomotive engineers 65 cents, brakemen 56 cents, others 45 to 48 cents; acid plant—acid makers 78 cents, refrigerator operators 65 cents, others 46 to 51 cents; digesters—first cooks $1, second cooks 70 cents, helpers 54 and 56 cents, testers 51 cents; preparing—stock runners 60 cents, pit men 50 cents, screen men 46 cents; bleaching—runners 62 and 77 cents, screenmen 46 cents, bleach mixer 59 cents; electrolytic—bleach makers 68 cents, repairman 63 cents; dry machines—machine tenders 83, 98 and $1; back tenders 62, 69 and 72 cents, pressmen and dry truckers 49 cents; shipping—head checkers 60 cents, truckers and sample cutters 49 cents; yard—truckers 54 and 60 cents, labourers 45 cents; screenings—stock runners 54 cents, loaders and cutters 46 cents; electricians and armature winders 70 to 76 cents; repairmen 54 to 91 cents.

Three Rivers mill

Hours: 8 per day for both day workers and tour workers.

Overtime for day workers is to be paid at time and one half with these exceptions: employees engaged in wood handling, bark burning plant, wood room, slasher mill and chip operation, employees engaged in boat loading and unloading operations including paper handling and warehouse, employees engaged in outdoor miscellaneous occupations including coal handling, townsite work and truck drivers. For all these excepted occupations, time and one half is payable only after 10 hours work in any day. Time and one half for all work on Sundays and three specified holidays.

Hourly wage rates for some classes: wood handling—wood handlers 45 and 46 cents, sawyers 48 cents, crane operator 76 cents; chipper man 45 cents; grinder man 54 cents; groundwood screenman 57 cents, deckerman 49 cents; acid maker 78 cents; digesters—cook 84 cents, cooks' helpers 50 and 63 cents, blow pit man 50 cents; sulphite screenman 54 cents; sulphite pressman 49 and 50 cents; beaterman 49 cents; paper machines—machines tenders $1.39 to $1.47, back tenders $1.23 to $1.29, third hand 95 to 99 cents, fourth hand 68 to 69 cents, fifth hand 62 to 63 cents, oiler 57 cents, clothing man 72 to 99 cents; wrapper machines—machine tender 90 cents, second hand 71 cents, third hand 65 cents; finishing—roll finisher 47 and 50 cents, rewinder man 52 to 61 cents, labourers 45 and 46 cents; paper loaders 47 and 50 cents, truck operators 49 and 52 cents; power plant (steam)—electric boiler operator 51 to 57 cents, firemen 51 cents; power plant (electric)—motor man 53 to 55 cents, electric operators 76 and 79 cents; repairman 54 and 79 cents.

Collective Labour Agreements Act, Quebec

The following agreements, amendments and corrections to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:—

Bakers, Granby (amendment).

Dress Manufacturing Industry, Province of Quebec.

Furniture Industry, Province of Quebec (amendment).

Building Trades, Quebec (correction).

Longshoremen (ocean navigation), Montreal.

Retail Stores, Quebec.

Clerks and Accountants, Jonquiere, Kenogami, Arvida and St. Joseph d'Alma (amendment).

Civic Employees (outside services), Quebec. (amendment).

Garages and Service Stations, Quebec (amendment).

Barbers and Hairdressers, Three Rivers (amendment).
Barbers and Hairdressers, St. Hyacinthe, Drummondville, Granby and Sorel (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Order in Council and is summarized in a special article on page 1077.

Ontario

Carpenters, St. Catharines.
Barbers, Paris.

Saskatchewan

Carpenters, Regina (amendment).
Electrical Workers, Regina (amendment).
Plumbers, Regina (amendment).
Sheet Metal Workers, Regina (amendment).
Garages and Service Stations, Moose Jaw.

COLLECTIVE AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Agreements Act was assented to June 22, 1940, and was summarized in the Labour Gazette, August, 1940, page 812. It replaces the Collective Labour Agreements Act, 1938. Agreements and regulations under the "Collective Labour Agreements Act," the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act made obligatory on all employers and employees in the trade, industry, commerce or occupation throughout the province or within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date the Order in Council is adopted. The Order in Council may be amended or revoked by a further Order in Council on the recommendation of the Minister of Labour after consulting the parties to the agreement and after the required notice has been published in the *Quebec Official Gazette*. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement and such bylaws must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues from May, 1938, to July, 1940. Proceedings under the Collective Agreements Act are noted in the issues beginning August 1940.

Recent proceedings under the Act include the extension of three new agreements, the correction of two agreements and the amendment of seven agreements, all of which are noted below. Requests for the extension of new agreements were published in the *Quebec Official Gazette* as follows: an agreement affecting the fur manufacturing industry (retail) at Quebec in the issue of September 14; the street railway employees at Montreal in the issue of September 21; the pleating and embroidery workers at Montreal in the issue of September 28. Requests for the amendment of certain agreements were published in the *Quebec Official Gazette* as follows: building trades, St. Hyacinthe in the issues of September 7 and September 14; building trades, Joliette in the issue of September 14, the paper box (uncorrugated paper) industry, Province of Quebec, in the issue of September 21. In addition, Orders in Council were published in the *Quebec Official Gazette* during July approv-

ing or amending the constitution and bylaws of eleven joint committees, and others approving the levying of assessments by thirteen joint committees as listed below.

Manufacturing: Vegetable Foods

Bakers, Granby.—An Order in Council approved September 11 and published in the *Quebec Official Gazette,* September 21, amends the previous Order in Council for this trade (Labour Gazette, October, 1938, page 1170).

The second employee (helper) on a delivery is to be paid $6 per week during first year, $8 during second year and $10 during third year.

Employers must pay their employees for religious holidays and four other holidays.

Manufacturing: Textiles, Clothing, etc.

Dress Manufacturing Industry, Province of Quebec.—An Order in Council approved September 24 and published in the *Quebec Official Gazette,* September 28, makes obligatory the terms of an agreement between the Montreal Dress Manufacturers' Guild and the International Ladies Garment Workers Union, Local No. 205 (dress cutters) and No. 262 (dressmakers).

This Order in Council covers the manufacture of dresses, blouses, separate skirts, play clothes, aprons, dressing gowns (except of flannel, etc.), uniforms, etc. but does not include knitted garments, ski suits, windbreakers, nor small children's clothing. The Order in Council is to be in effect from September 28, 1940 to April 1, 1942, and thereafter from year to year, subject to notice.

The territorial jurisdiction comprises the whole Province of Quebec, Zone I being the Island of Montreal and within 20 miles of it and Zone II the rest of the Province.

Hours: 48 per week divided into 5½ working days. However, in shops where the 44 hour week is in effect by agreement these hours may not be increased.

Overtime: in shops where the 44 hour week is in force the first four hours overtime to be paid at regular rates. All other overtime to be paid at time and one half. Not more than two hours overtime in any one day nor eight hours in any one week may be worked.

No work on six specified holidays.

Minimum wages for a 48 hour week in Zone I: skilled cutters (grade 1) $34; skilled cutters (grade 2) $24.50; spreaders $12.50; operators $14.50; drapers $14; sample makers $14.50; finishers $12.75; examiners $12.50; folders $11; pressers' assistants $11; general hands $11; pressers (male) $22.65; pressers (female) $14. No piece work prices may be fixed which do not yield pay equal to the above minimum rates. A scale of minimum weekly rates higher than the above rates is included in the agreement. This higher wage scale would come into effect on condition that similar minimum rates and hours be established by law for the same industry for the Province of Ontario.

Minimum wage rates for a 48 hour week in Zone II are 10 per cent less than in Zone I.

Employers paying higher rates than the above may not reduce them. A joint committee may issue permits to employees whose production is deficient to work for less than these minimum rates.

Apprentices: shops employing seven or more cutters may employ one apprentice, to be paid from $7 per week during first six months to $20 during sixth six months. In all other crafts the number of apprentices in any shop shall not exceed fifteen per cent of the employees. Such apprentices to be paid from $7 per week during first six months to $11 during fourth six months.

No work shall be given to employees to be manufactured or worked upon at home.

Manufacturing: Miscellaneous Wood Products

Furniture Industry, Province of Quebec.—An Order in Council approved September 6 and published in the *Quebec Official Gazette,* September 14, amends the previous Orders in Council for this industry (Labour Gazette, December, 1937, page 1386, February, 1938, page 214, October, 1938, page 1170, January, 1940, page 69 and February, page 172). The period of the agreement is extended from September 1, 1940 to October 31, 1940.

Construction: Buildings and Construction

Building Trades, Quebec.—A correction of the Order in Council which was summarized in the Labour Gazette, June, 1940, page 608 was published in the *Quebec Official Gazette,* September 7, adding the municipality of Charlesbourg to Zone I.

Transportation and Public Utilities: Water Transportation

Longshoremen (Ocean Navigation), Montreal.—An Order in Council, approved September 11, and published in the *Quebec Official Gazette,* September 14, makes obligatory the terms of an agreement between certain steamship companies and the International Longshoremen's Association, Local 375.

The Order in Council, which covers work for all ocean steamships coming into the harbour of Montreal, is to be in effect from September 11, 1940, to December 31, 1940, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, December, 1938, page 1423, with certain exceptions:

Hours: both parties to endeavour to ensure that the average number of hours per week of the workers shall not exceed 48 hours.

Wages: the basic hourly wage rates of 77 cents per hour for day work, 87 cents for evening work and 97 cents for night work (with higher rates for special cargoes) are unchanged, but there is now added a war bonus of 8 cents per hour.

The longshoremen to have the right to appoint a representative on the wharves who shall also assist in the settling of disputes.

Trade

Retail Stores, Quebec.—On Order in Council, approved September 5, and published in the *Quebec Official Gazette,* September 7, with correction in the issue of September 14, makes obligatory the terms of an agreement between L'Association patronale du Commerce de Québec, inc. (The Employers Commercial Association of Quebec, Inc.) and Le Syndicat national catholique des Employés du Commerce, gros et détail, du district de Québec, inc. (The National Catholic Union of Wholesale and Retail Trade Employees of the district of Quebec, Inc.).

The Order in Council to be in effect from September 7, 1940, to August 31, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, January, 1939, page 96, March, page 336, July, page 729, October, page 1067, January, 1940, page 69, April, page 391 and August, page 867 with these exceptions:

The jurisdiction covers all establishments engaged in retail trade or in wholesale and retail trade except the sale of food products, fuel, tobacco and articles for smokers, florist, optometrist and pharmaceutical products or any other trade governed by another Order in Council. It now includes also the office staff of the establishments covered.

Weekly wage rates for male clerks are now $1 higher for all but 15 per cent of such clerks, the minimum rate for 60 per cent of the clerks being now $21, 25 per cent at $16 and the remaining 15 per cent $8. The minimum weekly rates for the office staff are: accountant $25, assistant accountant (male) $18, assistant accountant (female) $12, outside collector $20. The wage rate for senior employees in general work is also raised $1, to $16 per week.

Clerks and Accountants, Jonquiere, Kenogami, Arvida and St. Joseph D'Alma.—An Order in Council approved September 11, and published in the *Quebec Official Gazette,* September 21, amends the previous Orders in Council for these workers (Labour Gazette, July, 1939, page 730, and January, 1940, page 69).

In the original agreement it was provided that female employees be governed by a Fair Wage Board Ordinance. This amendment now provides for conditions for female employees as follows:

Hours for female employees are 51 per week in commercial establishments and 44 for office employees. For telephone operators 42 hours per week for day work and 60 hours for night work.

Overtime for female employees in commercial establishments, 25 cents per hour.

Weekly wages for female employees: in commercial establishments, $7 during first year to $11 during fourth year and after; office employees may be paid 13 cents per hour or $6 per week during first year and 20 cents per hour thereafter. For female telephone employees, 40 per cent of the operators to be paid $11, 35 per cent $9 and remaining 25 per cent $7; apprentice operators 13 cents per hour. Employees of the Saguenay-Quebec Telephone Company, however, remain under the conditions of the Fair Wage Ordinance until December 8, 1940.

Garage and Service Station Employees, Quebec.—See under Service: Custom and Repair.

Service: Public Administration

Civic Employees (Outside Services), Quebec.—An Order in Council approved September 11 and published in the *Quebec Official Gazette,* September 21, amends the previous Order in Council for this industry (Labour Gazette, August, 1940, page 868).

Overtime: time and one-half for work after regular working day until midnight and double time after midnight.

Service: Custom and Repair

Garages and Service Stations, Quebec.—An Order in Council approved September 11 and published in the *Quebec Official Gazette,* September 21, amends the previous Orders in Council (Labour Gazette, June, 1938, page 696, December, page 1174, February, 1939, page 218, April, page 435, May, page 529, June, page 630, and July, 1940, page 734) by removing the counties of Beauce and Montmagny from the territorial jurisdiction.

Service: Business and Personal

Barbers and Hairdressers, Three Rivers.—An Order in Council approved September 6 and published in the *Quebec Official Gazette,* September 14, amends the previous Orders in Council for these trades (Labour Gazette, October, 1937, page 1158, February, 1938, page 215, July, page 800, September, page 1045 and January, 1940, page 69) by changing zones as follows: zone I, the cities or towns of Three Rivers, Cap-de-la-Madeleine, Shawinigan Falls, Grand Mère and within two miles of them; Zone II, the towns of Louiseville and La Tuque and within two miles of them.

Barbers and Hairdressers, St. Hyacinthe, Drummondville, Granby and Sorel.—An Order in Council, approved September 6 and published in the *Quebec Official Gazette,* September 14, amends the previous Orders in Council (Labour Gazette, October, 1938, page 1174, November, page 1300, January, 1940, page 70, February, page 173, and July, page 734).

The wage rates for Granby and within two miles of it are fixed at $15 per week plus 50 per cent of the gross receipts in excess of $22. A scale of prices to be charged at Granby is also included.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved or amended by Orders in Council and published in the *Quebec Official Gazette*, September 14, 21 and 28:

Fur industry (retail), Montreal.
Building trades, Sherbrooke (amendment).
Fur industry (wholesale), Montreal.
Lithographing industry, Province of Quebec.
Printing trades, Montreal.
Retail stores, Quebec.
Longshoremen (ocean), Montreal.
Checkers and coopers, Montreal.
Building trades, Joliette (amendment).
Bakers, Quebec (amendment).
Dairy industry, Quebec.

Notices were published in the *Quebec Official Gazette*, September 14, 21 and 28, that authorization was given by Orders in Council for the joint committees to levy assessments on employers and employees, parties to the following agreements:

Barbers and hairdressers, St. Hyacinthe.
Barbers and hairdressers, Three Rivers.
Hairdressers, Montreal.
Fur industry (retail), Montreal.
Building trades, Sherbrooke (amendment).
Fur industry (wholesale), Montreal.
Furniture industry, Province of Quebec.
Retail stores, Quebec.
Lithographing industry, Province of Quebec.
Printing trades, Montreal.
Building trades, Sorel.
Glove manufacturing industry (work gloves), Province of Quebec.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Saskatchewan

IN five provinces—Ontario, Alberta, Nova Scotia, Saskatchewan and New Brunswick—legislation provides that, following a petition from representatives of employers or employees in any industry, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour; in Saskatchewan under the Commissioner of Labour and Public Welfare; in New Brunswick under the Minister of Health and Labour. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June, 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604, and July, 1939, page 671; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939, page 581; New Brunswick, in the issue of October, 1939, page 996. Similar legislation is in effect in Part II of the Fair Wages Act of Manitoba for certain industries (Labour Gazette, May, 1938, page 499, and June, 1939, page 570). Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Construction: Buildings and Structures

Carpenters, St. Catharines.—An Order in Council, dated September 18, and published in *The Ontario Gazette*, September 28, makes binding the terms of a schedule governing the carpentry industry in the city of St. Catharines and the towns of Thorold, Merritton, Port Dalhousie and Port Weller and adjacent district.

The Order in Council to be in effect from October 8, 1940 "during pleasure".

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one-half unless the Advisory Committee has issued a special permit to the employer authorizing such work at a lesser rate; work on Sundays and three specified holidays, double time.

Minimum wage rate for carpenters: 80 cents per hour. The Advisory Committee may fix a special minimum rate of wages lower than the regular minimum for any handicapped employee.

Service: Business and Personal

Barbers, Paris.—An Order in Council, dated September 4, and published in *The Ontario Gazette*, September 14, makes binding the terms of a schedule governing the barbering industry in the town of Paris, from September 24, 1940, "during pleasure."

Hours are those permitted by municipal by-law, with no work on Wednesday after noon nor on holidays.

Minimum wage rates for full time work are $20 per week, or $15 per week plus 50 per cent of proceeds in excess of $20. Minimum rates are set for part time work and a scale of minimum prices which must be charged customers is also included.

Saskatchewan

Construction: Buildings and Structures

Carpenters, Regina.—An Order in Council, published in *The Saskatchewan Gazette*, September 16, exempts the construction of hutments, administrative and training buildings (militia training centre) at Regina from the provisions of this schedule which was summarized in the Labour Gazette, October, 1939, page, 1069, November, page 1185 and December, page 1282.

Electrical Workers, Regina.—An Order in Council, published in *The Saskatchewan Gazette*, September 16, exempts the construction of hutments, administrative and training buildings (militia training centre) at Regina from the provisions of this schedule which was summarized in the Labour Gazette, October, 1938, page 1304.

Plumbers, Regina.—An Order in Council, approved August 14, and published in *The Saskatchewan Gazette*, September 16, amends the previous Order in Council for this trade (Labour Gazette, July, 1940, page 736, and July, 1939, page 733) which is in effect from June 25, 1940, "during pleasure."

Minimum wage rate for journeymen plumbers: Ninety cents per hour until July 31, 1940 (as in original schedule), 95 cents from August 1 to October 31, and $1 from November 1, 1940.

Another Order in Council, published in *The Saskatchewan Gazette*, September 16, exempts the construction of hutments, administrative and training buildings (militia training centre) at Regina from the provisions of this schedule.

Sheet Metal Workers, Regina.—An Order in Council, published in *The Saskatchewan Gazette*, September 16, exempts the construction of hutments, administrative and training buildings (militia training centre) at Regina from the provisions of this schedule, which was summarized in the Labour Gazette, September, 1938, page 1408.

Trade

Garages and Service Stations, Moose Jaw.—See under "Service: Custom and Repair."

Service: Custom and Repair

Garages and Service Stations, Moose Jaw.—An order in Council, approved August 26, and published in *The Saskatchewan Gazette*, September 16, makes binding the terms of a schedule governing the garage and service station industry in the city of Moose Jaw and within five miles of it.

The Order in Council is to be in effect from September 5, 1940, "during pleasure."

Hours: 8 per day to be completed within 14 consecutive hours, 6 days per week, a 48-hour week.

Overtime for all employees: 40 cents per hour.

Minimum weekly wage rates: for full time experienced employees $15; for inexperienced employees from $8.50 during first six months to $12.50 during third six months; for all part time employees, 40 cents per hour.

A scale of minimum charges which an employer or employee must contract for or accept is included.

Miss Frieda S. Miller, Industrial Commissioner of New York State, approved on October 11 the unanimous report of the Hotel Minimum Wage Board, and promulgated Directory Minimum Wage Order No. 6 governing women and minors in the hotel industry in the State to become effective November 25, 1940. A large number of the 30,000 women and minors working in hotels throughout the State will have their wages raised when the Order goes into effect. Waitresses will get a minimum cash wage of 26 cents an hour, chambermaids and bathmaids, 33 cents, and all other women and minors in all-year hotels who do not receive meals and lodging, 36 cents. If the worker gets one meal a day, the rate is three cents less an hour and six cents less if two or more meals are provided.

NEW COST OF LIVING INDEX FOR CANADA

Based on Survey of Family Expenditures, 1938

The construction of a cost of living index number based on a survey of average family expenditure in the households of wage-earners and low salaried workers in cities in Canada made in 1938 and 1939 has now been completed, and figures are available by months from 1935 to September, 1940. The survey covered 1,439 families in Charlottetown, Saint John, Halifax, Quebec, Montreal, Ottawa, Toronto, London, Winnipeg, Saskatoon, Edmonton and Vancouver. (Labour Gazette, April, 1939, p. 366.) The index was constructed by the Dominion Bureau of Statistics in consultation with the Department of Labour and the Wartime Prices and Trade Board. The index number of changes in the cost of living, based on prices in 1913 as 100, published in the Labour Gazette annually from 1921 to 1926 and monthly from 1927 to date, will be discontinued.

The latter index based to some extent on the weekly cost of a list of staple foods, fuel, etc., entering into a family budget for which figures have been published since 1911, was constructed to represent approximately the changes in all items including clothing and sundries, as well as food, fuel and light, and rent, pending a cost of living survey from the results of which a complete system of weighting could be made. This index was designed to show changes in the cost of living for workingmen in cities and the method of computation made it possible to readily calculate indexes for any given locality at any time for special purposes. The index number of retail prices, rents and costs of services, based on prices in 1926 as 100, issued by the Dominion Bureau of Statistics since 1928, was to measure the general movement of retail prices and cost of living in the Dominion as a whole and for comparison with other general index numbers such as the index for wholesale prices.

The new index number is constructed by calculating the cost in terms of the prices at the beginning of each month of a list of commodities and services using quantities for each item proportionate to the average annual consumption per family ascertained in the cost of living survey. For each group of commodities the list includes a number of representative staple articles in common use for which reliable and comparative prices can be obtained every month in the year. Goods which are not available every month cannot be included in a calculation designed to show monthly changes, and some lines of seasonal goods, especially in fruits and vegetables, are therefore necessarily excluded. The lists used must, therefore, in as far as is possible, include articles which show at least the general trend of the prices of the goods not included. It is comparatively easy to construct a budget of family expenditure representing all varieties of goods available at any particular date or season in the year and to compare the cost with that on the same date in a previous year but such an extensive budget, including seasonal goods, cannot be made comparable from month to month or even at quarterly or half-yearly intervals.

Construction of Index

The following paragraphs from a circular issued by the Dominion Bureau of Statistics, entitled "An Official Cost of Living Index for Canada," describe briefly the base of the survey and the construction of the new index:—

"The new index will reflect changes in the cost of a fixed budget covering retail prices of commodities, services, and shelter costs based upon the expenditure experience of 1,439 urban wage-earner families in the year ending September 30, 1938. The record completed by these families was especially designed to provide budget data necessary for the accurate compilation of a cost of living index. It must be kept in mind that the new index reflects changes in the cost of a fixed level of living. No account can be taken in this measurement of shifting planes of living due to changes in economic circumstances, e.g., variations in income or direct taxation or to changing ages

TABLE I.—URBAN WAGE-EARNER FAMILY ANNUAL LIVING EXPENDITURES
Year ending September 30, 1938

Budget Group	Expenditure Averages	Percentage Distribution
	$	
Food	443·0	31·3
Shelter	269·5	19·1
Fuel and light	90·5	6·4
Clothing	165·8	11·7
Home Furnishings	125·7	8·9
Miscellaneous	319·4	22·6
Health	60·8	4·3
Personal Care	23·9	1·7
Transportation	79·3	5·6
Recreation	82·1	5·8
Life Insurance	73·3	5·2
Total	1,413·8*	100·0

* Directly represented in the index. Other miscellaneous outlay brought total family living expenditure to $1,453·8.

and numbers of persons in the family. The complete list of goods and services upon which the index is based will be published later. Meanwhile, a brief description of the family it represents may help those using the index to visualize the level of living and type of family to which it applies.

"The type of family was determined before expenditure records were collected in order to make certain that they were obtained from families which would be typical of Canada's urban wage-earner population. It was defined after careful study of 1931 urban census records with reference to family size, numbers of children, conjugal condition of family heads, earnings, tenure, and racial origin.

"On the basis of this investigation of census returns, it was decided to collect living expenditure records only from families satisfying the following conditions:

"1. All families to have husband and wife living in the home as joint heads with from one to five children.

"2. All families to have been completely self-supporting during the survey year, with family earnings ranging from $450 to $2,500 during that period.

"3. All families to be living in self-contained dwelling units, not sharing either kitchen or bathroom facilities with other families.

"The 1,439 families for which records were collected averaged 4·6 persons, and the majority had two or three children. Family earnings in many cases were supplemented by other small sources of income, and total family incomes between $1,200 and $1,600 were the most common. There were approximately two tenant families to every home-owning family, and about one family in three operated a motor car. The general distribution of living expenditures for these families, which represented all the principal racial groups in Canada, was as follows:

"The choice of the five year 1935-9 base period was prompted by several considerations. In selecting a new period to replace 1926, the Dominion Bureau of Statistics had to consider many types of indexes other than those for prices. Employment, industrial production, and car loadings were some of the series involved, and it was difficult to find a recent 12-month period which would provide a generally satisfactory reference level. For both prices and industrial production the years 1935-9 offered a period of rise and fall which tended to minimize differences in the base levels of various series relative to earlier periods. Although the last four months of 1939 were affected by the outbreak of war, neither prices nor industrial activity reacted sufficiently in that interval to affect a five-year average materially. The years 1935-9 provided a base which is representative of pre-war conditions, and at the same time gives a reference level for comparison with average conditions obtaining subsequent to recovery from the depression from 1929 to 1933.

"Acting upon a recommendation by the United States Central Statistical Board, the United States Bureau of Labour Statistics has already adopted the 1935-9 base period for its cost of living index, and the Federal Reserve Board and Federal Departments concerned with statistical time series also have taken this step or announced their intention of doing so. There are definite advantages in direct comparability between Canadian and United States index number data."

The index is constructed by multiplying the average price of each item in the cities included in the calculation at the beginning of the month, by the average quantity per family purchased in a year as shown by the survey. The cost of the items in each group is then ascertained and a group index number made by calculating the percentage of change from the average cost of the group in the base period, 1935 to 1939 inclusive. The group indexes are then weighted according to the importance of the average group expenditure by the families in the survey, Table I. The groups are the same as in the old index numbers except that a new group "Home Furnishings" has been made and the other items in the old group "Sundries" are included under the title "Miscellaneous."

The new index number has been calculated by months back to 1935, the first year in the base period. In order to have comparisons with earlier figures the old index numbers of the Bureau of Statistics for certain years from 1913 to 1939 have been converted to the new base. For these years the "Home Furnishings" group is not shown separately.

Composition of Index

The "Food" group includes dairy products, eggs, meats and fish, cereals, dry groceries (sugar, tea, etc.) vegetables, and fruits. These figures are obtained monthly. The "Rental" group covers houses, flats and apartments and the figures are secured in May and October. The "Fuel" includes coal, coke, gas and electricity, the figures being reported monthly. The "Clothing" includes men's and women's wear, piece goods and footwear, the prices being secured monthly. The "Home Furnishings" group includes furniture, floor coverings, sheets, towels, blankets, etc., hardware, dishes and glassware, and household cleaning supplies. The figures are obtained each month. The "Miscellaneous" group includes medicine, doctors' and dentists' fees, hospital charges, personal cleaning supplies, barbers' fees, motor operating costs, railway and street car fares, theatre admissions, newspapers, periodicals, tobacco, and life insurance. The figures for these items are obtained, monthly, quarterly, semi-annually or annually according to the character of the price movements, frequency of change, etc.

NEW COST OF LIVING INDEX NUMBER ISSUED BY UNITED STATES BUREAU OF LABOR STATISTICS

FIGURES for a new index number of the cost of living have been published by the United States Department of Labor in the August issue of the *Labor Review*, the monthly journal of the Bureau of Labor Statistics. The new index is based on the results of a cost of living survey begun in 1934. Figures were used for 14,469 families in 33 of the larger cities. The base period is prices in 1935-1939 as 100, this having been recommended for the index numbers issued by other statistical agencies of the United States Government. The accompanying table gives the figures by quarters from March, 1935, to 1940 by groups, these being the same as those in the new cost of living index number of Canada.

The first cost of living survey by the United States Bureau of Labor was made in 1900-1901 and from this an index number of retail food prices was constructed and published for the years 1890 to 1919. A more complete survey was made during the period 1917 to 1919 and an index number covering all items was calculated back to 1913 using prices in 1913 as 100 for a base. This index number was issued until the present year but was revised from time to time to include more lines of foods, especially fruits and vegetables, there being 84 from 1935 to 1939. In the new index there are only 54 lines of foods. The figures of the old index number from 1913 to 1940 have been converted to the new base period to enable comparisons to be made with the earlier years. The new index, like the old, is calculated for each of the cities included in the scope of the statistics.

INDEXES OF COST OF GOODS PURCHASED BY WAGE EARNERS AND LOWER-SALARIED WORKERS IN 33 LARGE CITIES COMBINED, MARCH 15, 1935-MARCH 15, 1940

[1] Covers 51 Cities.

PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1940

Cost of Living Prices of Staple Articles and Index Numbers

A slight upward movement in the cost of living from the beginning of August to the beginning of September was shown by the new official index number due to an advance of three per cent in clothing, two per cent in home furnishings and a fractional increase in fuel. The food and rent groups were unchanged while a fractional decline appeared in the miscellaneous group. The "total index" number (all items) was 106·4 as compared with 100·8 for the beginning of September a year ago, an increase of 5·6 per cent. For the same period the increase in clothing prices was about thirteen per cent, in fuel and light ten per cent, home furnishings eight per cent, food six per cent, rent three per cent, and in the miscellaneous group one per cent.

The new index number calculated by the Dominion Bureau of Statistics in consultation with the Department of Labour and the Wartime Prices and Trade Board and based on data from a survey of family expenditure in 1938 is described in the article on page 1079 which contains tables of figures by months back to 1935 and by years back to 1913.

Index Number of the Cost of Living in Canada by Principal Groups of Expenditure

	September 1940	August 1940	September 1939
Food	105·4	105·4	99·4
Rent	106·9	106·9	103·8
Fuel and Light	108·5	108·4	98·9
Clothing	112·4	109·1	99·6
Home furnishings	108·9	106·9	100·8
Miscellaneous	102·8	103·0	101·3
Total index	106·4	105·9	100·8

The table of index numbers of changes in the cost of living published in this monthly statement since January, 1927, is being discontinued and replaced by the new official cost of living index number calculated by the Dominion Bureau of Statistics. Those who have been using the old index number of the Department for special purposes and cannot immediately change to the new may bring the old series down to date each month by applying the percentage change shown in the new "Total Index" for the last month over that for the previous month to the "All Items" figure in the old index for the previous month. The group figures may be similarly adjusted. For the "Sundries" group figure the indexes for the new "Home Furnishings" and the "Miscellaneous" should be combined using the weights. By this method of calculation the figures of the old index for September are Food 119, Fuel and Light 148, Rent 152, Clothing 132, Sundries 161, All Items 138, as compared with the August figures published in the September issue of the Labour Gazette namely: Food 119, Fuel and Light 148, Rent 152, Clothing 128, Sundries 160, All Items 137.

Publication of the table showing the cost per week of a list of staple foods, fuel and lighting, and rent entering into a family budget which has appeared in the Labour Gazette since August, 1915, is also being discontinued. The cost of the list in terms of average retail prices in 69 cities in Canada at the beginning of September was: Food $8.64; Laundry starch 4·1 cents; Fuel $2.93; Rent $6.21; and Total $17.82. The average cost of staple foods by provinces at the beginning of September was: Nova Scotia $8.85; Prince Edward Island $8.36; New Brunswick $8.94; Quebec $7.99; Ontario $8.66; Manitoba $8.39; Saskatchewan $8.09; Alberta $8.44; and British Columbia $9.57.

Wholesale Prices

The Dominion Bureau of Statistics weekly index number of wholesale prices moved within narrow limits during September the high being 83 for the two weeks ended September 13 and September 20, and the low 82·8 for the week ended September 27. These figures are slightly higher than those recorded week by week in August. Little movement has occurred in this index since the beginning of 1940 following the advance last autumn after the outbreak of war. The increase between the beginning of September, 1939, and the last week in September, 1940, was about 14 per cent. Comparative figures on a monthly basis are 82·7 for August, 1940; 72·4 for August, 1939; 74·5 for September, 1938; 85·0 for September, 1937; 76·4 for September, 1936; 63·5 for February, 1933, the low point during recent years; 97·8 for September, 1929; 94·4 for September, 1922; and 164·3 for May, 1920, the post war peak. Group changes during the month under review were also slight. In the classification according to chief component materials the Animal Products Group and the Non-Ferrous Metals Products Group each advanced about one per cent while the Vegetable Products Group declined about one per cent. Fractional increases were recorded in each of the other five groups. Among the commodities which advanced in price during the month were hides, eggs, livestock, cocoa and copper wire bars while grains, milled products, fresh meats, raw silk and raw rubber declined.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended September 27, 1940, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 1083)

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of September of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in some of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

Retail Prices

Beef prices declined slightly in September following the gradual advance between January

and August. They were higher, however, than at the beginning of September, 1939. Sirloin steak averaged 30·7 cents per pound in September, 31·3 in August, and 27·7 cents in September, 1939. Fresh pork at 23·4 cents and breakfast bacon at 32·6 cents both averaged slightly higher than in the previous month and were little changed from the averages for September, 1939.

Considerable seasonal advance in the prices of fresh eggs was recorded in most localities the Dominion average being up from 30·2 cents per dozen to 34·4 cents. The average in September, 1939, was 32·8 cents per dozen. Stocks in cold storage at September 1 were slightly lower than at August 1 but about nine per cent greater than on September 1, 1939. Milk has been unchanged since February at an average price of 11 cents per quart. The production of creamery butter during the first eight months of the year was not materially different from that of 1939. The price averaged 26·5 cents per pound at the beginning of September as compared with 26·7 in August and 26·2 cents in September, 1939. The price of cheese at 23·8 cents per pound was fractionally higher than for the previous month as compared with 21·5 cents at the beginning of September, 1939. Production for the first eight months of the year was about 14 per cent higher than for the same period in 1939 and exports to the United Kingdom have also increased substantially. The price of bread has averaged 6·7 cents per pound since March as compared with 6·5 cents one year ago. Flour at 3·6 cents per pound was unchanged from the previous month as compared with a price at the beginning of September, 1939, of 2·9 cents per pound. Dry beans were down in the average from 7·2 cents per pound in August to 6·9 cents in September. The price in September, 1939, was 5·1 cents. Onions again declined averaging 4·6 cents per pound at the beginning of September as compared with 7·1 cents in August. The price in September, 1939, was 4·1 cents. A substantial seasonal fall was recorded in the price of potatoes in most localities, with the marketing of the new crop, which was estimated to be about 12 per cent larger than in 1939. The Dominion average price at September 1 was $1.52 per 100 pounds as compared with $1.96 in August, $2.04 in July and $1.51 in September, 1939. Granulated sugar continued unchanged at an average price of 7·5 cents per pound. The prices of coffee and tea have changed little in recent months but both were considerably higher than at the beginning of September, 1939, largely as a result of special war taxation. United States anthracite coal averaged $15.72 per ton in September, $15.62 in August and $14.08 in September, 1939.

The following are the prices reported for Welsh coal "cobbles" and "French nuts" at the beginning of September, 1940; Halifax $17.50; Charlottetown $16.90; Saint John $16; Quebec $16; Three Rivers $16.50; Sherbrooke $16.75; Thetford Mines $17; Montreal $17; Ottawa $18; Kingston $17.50; Belleville $17.50; Peterborough $18.50; Oshawa $17; Toronto $16; St. Catharines $15.75; Hamilton $16; Galt $17; Sudbury $19.75; Cobalt $21.50; Timmins $21.50; Winnipeg $20.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables which appear quarterly give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries.

Since these tables are compiled from British and foreign sources the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the Labour Gazette. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

In most of the continental European countries some measure of control over prices and distribution has been put in force with consequent effect upon prices. In some of these countries the publication of price data has been suspended and in the case of Germany direct information is unobtainable although information contained in the official publications of neutral countries and in the press is noted.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Supreme Court of Canada Affirms Decision of New Brunswick Supreme Court Declaring Strain an Accident

The Supreme Court of Canada, on June 29, unanimously upheld the decison of the Appeal Division of the Supreme Court of New Brunswick and dismissed the appeal from it brought by the New Brunswick Workmen's Compensation Board. The provincial court had upset the Board's ruling and allowed the claim of a woman for damages for injury through strain sustained while working at an embossing machine for the Irving Oil Company at Saint John. (LABOUR GAZETTE, July, 1940, p. 751.)

The question was whether the injury was caused by accident and compensation was therefore payable, or whether it was due to disease. Many authorities were considered by the Court and there was unanimous agreement that a physiological injury had occurred as the direct result of the plaintiff's work. This was held to be an accidental injury within the meaning of the statute and subject to compensation. *Workmen's Compensation Board* v. *Theed,* (1940) 3 Dominion Law Reports 561.

British Columbia Supreme Court Upholds Vancouver By-law Limiting Driving Hours of Taxi Owners

On April 24 Mr. Justice Fisher of the British Columbia Supreme Court dismissed an application by the owner of a small taxicab business to have declared illegal the Cab and Commercial Vehicles By-law of the City of Vancouver, which limits to 54 hours a week and nine a day, the latter to be confined within 12 hours, the time that an owner may drive his own vehicle. The by-law requires him to keep a record of time worked. Persons employed to drive taxis have the same restrictions imposed on their hours of work by a provincial regulation under the Hours of Work Act.

The authority for the by-law relied on by the City was section 163 of the Vancouver Incorporation Act, 1921, which allows the Council to "pass, alter and repeal by-laws for the following purposes: . . .

(135) For inspecting, defining, classifying, prohibiting, controlling, licensing, limiting and regulating, subject to the provisions of the Motor Vehicle Act . . .

(*g*) The number of hours and time in any day during which motor vehicles may be operated or driven by any one person.

It was contended for the applicant that the Legislature in passing the Hours of Work Act and authorizing the regulations thereunder had dealt in a special Act with hours of work in the taxicab industry and the city was therefore excluded from passing a by-law dealing with the same subject under the prior legislation, which counsel for the applicants consider is the general Act.

The Court held that both acts cannot operate with respect to the number of hours in any one day in which taxicabs may be operated or driven by any one employee in the industry and the later enactment, the Hours of Work Act, must govern with respect to employees but that the power given by the earlier legislation has not been abrogated but merely curtailed by the subsequent legislation. Although hours of employees are regulated under the Hours of Work Act, the City Council under the Vancouver Incorporation Act may still regulate the number of hours and time in a day during which a vehicle for hire may be operated or driven by its owner.

The Court refused to invalidate the by-law for uncertainty as it was felt that the intention of the enacting body was "reasonably clear." Neither was the objection sustained that the by-law was prohibitive and would tend to create a monopoly. For the Court to allow this it would have been necessary to show bad faith in its passage and there was no attempt to do that. In *re Vancouver Incorporation Act, 1921,* (1940) 2 Western Weekly Reports 697.

Wages on Relief Works in Quebec Again Held Subject to Seizure

On September 21, Judge Lajoie of the Magistrate's Court of Three Rivers followed a judgment in a similar case given by Mr. Justice Forest of the Montreal Superior Court (LABOUR GAZETTE, March, 1940, p. 313) in allowing seizure for debt of wages earned on relief works.

The individual defendant, against whom the plaintiff held a judgment, was employed by the City of Shawinigan Falls on work intended to relieve unemployment to the cost of which contributions were made by the federal and provincial governments as well as by the city. He received $14.40 a week.

In 1934, a provision was inserted in the Quebec Code of Civil Procedure expressly exempting from seizure "the salaries and wages of workmen and labourers employed at work undertaken to relieve unemployment with the aid granted by the Federal and Provincial Governments." This was repealed in 1939 and the case was, therefore, governed by sec. 11 of the Code, which allows seizure of fixed proportions of the wages depending

on the amount earned and which was amended in 1939 to provide that wages up to $6 a week are totally exempt from seizure and in the case of married men or widowers with one or more children $12 a week. The plaintiff came within the last-mentioned class and his wages could be seized up to $2.40 a week until the judgment was satisfied with interest and costs, the city to bear the costs of the action. *Courtois* v. *Bilodeau et la Corporation de la cité de Shawinigan Falls*, Cour de Magistrat, District de Trois-Rivières, September 21, 1940.

Quebec Court Holds Costs not Taxable Against Unions with no Pecuniary Interest in Action

Mr. Justice Bond of the Montreal King's Bench in Chambers on June 26 maintained the motion of the union plaintiffs for the rejection as concerned them of an item of $400 which had been allowed by the Clerk of the Court as "additional fee" when the costs were taxed against the plaintiffs after the union plaintiffs had been held not to be legal entities and therefore incapable of instituting an action before the courts of Quebec. (Labour Gazette, 1939, p. 544; September, 1940, p. 991).

The Tariff of Advocates' Fees allows an "additional fee" of $400 in cases involving $50,000 and over when an appeal is argued on its merits. The total amount claimed by the plaintiffs was $122,360, but the interest of the unions lay only in having their agreements with the respondent cancelled; they asked for no pecuniary judgment. Their action was joined with the individual plaintiffs because the law allows that without the interest of each plaintiff being affected by the total attained. The Court held that the respondent could not invoke the participation of the individual plaintiffs, whose claim was unaffected by the judgment as to the legal status of the unions and was still undecided, so as to make the unions liable for a fee chargeable only when the pecuniary claim was decided and the decision appealed. *International Ladies' Garment Workers' Union et al* vs. *Rothman* (1940) 69 Rapports Judiciaires de Québec, Cour du Banc du Roi (en appel) 160.

Trial Judgment Based on Jury's Verdict Upheld in Quebec Accident Case

The Montreal Court of King's Bench on June 28 unanimously dismissed the appeal from a judgment of Mr. Justice Duclos of the Montreal Superior Court rendered on June 1, 1939, in accordance with the verdict of a jury allowing the plaintiff employee $1,707.10 damages against his employer for injuries sustained in the collapse of scaffolding erected by his fellow employees.

Since June 25, 1937, the plaintiff had been employed by the defendant as a chauffeur and handyman. The defendant was making alterations in his residence at Ile Perrot. On September 2, 1937, three of his employees, one of whom was the foreman, constructed a scaffold to enable them to shingle the roof. On September 3, in the foreman's absence, the other two went on with the work according to instructions. The plaintiff had been directed to carry stones from the field nearby which he did in the morning, but in the afternoon he decided to join the others. He mounted the scaffold on which one of the men was working and it soon collapsed, resulting in his serious injury. He claimed the accident was due to negligence of the defendant's employees in its faulty construction. The defence alleged among other things that the plaintiff was not acting according to instructions and that the scaffold was built for men of lighter weight.

On appeal the defendant contended that the trial judge had refused to allow proof of an admission said to have been made to the foreman by the plaintiff but which was not alleged in the pleadings. Apparently, it was an extra-judicial admission. The Court distinguished from the present case the one on which the defendant relied. There such evidence was admitted when the plaintiff against whom the admission was invoked had died and so could not be examined. In the present case the plaintiff was present in Court and the attempt to prove admission by third parties was properly objected to as not being the best proof as required by sec. 1204 of the Quebec Civil Code. The Appeal Court also refused to interfere with the discretion that was exercised by the trial judge in allowing to be put to the jury certain questions to which the defendant objected. Although the jury did not answer all the questions as it is required to do under the Code of Civil Procedure, the answers given covered all the questions. When they had attributed the fault solely to the defendant no further issue remained. *Maillet* vs. *Perras* (1940) 69 Rapports Judiciaires de Québec, Cour du Banc du Roi (en appel), 183.

Montreal King's Bench Upholds Judgment that Price-Fixing Beyond Powers of Decree under Collective Agreements Act

In an unanimous judgment on June 28 the Montreal Court of King's Bench sitting on appeals dismissed, with costs, an appeal from the decision of Mr. Justice Gibsone of the Superior Court (Labour Gazette, 1939, p.

360) and agreed with him that the Lieutenant-Governor in Council exceeded his powers in allowing the joint committee for the shoe-repairing industry in Montreal set up under the Collective Agreements Act to fix minimum prices to be charged for shoe repairs. The respondent was therefore entitled to a writ of prohibition which the Quebec Code of Civil Procedure allows in cases where a court of inferior jurisdiction exceeds his authority. Since he has not power to fix prices it was held that neither can the Lieutenant-Governor in Council sanction a by-law of the joint committee making it an offence to advertise repairs at a price lower than that fixed by the order in council.

The sections in the Collective Agreement Act conferring authority on the Lieutenant-Governor in Council all deal with the employer-employee relationship except the last one which adds power to make "such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act". Having decided that the clause of the decree under the Act which fixed prices for repairs could not come under any of the headings regulating working conditions the only remaining authority was this general clause. However, the object of the Act seems to be to regulate the relationship between employers and employees; it does not contemplate other individuals who do their own work and the public at large and there was no evidence or argument to show "that the fixing of prices may be fairly regarded as incidental to or consequential upon any of the powers or discretion conferred upon the Lieutenant-Governor in Council by the statute". One of the judges expressed the opinion that if the intention of the legislature had been to allow price-fixing this would have been stated.

Some members of the Court disagreed with the trial judgment in holding that there has been a contravention of the Combines Investigation Act and sec. 498 of the Criminal Code. Others felt that the case having been disposed of on the grounds outlined above, it was not necessary to deal with the other objections raised by the petition. They were set out in the LABOUR GAZETTE in the account of the trial judgment. *Procureur général de Québec et Dame Lazarovitch et Comité paritaire des réparateurs de chaussures au district de Montréal et Cour des sessions de la paix et Autres* (1940) 69 Rapports Judiciaires de Québec, Cour du Banc du Roi (en appel) 214.

Majority of Quebec Court Allows Appeal and Sets Aside Attachment Order

With Mr. Justice Rivard dissenting, the Quebec Court of King's Bench sitting on appeals allowed with costs the appeal of the third party, Murdock, and reversed the judgment of Mr. Justice Marchand who on February 27 at Three Rivers had upheld the plaintiff's claim for seizure of part of the money said to be due by Murdock to the defendant on a contract for work done.

The plaintiff, Bisson, held a judgment against the defendant, Goulet, which with interest and costs amounted to $309.26. Goulet had entered into a contract with Murdock to cut and haul wood during the winter of 1938-39 at a fixed price payable as follows: 50 per cent when the wood was cut and measured, 10 per cent when it was hauled and 40 per cent in June, 1939. It was agreed that Goulet was to buy from Murdock supplies necessary for the execution of the contract and that the wages payable by Murdock as well as the goods he sold to Goulet were to be considered as payment on account of the wood cut.

On December 1, 1938, a writ of seizure issued by the plaintiff was served on Murdock. Three declarations were made by the latter as to the state of the account between the defendant and himself on February 28, 1939, March 22, 1939, and April 10, 1939, the third one showing that he owed the defendant nothing. In fact the latter was in his debt in the sum of $1,070.11. On December 1, 1938, when the writ was served the balance in favour of Murdock was $1,076.81.

The question was whether as the trial judge had held, the money which became due by Murdock to the defendant after December 1, 1938, namely $3,327.07, was attachable by the writ. Mr. Justice Rivard took this view. He expressed no opinion as to whether he would have reduced as did the trial judge the amount subject to attachment by $3,004.36 which was the sum paid out for wages and board, etc., of the woodcutters, a privileged debt. The majority opinion, however, in support of which authorities were cited, was that the contract called for an accounting on completion of the work and the rights and obligations did not arise until then. The contract was one and indivisible and the writ of seizure could not paralyze its execution. All advances made by Murdock after service of the notice of claim were in accordance with the contract. The appeal was, therefore, allowed. *Murdock* vs. *Bisson et Goulet* (1940) 60 Rapports Judiciaires de Québec, Cour du Banc du Roi (en appel) 230.

VOLUME XL] NOVEMBER, 1940 [NUMBER 11

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada showed a further pronounced expansion at October 1, resulting in a new all-time high index. Statements were received by the Dominion Bureau of Statistics from 12,304 employers, each with a minimum of fifteen employees, whose staffs aggregated 1,335,705 persons, as compared with 1,290,530 in the preceding month. The average change in employment between September and October in the years since 1920 has been a small increase; the improvement this year greatly exceeded this average gain, being, indeed, larger than that noted at the beginning of any previous October of the record.

The index (based upon the average for the calendar year 1926 as 100), stood at 136·2 at October 1, 1940, compared with 131·6 at September 1, 1940, and 121·7 at October 1, 1939. At the same date in recent years of the record, the index has been as follows: 1938, 116·7; 1937, 125·7; 1936, 110·1; 1935, 106·1; 1934, 100·0; 1933, 90·4; 1932, 86·7; 1931, 103·9; 1930, 116·2; 1929, 125·6; 1928, 118·8 and 1927, 110·3. These index numbers are calculated from returns furnished by employers in the following industries: manufacturing, logging, mining, communications, transportation, construction and maintenance, services (hotels and restaurants and laundries and dry-cleaning establishments), and trade.

Unemployment in Trade Unions.—At the beginning of October, 1940, the percentage of unemployment among local trade union members stood at 4·4 in contrast with percentages of 5·2 at the beginning of September and 9·1 at the beginning of October, 1939. The percentage for October was based on the returns compiled from 1,990 labour organizations, with a total membership of 261,247 persons.

Employment Offices.—Reports for September, 1940, received by the Department of Labour from the offices of the Employment Service of Canada showed marked gains over August, 1940, and September, 1939, in the average daily placement effected, construction and maintenance being mainly responsible for the increases under both comparisons, augmented by substantial advances in logging, manufacturing and services, this improvement being supplemented in the second instance by a noteworthy gain in transportation. During the month under review, September, 1940, the total opportunities for work numbered 71,581, applications made, 94,389 and placements in regular and casual employment, 66,192.

Prices.—In retail prices the new cost of living index number calculated by the Dominion Bureau of Statistics and based upon average prices in 1935 to 1939 as 100 was 107·0 at the beginning of October as compared with 106·4 for September; 103·5 for October, 1939; and 100·8 for September, 1939. In wholesale prices the weekly index number, also calculated by the Bureau and based upon prices in 1926 as 100 advanced gradually week by week during October and was 83·6 for the week ended November 1 as compared with 83·0 for the week ended October 4; and 82·9 for that ended September 6. Comparative figures on a monthly basis for certain dates are 83·1 for September, 1940; 79·3 for October, 1939; 74·1 for October, 1938; 84·7 for October, 1937; and 63·5 for February, 1933, the low point in recent years.

Business Statistics.—The table on page 1100 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business in September was higher than at any time in the last 20 years. The increase as compared with August was about two per cent and as compared with September, 1939, about 23 per cent. In both the foregoing comparisons the increase in the index was due to a large extent to the increased volume of manufacturing production and of new construction arising out of war demands. In the manufacturing groups, after adjustment for seasonal changes, the volume of pig iron production increased nearly 70 per cent and steel

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended November 1, 1940.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending October 26, 1940, and corresponding periods.

(6) Sugar production given in periods of four weeks ending October 5, September 7, and August 10, 1940; October 7, September 9 and August 12, 1939. (7) MacLean's Building Review.

(8) Index numbers are adjusted when necessary for seasonal variation. (9) Excluding gold.

(11) Now based on 203 municipalities instead of 58 as formerly.

production about 33 per cent between September, 1939, and September, 1940. The volume of textile manufacture increased about 22 per cent in the same period. In the construction group marked increase was recorded by the figures for contracts awarded in September, 1940, over those for August as well as for September, 1939. Decline was recorded in September in the figures for mineral output and production of electric power as compared with the previous month but both were somewhat higher than in September, 1940. External trade, while showing important increase over the same month of 1939, was lower than in August, 1940. Information available for October shows advance in wholesale prices, employment, the number of cars of revenue freight, and the gross earnings of the railways both as compared with September, 1940, and with October, 1939.

Strikes and Lockouts.—The number of strikes and lockouts recorded as in existence during October was 25, involving 7,609 workers with time loss of 19,830 man working days, as compared with 10 disputes during September, involving 2,668 workers with a time loss of 6,053 days. Most of the time loss during October was due to nine strikes of coal miners in Nova Scotia, and to strikes of shipyard workers in Collingwood, Ont., and in Montreal, P.Q. In September the only strikes of importance involved silk factory workers in Cornwall, Ont., and embroiderers in dress factories in Montreal, P.Q.

In October, 1939, there were 27 disputes, involving 6,496 workers with time loss of 23,724 days. Most of the time loss was due to strikes of coal miners in Nova Scotia, Saskatchewan and Alberta, gold miners in British Columbia, silk factory workers in Cornwall, Ont., knitting factory workers in St. Jerome, P.Q., sheet metal factory workers, Toronto, Ont., and fish handlers at Lockeport, N.S.

Of the twenty-five disputes in October, 1940, nineteen were recorded as terminated during the month. Six resulted in favour of the employers and one in favour of the workers involved. Compromise settlements were reached in five cases and in seven cases the results were indefinite. Six disputes, involving approximately 1,400 workers, were recorded as unterminated at the end of the month.

These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the past month the Department received the reports of three Boards established under the provisions of the Industrial Disputes Investigation Act.

These reports, together with other proceedings under the Act, will be found in the section commencing on page 1107.

Establishment of Inter-departmental Committee on Labour Co-ordination

In order to define the jurisdiction of several departments of the Dominion Government "in matters affecting labour as related to the war effort" and to facilitate unified planning and co-ordination in the work of these various agencies, an Order in Council (P.C. 5922) was issued on October 25, establishing an Inter-departmental Committee on Labour Co-ordination.

The Order in Council—which was issued on the recommendation of the Minister of Labour and concurred in by the Minister of Munitions and Supply and the Minister of National Defence—stated "that unless unified planning and co-ordination in the work of the various agencies are secured, effort to deal effectively with the matters affecting labour will be seriously hampered, especially as the problems involved become more acute."

The Committee thus constituted consists of: Dr. Bryce M. Stewart, Deputy Minister of Labour, Chairman; Dr. W. A. Mackintosh, Economic Adviser of the Department of Finance; Colonel George S. Currie, Department of National Defence; Major-General L. R. LaFleche, Associate Deputy Minister of National War Services; Mr. H. B. Chase, Director of Labour Relations, Department of Munitions and Supply; Mr. A. J. Hills, Chairman of the National Labour Supply Council. Mr. Humphrey Mitchell, Director of Labour Transference of the Department of Labour, and secretary of the National Labour Supply Council, is also secretary of this Committee.

The duties of the Committee as provided in the Order in Council are as follows:—

(*a*) To promote co-ordination of the functions and activities of all government agencies in relation to matters affecting labour and to obtain the co-operation of provincial governments;

(*b*) To anticipate, as far as possible, the labour and manpower requirements of the war program as a whole, and to recommend to the various departments having to do with these matters the most effective ways and means of meeting such requirements;

(*c*) To consider the needs of the war program with respect to training employees in industry, in technical schools or otherwise, and to recommend such further provision as may be deemed advisable;

(*d*) To maintain close and direct contact with industries engaged on war contracts and, in co-operation with the Department of Munitions and Supply, to assist them in meeting their labour requirements;

(*e*) To refer questions to and consult with the National Labour Supply Council in order to secure the considered judgment of employers and employees on measures and practices proposed with a view to obtaining their co-operation in such measures and practices as may be adopted, and that the said Committee be charged with the responsibility of ensuring the carrying out of any approved plans in respect of the foregoing matters;

(*f*) To formulate a plan whereby competition between employers engaged on the war program may be eliminated;

(*g*) To formulate a plan whereby employees and employers may be transferred from non-essential to essential war industries with the least possible disruption; and

(*h*) To report from time to time as may be necessary to a Committee of the Cabinet on Labour Supply, consisting of the Minister of Labour as Chairman, the Minister of Munitions and Supply, the Minister of National Defence, the Minister of Finance, and the Minister of National War Services.

Regulations to prevent enticement of skilled labour in war production

By the provisions of an Order in Council (P.C. 6286) issued on November 7 the Dominion Government has prohibited the "enticement" of skilled labour engaged in war production. (Reference was made in the LABOUR GAZETTE for October, page 998, to the appeal of the Minister of Labour in this regard.)

This action resulted from a report of the Minister of Labour that it was considered necessary "to promote the orderly employment of labour and to the end that the production of munitions, war equipment and supplies may not be hampered and, without limiting the individual rights of the workers, to prevent employers endeavouring to entice to their service those who are already engaged in the production of munitions, war equipment and supplies, by advertisement, or other form of solicitation."

The regulations to prevent enticing of workers established by Order in Council under the authority of the War Measures Act are as follows:—

1. No person, firm, corporation, or agent thereof shall

(*a*) advertise in any newspaper, periodical or magazine,

(*b*) write, send or publish any letter, circular or notice, or

(*c*) display any poster, placard or other writing or document conveying to the public any information

for the purpose of engaging or employing anyone for service in any industrial or manufacturing establishment, or having reference to employment therein or designed or intended to induce any worker or employed person to enter the employment of any such person, firm or corporation, without inserting in clear type in any such advertisement, letter, circular, notice, poster, placard or other writing or document words to the following effect:

"Applications will not be considered from persons in the employment of any firm, corporation or other employer engaged in the production of munitions, war equipment, or supplies for the armed forces unless such employee is not actually employed in his usual trade or occupation."

2. No person, firm, corporation, or agent thereof shall directly or indirectly solicit by word of mouth any person to enter his employ who is at the time engaged in the manufacture of munitions, war equipment, or supplies for the armed forces, unless such employee is not actually employed in his usual trade or occupation.

3. Every person who contravenes or fails to comply with any provision of these regulations shall be guilty of an offence and shall be liable on summary conviction to a fine not exceeding five hundred dollars.

Appointment of General Advisory Committee on Rehabilitation

On December 8, 1939, there was constituted by Order in Council (P.C. 4068½) a Special Committee of the Cabinet (under the chairmanship of the Minister of Pensions and National Health) to give "early and thorough consideration" to questions which will arise from the demobilization and discharge of members of the Canadian forces, and the rehabilitation of such members into civil life.

Under the provisions of its establishment this Special Committee was empowered to appoint Advisory Committees selected from the personnel of Government Departments or agencies. Accordingly, by Order in Council (P.C. 5421) there was established on October 8, a General Advisory Committee composed of the following members:

Chairman, Chairman of the Canadian Pension Commission.

Vice-Chairman, Chairman of the War Veterans' Allowance Board.

Members—

Chairman of the Civil Service Commission.

Deputy Minister of Labour and two other members nominated by the Minister of Labour.

Deputy Minister of Public Works, and one other member nominated by the Minister of Public Works.

Director of Auxiliary Services, Department of National Defence, and two other members nominated by the Ministers of National Defence.

Two members nominated by the Minister of Agriculture.

Deputy Minister of Pensions and National Health, and two other members nominated by the Minister of Pensions and National Health.

Two members nominated by the Minister of Finance.

One member nominated by the Minister of Trade and Commerce.

The duties of the General Advisory Committee are to take into consideration those matters assigned to the Special Committee of the Cabinet and to submit reports and recommendations thereto respecting plans formulated. The General Advisory Committee is empowered to appoint various sub-committees which may be selected from the personnel of Government Departments or agencies, and to appoint as members of the sub-committees recognized experts outside the Service.

Non-application of hours limitation in special defence projects

In order to provide accommodation and training facilities for men called in pursuance of the National Resources Mobilization Act, the construction of a large number of buildings at each of the training centres became urgently necessary.

To meet this requirement, an Order in Council (P.C. 3947) was passed providing that the working hours of the persons employed on such construction be not subject to "the limitations set out in paragraph (b), subsection (1) of Section 3 of the Fair Wages and Hours of Labour Act, 1935, Chapter 39 of the Statutes of Canada, 1935."

The pertinent clause of the Act which is thus made non-applicable is as follows:

> (*b*) The working hours of persons while so employed shall not exceed eight hours per day nor forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the minister.

That part of the Order in Council providing for the non-application of the above Clause (*b*) in the Fair Wages and Hours of Labour Act is as follows:

"His Excellency the Governor General in Council, on the recommendation of the Minister of Labour and pursuant to the provisions of paragraph (b), sub-section (1) of Section 3 of the said Fair Wages and Hours of Labour Act, 1935, and under and by virtue of the War Measures Act, Chapter 206 Revised Statutes of Canada, 1927, is hereby pleased to order, and to provide as a special case, that the provisions of the said paragraph (b), sub-section (1) of Section 3 of the Fair Wages and Hours of Labour Act, 1935, shall not apply to persons employed on the construction of the buildings and Defence Projects to be constructed at the several places set out in the Schedule hereto annexed and at such other places as may be designated by the Minister of National Defence as locations for training centres or troop concentrations."

There were thirty-nine training centres and three defence projects designated in the schedule.

Additional municipalities under rent control of Wartime Prices and Trade Board

In the October issue of the Labour Gazette, page 995, reference was made to an order of the Wartime Prices and Trade Board pegging the rents in certain designated areas in Canada at the levels of January 2, 1940, effective on and after October 1.

Since the "standstill" order was issued a further order (No. 8) of the Board extends and makes the original order applicable to the following additional municipalities:—

(a) the Townships of McDougall and Foley in the District of Parry Sound, in the Province of Ontario;

(b) Saanich and Oak Bay, in the Province of British Columbia.

Rentals Committees are being established in various centres in districts under the "standstill order".

Authority to fix maximum butter prices given Wartime Prices and Trade Board

The Minister of Labour, Hon. Norman McLarty, announced on November 12, that by Order-in-Council the Wartime Prices and Trade Board has been given authority to fix maximum prices for butter in Canada. He added that this Order had been made on recommendation of the Wartime Prices and Trade Board.

Following the Minister's statement, the Board confirmed that during the past two weeks it had been making a detailed check on butter holdings, and had been watching closely the price and supply position.

In its representations which resulted in the Order-in-Council the reasons set forth by the Board for securing this authority are as follows:—

"That a continual upward trend in butter prices during the past six weeks has given rise to widespread concern on the part of consumers;

"That the concern of consumers regarding prices is shared to a considerable extent by producers on the ground that the rapid increase in prices has occurred since the close of the period of major production and the transfer of the bulk of the product to distributors and speculators;

"That enlarged national income is reflected in increased consumption of butter at a time when it appears that Canadian production, particularly in Ontario and Quebec, is lower,

and reserve stocks are smaller, than in the corresponding period in 1939;

"That the present prospect is that, by the end of March next, the combined Canadian production and reserve of butter may be insufficient for anticipated requirements;

"That continued increase in the prices of butter may so stimulate its production as to prejudice the continued production of cheese, the price of which is virtually fixed by reason of the arrangement with the United Kingdom Government respecting the supply of large quantities to that country."

That, for these reasons, it is deemed to be in the national interest that approval be given to the exercise by the Board of the power to fix from time to time the maximum prices or maximum markups at which any butter may be sold or offered for sale;

Now, therefore, the undersigned recommends that, pursuant to powers conferred by the War Measures Act and otherwise, Your Excellency in Council do approve the exercise by the Wartime Prices and Trade Board of the power to fix from time to time the maximum prices or maximum markups at which any butter may be sold or offered for sale.

Statistics of Relief Recipients for September

The grand total of all classes of persons on urban and agricultural relief across Canada in September of this year showed a reduction of 26·6 per cent from August, and 49·9 per cent from September a year ago, according to figures released by the Department of Labour. The grand total for September, as shown by the preliminary results from the registration of all direct relief cases carried out for the Department of Labour by the provinces and municipalities, stood at 270,000. This total represented a decrease of 65·1 per cent from the peak figure of the year which occurred in the month of March; in September, 1939, the decrease from the peak month of that year was 47·5 per cent, while September, 1938, showed a 47·0 per cent decrease from March, 1938.

Unemployed but fully employable persons on relief in September this year numbered 52,500, a decrease of 33·6 per cent from the revised August total. The figure for September this year showed a decrease of 58·1 per cent from September a year ago, and a decrease of 54·2 per cent from September, 1938. From the peak figure of 172,683 in March of this year, the September total of fully employable persons was down by 69·6 per cent.

A total of 249,000 persons were receiving non-agricultural relief in September, a decrease of 22·6 per cent from the corrected figure for the previous month: September, 1939, had shown a decrease of 10·2 per cent from August, 1939. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a decrease of 49·1 per cent from the figure for September, 1939, and a decrease of 44·0 per cent from the figure for September two years ago. In relation to the high month of 1940, the September total on urban relief showed a decrease of 61·6 per cent.

The Dominion total on agricultural relief continued to show a major decline from the year before, following improved crop conditions in 1939 in the Prairie Provinces. A total of 5,000 farmers who, together with their dependents, accounted for a farm population of 21,000, were reported as receiving agricultural relief for subsistence in September; this total indicated a decline of 83·9 per cent from the high month of this year. The Dominion total on agricultural relief in September decreased by 54·2 per cent from the revised August figure, and was 58·0 per cent less than September, 1939, and 80·7 per cent less than in September, 1938. Figures for September, for Saskatchewan alone showed decreases of 61·8 per cent and 88·2 per cent from September, 1939, and from September, 1938, respectively: the Saskatchewan total of 10,000 persons on agricultural relief accounted for 47·6 per cent of the Dominion total in September this year.

Guarantee by Government of Home Improvement Loans Discontinued

Hon. J. L. Ilsley, Minister of Finance, announced on October 23, that Home Improvement Plan loans made after October 31st, 1940, by approved lending institutions would not be accepted for guarantee by the Dominion under the Home Improvement Loans Guarantee Act.

In accordance with the terms of that statute the maximum amount of loans which the Minister of Finance is authorized to guarantee is $50,000,000, and it was believed that by the end of October the total of loans made would closely approach that amount. (From time to time since the inception of the Home Improvement Plan, the LABOUR GAZETTE has periodically recorded the amount and number of loans contracted under the plan.) In view of the necessity of conserving the Dominion's financial resources and because of the ever expanding demands of the war program upon the country's labour supply, the Minister has decided not to ask Parliament for an amendment to the Act increasing the amount of loans subject to Dominion guarantee.

The Home Improvement Plan, which will now be discontinued, was started in November,

1936, (LABOUR GAZETTE September, 1936, page 785; November, 1936, page 988), on the recommendation of the National Employment Commission. It was designed as a measure to relieve unemployment, particularly in the depressed building industries.

"The Home Improvement Plan", said Mr. Ilsley, "has had a striking success. It was one of the most constructive measures taken to solve the unemployment problem. Up to September 30, 1940, loans to a total amount of $48,181,525 had been made, and as at that date losses paid amounted to less than ¼ of 1 per cent of the total loans made, while 62·14 per cent of the amount of money loaned had been repaid by borrowers.

"The Plan, however, has served its purpose, and what the country is now about to face is not the need to create employment, but rather the necessity of mobilizing all available supplies of labour, and particularly skilled labour, to meet the imperative demands of the war program. As the large number of new industrial plants being constructed by the Department of Munitions and Supply are completed, we shall need not only to utilize previously unemployed labour, both male and female, but also to draw increasingly upon labour now employed in the ordinary peace-time industries.

"It is realized that there may still be some demand for loans for the repair and modernization of existing homes, and perhaps particularly for the conversion of large single family dwellings into two or more apartment units, but it is believed that the experience of the private lending institutions with Home Improvement loans has been so satisfactory that they will be willing to take care of any cases of real necessity that may arise without the aid of a Dominion guarantee. If the principles of the Home Improvement Plan are followed, namely that loans are made for productive purposes subject to monthly amortization over a reasonable period of time, with the monthly payment for interest and principal being comfortably within the capacity of the individual borrower, any losses sustained should be of insignificant proportions."

Hospitalization plan of Ontario Hospital Association

At the convention of the Ontario Hospital Association held recently in Toronto, approval was given of an insurance plan providing for the prepayment of hospital expenses for Ontario families. The scheme, as outlined to the convention, will enable families to obtain 21 days' hospitalization for each member of the family at a prepaid premium of $1 a month. The Board of Directors of the Association was instructed to institute the plan as quickly as possible.

In its action, the Association adopted the principle of a report of a committee set up a year ago to consider prepaid hospitalization schemes. The committee suggested a semi-public plan to be applied to employees of companies paying premiums as a group.

The premium was fixed at 50 cents a month for individual employees and 50 cents for the remainder of the employee's family. The plan includes certain maternity benefits 12 months after payments begin.

Appointment of Safety Committee for United States Defence Industries

For the purpose of supervising a program to safeguard the productive manpower of the nation engaged in defence activities, the Secretary of Labour of the United States, Miss Frances Perkins, has appointed eight outstanding industrial safety experts, according to an article which appeared in a recent issue of the *Monthly Labour Review*, official publication of the United States Department of Labor.

The plan was worked out by the Secretary of Labour, safety-promotion experts, representatives of labour, and State and Federal officials and is designed to prevent injury or death of skilled workers; to preclude loss of worktime through sickness, accident, or occupational disease; to prevent delays to production schedules which follow accidents; and to control, as far as possible, factors making workers physically unfit.

The safety experts, who are assigned to eight geographical regions, will bring to industries (particularly smaller units) operating on Government contracts the expertness and efficiency in accident control exercised by the country's largest and best-managed industries.

In announcing the appointment of the Committee, the Secretary of Labour in part, stated:

"In essence, the plan represents the pooling of all accident prevention and industrial health conservation knowledge in which Government, management, and labour participate and share equally in the benefits. Management benefits through uninterrupted and less costly production; labour, by uninterrupted wages and earnings; the Government, by assurance of on-time delivery of needed defense materials."

40-hour work week mandatory in U.S.A.

On October 24, a standard work-week of 40 hours became mandatory in the United States in accordance with the provisions of the Fair Labor Standards Act (LABOUR GAZETTE, July, 1938, page 719, etc.). As passed in 1938 the law required that maximum working hours would be reduced from

44 to 42 on the first and to 40 hours on the second anniversary of the Act. It is required that any overtime above the 40 hour maximum be paid for at the rate of time and one half.

The legislation also provides for the progressive increasing of minimum wages of persons employed in interstate commerce or in the production of goods for interstate commerce from 25 cents to a minimum of 40 cents per hour by October 24, 1945. The first mandatory revision of the minimum wage rate took place last year when it was raised from 25 to 30 cents per hour. In announcing the reduction in maximum hours, Colonel Philip B. Fleming, Administrator of the Wage and Hour Division of the United States Department of Labor stated that the statutory minimum wage rate of 30 cents an hour would remain unchanged. It was pointed out, however, that this does not apply in cases where committees of industry have recommended minimum wages higher than the statutory requirement of 30 cents which became effective on October 24, 1939 (LABOUR GAZETTE, November, 1939, page 1090).

Minimum wage rates higher than 30 cents have become effective through wage orders issued by the Administrator in the hosiery, textile, millinery, shoe, knitted underwear, woollen, knitted outerwear apparel, leather, and pulp and primary paper industries. The minimum wage rates established by wage orders based on recommendations of industry committees in the aforementioned industries range from 32½ cents to 40 cents per hour.

It was estimated that nearly 2,000,000 wage earners in any week of average industrial activity will be affected by the rule of time and a half after 40 hours.

Training of munition workers in Great Britain

A Manual for the guidance of Technical Colleges providing training for workers in the production of munitions has been prepared by the Ministry of Labour and National Service (Great Britain) and issued to local education authorities and other governing bodies of Technical Colleges.

A summary of the manual is published in the British *Ministry of Labour Gazette* as follows:

The Manual states that the Government's munitions program will demand, within the next few months, additional trained workers, both men and women, running to several hundred thousands. To achieve this, the provision for training is being expanded in various directions. The training by employers in their own factories is to be stimulated to the maximum extent possible; the capacity of the Government Training Centres, run direct by the Ministry of Labour and National Service, is being greatly increased; industrial establishments which cannot be engaged on essential work are to be employed for training on behalf of the Ministry; and all available training facilities in Technical Colleges are to be brought into full use.

The training to be given will involve the instruction of persons with no knowledge of engineering processes, and also the provision of upgrading courses for workers who have already attained a certain degree of skill. Which of these kinds of courses should be given will be a matter to be decided in the light of the relative urgency and importance of the needs of industry at any given time, and of the facilities available at particular Training Colleges.

Where it is a matter of training unskilled labour, Technical Colleges will be supplied with a range of standard courses prepared by the Ministry of Labour and National Service. The standard syllabuses provided are intended to be by way of general guidance rather than a rigid framework of instruction, and they can be given a bias, where appropriate, towards meeting the needs of some particular firm or groups of firms whose requirements are of special importance. It will be necessary to test the attainments of the trainees before sending them forward to industrial employment, and standard tests have accordingly been drawn up by the Department, which will be available for the Technical Colleges. These tests also will be regarded as for general guidance and may be adapted to suit the character of the course which has been followed.

While there will be no disturbance of the existing control by local education authorities over Technical Colleges maintained by them, the Divisional Controllers of the Ministry of Labour and National Service will have certain responsibilities in relation to the scheme. In consultation with H.M. Inspectors of schools, they will initiate the provision of courses and arrange for the supply of syllabuses, drawings and tests. Through the Labour Supply machinery and the training section of the Divisional Office they will correlate the supply facilities available in the Division. Through the Inspectors of Labour Supply they will maintain contact with the Technical Colleges at which courses are being provided under the scheme; and they will arrange for the recruitment of trainees and their placing on completion of training.

Double and treble shifting will be introduced as soon as possible after single shift courses have got fully under way. The Manual contains some notes as to the details of the shift-working arrangements and some suggestions, based on the Ministry's own experience in industrial training, as to points which should be covered by the actual instruction.

Elsewhere in this issue will be found two articles dealing with the training of workers for defence industries, one entitled "Training Industrial Workers in Wartime" and the other "The Effective Use of Women in the Defence Program."

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

SIX applications for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From workmen employed by the Canada Creosoting Company, Limited, at North Vancouver, B.C., being members of Local No. 1, Creosote Workers' Industrial Union. Wage increases and certain changes in working conditions are requested by a committee of the union, 230 workmen being directly affected.

(2) From certain factory employees of the Robson Leather Company, Limited, at Oshawa, Ont., being members of Local 205, International Fur and Leather Workers' Union of the United States and Canada. The dispute related to the employees' request for increased wages and various changes in working conditions; also recognition of the union. Approximately 160 employees were affected. As a result of mediation by officers of the Dominion Department of Labour a settlement of this dispute was reached early in November and Board procedure was accordingly rendered unnecessary.

(3) From employees of Martin Transports, Limited, being members of Locals 193, 670 and 21, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America. An inter-union dispute is involved in this case, the applicants claiming that the Canadian Brotherhood of Railway Employees and Other Transport Workers signed an agreement with Martin Transports, Limited, at a time when the majority of the employees were members in good standing of the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America, and that the company has refused to negotiate with the latter organization. The dispute directly affects 325 employees.

(4) From all employees (except office workers) of the Sullivan Consolidated Mines, Limited, at Sullivan, Abitibi, Que. The dispute directly affects 285 workmen. The applicants, who are members of the Miners' Union of Abitibi, Reg., request re-employment of four workmen alleged to have been dismissed on account of union activities. They also request a wage increase of 10 per cent, recognition of the union in negotiations with the company, and freedom in the selection of a medical examiner, provided the practitioner selected by the union be deemed qualified to perform medical examination relating to mining work. A Board of Conciliation and Investigation was established by the Minister of Labour on November 8 to deal with this case, and Board members were appointed as follows: on the employees' recommendation, Mr. Guy Valiquette, of Val d'Or, P.Q.; on the company's recommendation, Mr. Paul D'Aragon, of Montreal, P.Q. Messrs. Valiquette and D'Aragon will confer in an endeavour to agree upon a person for appointment as third member and chairman of the Board.

(5) From 30 hat and cap makers employed by the Rayman Cap Manufacturing Co., at Toronto. The employees are members of Local 47 of the United Cap and Millinery Workers' International Union. The dispute arises out of the company's refusal to renew an agreement with the union which had been in effect during the past year.

(6) From employees of the Toronto-St. Catharines Transport, Limited, and the Direct-Winters Transport, being members of Locals 670 and 21 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers. The application states that 280 employees are directly affected by the dispute, which grew out of the refusal of the companies to negotiate an agreement with the union providing for higher wages and improved working conditions and hours of labour. Shortly after receipt of the application the Department was advised that the dispute involving the Toronto-St. Catharines Transport, Limited, and its employees had been settled through the intervention of the provincial Conciliation Service.

The personnel of the Board of Conciliation and Investigation established on September 30 to enquire into differences between the Atlantic Sugar Refineries, Ltd., of Saint John, N.B., and its employees, being members of the Atlantic Sugar Workers' Union, has been completed. Mr. R. M. Fowler, of Toronto, Ont., has been appointed a member of the Board on the recommendation of the employing company. Mr. Fowler and the Rev. Arthur J. Burns, of Saint John, N.B., the Board member nominated by the employees, being unable to agree upon a person for appointment as third member and chairman of the Board, the Minister has appointed His Honour Judge James Parker, of Toronto, Ont., to the chairmanship.

The Board established during October to deal with a dispute between the McKinnon Industries, Ltd., and the employees in its Heat Treat Department, being members of Local Union No. 199, United Automobile

13569—2½

Workers of America, is also now fully constituted. Mr. L. B. Spencer, K.C., of Welland, Ont., has been appointed a member of the Board on the recommendation of the company, and in the absence of a joint recommendation from Mr. Spencer and Mr. Joseph Bench, of St. Catharines, Ont., the Board member nominated by the employees, the Minister has appointed Captain His Honour Judge C. A. Cameron, of Belleville, Ont., as third member and chairman.

Applications Withdrawn

Two applications were withdrawn during October, a settlement having been reached in each case following mediation by officers of the Dominion Department of Labour. These applications had been received during August from (1) machinists, moulders, shipjoiners and electricians in the employ of the Victoria Machinery Depot Co., Ltd., at Victoria, B.C., and (2) employees of the Vancouver Engineering Works, Ltd., Letson and Burpee, Ltd., Canadian Sumner Iron Works, Ltd., and Ross and Howard Iron Works Co., Ltd., being members of Local No. 1, Moulders and Foundry Workers' Union.

Board Reconvened

The Board of Conciliation and Investigation which dealt with a dispute between the Algoma Steel Corporation, Ltd., and its employees, being members of the Algoma Steel Workers' Union (*see* report in Labour Gazette, August, 1940, p. 779) was instructed on October 9 to reconvene for the purpose of bringing out further evidence which the steel workers' representatives considered desirable and necessary. Subsequently Mr. Charles Beattie, the Board member nominated by the employees, resigned as a member of the Board, and on the employees' recommendation, Mr. J. L. Cohen, K.C., of Toronto, Ont., has been appointed Board member in his stead.

Report of Board in Dispute between Consumers' Gas Company of Toronto and Its Distribution Workers

The Minister of Labour has received a unanimous report from the Board of Conciliation and Investigation established to deal with differences between the Consumers' Gas Company of Toronto and certain of its employees being distribution workers, members of the National Union of Domestic and Industrial Gas Workers.

Members of the board were as follows: Hon. Mr. Justice C. P. McTague, of the Supreme Court of Ontario, chairman, appointed on the joint recommendation of the other two members; Mr. V. A. Sinclair, K.C., Toronto, nominee of the employer; and Mr. J. L. Cohen, K.C., Toronto, nominee of the employees.

The board was successful in persuading the disputants to come to an amicable settlement and its report is accompanied by a signed agreement covering all matters in dispute.

Following are the texts of the board's report and the signed agreement:—

Report of Board

To the Hon. the Minister of Labour,
Ottawa, Ontario.

Re: *Industrial Dispute Investigation Act and re differences between the Consumers' Gas Company and certain of its employees being distribution workers, members of the National Union of Domestic and Industrial—Gas Workers—*

Sir:

The Board of Conciliation and Investigation established in the above matter is now able to make a report concerning the matters in dispute between these parties, as above set forth.

Upon constitution of the Board arrangements were made for hearings and for the submission of briefs and arguments by the parties concerned. Subsequently, on the 17th, 18th and 19th of September, public sessions were held at which these briefs were presented with discussion and argument in support.

Following these public sessions it appeared to the Board that it should be possible to conciliate the dispute and bring about an agreement between the parties on the question of the Distribution Department. We, therefore, invited the parties to attend with us in private session, following which conferences were held between the parties themselves. We are pleased to be able to report that as a result of these efforts and the direct negotiations between the parties so obtained, an agreement has been reached covering all matters in dispute relative to the distribution employees, and we enclose herewith, approved by us in accordance with the provisions of the Act, a copy of the agreement so arrived at, duly signed by all parties. The question of wage is disposed of in the agreement by an increase, in effect, of 5 cents per hour to the employees concerned. Other matters, such as seniority rights, holidays, specifying of working hours, have been adjusted to the mutual satisfaction of the parties involved.

In view of the suggestion that you may consider it advisable to refer to this Board a further question dealing with the Produc-

tion Department employees of the same company, we submit this report to you as an interim report until the Board is further informed in respect to the matter.

We feel that we should like at this date to pay our tribute to the effectiveness and ability with which the parties presented their cases, the sense of responsibility and mutual understanding displayed by them, and to extend our congratulations to the parties upon the fact that they have been able, amicably, to arrive at an agreement mutually satisfactory to them.

Respectfully submitted,

(Sgd.) C. P. McTAGUE,
Chairman.
(Sgd.) V. A. SINCLAIR,
(Sgd.) J. L. COHEN,
Members.

Dated at Toronto this 2nd day of October, 1940.

AGREEMENT

This Agreement made in duplicate this 27th day of September, 1940, between The Consumers' Gas Company of Toronto, hereinafter called The Company of the First Part and The Employees of the Consumers' Gas Company of Toronto, as listed in clause 2 of this Agreement, hereinafter called The Employees of the Second Part.

Witnesseth that the parties hereto agree as follows:—

1. *Duration of Agreement.*

This Agreement shall become effective as to all matters relating to wage payments as of July 15th, 1940, and otherwise as of the date of execution hereof, and shall remain in effect until the 30th day of September, 1941, and thereafter shall be automatically renewed from year to year, unless in any year at least sixty days before the 30th day of September either party shall furnish the other with notice of termination of, or proposed revision of, or addition to, any provision hereof. In such event, negotiations on any such proposal, revision or addition shall take place between the parties within thirty days of such notice. All provisions not so terminated or proposed to be revised or added to, to continue in force and effect.

2. *Scope of Agreement.*

This Agreement covers employees in the departments listed below:—

Group 1. Meter and Commercial Departments—Fitters and Helpers.

Group 2. Meter Repair Department—Meter Repair men, Testers and Helpers, Stove Repair men.

Group 3. Stores and Delivery Departments —Storekeepers, Delivery men.

Group 4. Garage and Mutual St. Building —Auto Mechanics, Miscellaneous Garage men, Maintenance men and Watchmen.

Group 5. Street Departments—Caulkers, Compressor and all Machine Operators and Pipelayers, Service Foremen, Service and Main Repair men.

Group 6. Meter Reading Department—Meter Readers and Lockmen.

3. *Seniority.*

(*a*) Departmental Seniority only will be recognized, and will be based on length of continuous service with the Company.

(*b*) Seniority shall become effective only after an employee has been employed for a period of six months' continuous service, and shall be computed from date of last employment.

(*c*) Seniority lists will be prepared and posted in the respective departments, and a copy be supplied to the Secretary of the Employees' Committee.

4. *Promotion.*

(*a*) The promotion of employees will be determined by the Company, having due regard to the fitness for the position and the seniority of the employee; qualified employees senior in service to be given preference in promotion; seniority to date from time of last entry into the Company's service.

(*b*) Employees who feel that they have been unfairly dealt with in the matter of promotion have the right to appeal as provided in Article 14.

5. *Staff Reduction and Re-employment.*

(*a*) In staff reduction and re-employment the principle of seniority shall prevail and employees last on the seniority list shall be laid off first and re-employed in the reverse order to which they are laid off. (This rule will not apply to special appliance employees.)

(*b*) In the event, however, that there may be a shortage of work in any department, the Company, by mutual arrangement with the Employees' Committee, shall arrange to share the available work among the staff by reducing the number of working hours, provided, however, that no senior employee shall have his hours of employment reduced below thirty-six hours per week.

6. (*a*) Employees who have been laid off because of lack of work, shall not lose seniority when they are returned to work within a period of twelve months.

(*b*) If all employees whose names appear on a departmental seniority list are employed and additional help is needed, preference of employment shall be given to employees who have been laid off, provided they are capable of doing the work required.

7. *Hours of Work.*

	Week Days	Saturdays
Group 1—		
Fitters and Helpers..	9 hours (half hour for lunch)	5 hours

The Committee hereinafter provided for and the Company shall work out a suitable program for specified hours for fitters and helpers in order to avoid staggering of hours, and such arrangement shall include provision that the group will, as to emergency work, in rotation, work one week after 6 p.m. on week days and 1 p.m. on Saturdays, at straight time.

Group 2—		
Meter Repair Dept... ..	(7 a.m. to 5 p.m.) 9 hours	Nil
Appliance Repairs..	8 hours (8 a.m. to 5 p.m.)	4 hours (8 a.m. to 12 noon)

Group 3—		
Stockkeepers, Delivery men	(9 hours (7 a.m. to 5 p.m.)	5 hours (7 a.m. to 12 noon)
Group 4—		
Auto Mechanics and Machine Shop	9 hours	5 hours
Carpenters Painters and Maintenance men	8 hours	4 hours
Miscellaneous Garage men	6 day week of 54 hours	
Watchmen		
Group 5—		
Street Dept.	9 hours	5 hours
Group 6—		
Meter Readers	8 hours (8 a.m. to 5 p.m.)	4 hours (8 a.m. to 12 noon)
Lockmen	8 hours	5 hours

(*a*) Employees called upon to work beyond their regularly assigned hours in any one day shall be paid for such time at the rate of time and one-half. Except for shift work or work regularly performed on Sundays and holidays all work on Sundays and holidays shall be paid for at time and one-half.

(*b*) Employees in Group 6 when required to work beyond their assigned hours will be paid for such extra time at their regular rates of pay.

(*c*) Overtime work shall be evenly distributed among those normally performing the same kind of work.

8. *Holidays*—

(*a*) One week's vacation with pay each year shall be granted to all employees who have been employed with the Company one year or over.

(*b*) All such employees shall be granted the following legal holidays without loss of pay, namely:

New Year's Day	Civic Holiday
Good Friday	Labour Day
Victoria Day	Thanksgiving Day
Dominion Day	Christmas Day.

(*c*) When a holiday falls within an employee's vacation period such employee shall be granted an extra day vacation.

9. *Rates of Pay.*

Present rates of pay to be increased five cents per hour as follows:

	Per Hour
Group 1—	
First class fitters	65c.
Second " "	60c.
Third " "	55c.
Helpers—after 18 months	50c.
Helpers— " 12 "	45c.
Helpers— " 6 "	40c.
Helpers—to start "	35c.
Group 2—	
Meter Repairers	55c. to 65c.
Repairers on big meters	55c. to 65c.
Meter Testers	55c. to 65c.
Helpers—after 18 months	50c. per hour
Helpers— " 12 "	45c. " "
Helpers— " 6 "	40c. " "
Helpers—to start "	35c. " "
Stove Repairs	50c. " "min.
Group 3—	Per Hour
Stockkeepers	50c. " " "
Delivery men	50c. " " "
Group 4—	
Auto Mechanics, Miscellaneous Garage men, Maintenance men	50c. " " "
Watchmen	$2.50 per week in.
Group 5—	
Caulkers, Compressor and Digging Machine Operators, Pipelayers, Service Foremen, Service and Main Repair men	50c. to 60c. p. hr.
Group 6—	
Meter Readers, Lockmen.	An increase of 5c. per hour to hourly rates now in force.

10. An employee required to perform the duties of a higher rated position shall be paid the higher rate for the times so occupied.

11. In the event of a serious accident or an emergency, employees shall unite to meet the emergency as directed, and perform such duties as may be required of them, regardless of their regular occupation.

12. Employees called upon to work not continuous with their regular work periods, shall be allowed a minimum of two hours at the rate of time and a half for two hours' work or less, and if held on duty in excess of two hours, time and a half on a minute basis.

13. In departments where 10 or more are employed it will be permissible for notices to be posted, and for a bulletin board to be installed, copies of such notices to be handed by the Secretary of the Employees' Committee to the Company prior to being posted.

14. (*a*) Should any employee believe that he has been unjustly dealt with, or that any provisions of this Agreement have not been complied with, he shall have the right to place the grievance in the hands of the Committee for investigation and adjustment. A grievance relating to an individual worker shall first be taken up by such worker with the superintendent of his department and if not adjusted the complaint to be taken to the departmental superintendent by the employees' shop Steward. The departmental superintendent to render decision as promptly as circumstances permit. An appeal from that decision may be taken up with the Engineer of Distribution, who shall give his decision within reasonable time. Further appeal may then be made to the General Manager or such other official of the Company whom he may designate.

(*b*) Employees will not be disciplined in a manner involving suspension or dismissal without a fair and impartial hearing. At an investigation an employee may have the assistance of one or two members of the Employees' Committee, if so desired, who shall be allowed to offer such arguments as they desire in defence of such employee.

(*c*) In disposing of cases of suspension or dismissal the Manager may decide the case in any one of the four following ways:—

(i) Reinstatement with back pay.
(ii) Reinstatement without back pay.
(iii) Liquidation of claim for a sum of money.
(iv) Discharge.

(*d*) In case of an employee's dismissal for cause, the Company shall give such cause in writing within a period of 24 hours.

15. (*a*) The Company agrees that a Committee composed of and selected by the employees shall be recognized as the authorized representatives of the employees in all matters arising out of this Agreement or any proposed renewal or revision thereof.
(*b*) Representatives of the Company and the Employees' Committee shall meet monthly to consider any matter of mutual interest.

16. Employees required to work beyond the limits of the City of Toronto will be reimbursed for any additional necessary transportation paid for by them.

17. Employees required to report at regular starting time and place for a day's work, when conditions prevent work being performed, are to be allowed a minimum of two hours' pay. If held on duty over two hours, actual time so held will be paid for.

18. Carpenters working under Group 4 shall be supplied with replacement of tools worn out, broken or lost in doing Company work.

19. When transferring employees from one job to another in Company vehicles, suitable covering shall be supplied during inclement weather.

20. Committees of employees shall upon adequate notice to the Company, be granted leave of absence without pay, for investigation, consideration and adjustment of grievances.

21. No discrimination will be made in the employment, retention or conditions of employment of employees because of membership or non-membership in a Labour organization.

In Witness Whereof the Parties have hereto signed,

For the Company
(Sgd.) Edward J. Tucker
(Sgd.) Jacob D. von Maur
(Sgd.) W. L. Powell.

For the Employees
(Sgd.) William Simpson
(Sgd.) Joseph Black
(Sgd.) William Edmiston.
Witness (Sgd.) Thos. B. MacLachlan.

Approved.

Report of Board in Dispute between Canadian Vickers, Limited, and Its Employees in the Machine Shop, Industrial Engineering Department

The Board of Conciliation and Investigation established to deal with a dispute between Canadian Vickers, Limited, Montreal, and machinists, fitters, millwrights, helpers, machine operators, labourers, etc., in its Industrial Engineering Department, has submitted its report to the Minister of Labour.

Members of the board, which was established on September 30, were as follows: Mr. Walter S. Johnson, K.C., chairman, appointed on the joint recommendation of the other two members; Mr. D. A. Paterson, nominated by the employer; and Mr. Joe Wall, nominated by the employees. All three board members reside in Montreal.

The board's report, dated October 29, is unanimous and is accompanied by an agreement signed by both parties to the dispute at the conclusion of the board's sitting on October 28.

Following are the texts of the board's report and the signed agreement:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and of a dispute between Canadian Vickers, Limited (Employer), and its machinists, fitters, millwrights, helpers, machine operators, labourers, etc., in its Industrial Engineering Department (Employees).

To the Hon. NORMAN A. MCLARTY, K.C.,
Minister of Labour,
Ottawa.

The Board of Conciliation appointed by you and composed of Walter S. Johnson, K.C., Chairman, Mr. D. A. Paterson, nominee of the employer, and Mr. Joseph Wall, nominee of the employees, beg to report as follows:

The employer was represented before the Board by Mr. T. R. McLagan, Assistant to the President, and Mr. R. K. Thoman, Superintendent; the employees by Mr. Peter Guay and Mr. Charles E. Clement.

Draft contracts were submitted by each party at the Board's first general session, on October 16, and were carefully considered and compared, section by section, in an effort to find the main points of difference and to debate these with a view to a solution in agreement.

The employees asked a general increase of 10 cents an hour. There was a suggestion that this was justified by an increase in the cost of living.

The employer's submission was that increases had in the past been given consistently and prevailing rates were not out of line with those in the trade; that to grant the demand in all classifications would force the employer to pay wages considerably higher than are current among other companies; and that in coming to any agreement, "time and a quarter" for night shifts, heretofore observed by this employer, must be abandoned, as this rate was not paid by other employers in the Province and prevented competition on an equal footing, to the injury of employees, in lack of continuous work, and of the Company in building up a successful enterprise for the good of all concerned. The employer also insisted that an apprenticeship system and a

grading of employees and of wages in certain classifications must be made, to prevent the injustice that an unqualified man should receive the same pay as a qualified one, and to offer an incentive to the less skilled to become more skilled and better rewarded.

It was agreed to adjourn to October 17, to enable the representatives of the parties to confer; but upon reconvening it was found that they were still far apart on the employer's proposals. A further adjournment was made to October 21. On that date, a draft agreement prepared by the Chairman, incorporating the uncontested points of previous submissions by the parties, and offering certain suggestions for overcoming difficulties, was fully discussed, but without arriving at the unanimous agreement which in fact all parties desired. A further adjournment, to enable more private discussion, was made to October 28, when the employer submitted a redraft incorporating all points of agreement to date, including those arrived at during the adjournment, and leaving open for discussion minimum rates for labourers, and a final decision on classifications.

The Board is greatly pleased to be able to report that a unanimous agreement was signed at the conclusion of the sitting of October 28, 1940—a copy of which is enclosed.

It is impossible here to do justice to the courtesy, patience and broad vision with which the views of both parties were presented. A sincere effort was made by both, each with a knowledge of the peculiar problems of the other, to reach an agreement which would relieve immediate necessity, extend the period of profitable employment, do injustice to none and substantial justice to all, maintain that atmosphere of goodwill which, as was freely admitted, has always marked the relations between shop and management in this plant, and in the result help toward peace in industry.

The agreement is a credit to those who made and signed it. It is a golden mean between groups whose views do not always coincide, but whose interests are the same—peace and goodwill, that both may live, and survive. Its successful operation now depends upon goodwill, honesty of purpose, fairness of interpretation, co-operation, loyalty to the idea of a common purpose.

The Board feels constrained to make this further comment in the general interest.

If great confusion is not to result, there must be enforced at once a strict stabilization of wages throughout the country. As it is now, any recommendation by a Board, and any agreement, is jeopardized by the unceasing competition for labour. It was stated at our sessions that already other companies in this district engaged in war work are offering higher minimums and higher wages than those provided in the agreement just reported to you, and that men are being as a result drawn away and plans for output are disorganized. It is natural that in a free labour market, workmen are entitled to go where wages are highest; yet they go without much, if any, thought for the dangers lurking in artificially high wages and unconsidered spending.

If rents and commodity prices can be stabilized as a vital war measure, wages can and must be equally stabilized, or rents and commodity prices will become unmanageable in spite of attempts at regulation. If all three are stabilized, no one is worse off than before, and the menace of a great national and international financial collapse due to inflation, is at least intelligently met.

In the absence of such stabilization all along the front of our war effort, Boards of Conciliation are like stopping with one's finger one hole in a crumbling dyke. Due largely to the efforts of the War-time Prices and Trade Board, the cost of living in the first year of war advanced only 5·1 per cent. Meanwhile, and particularly in the last few months, wages have been increasing, due to unbridled competition and a widespread feeling that if higher wages are forced upon employers the Government will stand the gaff, and at the moment are beginning to outdistance any increased cost of living. Sight is lost by employees of the fact that the extra wages must be taken back in taxes, and that 75 per cent of corporation excess profits are also taken back in taxes. Wages and prices must by stabilization be kept in a fairly adjusted and from time to time revised equilibrium.

It is our belief and hope that responsible labour leaders wil co-operate loyally with the Government in such a plan so clearly in the national interest.

The whole respectfully submitted.

(Signed) Walter S. Johnson,
Chairman.

Member.

Montreal, Oct. 29, 1940.

October 28th, 1940.

AGREEMENT

Between Canadian Vickers, Limited and Employees of the Machine Shop, Industrial Department, Canadian Vickers, Limited.

This agreement shall be effective as from the 1st day of October, 1940, and shall continue from year to year thereafter subject to thirty days' notice in writing from either party

desiring to make a change in any of its provisions.

The purpose of the agreement is to establish and maintain harmonious relations between the management and the employees, to stabilize conditions of employment, and to ensure the smooth and efficient running of the plant without interruption.

Clause 1.—Working Hours:

Regular working hours shall be as follows:—
Monday to Friday, inclusive:
Day Shift.. .. ..7.30 a.m. to 12 noon.
1.00 p.m. to 5 p.m.
Day Shift Saturdays..7.30 a.m. to 12 noon.
Monday to Friday, inclusive:
Night Shift.. .. .7.30 p.m. to 12 midnight
12.00 a.m. to 6 a.m.

Night Shift hours will be subject to change by agreement, to suit special circumstances. Also, provision may be made to operate three (3) eight-hour shifts if, as and when men are available.

Clause 2.—Overtime:

(*a*) All time worked in excess of regular working hours on any one shift shall be considered as overtime, and shall be paid for at the rate of time and one-half;

(*b*) All work performed on Sundays and Statutory Holidays shall be paid for at the rate of double time. When any Statutory Holiday falls on a Sunday, the day proclaimed by the Government shall be observed; these holidays are specifically as follows:—Christmas, New Years, Dominion Day, Labour Day, Good Friday, Victoria Day and Thanksgiving;

(*c*) The night shift on the two shift basis and the 12 midnight until 8 a.m. shift on the three shift basis will receive the regular day rate plus five cents per hour.

Clause 3.—Classification of Employees:

(*a*) Journeymen: are men skilled at their particular trade, as hereunder mentioned, and comprising:—

I. Machinists: who have a thorough knowledge of machine shop practice and are proficient in the handling of lathes, milling machines, shapers, grinders and planers; who are able to read working drawings, and to understand and use precision instruments; and who have a practical knowledge of the physical properties of materials and their heat-treatment.

II. Toolmakers: who are Machinists as above defined, and who, in addition, can make jigs, fixtures, dies and tools from drawings or samples.

III. Lay-off Men: who are Machinists as above defined, but are specially skilled in the reading of drawings and the transferring of such information efficiently.

IV. Fitters: who can read drawings and use precision instruments under limited supervision, who can chip, file, scrape and assemble and line up components of machinery in a satisfactory manner.

(*b*) Machine Operators and Production Workers:

Class A: men expert in the use of a particular machine who can work from drawings under supervision; or do bench work.

Class B: men not so expert and requiring more supervision;

on the understanding that the present personnel coming within the general classification shall be at once graded, but in such a way that no present employee shall suffer a reduction in basic wage rates as established by this agreement.

(*c*) *Apprentices*: It is intended to group men now known as Apprentices and Improvers, under the general classification of Apprentices, to be graded as First, Second, Third and Fourth Year Apprentices; on the understanding that the present personnel coming within the classification shall be at once graded but in such a way that no present employee shall suffer a reduction in basic wage rates as established by this agreement.

(*d*) Cranemen: men licensed to handle an electric crane, and being either;

Class A: Experts, capable of rapid handling of heavy loads; or

Class B: men not so expert;

on the understanding that the present personnel coming under the general classification shall be at once graded, but in such a way that no present employee shall suffer a reduction in basic wage rates as established by this agreement.

(*e*) Slingers: men experienced and capable of slinging work, and being either:

Class A: experts, capable of rapid slinging safely, of heavy loads;

Class B: men not so expert;

on the understanding that the present personnel coming within the general classification shall be at once graded, but in such a way that no present employee shall suffer a reduction in basic wage rates as established by this agreement.

(*f*) Millwrights: men capable of dismantling, repairing and assembling various machines; of hanging and lining up shafting; and of maintaining belts, shafts, machines, etc.

(*g*) Oilers: men thoroughly capable of oiling and greasing machines and repairing belts.

(*h*) Learners: A learner shall be an employee who has completed six months employment as a beginner. A learner shall be so classified for a period of six months from the date of his transfer from classification of a beginner, and at the end of that time shall either be classified as a Production Worker Class B or discharged. The Company may, at its discretion, promote or discharge a learner at any time prior to the expiration of the said period of six months.

(*i*) Beginner: A beginner shall be an employee who has no previous workshop experience in the kind of work on which he is engaged. An employee hired as a beginner shall be so classified for a period of six months from the date of his employment and at the end of that time shall either be classified as a learner or discharged. The Company may at its discretion, promote or discharge a beginner at any time prior to the expiration of the six months.

Clause 4.—Minimum Rates of Pay:	Cents per hour
(*a*) Journeymen—Machinists	75
" —Toolmakers	80
" —Lay-off men	80
" —Fitters	75
(*b*) Machine Operators and Production Workers.	
Class A	60
Class B	50
(*c*) Apprentices:—	
I First Year	30
II Second Year	40
III Third Year	55
IV Fourth Year	65
(*d*) Cranemen:—	
Class A	58
Class B	50
(*e*) Slingers:—	
Class A	58
Class B	50
(*f*) Millwrights	68
(*g*) Oilers	45
(*h*) Labourers and helpers	
(*i*) Learners	40
(*j*) Beginners	30

Clause 5.—Grievances.

Any employee who feels that he is being unjustly treated, shall place his complaint in writing, and hand same to a member of the Shop Committee, whereupon the Shop Committee shall study the nature of the employee's complaint, and if in their opinion the complaint is valid, the Committee shall request the management to remedy the complaint, and the matter shall if necessary be proceeded with as provided in Clause 8 hereof.

Clause 6.—Seniority.

Seniority of employees shall be established after sixty days' continuous employment, and shall date from the time of entering the service. When reduction of staff is necessary, senior employees shall be given the preference, ability however being the deciding factor. In case of any hardship or injustice arising out of staff reductions, the Company agrees to discuss such cases with the Shop Committee.

Clause 7.—Recognition.

(*a*) The Company agrees that the Shop Committee, which must consist of employees of the Company, shall be the sole bargaining agency in respect to its employees, so long as the Committee represents a majority of the employees covered by this agreement.

(*b*) No employee shall be discriminated against, nor jeopardized in seniority standing, nor suffer any loss of employment because of activity in the meetings or the Committee, so long as such meetings or activities are not carried out during working hours.

Clause 8.—Disputes.

(*a*) The settlement of all disputes or grievances arising out of the application of this agreement shall be negotiated between the Management and the Shop Committee, but outside regular working hours.

(*b*) In the event of a disagreement when no settlement is reached, the matter in dispute shall be first submitted to a committee of three (one from the Shop Committee, one from the Company, and a third by choice of the other two, who shall be chairman). For the sake of harmony, the decision of this committee will be given special consideration as reasonably settling the dispute; but if there is still serious dispute, the Dominion Minister of Labour shall be requested to refer it to a Conciliation Board under the Federal Industrial Disputes and Investigation Act, in the expectation that the Board's decision can be loyally accepted by all parties.

For Canadian Vickers, Limited,
(Sgd) R. K. Thoman.

Montreal, October 28, 1940.

For Machine Shop Employees Industrial Department, Canadian Vickers, Limited,

Report of Board in Dispute between the Canadian Pacific Railway Company and the Canadian National Railways and their Freight Handlers on the Montreal Wharf

The Board of Conciliation and Investigation established to inquire into differences between the Canadian Pacific Railway Company and the Canadian National Railways, on the one hand, and their freight handlers employed on the Montreal Wharf, on the other hand, has reported to the Minister of Labour.

The report of the board is signed by the chairman, His Honour Judge J. J. Coughlin, of Windsor, Ontario, and the board member nominated by the employees, Mr. J. L. Cohen, K.C., of Toronto. The other board member, Mr. Frederick T. Collins, K.C., of Montreal, nominee of the employers concerned, submitted a minority report.

The texts of the majority and minority reports are given below.

Report of Board

To the Honourable the Minister of Labour, Ottawa, Ont.

In the matter of a dispute between the Canadian Pacific Railway Company and Canadian National Railways (Employer); and their freight handlers on the Montreal Wharf being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Employees).

1. The Board of Conciliation and Investigation appointed by you to investigate the above dispute beg to report that sessions of the Board were held at Montreal on August 22 and following days whereat the parties to the dispute were represented as follows:—

The Employees by Mr. F. H. Hall, Vice-President, and Mr. W. A. Rowe, General Chairman, of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

The Canadian Pacific Railway Company by Mr. George Hodge, Manager of Personnel Department, Mr. E. D. Brydone-Jack, Assistant Manager of the same Department, and Mr. R. W. Scott, Superintendent of Montreal Terminals.

The Canadian National Railways by Mr. F. W. Edge, Superintendent of Personnel, Mr. P. E. Ayrhart, Staff Inspector, Personnel Department, and Mr. F. J. Connolly, Superintendent of Montreal Terminals.

2. A preliminary canvass of the situation led to the conclusion that no results would be attained by endeavours to bring about a compromise agreement between the parties and therefore the hearing of the dispute on its merits was proceeded with.

3. Very complete briefs with accompanying exhibits were presented on behalf of the men and each railway, supplemented by oral explanation and argument.

4. In the course of the proceedings the Board, accompanied by representatives of all parties, spent a day in inspection of the work performed by freight handlers at the Montreal wharf, by longshoremen on the wharf and on board ship, and by freight handlers at Bonaventure freight sheds.

5. This dispute arises out of the request of the Canadian National and Canadian Pacific Companies' Montreal wharf employees for an increase in wages of 12 cents per hour and for revision of graded wages for checkers.

6. The application for the Board discloses that in respect to the Canadian National 250 employees are affected, all male, of whom 50 are under 21 years, and that as to the Canadian Pacific Railway 300 employees are affected, of whom 50 are under 21 years. In the hearings before us these figures were approximately confirmed. The employees are composed of truckers, checkers, and related categories, all generally designated under the term Montreal wharf freight handlers.

7. The substantial portion of this dispute deals with the question of wage increase and this question, in turn, divides itself into two branches:—

(1) The request of the men for an increase of 4 cents per hour, being the balance of a 7-cent increase recommended to be paid by a Conciliation Board report dated 11th October, 1938, and hereinafter referred to as the Claxton Report, of which increase only 3 cents was put into effect by the railways.

(2) The request of the men for a further increase of 8 cents per hour based on the fact that the wages of longshoremen employed by steamship companies at the harbour of Montreal have recently been increased by 8 cents per hour, the contention of the men being that the Claxton Report fixed 20 cents as the maximum differential that should exist between the rates for wharf freight handlers and longshoremen at Montreal and that the same increase is required to maintain the same differential.

8. In their brief the men reproduce portions of their submission to the Claxton Board on the wage questions involved, which submissions are practically identical with those submitted to the present Board and which may be summarized as follows:—

(1) That Montreal is a seven-month port; that employees at the close of navigation have to take a chance of getting a job during the winter months, and that in the majority of cases no work is secured.

(2) That prior to 1921 it had been recognized at this port that, owing to the seasonal nature of the work, as well as its intermittent character, there should be paid a wage rate higher than that paid in the local freight sheds where there was year round operation.

(3) That as a result of an unfortunate strike of two or three days' duration in 1921, and which failed, the men had to accept new wage rates of a reduced amount wiping out the differential previously in their favour with respect to freight handlers in the local sheds.

(4) That the question involved is a local question and problem, concerned solely with the question of whether or not the wages of these wharf employees, having regard to the nature of their work and its seasonal and intermittent character, is a just wage, and that it is not a claim for wage increase based upon broader and more general considerations involving questions of cost of living, living standards, prosperity of the employer, increased efficiency of employees, etc.

(5) That the continued payment to these wharf employees of a wage as low (at the time of the Claxton Report) as 50 cents per hour, and so far short of the wage paid to the longshoremen, amounts to discriminatory treatment, having

regard to the fact that these employees and the longshoremen "perform a joint operation".

(6) That in fact during the time when the wage differential between these two groups of workers has broadened, changes have been effected in performing the work of the railway wharf employees due to mechanization, etc., which rendered their work relatively more onerous than that of the longshoremen, as well as adding to the productivity of these workers as compared with the situation previous to such mechanization.

(7) That while these employees recognize that there should be some differential wage rate favouring longshoremen, the basic fact remains that the same conditions surround the work of each and that consequently, in determining a just wage for the wharf employees, regard must be had to the wage being paid to longshoremen.

(8) That failure to recognize this integral relationship as to the work and conditions between the wharf employees and longshoremen creates a situation in the minds of these employees which must necessarily interfere with efficient and economic operation, and that it is not possible to expect one of the two groups of workers, sharing in this close joint manner virtually one operation, and paid at an excessively low rate compared with the other group, to carry on its work in a situation which so constantly manifests itself to them as being unfair and discriminatory.

9. The employees' submission then goes on to adopt, and to support, the reasoning and recommendations contained in the Claxton Report, to which fuller reference will be made by us later. For the purpose of convenience the whole question was argued on the basis of the wages being paid to truckers, this being in numbers the largest group of employees involved, and it being urged that any recommendation as to wage rates would be equally applicable to checkers or other categories involved.

10. Extensive briefs and material were filed by each of the railway companies, but substantially the representations and argumentation is common to both, the difference in the briefs and material submitted arising mainly out of the technical differences in respect to earning figures, numbers involved, etc. These representations are summed up in paragraphs 114 to 147 of the Canadian Pacific brief, and in paragraphs 56 to 72 of the Canadian National brief.

11. The contention of the railways with respect to the wage claim of the employees is substantially as follows:—

(1) That the companies' organized employees, representing in the case of the Canadian Pacific Railway 47,000 and in the case of the Canadian National Railways 60,000 employees, had received increases of pay during the prosperous years of 1926 to 1929; that deductions in the depression years of 1931 to 1939 were effected on the rates established during the previous years, and that the Montreal wharf freight handlers, representing as to the Canadian Pacific Railway Company 350 employees, and as to the Canadian National Railways 300 employees, "are the only employees who have had their rates of pay increased from the rates established under the 1926-1929 conditions, and that they are the only employees who to-day are demanding any increase in rates of pay".

(2) That since the rates of pay with respect to railway employees generally were established during the 1926-1929 period, the cost of living has been reduced, the operating revenues of the companies reduced and the wages of this particular group increased as of November, 1938, by 3 cents per hour (or 6 per cent on the then prevailing rate); and that while, as a result of the greater purchasing power of the dollar in these years, as compared with previous years, the real wages of all railway employees have been increased by about 15·3 per cent, the real wage of these employees, by reason of the 3-cent increase given them in November, 1938, has increased 22 per cent.

(3) That the increase of 3 cents per hour given to the Montreal wharf freight handlers in November, 1938, brought their rate of pay up to the level of the winter port of Saint John, and that, this levelling having been effected, no further increase should be granted.

(4) That as a result of increased business volume, as well as the 3-cent increase in November, 1938, the earnings of the wharf freight handlers for 1940 will be in excess of those earned by them for the season of 1938 or 1939.

(5) That the basic rates of pay of the Montreal wharf freight handlers are favourable as compared with those in effect for railway employees in a number of other classifications who perform services alleged by the railways to be as important and at least equally arduous as that of freight handlers, a portion of whom are also within the category of seasonal and intermittent workers.

(6) That it is not usual for railway employees to base a claim for wage increase upon rates of pay in effect in other industries, but that, in fact, the rates actually being paid to the Montreal wharf freight handlers, if compared, not with the wages of longshoremen, but with other classes of "labour" services in other industries, would be found to be higher than those rates.

(7) That the rates of pay of Montreal wharf freight handlers are already closer to the level of rates paid railway wharf freight handlers in the U.S. Atlantic ports than are the rates of pay of Canadian railway workers generally to the corresponding classes of railway employees in the United States.

(8) That the differential at the New York port between railway wharf employees and the longshoremen is even greater than that which prevails at the Montreal port.

(9) That the reasons leading to or upon which was based the 8-cent increase granted by the Shipping Federation and

the Gillanders Report in 1940 to longshoremen are not relevant to the conditions or considerations applicable to railway employment.

(10) That any further increase in the wages of this specific group, notwithstanding its local character, might have the effect of inviting similar moves for wage increases on the part of railway workers generally which, having regard to the number involved, would have serious consequences both for the companies and for the public.

12. It seems to us that the questions raised before us are precisely the questions that came before the Claxton Board, and in dealing with them the same arguments are used by the parties.

13. The Board ventures at this point to set out certain conclusions which we are satisfied have been established, namely:—

(1) Wage agreements with practically all groups of union employees were negotiated by the railways in the period 1927-1929.
(2) This was a period of high revenue for the railways and high cost of living for their employees.
(3) As compared with that period the present day levels of railway earnings and of cost of living are both down.

14. In establishing these wage schedules the relative position of one group to the other, as well as wage schedules in other industries for comparable work, would be, we presume, and it is so contended by the companies, among the matters taken into account.

15. While we are satisfied that considerations of the above nature were important actuating factors in producing the ultimately agreed on terms of the wage agreements reached during this period, it does not necessarily follow that unfair inequalities of reward may not exist as between different groups, either to-day or for that matter at the very time when the agreements were arrived at. We think, however, that the onus of establishing such inequalities should be on the party alleging it.

16. Complaints of such inequalities were made by the employees in question herein before the Claxton Board in 1938, and reasserted in approximately identical terms before this Board and are embodied in the statements set out above (see paragraph 8).

17. We now come to the question as to what should be the attitude of a subsequent Board of Conciliation to the findings of fact and recommendations for action of a prior Board when they are both called upon to deal with the same subject matter. The proceedings before the subsequent Board are in the nature not of an appeal, but of a rehearing in which further evidence and new arguments may be advanced.

18. The object of the statute instituting Boards of Conciliation was to provide a tribunal whose decision would put an end to a dispute which could not be composed between the immediate parties. It was hoped to thus allow them to resume normal relations and permit the vital industries of the country to perform their functions and to avoid the great waste of economic power and loss of workers' income involved in strikes and lockouts.

The attainment of these ends is a result of tremendous importance to both capital and labour and also to whatever other portion of the general public may not come under these two heads.

It thus seems to us that the findings of one Board should not be lightly over-ridden or modified by another. Only where new evidence discloses an error in the previous findings of fact, or where there has been evident application of a wrong principle or some other cause clearly invalidating the previous decision should, in our opinion, the right of revision be exercised.

19. We have carefully gone through the Claxton Report, filed as Exhibit 1 in the employees' brief. We have examined in particular its findings that:—

(1) The rates payable to wharf freight handlers at ocean ports are governed by special agreements arrived at in the light of local as well as of more general considerations.
(2) The settlement of the Montreal wharf freight handlers' rates should be dealt with by this Board as a local question.
(3) Among the factors to be considered should be:—
  (*a*) The nature of the work.
  (*b*) The conditions of employment.
  (*c*) The rates paid for comparable work.
  (*d*) In considering rates paid for comparable work the wages and conditions of work of the longshoremen at Montreal and of the freight handlers at the Montreal railway sheds should be a guide to the Board.
  (*e*) The seasonal nature of their employment distinguishes the work of the wharf workers from shed workers.
  (*f*) The railways should be willing to pay to men of experience employed at the wharf throughout a seven-months' season a higher hourly rate of pay than that paid to men at city sheds engaged in all-the-year-round work of a somewhat less onerous nature.
  (*g*) The work of the wharf freight handlers is somewhat less laborious and considerably less dangerous than the work of longshoremen.
(4) That for these reasons a proper addition was made to the hourly rate of wharf freight handlers of 7 cents.

20. Having so considered the above findings we express our positive concurrence with findings Nos. 1, 2, and 3.

With respect to No. 4 we do not dissent. It may be that the increase should be less. It may be that it should be more. It is a recommendation of a properly constituted Board, logically arrived at, and based on properly found facts, and as such should stand. We therefore adopt it as our finding and recommend that the further increase of 4 cents be allowed. It is our opinion and recommendation that this rate take effect as of the date of this report.

This disposes of the first branch of the employees' request.

21. We now proceed to deal with the second branch. On behalf of the men it is contended that since the making of the Claxton Award, and as the result of proceedings had before a Conciliation Board of which Mr. Justice Gillanders was Chairman, an agreement was entered into early in the present season under which the steamship companies operating out of the Port of Montreal granted an 8-cent per hour war bonus to longshoremen, and that to maintain the differential contemplated by the Claxton Award a corresponding increase should be given to these employees.

22. It is our opinion that we have not been furnished with reasons which enable us to concede this request. Our reference to the basis on which the Claxton Award and our own was arrived at indicates that, while the wage of longshoremen is one of the factors to be taken into account in determining the wages of the railway wharf employees, it is only one of several factors. The Board itself in its report stated that it wished to make clear:—

> "That, in recommending an increase, it is actuated primarily and principally by consideration of the peculiar situation which now exists in ocean shipping and which may be expected to continue, or even to become accentuated, during the continuance of the current hostilities."

We have not been furnished with any material which would indicate that the reasons supporting the Gillanders Report apply in this instance and, in fact, some of the matters mentioned, as for instance the increase in ocean shipping rates not paralleled by any corresponding increase in railway freight rates, would suggest that these reasons were not applicable to the situation under review.

23. Special and temporary conditions in the ocean shipping industry, one of which is referred to in paragraph 22 and others of which are generally referred to in the Gillanders Report, may very well have constituted a sufficient reason for the war bonus then given. That in itself would not warrant, in our opinion, disturbing at this time the wage rates of Montreal wharf employees in relation to shed freight handlers and other related groups in the railways as brought about by the Claxton Report and our own confirmation of the same.

24. We regard the closest possible maintenance of the existing level of the cost of commodities and the closely related cost of living during war time as of vital importance to the nation. The danger of unduly disturbing the economic position by wage adjustments appreciably affecting such costs should not be incurred except to remedy manifest and serious injustices.

25. We, therefore, for these reasons, disallow the second branch of the employees' request.

26. A further matter referred to us is the request of the men that first and second year rates for checkers be eliminated. This request arises out of the fact that there are at the present time, in respect to both companies, three categories of checkers: junior checkers, who are paid a rate of 50 cents per hour; intermediate checkers, who are paid a rate of 60 cents per hour; and senior checkers, paid at the rate of 63 cents per hour. On the implementing of our report with respect to wages each of these rates will be increased by 4 cents. We understand that the junior rate applies for the first year, and that thereafter, that is, after one year, a checker is transferred to the intermediate group, but that the senior group is, by agreement between the parties, limited to a fixed number at one time of fifteen to twenty-four, and that transfers from the intermediate group to the senior group only take place, on the basis of seniority, as openings occur in the top group.

27. The original request of the men as set out in the application and in the brief submitted to the Board was for complete abolition of graded rates, all checkers to receive the senior rate. During the course of the hearings this was revised by the men to a request that the junior rate remain as to checkers with one year's experience or less, but that transfers take place from the intermediate group to the senior after three years' service instead of, as now, only when openings in the senior group occur. The situation which would prevail if this revised proposal of the men was granted would be as follows:—

1. A junior group of checkers with less than one year's experience.
2. An intermediate group of checkers with more than one but less than three years' experience.
3. A senior group composed of all checkers with more than three years' service.

28. The number of checkers involved are, as to the Canadian Pacific Railway, 5 junior, 18 intermediate and 24 senior, and as to the Canadian National Railways, 30 junior, 12 intermediate and 24 senior checkers. All of

the present intermediate group have more than three years' service as checkers.

29. The companies contest this request. Apart from their general opposition to any wage increase they state that when the fixed quota of senior checkers was agreed upon it was accompanied also by an arrangement that this group of senior checkers, although hourly rated employees, would be treated for holiday purposes as monthly rated employees, and they contend that any change which would add to the group of checkers who were to enjoy this holiday privilege would destroy the basis of the original arrangement.

30. It is admitted that checkers employed by the companies in local freight sheds are on a monthly rated basis and that the reason for the hourly, instead of the monthly, rating of the Montreal wharf checkers, arises out of the fact that they work on a 10-hour day basis with an allowance of an extra 5 cents per hour for overtime work, as compared with the 8-hour day, time and a half for overtime, the basis upon which the local freight employees, in common with other railway workers, are employed. We do not feel that by the terms of the reference to us we have any jurisdiction, however, to deal with the question of whether or not this holiday privilege, enjoyed by all monthly rated employees, should be extended beyond the previously fixed quota of 24. There was a suggestion made at the hearing that the matter was one which might be taken up by direct negotiation between the parties. Having regard to the fact that our recommendation in paragraph 20 will, when implemented, yield a wage increase of 4 cents an hour to all these classes, we deem it advisable to refrain from making any recommendation on this count.

31. We cannot too strongly express our appreciation of the complete co-operation we have received from all parties, of the commendable manner in which they conducted themselves, and of the marked ability with which their respective cases were prepared and presented. We include in this our thanks to those who so effectively and courteously arranged for, and assisted, our view of the work at the port and at the local sheds.

Respectfully submitted,

(Sgd.) J. J. COUGHLIN,
Chairman.

(Sgd.) J. L. COHEN,
Member.

Montreal, September 12, 1940.

Minority Report

Mr. Collins' minority report also commences with a summary of the claims of each party to the dispute, and then continues as follows:—

The question of the rate of wages which should be paid to employees by their employers is one which goes deep into the root of our social system, because in its very essence the success or failure of our system of democracy depends in such large measure on the mutually happy and peaceful relationship of employer and employee and in turn that relationship depends on a satisfactory scale of wages and working conditions. Democracy is essentially based on justice and upon the recognition of the rights of man whether he be an employee or an employer and it is only by continuance of the recognition of those rights that democracy can hope to survive against the threat of totalitarianism. Democracy has been replaced in Europe by a totalitarian form of government which has totally destroyed the rights of the working man and the rights of labour unions in all countries where that new system exists. It has reduced the working man, to a large degree, to the position of a serf and has destroyed in a few years rights which it took centuries to gain. It has in most cases reduced the employer to the position of an employee of the government. Consequently, in Canada, which remains as one of the strongholds of democratic liberties, it has become increasingly important for all persons to observe with justice and clarity the rights of the employee and the employer in order to preserve for all of us and for posterity the system in which we believe and under which we have lived so happily for so many years.

I am strongly of the opinion that it is not therefore the duty of the Board to decide the question on sympathetic grounds or on the ground that the railways are large companies with large revenues and can afford to pay this small increase to this small group of employees, and that any increase paid to such employees by the railways is a "mere drop in the bucket" when compared to total railway revenues. The responsibility of this Board is the greater because it is a Board constituted in war time, and in war time, particularly in this war, it is so very important to be able to maintain all transportation, industrial, commercial and business activity at its peak at all times, to ensure that Canada's war effort will always be at its maximum. Consequently, it is obvious that any Board of this kind should approach the questions placed before it on at least a scientific, logical and practical basis and method to find out whether the employees are or are not entitled to any increase in wages, and with such a basis

and method the following essentials should be at least considered carefully:—

(*a*) The relation between wages and the cost of living;

(*b*) The scale of wages paid for similar kinds of work in other industries;

(*c*) The hazards of the employment;

(*d*) The training and skill required;

(*e*) The character and regularity of the employment;

(*f*) Whether the earnings of the railways have increased to such an extent that the employees are entitled to a greater share in those earnings by reason of the part that they play in the making of those earnings;

(*g*) The effect that any increase or decrease in wages will have on other wages to railway employees and on other wages and industries and on production generally.

Bearing in mind the foregoing essentials, I propose to examine and discuss the many facts, statistics, documents and arguments presented at length by the parties as follows:—

(a) *The relation between wages and the cost of living*

The employees claim in their brief that the cost of living had nothing to do with their claim, and they presented no evidence or arguments upon this matter, except to state that it had increased slightly over 5 per cent, but they stated specifically in their brief in rebuttal: "It may be said that we have not argued the increased cost of living as justification for the wage adjustment asked. If we thought there was justification from that standpoint, we would probably seek a wage increase for all freight handlers." The admission of the employees that there was no justification for an increase from the cost of living standpoint in effect disposes of any basis of claim upon that standpoint, and it is unnecessary, therefore, to discuss it further, except to say that both railways dealt fully with this matter upon that point and presented charts which showed that the cost of living as of June, 1940, was 13·3 per cent below the cost of living for the so-called prosperous years of 1926 to 1929, whereas the real wage for the Montreal Wharf freight handlers had increased in June, 1940, 22·3 per cent over the years 1926 to 1929. It is clear, therefore, that the cost of living is substantially under the cost of living in the prosperous years 1926 to 1929 and the wage rates now paid to freight handlers, which are 6 per cent over the wage rates paid in 1929, have a real wage value equivalent to 22·3 per cent over their value in 1926 to 1929. Consequently, as admitted by the employees, there is no justification for an increase in wages on the basis of the cost of living. Consequently (as stated by Professor W. A. Mackintosh, Director of the School of Commerce and Administration at Queen's University, in a paper read by him at a conference on industrial relations held at Kingston, Ontario, in April, 1940, as follows: "With regard to wage rates in the opposite category, namely, in which the purchasing power is greater than in 1929, the burden of proving whether the increase was justified on grounds other than a rise in the cost of living would rest on the recipients of such wages"), it is therefore evident that the employees must establish their claim on some other basis than any increase in the cost of living.

(b) *The scale of wages paid for similar kinds of work in other industries*

The employees really based their whole claim (apart from their claim with regard to wages due to checkers) on the fact that longshoremen receive a much greater wage than wharf freight handlers for work which the employees claim to be similar, and that therefore while the employees admit that there are grounds for the differential between the wages paid to longshoremen and to wharf freight handlers, they claim that the differential presently existing is too great in favour of the longshoremen, so that really the employees' claim resolves itself into an examination of the work and wages of longshoremen and wharf freight handlers. The claim of the employees to the 4 cents an hour increase is based on the Claxton Report, which recommended a 7 cent increase, and the increase claimed before the Claxton Board was claimed because in 1938 the longshoremen had received an increase of 12 cents an hour. The employees claimed before the Claxton Board a similar increase of 12 cents an hour, and that Board recommended an increase of 7 cents an hour, and by subsequent negotiation the employees agreed to accept a 3 cent an hour increase. They are now claiming the difference of 4 cents an hour between the 3 cents an hour which they voluntarily accepted and the 7 cents an hour recommended by the Claxton Board. In addition, the employees are claiming a further 8 cents an hour, being the equivalent of the 8 cents an hour increase granted to the longshoremen this year as a special war bonus.

The members of this Board inspected the operation of longshoremen and wharf freight handlers at Montreal on Wednesday, September 4, 1940, and not only paid visits to the various freight sheds but visited many ships, to observe at first hand the operation performed by the 2 different classes of employees. While it is true in large measure that the 2 groups of employees handle the same type of goods, materials, supplies and merchandise (except steel rails and similar products which are transferred directly from the wharves to the holds of ships without the intervention of railway freight handlers), the dangers inherent to the work of longshoremen are very substantially greater than the dangers inherent to the work of freight handlers, and that the work of longshoremen is more difficult and arduous there is no doubt in my opinion.

The work of wharf freight handlers is in practically all cases, with perhaps some minor exceptions, performed on the level, their duty being to take freight out of railway cars and to place it on the floors of freight sheds, a good part of which work is performed with the assistance of mechanical equipment, whereas the work of longshoremen requires that this freight be taken from the floors of freight sheds and deposited in many cases deep in the holds of ships. The physical effort to place such cargo exactly where it is required to be put in the hold of a ship, in order that the cargo may be properly packed for a long sea journey to prevent it from sliding, is most difficult and, in addition, very dangerous, because longshoremen must work deep in the holds of ships and receive heavy freight and cargo which is lifted down to them by cranes. Trucks and other conveyances cannot be used in the holds of ships to place the cargo where it is required to be put, and longshoremen must, in many cases, use their physical strength to accomplish what is in many cases accomplished by wharf freight handlers by means of mechanical equipment.

The employees admit that there is no objection to the principle that longshoremen should receive greater wages than freight handlers, but they say in effect that the differential now existing of 32 cents an hour between the 85 cents an hour paid to the longshoremen as against 53 cents an hour paid to wharf freight handlers is too great. In this connection the railway companies filed statements which show that the differential existing between the longshoremen's rates and wharf freight handlers' rates elsewhere is even greater. For example, longshoremen in New York receive in the day time $1.10 an hour and wharf freight handlers receive 58 cents an hour. In Montreal, longshoremen receive in the day time 85 cents an hour and wharf freight handlers receive 53 cents an hour, so that in New York there is a differential of 52 cents an hour in the day time between what longshoremen and wharf freight handlers receive, whereas in Montreal that differential is only 32 cents an hour, a difference of 20 cents an hour. In New York, longshoremen between 7 p.m. and 11 p.m. receive $1.65 an hour, whereas longshoremen in Montreal receive 95 cents an hour for the same period, but wharf freight handlers in New York receive the same rate of pay, that is, 58 cents an hour as during the day time, while in Montreal wharf freight handlers receive a 5 cent increase, that is, 58 cents an hour for work done between 7 p.m. and 11 p.m., which brings them exactly to the New York rate for that period. Consequently, as compared to New York, which is one of the largest ports in the world, and in which conditions are fairly similar to the conditions in Montreal, wharf freight handlers receive a night rate exactly equivalent to the night rate paid wharf freight handlers in New York and receive a day rate of only 5 cents an hour less than the rate paid in New York, whereas the difference between the wages paid to longshoremen in New York over the wages paid to longshoremen in Montreal is very much greater, being 25 cents an hour in the day as against only a difference of 5 cents an hour in the day between wages paid to New York freight handlers and Montreal freight handlers, and a difference of 70 cents an hour paid to longshoremen in New York between 7 p.m. and 11 p.m. as against the amount paid to longshoremen in Montreal during the same hours, whereas freight handlers in Montreal receive exactly the same pay as freight handlers in New York during those hours.

The railways submitted a memorandum showing the comparison of the basic rates of longshoremen as against the basic rates paid railway dock freight handlers in New York City for the years 1914 to 1940 inclusive, which shows that the basic rate of longshoremen always exceeded that of the freight handlers by a large amount, except in two years, 1914 and 1916, when the differences were 8 and 5 cents respectively. This memorandum reads as follows:—

COMPARISON OF BASIC RATES OF LONGSHOREMEN AS AGAINST RAILWAY DOCK FREIGHT HANDLERS, NEW YORK, YEARS 1914 TO 1940

	Longshoremen	Railway dock freight handlers	Amount longshoremen over railway dock freight handlers
1914	0.33	0.25	0.8
1915	0.35	0.25	.0.10
1916	0.35	0.30	0.5

1939	1.05	0.58	0.47
	1.10 Dec. 1	0.58	0.52
1940	1.10	0.58	0.52

The railways further claim that the basic rate of pay of freight handlers in Place Viger and Bonaventure freight sheds of the Canadian Pacific Railway and the Canadian National Railways, respectively, is 50 cents an hour, and that already wharf freight handlers receive 3 cents an hour over local shed freight handlers for work which is exactly similar. It is my opinion that there is very little, if any, difference between the work done in the Bonaventure shed, which the Board examined, and the work done by the wharf freight handlers in the sheds which the Board examined. The railways submitted a statement showing the rates of pay of freight handlers for the years 1913 to 1940, which read as follows:—

RATES OF PAY OF TRUCKERS

Year	Montreal wharf	Place Viger	Bonaventure
1913	25c.	19c.	19c.
1918	43c.	43c.	43c.
1921	57½c.	55c.	55c.
1922	47½c.	49c.	49c.
1923	48c.	48c.	48c.
1924	48c.	48c.	48c.
1927	50c.	50c.	50c.
1932	50c.—45c.	50c.—45c.	50c.—45c.
1934	42½c.	42½c.	42½c.
1935	45c.—44c.	45c.—44c.	45c.—44c.
1936	45c.	45c.	45c.
1937	45c.—48c.	45c.—48c.	45c.—48c.
1938	48c.—50c.	48c.—50c.	48c.—50c.
1940	53c.	50c.	50c.

The above table shows that the rates paid at Place Viger and Bonaventure sheds to freight handlers were exactly the same as the Montreal wharf from 1918 up to the year 1938, with two exceptions, one in 1921, when the wharf freight handlers received 2½ cents an hour more, and again in 1922, when the Place Viger and Bonaventure shed freight handlers received 1½ cents an hour more, there being some wage changes in that year.

On November 1, 1938, the employees received a 3 cent an hour increase as a result of negotiations arising out of the Claxton Report. Furthermore, the railways claim that the rates of pay of employees engaged by leading industries in Canada in loading and unloading cars, which is exactly the same work as done by wharf freight handlers, is considerably less, and also the railways claim that the rates of pay in other industries are less for other work similar to that done by the wharf freight handlers. The rates of pay quoted by the railways in their brief as being wages paid by leading industries to employees engaged in loading and unloading cars varied from 33 cents an hour to 42 cents an hour and, in the case of one industry, to 50 cents an hour. The railways submitted a memorandum showing rates of pay paid to civic employees classified as labourers.

Rates of pay of civic employees classified as labourers, as published in "Wages and Hours of Labour," issued as a supplement to the Labour Gazette in March, 1940.

Place	Rate per hour	Hours per week	Remarks
Quebec	40c.	48	It is understood that some special classes of municipal labourers are paid as high as 45c. per hour.
Three Rivers	35c.	48	
Westmount	40c.	54	
Montreal	35c.—40c.	48	

The railways also claim that the rate paid to wharf freight handlers was very favourable as compared to the prevailing agreed rates of pay paid in other classes of railway service for work at least as important and quite as arduous, if not more so, than that of freight handlers, and quoted the following examples:—

	Per Hour
Enginehouse ashpitmen	43c.—44c.
Engine cleaners	41c.—43c.
Enginehouse labourers	41c.—43c.
Coach cleaners	44c.
Car yard labourers	41c.
Track sectionmen in classified yards, including Montreal terminals (after 2 years' service)	45c.
All other track sectionmen (after 2 years' service)	43c.
Bridge and building department labourers (after 2 years' service)	43c.

The railways claim that they have many thousands of employees engaged in the foregoing occupations.

In addition, the railways submitted a memorandum showing wages under Dominion Government contracts in and close to Montreal, all of which wages, with three exceptions, those of tractor and hoist operators and pipefitters, were below (in some cases substantially so) the level of 53 cents an hour paid to wharf freight handlers, as follows:—

Labour Gazette, June, 1940.

Additional development of Airport, Ottawa, Ont. Name of contractors: Dibblee Construction Co. Ltd., Ottawa, Ont. Date of contract May 9, 1940:

Drivers	45c.
Motor truck drivers	50c.
Labourers	45c.
Tractor operators	55c.

Labour Gazette, June, 1940.

Development work (grading, smoothing, seeding and fencing) at the Airport, Windsor Mills, P.Q. Name of contractors: Union Quarries and Paving, Ltd., Quebec. Date of contract, May 15, 1940:

Drivers	35c.
Labourers	35c.
Motor truck drivers	40c.
Tractor operators	45c.

Labour Gazette, June, 1940.

Construction of steel towers for handling timber at Laurier Pier, Montreal Harbour. Contractor: Canadian Structural Steel Works Co., Ltd. Date of contract, May 6, 1940:

Labourers	40c.
Motor truck drivers	45c.

Labour Gazette, June, 1940.

Construction of an extension (60 ft.) to the Transit Shed No. 27A in Montreal Harbour. Contractor: Canadian Structural Steel Works Co., Ltd. Date of contract, May 6, 1940:

Blacksmiths' helpers	45c.
Compressor operators (gas or electric)	50c.
Firemen, stationary	50c.
Jack hammer operators	50c.
Labourers	40c.
Motor truck drivers	45c.
Pipefitters (surface, temp. work)	55c.

Labour Gazette, May, 1940.

Construction of repairs to Vitre Street elevation, Craig St. Armoury, Montreal. Name of contractors: Sutherland Construction Co., Montreal. Date of contract, March 8, 1940:

Brick and hollow tile layers' helpers	45c.
Fireman, stationary	50c.
Labourers	40c.
Mastic floor labourers	45c.
Motor truck drivers	45c.
Roofers, felt and gravel	45c.
Rodmen, reinforced steel	50c.

Labour Gazette, April, 1940.

Construction of certain dams in St. Lawrence River, between Sorel and Berthierville, P.Q. Name of contractor: Dufresne Construction Co., Ltd., Montreal. Date of contract, March 19, 1940:

Labourers	35c.
Pile driver and derrick men (rigging, setting and signalling)	50c.
Pile driver and derrick firemen	40c.
Pile driver and derrick labourers	40c.
Scowmen	35c.

Labour Gazette, April, 1940.

Construction of a collecting sewer at Quebec City, P.Q. Name of contractors: Pacifique Marcotte, Quebec. Date of contract, March 12, 1940:

Drivers	40c.
Firemen, stationary	45c.
Hoist operators, tower (gas or electric)	55c.
Motor truck drivers	45c.
Pile driver and derrick firemen	45c.
Pile driver and derrick labourers	45c.
Labourers	40c.

Labour Gazette, March, 1940.

Construction of water service and sewerage systems in the annex laboratories of the National Research Council, Ottawa, Ont. Name of contractors: Thomas Fuller Construction Co., Ltd., Ottawa. Date of contract, January 24, 1940:

Construction of a Customs and Immigration Building at Armstrong, P.Q. Name of contractor: Walters Construction and Engineering Co., Quebec. Date of contract, January 23, 1940.

Drivers	35c.
Labourers	35c.
Motor truck drivers	40c.
Firemen, stationary	40c.

In the aircraft industry, in all contracts for aircraft manufacture and overhaul in Eastern Canada, which are awarded by the War Supply Board, the minimum wage fixed for labourers is 40 cents an hour. It is obvious, therefore, that railways pay their freight handlers an amount substantially in excess of the amount paid by other industries in Canada for similar work, and it is a well known fact that railway wages are, comparatively speaking, much higher than wages paid by industry in general, and in fact for the year 1938, the last year for which figures are available, according to figures compiled by the Dominion Bureau of Statistics and published by the Department of Trade and Commerce, the average wages paid to railway employees in Canada exceeded by 38·9 per cent the average wages paid to employees of manufacturing industries in Canada, and this percentage of excess now stands at its highest figure. In 1938 there were 642,016 employees engaged by manufacturing industries in Canada, who received a total of $705,668,589, an average of $1,099 each, whereas in railways in 1938 there were 127,824 employees, who received $195,108,351, or an average of $1,526 a year, so that railway employees received in 1938 on the average $427 more a year than the employees engaged in manufacturing industries. It is estimated in 1939 that each railway employee received an average of $1,551 per year, or an increase of $25 a year over the 1938 average. Consequently, it is readily apparent that railway employees in general receive relatively higher wages as compared to employees in the manufacturing industry, who are equally as important in the industrial picture of Canada, and that wharf freight handlers receive much higher wages than employees in similar occupations in other industries in Canada.

In so far as wages paid to longshoremen are concerned, those wages are admitted by the employees always to have been higher than the wages paid to wharf freight handlers. Comparatively speaking, Montreal wharf freight handlers receive much higher wages when compared to wages of longshoremen in Montreal than the corresponding freight handlers in New York when compared to what longshoremen receive in New York. Moreover, in considering longshoremen's rates in Montreal, it must be borne in mind that the recent 8 cents an hour increase given to longshoremen as the result of the Gillanders Report was given as a special war bonus. As the employees state in their brief, longshoremen are exponents of the principle of "direct action," which explains in large measure the rates of pay which they receive. In any event, the Board presided over by Mr. Justice Gillanders awarded the 8 cents an hour increase as a temporary measure during war time, and stated that "The Board wished to make it clear that in recommending the increase it is actuated primarily and principally by con-

sideration of the peculiar situation which now exists in ocean shipping and which may be expected to continue or even to become accentuated during the continuance of the current hostilities," and that Board stressed the fact "that the increase in wages which it is recommending should be regarded as a war bonus and that, if the Shipping Federation of Canada, Inc., and the constituent companies adopt and execute the proposed new agreement, they will do so, and will in future be recognized as having done so, solely with the object of furthering the public interest in war time by ensuring the harmonious operation of one of the most important seaports in the British Empire."

It should further be borne in mind that railway freight rates have not increased since the war commenced, and are subject to the control of the Board of Transport Commissioners of Canada, whereas ocean steamship rates have increased very substantially. The memorandum submitted to the Board showed increases in ocean freight rates ranging from 63 per cent to 354 per cent on the products and articles mentioned therein. Moreover, all the ships engaged in the ocean trade have been taken over by the British Ministry of Shipping and the Ministry of Shipping pays to the shipowners a rental for those ships calculated on their value, maintenance cost and depreciation. Consequently, the increased wages granted to longshoremen as a result of the Gillanders Report will not be paid by the shipowners but by the British Ministry of Shipping, and therefore by the British taxpayer. Whatever reasons may have actuated the Gillanders Board to grant a war bonus to Montreal longshoremen to ensure the harmonious operation of the Port of Montreal would not apply to the case before this Board, because if the principle of a war bonus is to be applied to railway freight handlers, then the principle of the war bonus must be applied to every employee engaged in every industry in Canada which is in any way connected with Canada's war effort, which would mean that practically every employee in Canada should receive a war bonus.

The work of a railway freight handler in unloading aircraft from a railway car at Montreal into a freight shed is not as important as the work of the employee engaged in its manufacture, and, moreover, that aircraft or its component parts, in its journey from its place of manufacture to the seaport, is probably handled by many freight handlers. In this connection it should be remarked, as pointed out already, that labourers in the aircraft industry receive a minimum wage of 40 cents an hour under contracts awarded by the War Supply Board. Consequently, unless this Board is ready to admit the principle that all employees in Canada who may be engaged directly or indirectly in any industry or business which in any way contributes to Canada's war effort should be granted a war bonus, then there can be no justification for this Board recommending an increase in the rate of pay of freight handlers, because, for particular reasons, it was deemed advisable to grant a war bonus to longshoremen in Montreal, which was payable in fact not by the companies which, as a result of the Report, agreed to grant the war bonus, but by the British taxpayers, who were not represented at the sessions of the Board in question.

It appears clear to me that the wharf freight handlers are well compensated for their work, bearing in mind the wages paid in similar industries in Canada and in local freight sheds in the larger cities of Canada, and bearing in mind the differential existing between longshoremen and wharf freight handlers in New York. How well compensated railway wharf freight handlers are appears from the figures submitted by the railways. For example, the following parties earned on the average the following compensations in the years 1938 and 1939:—

	1938	1939
1st 10 checkers	$1,171 59	$1,265 91
2nd 10 checkers	1,074 89	1,121 28
3rd 10 checkers	941 26	1,039 85
1st 30 truckers	1,027 94	1,118 40
2nd 30 truckers	904 85	992 95
3rd 30 truckers	818 57	903 23
4th 30 truckers	672 90	772 84
5th 30 truckers	532 58	619 66
6th 30 truckers	352 52	464 02

There was also submitted to the Board by the Canadian Pacific Railway Company the following comparative statement for the months of May, 1940, and May, 1939, showing the number of hours worked and the earnings of checkers and truckers on the seniority list at the opening of the seasons of navigation in 1940 and 1939 at the Montreal Wharf:—

	May, 1940		May, 1939	
Checkers	Average hours worked	Average earnings	Average hours worked	Average earnings
1st 10 checkers	373	$251 78	316	$206 03
2nd 10 checkers	350	223 64	309	188 49
3rd 10 checkers	325	208 39	292	177 14
4th 10 checkers	317	192 69	281	168 39

	May, 1940		May, 1939	
Checkers	Average hours worked	Average earnings	Average hours worked	Average earnings
5th 7 checkers	229	149 27(6)	243	145 45
Truckers				
1st 30 truckers	352	202 69	312	173 25
2nd 30 truckers	312	176 70	286	157 83
3rd 30 truckers	292	162 60	271	148 41
4th 30 truckers	273	150 14	249	136 18
5th 30 truckers	246	135 86	206	113 41
6th 30 truckers	216	119 10	162	90 11
7th 30 truckers	159	86 97	109	60 87
8th 30 truckers	119	63 65	72	39 85
9th 29 truckers	52	29 53	27	15 34

The first group of ten checkers made an average of $251.78 in May, 1940, and the first group of 30 truckers made an average of $202.69 in May, 1940, which is high pay for labouring work.

The following checkers and truckers at Montreal wharf made the following average amounts for the months of May, June and July, 1940, as compared to the corresponding checkers and truckers at Place Viger for the same months:—

MAY–JUNE–JULY, 1940, AVERAGE PER MONTH MONTREAL WHARF OVER PLACE VIGER

	Montreal wharf	Place Viger	Montreal wharf	Place Viger	3 mos.	Amount per mo.	Per cent
	Montreal wharf	Place Viger	Montreal wharf	Place Viger	3 mos.	Amount per mo.	Per cent
1st 10 checkers	$664 31	$375 00	$221 44	$125 00	$289 31	$96 44	77
2nd 10 checkers	575 12	375 00	191 71	125 00	200 12	66 71	53
3rd 10 checkers	521 12	375 00	173 71	125 00	146 12	48 71	39
1st 30 truckers	530 12	308 00	176 71	102 67	222 12	74 04	72
2nd 30 truckers	468 29	308 00	156 10	102 67	160 29	53 43	52
3rd 30 truckers	413 46	305 12	137 82	101 71	108 34	36 11	35
4th 30 truckers	369 51	283 54	123 17	94 51	85 97	28 66	30
5th 30 truckers	311 92	245 46	103 97	81 82	66 46	22 15	27
6th 30 truckers	219 27	178 57	73 09	59 52	40 70	13 57	23

The employees contended that the wages of the truckers in the lower groups were not high, but it was pointed out by the railways that the reason that there was a variation in the wages received was because the senior men on the roster were entitled to priority in work, and if they exercised that priority, the junior men were deprived of work, and that the senior men exercised that priority continually. In other words, the junior men only get the work which the senior men do not care or are not able to handle. On the other hand, the longshoremen work in rotation which spreads the work among them.

The Claxton Board stated in its report, "It must be recognized that no change in hourly rates of pay would improve the position of the junior men." This still remains the case because even with the 3 cents an hour increase granted following the Claxton Report, the 9th group of truckers (the last group) were only able to work 52 hours in the month of May, 1940, for an average wage of $29.53 each, while the first group of truckers worked 352 hours in that month for the high wage of $202.69, which, assuming that there were 260 hours of ordinary working time (26 working days at 10 hours a day), meant that each one of the first 30 truckers worked on an average at least 92 hours' overtime, even on the assumption that such truckers worked the full average working time of 260 hours. Even the fourth group of truckers worked at least an average of 13 hours' overtime on the same assumption. Consequently, any increase which this Board recommends only goes to increase the already high earnings of the senior men and will not help the junior men substantially, so long as the senior men, in the exercise of their seniority rights, deprive the junior men of work. What the employees need to right conditions, which they claim are discriminatory, is a change in the agreement between the employees and the railway companies, whereby the wharf freight handlers would work in rotation and not on the principle of seniority, which will even up earnings among all freight handlers and remedy any injustice in the distribution of work and earnings. However, the employees did not place before the Board any question of working conditions, and apparently preferred to keep in force the present seniority system, although the representatives of the railways stated that they had no objection if the longshoremen system of rotation were put in force for freight handlers also. The remedy lies entirely with the employees.

(c) *The hazards of the employment*

The hazards of the employment of a railway freight handler are no greater than the hazards of the employment of thousands of other employees engaged in manual labour throughout Canada and very substantially less than the hazards connected with the job of longshoremen. Moreover no party placed before the Board a claim that by reason of the hazards of employment a wage increase was desired.

(d) *The training and skill required*

It was contended by the employees that the training and skill required by wharf freight handlers was greater than the training and skill required in other occupations. After careful survey of the work done by railway freight handlers I am definitely of the opinion that the training and skill required are no greater than that required in very many similar occupations in other industries in which the wage scales are lower or in local freight sheds of the railways. No particular argument was made by the employees for an increase in wages under these points.

(e) *The character and regularity of the employment*

The employees argued that because the work was seasonal they were entitled to a higher rate of pay than freight handlers who had all-year-round occupation and much argument was addressed to the Board by both parties upon these points, particularly with regard to its regularity. The work of wharf freight handlers is seasonal. It commences with the opening of navigation around the last week of April and it closes around the end of November when the freeze-up of the St. Lawrence River occurs. Consequently the occupation of a wharf freight handler is a seven-months occupation. It cannot be contended therefore, that because a man chooses to engage in a seasonal occupation, such as a wharf freight handler, he should make in a seven-months period an amount equivalent to the amount he would make in a similar occupation with twelve months' employment. If this were the case such an employee would be getting the equivalent of five months' holiday with pay as compared to a freight handler who had an all-year-round job. The question of seasonal occupation is not a new one, and in fact a large number of occupations, not only in railway work but in general industrial activity, are seasonal. For example, the maintenance of way employees who maintain the tracks of the railways are largely seasonal employees who do most of their work in summer. As at December 1, 1939, there were in the Quebec District of the Canadian Pacific Railway Company 1,786 maintenance of way employees on the seniority list, of whom exactly one-half, namely 893, were engaged, whereas on the following May 1, 1940, there were engaged 1,310 maintenance of way employees out of 1,750 on the seniority list. Similarly in the Angus Shops, where railway cars are repaired in the winter season for use in the summer season there were 1,096 employees on the seniority list for passenger carmen, of whom 676 employees were working on February 1, 1940, whereas on the following August, 1, 1940, only 296 were working out of 1,082 on the seniority list.

The question of seasonal employment is, of course, important, but not new. There has been no change in the season or in the nature of the employment of freight handlers since the last increase was granted in 1938 or in fact since freight handlers were first engaged at the Montreal wharf perhaps fifty years ago. The season has always been a seven-months season. The wages for wharf freight handlers have varied from time to time, for example, 25 cents an hour in 1913, 57½ cents an hour in 1921 and now at the rate of 53 cents an hour. The rates in the years 1918 to 1921 were established as a result of various general awards, which only established these rates after extensive investigations, which investigations took into consideration the various factors which went into the payment of a just wage, for example, the Lane Report of April 30, 1918, and the McAdoo Report of May 25, 1918, as well as the reports of the United States Railway Labor Board, most of which were made applicable to Canadian railways. Moreover, since the year 1923 the wharf freight handlers have had wage agreements with the railways, and the first agreement, which is dated the 26th of July, 1923, and which was signed for the employees by Mr. F. H. Hall, who presented the argument for the employees, fixed a wage of 48 cents per hour for freight handlers for day work. This wage of 48 cents per hour represented a small increase over the wage previously paid to employees prior to the agreement. This wage was subsequently raised to 50 cents an hour by agreement, which was made on the 4th of July, 1927, with the Canadian Pacific Railway, and later by agreement made with the Canadian Pacific Railway on the 1st of June, 1930, this wage of 50 cents per hour was continued in force. Similar agreements were made with the Canadian National Railways on or around the same

time. It is important to note that railway freight handlers' wages were fixed at 50 cents an hour in the so-called prosperous year of 1927 and maintained at that rate during the years 1928 and 1929, the most prosperous years in the history of railways in general. Consequently, it must be assumed that if the employees accepted a rate of 50 cents an hour in years when railway wages advanced very considerably and the cost of living was in excess of what it is to-day that that wage must have been adequate in those years, and, of course, as these agreements were the voluntary agreements of the parties involved, they must have taken into consideration all the factors relating thereto, including the seasonal nature of the employment. As the result of the depression that set in at the end of 1929, the wages of freight handlers, along with the wages of all railway employees, were by agreement reduced until in 1934 they were at the rate of 42½ cents an hour, being increased gradually until in April, 1938, the rate of 50 cents an hour was restored, and in November of that year an increase of 3 cents an hour was granted.

In dealing with the seasonal factor, therefore, the following facts are important:—

1. It is apparent that the seasonal nature of the work has been taken into consideration in fixing the present wage scales.

2. Railway freight handlers have worked on the Montreal wharf for over forty years and no change has occurred in the nature of their seasonal employment in all these years and no argument was presented to the Board by the employees that any change in the seasonal nature of the employment had occurred which changed the employees' position in this regard.

3. A very large number of the employees of the railways are engaged in seasonal occupations, some in the winter time and some in the summer time, and the wharf freight handlers are in no worse position than all the other employees of railways who are subject to seasonal fluctuations in their work.

4. Wharf freight handlers have greater opportunities to make more by reason of overtime work than ordinary railway freight handlers engaged in railway sheds who work an eight-hour day and have very little or no overtime. So much is this the case that the figures presented by the Canadian Pacific Railway show that in the months of May, June and July, 1940, the first thirty truckers on the Montreal Wharf earned, on the average, $176.71 per month as against an average amount of $102.67 made by the corresponding first thirty freight handlers at the Place Viger freight sheds of the Canadian Pacific Railway. The checkers were paid a higher rate and the first ten checkers on the Montreal Wharf made an average of $221.44 monthly for the months of May, June and July, 1940, whereas the corresponding ten checkers in Place Viger made $125 monthly for each of these months. Furthermore, the first thirty truckers on the Montreal Wharf made $1,118.40 each for the year 1939, whereas a trucker in Place Viger freight sheds, if he worked full time, that is, 306 days, eight hours a day at 50 cents an hour, would make only $1,224 per year, but a large proportion of Place Viger truckers did not work full time. Wharf freight handlers receive 53 cents an hour and work ten hours a day, whereas railway freight handlers engaged in local freight sheds in Montreal receive only 50 cents an hour and work only eight hours a day, which means that a wharf freight handler receives $5.30 for a ten-hour day as against $4 received by a railway freight handler in the local freight sheds for an eight-hour day. The reason why wharf freight handlers work ten hours a day is to give them an opportunity of making two extra hours' pay per day to compensate for the seasonal factor. In the local freight sheds at Montreal, the freight handlers work only eight hours a day. Consequently, for a day's work a wharf freight handler receives $1.30 a day more than a local shed freight handler, or over 25 per cent more for a regular day's work, so that in seven months a wharf freight handler would receive, in effect, what a Place Viger or Bonaventure shed freight handler would receive if he worked regularly in about nine months' time. In other words, it takes a Place Viger or Bonaventure shed freight handler approximately nine months to make what a Montreal Wharf freight handler makes in seven months, and if the rate of pay is increased to 57 cents an hour, as recommended by the majority report, the Montreal Wharf freight handlers will receive $5.70 a day as against $4 a day for Place Viger or Bonaventure shed freight handlers, which means that they will receive a wage 45 per cent in excess of the Place Viger and Bonaventure shed freight handler, calculated on their working day, which means that in seven months, wharf freight handlers would receive, if they worked ten hours a day in a 26-day month, $1,037.40, that is, $148.20 a month, whereas the Place Viger and Bonaventure shed freight handler would make per month, on the same basis for an eight-hour day, $104 as against $148.20, and it would take him almost ten months straight work on every working day to make the equivalent. This calculation does not, of course, take into consideration any pay

received as a result of overtime work, of which there is much on the Montreal Wharf, as against very little at the local freight sheds. For example, according to Railway Submission number C.P. 19, and on the basis of May earnings, any checker on the Montreal Wharf in the first group of ten checkers would earn in seven months $1,762.46, whereas the corresponding checker in Place Viger would only make in twelve months $1,537.80. On the same basis any one of the first thirty truckers on the Montreal Wharf would make in seven months $1,418.83 as against an amount of $1,279.92 for twelve months by any one of the first thirty truckers at the Place Viger local freight sheds.

5. It is a fallacy to claim that railways should pay sufficiently high wages to their seasonal employees to make up for what they would make for the same work if they worked continuously all year, and if that principle were adopted railways and industries in general would have an impossible and even hopeless financial problem to face. Canada by reason of its extremes of climate is a seasonal country for many industries as well as for many employees and an employer or employee must face seasonal problems.

6. The employees in their brief themselves admit that "The wages of freight handlers, on the other hand, are the result of collective bargaining over many years, in the course of which all basic, underlying and relevant factors had due consideration, including as to wages in outside industries." One of the basic, underlying and relevant factors in any claim for wages in Canada is undoubtedly the seasonal factor. This statement in the employees' brief, therefore, that all basic, underlying and relevant factors had been considered leaves no room for doubt that proper appreciation has been given to the seasonal factor in the wages which are now paid to wharf freight handlers and for this reason alone it does not appear that I am called upon to consider any seasonal factor or the character or the regularity of the employment under all the circumstances.

In this connection it has been particularly pointed out to the Board that rates 3 cents an hour lower than the present prevailing rates were fixed in the years 1926 to 1929, the most prosperous years that Canada ever enjoyed, and in these years the employees voluntarily agreed to accept that scale of wages at a time when living costs were much higher than to-day. It appears proper that the railways have considered that the wages in 1926 to 1929, inclusive, represented a fair wage to an employee for an honest day's work for the occupation in question because those wages were fixed in years when railway revenues were at a peak, when people spent money freely and all sense of real values was frequently distorted. If these scales had been fixed in the years of depression it could be argued that the railways had taken advantage of the depression to fix the scales as low as possible but as the wages were fixed in years of great prosperity it would appear that the employees had received a fair and perhaps generous treatment at the hands of the railway companies, particularly at a time when employers could afford to be generous out of their large revenues. As these wage scales were accepted by the employees voluntarily they must have been fair and just, even in the standards of those days.

(f) *Whether the earnings of the railways have increased to such an extent that the employees are entitled to a greater share in those earnings by reason of the part that they play in the making of those earnings.*

Both the employees and the railways presented arguments on the question of railway earnings, the employees contending that because the railway earnings had increased very substantially in 1940, they were entitled to the increase asked for. The railways, while admitting that the earnings had increased substantially in 1940 over 1939, showed that these earnings were still very much below the earnings for the period 1926 to 1929, when the basic rates of pay for all railway employees, including freight handlers, were fixed. The graphs which were filed by the railways in this connection, and which are annexed to this report as Exhibits number 1 and number 2, respectively, show that in so far as the Canadian National Railways are concerned (Railway Submission—C.N. No. 3) that the operating revenues of that railway stood at the end of 1939 at a point 71·2, as compared to the figure 100 for the years 1926-1929. In terms of dollars and cents, the operating revenue of the Canadian National Railways for the year 1939 was $173,059,119, as compared to an operating revenue of $243,179,850, being the average for four years 1926-1929 inclusive, so that the operating revenue of the Canadian National Railways was down $70,120,731 under the average for the years 1926-1929. The Canadian Pacific Railway figures are somewhat similar and their evidence shows that the operating revenue for the year 1939 was down $68,461,489, compared to the average for the years 1926-1929 inclusive. The year 1940 has seen for both railways a substantial pickup in the operating revenue, resulting almost exclusively from the increased industrial activity caused by Canada's war effort. At the request of the Board, both railways gave details of their operating revenues for the year 1940 to date. It was estimated by

the Canadian National Railways that if their earnings continued to improve upon the same basis that they had improved up to the end of July last, the total operating revenues for the year 1940 would be around $19,000,000 less than the average revenue for each of the years 1926-1929, whereas in the case of the Canadian Pacific Railway, it was estimated on the same basis that the earnings of the Canadian Pacific Railway Company would be over $39,000,000 less in 1940 than the average earnings for each of the years 1926-1929. Both companies stated, however, that it was unlikely that the rate of increase enjoyed up to the end of July, 1940, would be continued for the balance of the year 1940. In any event, for the seven months for which 1940 figures are available, the operating revenues of the Canadian Pacific Railway Company are $26,281,449 below the average for each year of the period 1926-1929 for the same months and the operating revenues of the Canadian National Railways for the first seven months of 1940 were $15,953,765 below the average for the first seven months of each year 1926-1929.

Consequently it is readily apparent that the railway operating revenues for 1940 will be substantially below the years 1926-1929, and therefore no argument can be successfully based on the increase in railway revenue under all the circumstances, particularly as the employees are already receiving 3 cents an hour more for their work than they received in 1926-1929, when the basic rates were fixed. It should be remarked that the figures reported by the Canadian National Railways were figures of their operating revenue from their Canadian lines, whereas the figures presented by the employees' newspaper clippings were figures for all lines, including American subsidiaries of the Canadian National Railways, so that these figures are not comparative under the circumstances. It was not thought necessary to ask the Canadian National Railways to produce their operating figures for all lines, as their representative stated that their all-line figures would reflect the same comparative position.

(g) *The effect that any increase or decrease in wages will have on other wages to railway employees and on other wages and industries and on production generally.*

The employees contended that any increase granted to wharf freight handlers was purely a local matter, which had no relation to railway wages as a whole, and that any increase simply corrected a local inequality. On the other hand, the railways contended most strongly that the wharf freight handlers were paid on basic rates which were fixed in the years 1925 to 1929, that any differential between Montreal Wharf and the winter port of St. John was corrected in 1938, when they were granted a 3 cent an hour increase, and that any further increase in their wages might disturb the whole relationship of wage rates between the wharf freight handlers and the various groups of employees of the two railways, who numbered in all over 127,000. The cases of many of which were indistinguishable from that of the wharf freight handlers in principle and in fact. The employees, in their contention that the wage increase was purely a local matter and had no effect upon other wages, claimed that the differential between the rates paid the longshoremen in Montreal and the rates paid to wharf freight handlers justified their application and that their application was for an adjustment of the rates to correspond with the increase which the longshoremen had received. The increase granted to longshoremen and the reasons therefor, and the differential existing between the longshoremen and the freight handlers, both in Montreal and New York, have been already discussed fully and it is unnecessary, therefore, to discuss this matter further here, except to repeat that the employees have not satisfied me that their claims are well founded on this score.

The employees have failed to establish that any particular local situation exists which justifies an increase. Wharf freight handling is carried on in the many thousands of ports throughout the world, not only in ocean ports but in river and lake ports, and there was nothing brought to the attention of the Board which even attempted to establish that working conditions or any other conditions were more onerous for wharf freight handlers in Montreal than elsewhere. The employees argued that because wharf freight handlers are subject to special wage agreements their case is different from that of local shed freight handlers, but the railways explained that these special agreements were arrived at in view of the fact that the work of wharf freight handlers was seasonal, and these agreements provided for a ten-hour working day at the request of the employees themselves, whereas the local shed freight handlers had only an eight-hour working day. The differentials existing between longshoremen's rates at New York and wharf freight handlers' rates at New York show clearly that, comparatively speaking, wharf freight handlers are better off from a wage point of view in Montreal than wharf freight handlers in New York, when you compare their respective wages to the longshoremen's wages paid in Montreal and New York. The situation is the same in Boston, where wharf freight handlers receive 58 cents an hour, both

day and night, and longshoremen receive $1.05 an hour between the hours of 8 to 5 in the day, and $1.60 per hour for overtime. Before the Claxton Board the employees complained that wharf freight handlers at St. John received 53 cents an hour as against 50 cents an hour received at Montreal and the railways, in the agreement negotiated subsequent to the Claxton Report, raised the Montreal Wharf freight handlers to 53 cents an hour, and consequently any argument on that score exists no longer.

The only cause for complaint that the employees have is that longshoremen receive a greater wage than wharf freight handlers, and while the employees admit that longshoremen are entitled to a higher wage than wharf freight handlers, they claim that the differential now existing is too high, but the facts show that the same differential is still greater in New York City and in Boston as well as in Vancouver. Moreover, 8 cents of that differential in favour of longshoremen in Montreal is accounted for by the special war bonus as already explained, given as a result of the Gillanders Report, and the employees have not shown that they are entitled to any war bonus. The balance of the differential which now exists existed prior to 1938 except 12 cents thereof, this increase resulting from the raise in wages of 12 cents an hour given to longshoremen in 1938. In discussing wages paid to longshoremen in Montreal, the Claxton Report said "The justice or injustice of the rate of 77 cents paid to longshoremen was not in issue in the present reference, and the Board expressly refrains from commenting thereon." It is obvious, therefore, that the Claxton Board did not consider it necessary to inquire whether there was justice or injustice in the high rate paid to longshoremen. It is fundamental, in my opinion, that where employees seek to justify demands for a wage increase by comparison with wages paid in similar occupations, there should at least be some inquiry made as to whether the wage paid in the compared occupation is just or unjust, but the Claxton Board expressly refrained from discussing this important matter or apparently from inquiring into it. Therefore, any argument by the employees based on the Claxton Report in this regard would not be sound. In other words, no evidence was produced by the employees before this Board to show that the local situation was any worse than elsewhere as regards wages, and the railways showed that the local situation was 3 cents an hour better for wharf freight handlers than local shed freight handlers and the equivalent of the situation at the winter port of St. John, and that, comparatively speaking, the position of the wharf freight handlers at Montreal was much better as compared to the longshoremen in Montreal than the position of wharf freight handlers in New York and Boston as compared to the longshoremen in those same cities and those are the comparisons which matter.

Therefore, if any local situation so fails to exist, then the employees can only be entitled to an increase if general conditions, either throughout Montreal, the Province of Quebec or elsewhere, justify such an increase. No efforts were made along these lines to justify an increase. On the other hand, the railways pointed out fully the probable effect of any increase on railway wages in general. In questions of wage increases or decreases precedent is very important, and it is difficult for the parties involved to resist demands for wage increases if it can be shown that a certain class or classes of employees have received wage increases. For example, the employees in this matter base their claims solely on the precedent established by the increase in wages to longshoremen, who belong to the trans-Atlantic shipping industry, an industry which differs from the railway industry, and claimed that irrespective of any other consideration, they are entitled to the same increase because longshoremen received such an increase. Mr. Hall, acting for the employees, stated that any wage increase granted would not be used as a precedent to ask for any further increase for freight handlers, clerks, etc., but the representative of the railways pointed out that Mr. Hall represented only a very small proportion of the railway employees, and any undertaking which he made was not binding on the very vast majority of railway employees, and perhaps not even binding on the employees whom he represented. Any such undertaking cannot, therefore, under the circumstances be taken into consideration. Upon this point it must be again noted that basic rates for all railway employees, including wharf freight handlers, were determined in the prosperous years 1926-1929, and that these basic rates have remained undisturbed since that time, except in November, 1938, when the wharf freight handlers now before us received an increase of 3 cents an hour over those basic rates to bring up the Montreal Wharf freight handlers to the rates paid wharf freight handlers at the winter port of St. John.

In the long proceedings before the Board of Conciliation and Investigation presided over by Mr. Justice A. K. MacLean, it is clear that all parties dealt with the rates fixed in the years 1926-1929 as being the basic rates for railway employees, and those rates were used between the years 1932 to 1938 as the medium for granting increases and for making

reductions. Railways are, perhaps, Canada's largest employers of labour, and there must be some consistency in their wage policy. The haphazard method of fixing wages which was followed many years ago before railway wages were standardized cannot be continued by railways, and it appears important, both from the point of view of the employers as well as that of the employees, that the basic rates established in 1926-1929 should be as far as possible maintained, except where it can be clearly shown that those rates are unfair to any group or groups of employees or to the railways, in which cases adjustments can be made either up or down. Consequently, when basic rates are so in force and effect, the question of an increase or decrease can be considered upon a basis and on principles which are fair to all concerned. Basic rates are designed to value the service of each group of employees to their company. It should be borne in mind that those basic rates have been arrived at in various negotiations between the employers and employees extending well over forty years.

It is unnecessary to discuss at length the arguments presented by the two railways as to the effect of any increase in basic rates, but it is self-evident that if the cost of living is to be kept down, wages of necessity must remain at or near their present levels, because if wages go up, the cost of living will go up, and if the cost of living goes up, wages must go up, resulting in a vicious circle which can only result in the chaotic condition of the Great War years. It is to the interest of all concerned, and particularly in the interest of Canada's war effort, that the cost of living be kept as close as possible to its present level, and as any increase in wages is bound to reflect itself in the cost of living, it is therefore most important to avoid a repetition of what occurred in the last Great War in wages and cost of living, in order to preserve a fair relationship between employer and employee, which will do justice to both of them. The Government of Canada is endeavouring to prevent any increase in the cost of living, but if that policy does not succeed, and if and when wage adjustments are needed to meet increased living costs, they should be dealt with on a broad national basis, which will take into consideration everything which should enter into any such increase, rather than to permit them to be dealt with on a local basis from time to time and in different localities, which can only have disastrous results in the ultimate end. If and when the problem of increased wages for railway workers must be faced, then that problem should be faced by a Board which is competent to deal with the question of an increase for railway workers as a whole, rather than to permit isolated boards to disturb the basic rates already established as a result of recommendations which would have no relation to each other. The evidence produced before this Board clearly establishes that railway workers as a whole are certainly not now entitled to any increase in wages, as their remuneration is already approximately over 38 per cent above the remuneration received by employees in the manufacturing industries in Canada, nor have they asked for any increase.

The railway companies have figured what the increases claimed will cost them in terms of dollars and cents, and they estimate that it will cost the two railways an amount of approximately $132,700 every year based on the 1940 wages paid to freight handlers, and if the same ratio of increase is granted to all other railway employees on the same basis, that the total cost to the railways will be $46,171,000, and it is not difficult to imagine the calamitous effect upon railways that any such increase would have. There must be fairness and justice to the employer as well as to the employee.

In an Order-in-Council passed on the 20th of June, 1940, in which there were laid down certain principles for the avoidance of labour unrest during the war, it was stated:—

> In war time, the safety of the nation must be the first consideration of all patriotic citizens, and no element in the community can be permitted to benefit from war time necessities. The best interests of industry and labour are inseparable, and since organized society alone makes possible industrial production to the mutual benefit of those engaged therein, the needs of the community at large, especially under war conditions, must be regarded as paramount ..... While the causes of industrial unrest have not thus far arisen from the war, they might well be accentuated by it ..... Statutory provisions have been made since the outbreak of hostilities to obviate the making of undue profits on war work, and the operation of the War-time Prices and Trade Board is designed to safeguard the interests of the consuming public against undue enhancement of the prices of the necessaries of life.
>
> The policy is reaffirmed which was previously announced by the Prime Minister of Canada, that the full weight of the Government's power will be exerted to prevent the exploitation of wartime needs by any form of profiteering.

In the conditions laid down it was stated:—

> (2) That fair and reasonable standards of wages and working conditions should be recognized, and that where any temporary adjustments in remuneration are made, due to war conditions, they might well be in the form of bonus payments.

The last increase granted to longshoremen at Montreal was in the form of a bonus payment, being a war bonus, and because a war bonus was given to one group, there is no

reason why another group should get a war bonus on that basis, unless that group can show specific reasons for the granting of such a bonus. In England, under Section 58a of the Defence Regulations, the Minister of Labour and National Service may direct any person in the United Kingdom to perform such services in the United Kingdom as may be specified by the directions, being services which that person is, in the opinion of the Minister, capable of performing, and the same section goes on to provide as follows:—

> Provided that in determining the terms upon which any such services are to be performed the Minister shall have regard to any rates of salary, fees or wages for the performance of those services which appear to the Minister to be usual, and, in particular, in the case of services usually rendered under a contract of service, shall have regard to any determination relating to the remuneration and conditions of service of persons employed in the district in the capacity and in the trade in which the person to whom the direction relates is to serve, *being a determination contained in an agreement between organizations* representative of employers and workers or in a decision of a Joint Industrial Council, conciliation board, arbitration tribunal or other similar body, *or, in the absence of any such determination, shall have regard to the remuneration and conditions of service in practice prevailing among good employers in that trade in the district.*

Montreal Wharf freight handlers are already remunerated 3 cents an hour in excess of railway freight handlers engaged in the Place Viger Shed and the Bonaventure Shed of the railways concerned, and the work of the railway freight handlers in those sheds is exactly similar to the work of the wharf freight handlers and they receive the same rate as wharf freight handlers at St. John. On the principles adopted by England for its war effort, they are well remunerated.

It is apparent that the Government of Canada is doing its best to keep down the cost of living, and for that purpose has made various appointments of boards and commissions designed to control prices, foreign exchange, production, supply and demand. It is deeply concerned that the relationship between industry and labour remain a peaceful and happy one. It has raised the income tax for corporations, and has enacted an excess profits tax under which 75 per cent of the profits of corporations are taxable. The effect of excess profits and other taxation upon industry in general, including railways, has yet to be determined, but in any event the Government has certainly prevented employers from the making of any undue profits in war time. It is also apparent that the Government of Canada, as well as the Government of the United Kingdom, hopes to maintain fair and reasonable standards of wages and working conditions which will maintain war time production and war time services at capacity with justice to all concerned. The Montreal Wharf freight handlers are already benefiting greatly from the increased overtime work received as a result of the increased activity resultng from Canada's war effort and the railways are penalized to the extent of the overtime pay which they have to pay them, which would not have been necessary, if it were not for these exceptional war time activities, in large measure in any event.

On the whole, it appears to be in the interest of all concerned to endeavour to maintain as much as possible the status quo if no injustice is caused thereby, and there is certainly no injustice caused by the maintenance of the status quo in this case.

I have, therefore, come to the conclusion that the employees have failed to substantiate their demands, and cannot recommend any increase.

In connection with the particular claim for increased rate for checkers, it is to be remarked that while for the reasons already set forth no increase of any kind should be granted to checkers, it should be pointed out that the employees in the course of the hearing changed their demands with regard to checkers. The reference which was submitted to the Board by the Minister of Labour asked that the Board report upon the elimination of first and second year rates for checkers, and upon the question as to whether all checkers should receive 67 cents an hour, plus such amount as may be represented by the increase to longshoremen as between their 1939 and 1940 rates, in effect, a further 8 cents an hour increase. The employees desisted from this demand and instead claimed that all checkers after three years' service should receive the same rate paid to top rate checkers, with which claim the majority members of the Board did not agree, for the reasons explained in their report.

In view of the conclusions that I have come to and the fact that the majority members of the Board have not agreed entirely with my conclusions, it is proper to explain the differences of opinion existing between us and the reasons therefor, which I shall now proceed to do.

The members of the Board are unanimous in the following opinions:—

(*a*) That the wharf freight handlers are not entitled to any increase by reason of the 8 cents an hour increase granted to the longshoremen as a result of the Gillanders Report.

(*b*) That the checkers are not entitled to the special increase asked for on their behalf.

The majority members of the Board did, however, recommend a further general increase of 4 cents per hour, with which recommendation I emphatically disagree. As justification for this recommendation, they state that they consider themselves bound by the Claxton Report and recommend the increase solely because the majority members of the Claxton Board recommended the increase, even though they state in their own report that "It may be that the increase should be less. It may be that it should be more." In other words, the majority members of the present Board admit openly that they have not made up their minds whether the employees were or were not entitled to the increase which they recommend, even although they were appointed to determine this very question.

This Board was appointed under the Industrial Disputes Investigation Act to inquire into the claim of the Montreal Wharf freight handlers as to whether or not they were entitled to a wage increase and not to sit as a court of appeal or revision upon the Claxton Report. By Section 26 of the Industrial Disputes Investigation Act the Board was directed to submit to the Minister of Labour its recommendation for the settlement of the dispute according to the merits and substantial justice of the case, and the majority members of the Board treated this matter in their report in the following way:—

> We now come to the question as to what should be the attitude of a subsequent Board of Conciliation to the findings of fact and recommendations for action of a prior board when they are both called upon to deal with the same subject matter. The proceedings before the subsequent Board are in the nature not of an appeal, but of a re-hearing in which further evidence and new arguments may be advanced ..... It thus seems to us that the findings of one Board should not be lightly over-ridden or modified by another.
>
> Only where new evidence discloses an error in the previous findings of fact or where there has been evident application of a wrong principle, or some other cause clearly invalidating the previous decision should, in our opinion, the right of revision be exercised.

In other words, the majority members of this Board have applied to Boards of Conciliation and Investigation under an Act which was passed for the sole purpose of facilitating the amicable settlement of labour disputes, free of legal technicalities, the legal principle of "stare decisis", which means, in effect, to abide by or adhere to decided cases. All Boards of Conciliation and Investigation deal only with questions of fact and there are no questions of law involved of any description. As a passing commentary, it is interesting to note that the legal principle or maxim of "stare decisis" is not applicable in Quebec, where the dispute arose and was decided.

The majority members of the Board have, in my opinion, entirely misconceived their duties in recommending an increase based solely on the Claxton Report. They were called upon to investigate the facts fully and make their own recommendation upon those facts, instead of considering themselves so bound by the findings of the Claxton Report to such an extent that they refused even to come to a conclusion as to whether the increase recommended by the Claxton Report should have been more or less. The importance of this point is that the Claxton Report recommended a 7 cents an hour increase, of which 3 cents an hour was subsequently granted by the railways, so that it is obvious that the majority members of the Board, if they had not considered themselves bound by the Claxton Report, might not have recommended any increase, because if they had decided that the increase which the Claxton Board had awarded should have been less, they might have decided that it should have been 3 cents or less, in which case the majority members of the Board could not have recommended any increase, as the employees had received a 3 cents an hour increase already as a result of the Claxton Report.

The Industrial Disputes Investigation Act has always remained free of legal technicalities and if that Act is to serve the useful purpose which it has served over so many years, it must remain an Act under which Boards of Conciliation and Investigation are free to give their opinions upon the facts submitted, unfettered by the findings and recommendations of previous boards.

The majority members of the Board apparently only intended to sit as a court of revision or appeal, and upon such a legal basis it is obvious, even to a law student, that there would be practically no chance of reversing or changing the report of any Board of Conciliation and Investigation. It is obvious, in my opinion, that the majority members of the Board did not make up their minds on the merits and substantial justice of the case as directed by the Act upon the question as to whether or not the employees were entitled to an increase of 4 cents an hour as claimed. A careful reading of the Industrial Disputes Investigation Act and of the history behind it clearly shows that it was never intended that formal, legal and judicial rules should be binding upon any board appointed thereunder. The Act provides that the Board may accept, admit and call for such evidence as in equity and good conscience it thinks fit, whether strictly legal evidence or not. A lawyer is not permitted to be present except with the

consent of the parties to the dispute, and even then the Board may decline to allow lawyers to be present. The railways pointed out that if the recommendations of the Board of Conciliation and Investigation presided over by the Honourable Mr. Justice A. K. MacLean, President of the Exchequer Court of Canada, had been implemented, the wharf freight handlers would now be receiving a basic rate of 48 cents an hour, instead of a basic rate of 53 cents an hour, and if the majority members of the present board had been consistent, there would have been just as much justification for holding the MacLean Report as binding upon them as the Claxton Report, because the MacLean Board dealt with railway wages in general in Canada, which included the wages of freight handlers, and were in a much better position to decide the whole question of the wage rates because of the many general problems which they faced, rather than the Claxton Board, which dealt only with the claim of one group of railway employees, and which treated that claim as a purely local problem.

In my opinion the majority members of the Board, by considering themselves bound by the Claxton Report, nullified in effect the work of the present Board, because it is obvious from the majority report that the majority members of the Board refused to give any consideration to the many important and weighty arguments advanced by the railways as to why the 4 cents increase should not be granted.

It is interesting to note that the majority members of the Board did not however feel themselves entirely bound by the whole report. The Claxton Report recommended as follows:—

> We think that if an agreement is arrived at it should be for two years and it would of course be subject to any adjustment of general railway wages.

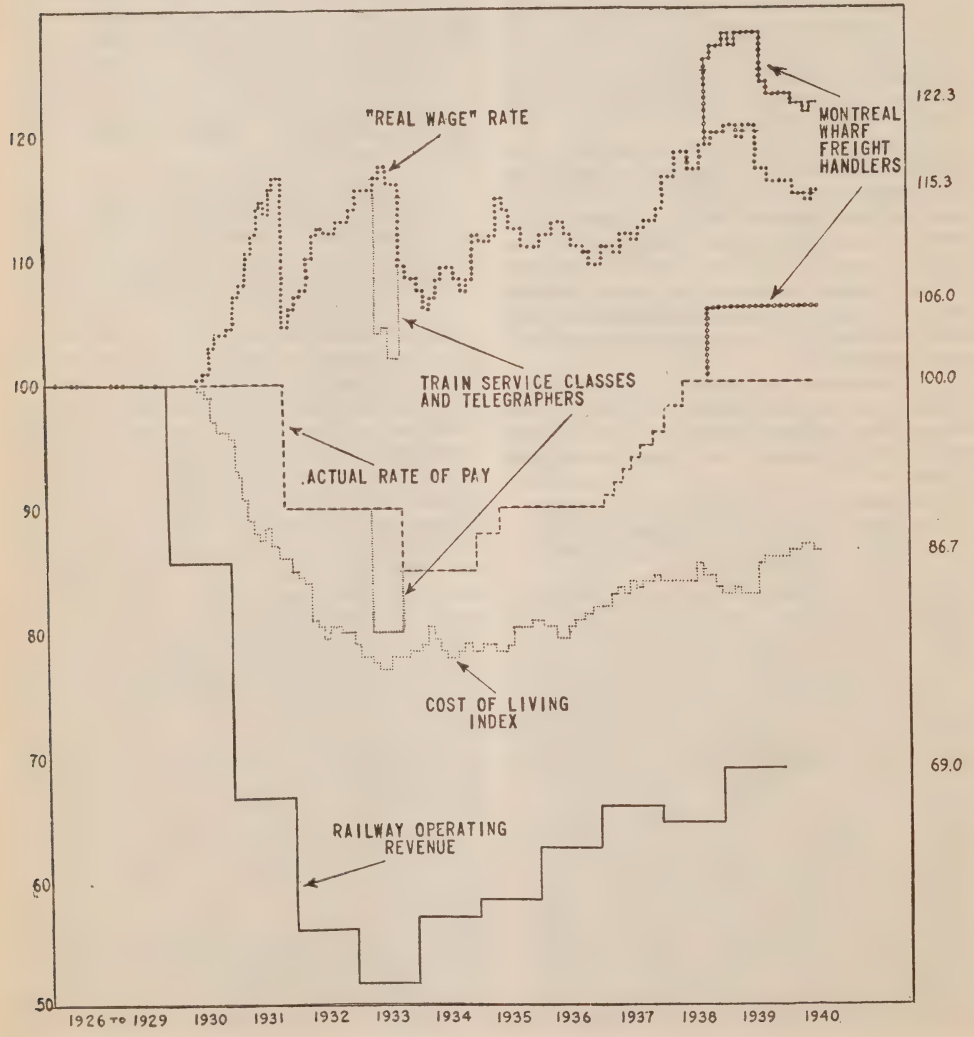
Following the Claxton Report, an agreement was arrived at on November 15, 1938, by which the railways agreed to give an increase of 3 cents an hour to the employees, which the employees accepted, and which agreement was effective on November 1, 1938. The employees served notice upon the railways on the 5th of February, 1940, of their demands for an increase. The agreement, of course, was subject to the usual thirty days' cancellation clause, to which practically all railway wage agreements are subject, but at least it would appear that if the majority members of the Board wished to be consistent in their reliance upon the Claxton Report and in holding that that report, was binding upon them, they should at least have held that the claim of the employees was premature, because the recommendation of the Claxton Board that any such agreement should endure for two years was, to use the words of the majority report in this connection, just as much "a recommendation of a properly constituted board, logically arrived at, and based on properly found facts and as such should stand" as was the recommendation for the 7 cents increase.

It is, therefore, my opinion that the majority members of the Board have made a serious error in considering themselves bound by the Claxton Report and in recommending an increase of 4 cents an hour by reason of their having considered themselves so bound. It was the duty of this Board to make recommendations upon the facts submitted to them, regardless of whether Mr. Claxton was right or wrong in his recommendations. The recommendations of this Board should have been made solely on the merits and substantial justice of the case in accordance with the Industrial Disputes Investigation Act.

Furthermore, the majority members of the Board in disallowing the request of the employees for the 8 cents an hour increase in question which they claimed, expressed the following opinion:—

> We regard the closest possible maintenance of the existing level of the cost of commodities and the closely related cost of living during war time as of vital importance to the nation. The danger of unduly disturbing the economic position by wage adjustments unduly affecting such costs should not be incurred except to remedy manifest and serious injustices.

If the majority members of the Board had been consistent in this opinion, they should at least have satisfied themselves that the present rates paid to wharf freight handlers constituted a manifest and serious injustice before recommending any increase, but, as pointed out already, the majority members of the Board did not attempt to satisfy themselves whether an increase or decrease was or was not justified, but they considered that the Claxton Report was so binding upon them that they were prepared to risk, to use their own words, "the danger of unduly disturbing the economic position by wage adjustments" affecting the cost of commodities and the cost of living during war time, when they were not, by their own written admission, convinced that any such adjustment was required on the merits and substantial justice of the case, even though they regarded that "the closest possible maintenance of the existing level of the cost of commodities and the closely related cost of living during war time" was "of vital importance to the nation."



Since the Claxton Report was made, the Parliament of Canada has passed unemployment insurance legislation which will eventually place further burdens upon employers. It is too early to know what effect such legis-

lation will have upon wages, but it is a matter which both employers and employees must in the future carefully consider in probably all wage problems. The Claxton Board did not consider the matter at all, as the legislation had not at that time been passed. Unemployment insurance is designed to alleviate unemployment. One of the complaints of the employees in this present matter was that by reason of the seasonal nature of their occupation, they were necessarily subject to a certain degree of unemployment in each year and consequently entitled to higher wages. Unemployment insurance should help to alleviate this complaint and if I had come to the conclusion that the employees were

CANADIAN NATIONAL RAILWAYS

Basic rates of pay of all classes of employees whose wages and working conditions are provided by agreement were established in the period 1926-29. During the period 1931 to 1937, deductions ranging from 10 to 20 per cent, calculated on basic rates of pay, were in effect, all of which were gradually restored by April 1, 1938. The basic rates of pay for all employees except the Montreal Wharf employees, whose basic rates of pay were increased 6 per cent November 1, 1938, remain as established in the period 1926-29.

The chart shows the changes in actual rates paid, cost of living "All Items" index, "real wage" rate and Company's railway operating revenues in the years subsequent to the period 1926-29. (1926-1929=100.)

entitled to any increase I should have taken this question of unemployment insurance into consideration in determining the amount of any such increase and the period of time for which it would be applicable. The majority members of the Board did not, in my opinion, give sufficient consideration to this very important matter.

Recommendations

1. As previously stated in this Report, I have come to the conclusion that the employees have failed to substantiate their demands, and cannot recommend any increase in wages.

2. Under all the circumstances, in order that the question of the 4 cents an hour increase to the employees may be dealt with according to the merits and substantial justice of the case and not in accordance with the terms of the Claxton Report, I recommend that an entirely new Board of Conciliation and Investigation should be constituted to determine whether or not the employees are entitled to a 4 cents an hour increase over their present rates on the merits and substantial justice of their case, and that this new Board should be particularly instructed to make its recommendations solely on the merits and substantial justice of the case without considering itself in any way bound in its recommendations by the Claxton Report.

3. I further recommend that the method of applying the seniority system now in force on the Montreal Wharf, in so far as it controls the division of work among the employees, should be abolished and that the rotation system used by the longshoremen in Montreal should be substituted therefor in order to spread work and the earnings more evenly among all wharf freight handlers, so as to avoid any unfairness existing in the situation whereby the senior men receive relatively high wages as compared with the junior men, who, as a result of the seniority system, are deprived of the opportunity for work and consequently for wages. It appears that substantial justice would be done to the junior employees if the employees agreed among themselves to share the work more evenly.

The whole respectfully submitted.

(Sgd.) Frederick T. Collins,
Member.

Montreal, September 24, 1940.

Report of Commissioner in dispute between Courtaulds (Canada) Limited and its Employees, Members of the United Textile Workers Federal Local Union No. 3

A dispute arose in September in the plant of Courtaulds (Canada) Limited, Cornwall, Ont., over the refusal of the company to dismiss an employee whom the union, the United Textile Workers Federal Local Union No. 3, contended should be dismissed for cause. In connection with this dispute a strike of approximately 1,700 employees occurred on September 26, 1940. As the result of mediation by an officer of the Department of Labour work was resumed on the following day on the understanding that the dispute would be the subject of direct negotiations between the parties concerned. These negotiations, however, proved unsuccessful, and, on the recommendation of the Minister of Labour, His Honour Albert Constantineau, Judge of the County Court for the Counties of Prescott and Russell, was, in accordance with Section 65 of the Industrial Disputes Investigation Act, appointed a Commissioner under the provisions of the Inquiries Act to inquire into the said dispute. Both parties undertook in advance to be bound by the recommendation of the Commissioner.

In his report dated October 22, 1940, the Commissioner stated that the dispute "originated and is connected with an alleged assault by one Louis Cinquini, an employee of the company in their mill at Cornwall on one of his co-employees, named Daniel Campbell, aged 17. The facts agreed upon by the company and the union, are that during operations in the reeling department at the plant on September 21, 1940, Campbell, whose work consists of wheeling loaded trucks of rayon yarn in 'cakes', pushed his truck against Cinquini, who was at that time, with his back towards Campbell, engaged in adjusting a reeling machine. The force of the collision knocked Cinquini against the machine, with the result that he was wounded on the head. Cinquini then lost his temper and struck the boy, first with a board, then with the palm of his hand."

The following observations and recommendation are contained in the Commissioner's report:—

"First of all, the offence was of a very mild nature. Young Campbell committed the initial wrong-doing by bumping into Cinquini, through negligence or want of care, since in the absence of evidence to that effect, it cannot be assumed he did it deliberately. Cinquini acted under the im-

pulse of the moment, and apparently without any malice whatever. He struck him with a board three feet in length on the seat of his trousers, and then gave him a slap on the side of the face. No real injury was done to the boy, and had he been prosecuted before a Magistrate, undoubtedly the latter would have taken a very lenient view of the case, and if he had not exonerated him entirely, the fine imposed would have been a very nominal one.

"In the second place, the two parties primarily interested in the so-called assault, were the victim himself and his father. The boy related the circumstances of the incident before the undersigned and acknowledged that no grievous injury was done to him. It appears that it was not the first time that he had run against people with his truck, and on this account his father was notified by the Company that if he continued in his recklessness they would have to discharge him. As to the father, he received a written apology from Cinquini, which wholly satisfied him and his wish was that the incident should be closed.

"The Union, however, took a different view of the matter and contended that the employees of the Company were directly interested. They threatened to call a strike if Cinquini was not immediately discharged. Their contemplated action was based on the fact, as alleged by them, that Cinquini was a menace to his co-employees, by reason of his assault on the boy and of his previous conduct, as already explained. They refused to compromise, though the Company was willing to take disciplinary measures against Cinquini, which in fact they did by suspending him for a few days. The Company, on the other hand, claimed that to permit the Union to insist upon the discharge of a servant, when in their opinion there were no sufficient reasons to do so, was to hand over to the Union the control and management of their business, in regard to the hiring and dismissal of their employees. The Union, however, denied they had any such intention, but pointed out in their brief, 'that when there is sufficient justification for the discharge of any employee, in the interest and welfare of all the employees, they were in duty bound forced to bring this to the attention of the management'. As the Company and the Union were unable to harmonize their view regarding the action to be taken with reference to Cinquini, all attempts of amicable settlement failed.

"As already stated, Cinquini has been employed by the Company for the last 16 years, and it is the first time that charges of misconduct or inefficiency have been openly made against him, and that any step has been taken to have him dismissed from his employment. Had he been an undesirable servant, one should have thought that the Company would not have retained him in their service for such a long period.

"On the whole, the undersigned is firmly convinced that were Cinquini a servant hired by the Company for a specified period, he could successfully bring an action in damages against the latter for wrongful dismissal, were they to dismiss him on the flimsy grounds disclosed in this investigation. No complaint was ever made to any of his superiors regarding his behaviour or his manner of performing his work, and the most elementary principles of justice and decency demand that before a servant is discharged, he be notified of his shortcomings and afforded an opportunity of mending his ways, unless his acts of omission or commission constitute a very grave dereliction of duty.

"The recommendation, therefore, is that Cinquini be not dismissed, but be reinstated in his employment, since in the opinion of the undersigned, there is no sufficient justification to warrant his dismissal. He has already been suspended for over a month and this, to my mind, is ample punishment for the wrong he is charged with."

The Commissioner's report concludes with a further recommendation that Cinquini be immediately dismissed should he in the future commit any reprehensible act or do anything likely to injure anyone even in the slightest degree.

Unemployment Insurance Benefits in New York State

According to a report issued by Miss Frieda S. Miller, Industrial Commissioner of New York State, the Unemployment Insurance Fund of that state had paid $241,479,857.79 in benefit payments to unemployed workers since January 1, 1938 when benefits first became payable. After payments for August were made it was reported that the fund had a balance of $202,323,497.26.

National Housing Act loans approved in October, 1940, numbered 399 and aggregated $1,197,661. All loans made were to finance single family houses.

Compared with September, 1940, this was an increase of 15 per cent in number of loans and 9 per cent in volume of loans approved.

The number of new applications received during the month was 443, the largest number received in any month since June, an increase of 30 over September, 1940, and of 36 over October, 1939.

CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

Summary of Recent Decisions

REPORTS have been received of four cases settled recently by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the Labour Gazette, August, 1939, page 803, and in previous issues.

The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925 (the date of the inception of the Board), to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board, was given in these summaries.

The Canadian National Railway Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "clerks and other classes of employees herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to reappointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made, in the agreement constituting the Board, for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award. The ruling of the arbitrator becomes the decision of the Board.

Case No. 207.—Operating Department, Central Region and Mechanical Employees, Quebec District.—This dispute concerned the claim of employees in the Mechanical Department at Monk, Ste. Rosalie, Fitzpatrick and Chicoutimi for pay at stationary firemen's rate.

The employees contended that the Mechanical Department discontinued the use of stationary boilers for heating purposes at the points indicated and the classified labourers at these places were required to fire locomotives attached to steam lines to supply steam for purposes other than engine service. The employees maintained that the men who were so assigned were entitled to pay at stationary firemen's rate of 55 cents an hour for their entire shifts respectively during the period so assigned.

The railways contended that there was no schedule rule or understanding to support the claim of the employees.

This case was first heard on November 21, 1939, at which time it was carried over with the understanding that a railway representative would develop the matter further with the parties to the dispute.

The Board's decision denied the claim of the employees.

Case No. 211.—Stores Department, Central Region, and a storeman at London.—This case developed from the claim of a storeman for pay at the store clerk's rate during relief periods in August and September, 1939.

The employees claimed that under the schedule for "Clerks and Other Classes of Employees", the appellant storeman was entitled to pay at the stores clerk's rate for the two periods he was assigned to that position.

The railways stated that "we have many monthly rated positions requiring employees to change their regular hours in order to relieve during holidays, but we have never been asked to apply the higher rate." The railways cited the rule from the schedule supporting their contention and declined the claim of the employees.

In a general statement the Board reported that the case had been heard on June 24, 1940, and at that time was held over with the understanding that a representative of the Board would develop the matter further with the management of the Railways.

The Board's decision was that the employees' claim be sustained to the extent that the appellant storeman be paid the rate of $130 while relieving the stores clerk when the latter was on vacation.

Case No. 213.—Operating Department, Central Region, and a Clerk in the Freight Shop at London.—This case arose out of the claim of a clerk for the rate of $135 per month on a position in the Freight Shop at the London car shops.

The employees contended that as the position of Freight Shop Foreman's Clerk was enumerated in the current schedule at the rate of $135 per month and as it was re-established on October 1, 1939, the incumbent

should be paid at the schedule rate of $135 retroactive to the date the position was re-established.

The railways maintained that a review of the duties and responsibilities attached to the various positions of Shop Clerk both at London and Montreal "indicates that the rate of $120 per month for the position of Clerk in the Freight Shop at London is in conformity with the wages for positions of similar kind or class" and requested that as the claim of the employees was unjustified, it be denied.

This case was heard on June 24, 1940, at which time both parties to the dispute appeared before the Board and submitted oral evidence. The case was then referred back to the disputants for additional information.

The decision of the Board sustained the claim of the employees.

Case No. 214.—Stores Department, Central Region, and Stores Employees, Toronto Terminals.—Stores Department Employees, Toronto Terminals, contended that the management of the railways had violated the rule of the current schedule by arbitrarily changing the classification of the position of storeman 8-4 shift at Mimico roundhouse, and in doing so had reduced the wage rate applicable to this position. The employees claimed that the position should be continued on the payroll under the classification of "Storeman" at the schedule rate of $115 per month, which claim had been declined by the management.

The railways maintained that there was no violation of the schedule.

Both parties appeared before the Board and gave oral evidence in support of their respective presentations.

The claim of the employees was denied.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1940

THE following table shows the number of disputes, workers involved and time loss for October, 1940, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time lost in man working days
*Oct. 1940	25	7,609	19,830
*Sept. 1940	10	2,668	6,053
Oct. 1939	27	6,496	33,724

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Substantial increases appear in the number of disputes and workers involved as well as in the time loss during October as compared with figures for September, a month in which there were substantial decreases. The increase in October was due chiefly to nine strikes of coal miners in Nova Scotia, there being also brief strikes of coal miners in New Brunswick and Alberta and of gold miners in Quebec as well as of shipyard workers in Montreal, P.Q., and Collingwood, Ont. In September the only important disputes involved silk factory workers at Cornwall, Ont., and embroiderers in dress factories in Montreal, P.Q. In October, 1939, there were strikes of coal miners in Nova Scotia, Saskatchewan and Alberta and of gold miners in British Columbia; also of silk factory workers at Cornwall, Ont., knitting factory workers at St. Jerome, P.Q., sheet metal factory workers at Toronto, Ont., and fish handlers at Lockeport, N.S.

Four disputes, involving 77 employees, were carried over from September (including a strike of poultry buyers in one packing establishment in Toronto, Ont., and a strike of taxi drivers employed by one Toronto firm, both of which were reported to the Department too late for inclusion in the October issue of the LABOUR GAZETTE.) Twenty-one disputes commenced during October. Of these twenty-five disputes, nineteen were terminated during the month. Six resulted in favour of the employers and one in favour of the workers involved. Compromise settlements were reached in five cases. The results of seven disputes were recorded as indefinite. At the end of the month, therefore, there were six strikes or lockouts recorded as in progress, namely: coal miners, Glace Bay, N.S.; coal miners, Reserve, N.S.; poultry buyers (packing plant), Toronto, Ont.; knitting factory workers, Dunnville, Ont.; taxicab drivers, Toronto, Ont.; and dairy employees, Toronto, Ont.

The record does not include minor disputes such are defined in a previous paragraph, nor

does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not yet declared terminated. Such disputes are listed in this paragraph for a period up to one year after their removal from the table of current strikes. Information is available as to one dispute of this nature, namely: hotel chambermaids, Montreal, P.Q., one employer, July 19, 1940, to September 15, 1940. The dispute involving plasterers employed by one firm in Toronto Ont., September 16, 1940, to September 17, 1940, carried in this list in the October Labour Gazette, has been removed from the paragraph as the construction affected was completed by the end of October.

Disputes involving men of unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employee being involved.

A minor dispute involved some labourers on a construction job for an hour on October 10 at Calgary, Alta. The men objected to the foreman and ceased work, most of them going to work later on other parts of the job.

A minor dispute at Winnipeg, Man., on October 15 involved four machine operators in a work clothing factory at Winnipeg, Man. The strike was in protest against the dismissal of one worker as a result of a misunderstanding as to work to be done on a holiday in accordance with the union agreement. The dispute was dealt with by the impartial chairman under the agreement and by the Winnipeg representative of the Department of Labour. The dismissal of the employee was sustained and one of the strikers was not taken back. Work was resumed by the other three after two days.

A strike of twenty-one coal miners at Ardley, Alta., on September 12 was reported too late for inclusion in the Labour Gazette for October. The men demanded a change in method of wage payment and certain other changes in working conditions. The management agreed to negotiate an increase in wages when the market for coal improved and work was resumed on September 26.

A strike of upholsterers in several establishments in Toronto, Ont., from the 21st to the 26th of October has been reported but complete particulars have not yet been received. An increase in wages and union recognition is reported to have been secured in most of the establishments.

The result of the reference of the dispute in a silk factory at Cornwall, Ont., causing a strike for one day, September 26, as to the discharge of one worker, to a Commissioner in accordance with the Industrial Disputes Investigation Act is outlined in this issue on page 1137. The discharged worker was reinstated after a period of suspension.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to October

Poultry Buyers (Packing Plant), Toronto, Ont.—A number of employees of one poultry packing company ceased work on September 24 against the recognition of another union and the alleged failure of the employer to remit union dues. The strikers were members of the United Packing House Workers' Union affiliated with the Congress of Industrial Organizations and the Canadian Congress of Labour. In October it was reported that an injunction against picketing had been dissolved. At the end of the month a settlement had not been reported.

Disputes Commencing During October

Coal Miners, Stellarton, N.S.—Miners in one colliery refused to work on October 1 owing to a dispute as to the duties of a driver, who had been suspended because he refused to do certain work. The pit committee and the manager agreed that he should do the work pending an inquiry but the coal handlers objected to this decision. Later the decision of the committee was accepted and work was resumed the next day.

Coal Miners, Glace Bay, N.S.—Employees in one colliery ceased work on October 2 against the employment of miners transferred from a worked-out mine in another locality. Work was resumed the next day when the company agreed to take on an equal number of local men.

On October 7 the men ceased work again in protest against a delay in taking on the local men. Work was resumed on October 9.

Coal Miners, Minto, N.B.—Miners in one colliery, members of the United Mine Workers of America, ceased work on October 3 alleging that one worker had been dismissed without sufficient cause. The New Brunswick Fair Wage Officer conferred with the management and with the union officials and work was resumed on October 6 pending further inquiry.

Coal Miners, Sydney Mines, N.S.—Following a mechanical breakdown for an hour and a half on October 7 twenty-two loaders left the mine claiming that they should be paid the datal rate for the shift instead of piece rates. The mine was tied up for three days. The employer stated that the day rate would have been paid if the loaders had not left the mine. Work was resumed on October 10,

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1940*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to October, 1940				
LOGGING—				
Loggers (fallers and buckers), Port Alberni, B.C.	1	10	50	Commenced Sept. 24, 1940; for increased wages (piece rates); terminated Oct. 15, 1940; replacement; in favour of employer.
MANUFACTURING—				
Metal Products—				
Automobile parts factory workers, St. Catherines, Ont.	1	28	84	Commenced Sept. 28, 1940; *re* payment for overtime; terminated Oct. 3, 1940; negotiations; referred to I.D.I. Board; indefinite.
TRANSPORTATION—				
Local—				
Taxicab drivers, Toronto, Ont.	1	3	81	Commenced Sept. 23, 1940; for union recognition and signed agreement providing for increased wages and reduced hours; unterminated.
TRADE—				
Poultry buyers (packing plant), Toronto, Ont.	1	36	900	Commenced Sept. 24, 1940; *re* union dues and against recognition of another union; unterminated.
(b) Strikes and Lockouts commencing during October, 1940				
MINING, ETC.—				
Coal miners, Stellarton, N.S.	1	481	481	Commenced Oct. 1; against discipline of a miner refusing certain work; terminated Oct. 2; negotiations; compromise.
Coal miners, Glace Bay, N.S.	1	650	650	Commenced Oct. 2; against employment of miners from outside the district; terminated Oct. 2; return of workers; compromise.
Coal miners, Minto, N.B...	1	275	825	Commenced Oct. 3; against dismissal of worker; terminated Oct. 5; conciliation (provincial); work resumed pending inquiry; indefinite.
Coal miners, Glace Bay, N.S.	1	650	1,300	Commenced Oct. 7; alleged failure of company to carry out terms of settlement of strike on Oct. 2; terminated Oct. 8; return of workers; in favour of employer.
Coal miners, Sydney Mines, N.S.	1	900	2,700	Commenced Oct. 7; for datal pay instead of piece rates following a mechanical breakdown; terminated Oct. 9; return of workers pending negotiations; indefinite.
Coal miners, Florence, N.S.	1	700	700	Commenced Oct. 8; *re* seniority for new positions as brushers; terminated Oct. 8; return of workers pending negotiations; in favour of employer.
Gold miners, Val d'Or, P.Q.	1	285	855	Commenced Oct. 8; against dismissal of employees alleged to be for union activity, and for increased wages, union recognition, etc.; terminated Oct. 10; negotiations (reference under I.D.I. Act); indefinite.
Coal miners, Florence, N.S.	1	700	1,400	Commenced Oct. 15; for extra pay for difficult place; terminated Oct. 16; return of workers pending negotiations; indefinite.
Coal miners, Westville, N.S.	1	425	3,400	Commenced Oct. 19; *re* alleged delay in conveying men out of mine; terminated Oct. 28; conciliation (federal); in favour of employer.
Coal miners, Glace Bay, N.S.	1	900	1,800	Commenced Oct. 30; against employment of miners of alien enemy origin; unterminated.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1940—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during October, 1940—*Concluded*				
Coal miners, Drumheller, Alta.	1	130	390	Commenced Oct. 29; *re* transportation to the coal face; terminated Oct. 31; return of workers pending negotiations; indefinite.
Coal miners, Reserve, N.S.	1	250	250	Commenced Oct. 31; against employment of miners of alien enemy origin; unterminated.
MANUFACTURING—				
Textiles, Clothing, etc.—				
Women's clothing factory workers (dressmakers), Montreal, P.Q.	1	4	56	Commenced Oct. 7; *re* interpretation of agreement; terminated Oct. 23; negotiation; compromise.
Knitting factory workers, Dunnville, Ont.	1	128	256	Commenced Oct. 30; against the discharge of certain employees and to secure an increase in wages and union recognition; unterminated.
Metal Products—				
Automobile factory workers, Oshawa, Ont.	1	90	450	Commenced Oct. 4; for revision of piece rates on new model; terminated Oct. 9; negotiations; work resumed pending negotiations and arbitration; indefinite.
Automobile parts factory Workers, Oshawa, Ont.	1	120	120	Commenced Oct. 15; for increased wages, reduced hours and union agreement; terminated Oct. 15; negotiations; in favour of workers.
CONSTRUCTION—				
Shipbuilding—				
Shipyard workers, Collingwood, Ont.	1	550	1,100	Commenced Oct. 24; for increased wages; terminated Oct. 25; conciliation (federal); compromise.
Shipyard labourers, etc., Montreal, P.Q.	1	160	1,060	Commenced Oct. 24; for recognition of union terminated Oct. 31; conciliation (federal); in favour of employer.
Other—				
Truck drivers, Dauphin, Man.	1	22	11	Commenced Oct. 15; for increased wages; terminated Oct. 15; conciliation (provincial); compromise.
Truck drivers, Dauphin, Man.	1	22	11	Commenced Oct. 18; for increased wages; terminated Oct. 18; return of workers; in favour of employer.
TRADE—				
Dairy employees, Toronto, Ont.	1	90	900	Commenced Oct. 8; for union agreement with increased wages, reduced hours and changes in working conditions; unterminated.

* In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

the dispute to be settled by negotiations between the union officials and the management.

COAL MINERS, FLORENCE, N.S.—Miners in one colliery ceased work on October 8 claiming that certain coal cutters, shooters and loaders should have been given eight new jobs as brushers in accordance with seniority in their section of the mine. The company stated that there were a number of brushers on the spare list from which the men had been selected. Work was resumed after one day pending negotiations.

GOLD MINERS, VAL D'OR, P.Q.—A large number of the employees in one gold mine ceased work on October 8 against the dismissal of four workmen alleged to be for union activity and to secure an increase in wages of ten per cent with recognition of the Abitibi Miners' Syndicate, Inc. The union requested the intervention of the Minister of Labour who advised that the strike was contrary to the Industrial Disputes Investigation Act and that work should be resumed and the dispute dealt with under the Act if con-

ciliation did not result in a settlement. Work was accordingly resumed on October 10. Conciliation officers of the Department interviewed the directors, the management and a union committee, ascertaining that eighty per cent of the employees belonged to the union. The committee offered to accept an agreement providing for no discrimination against union members. This not being accepted the union applied for a Board under the Industrial Disputes Investigation Act on October 26.

COAL MINERS, WESTVILLE, N.S.—Certain miners in one colliery refused to go down the mine on October 19 in protest against a delay in taking the men out on the previous day. It is reported that the management would not give the signal to commence operations until the men reported they were willing to resume work and the men in other collieries threatened to strike. In the meantime both parties telegraphed to the Federal Department of Labour and they were advised that the stoppage was contrary to the Industrial Disputes Investigation Act. Work was resumed on October 19.

COAL MINERS, DRUMHELLER, ALTA.—Employees in one colliery ceased work on October 29 when their request for a "man trip" for transportation into the mine to the coal face was refused. Work was resumed after three days on the advice of a union official, pending investigation by the union and further negotiations.

KNITTING FACTORY WORKERS, DUNNVILLE, ONT.—A number of employees in one establishment ceased work on October 30 against the dismissal of certain workers, alleging discrimination against union members and demanding a ten per cent increase in wages, changes in the wage payment system and recognition of the Canadian Full Fashioned Hosiery Workers' Association and Allied Crafts. As a result of conciliation by the Federal Department of Labour early in November work was resumed on November 4, the discharged workers to be taken back as required according to seniority, etc., and the employer to negotiate with a committee of employees along with a representative of the Ontario Department of Labour.

SHIPYARD WORKERS, COLLINGWOOD, ONT.—Over 500 out of 700 employees in one establishment ceased work on October 24 to secure increases in wages and better overtime rates. The dispute had been referred to a Board of Conciliation under the Industrial Disputes Investigation Act, the report of the Board, with a minority report, appearing in the LABOUR GAZETTE, October, 1940, pp. 1009-1014. The Board recommended increases from 58 cents per hour to 64 cents for most of the skilled trades, 40 cents to 45 cents for labourers with a bonus to be adjusted according to changes in the cost of living, with time and one-half for overtime, Sundays and holidays. The member representing the workers' unions recommended 75 cents for most of the trades, 45 cents for helpers, with time and one-half for overtime and double time for Sundays and holidays. The employing company agreed to accept the award of the Board but the employees refused and submitted a scale substantially equal to that recommended in the minority report. A strike vote was taken but arrangements had been made for further negotiations when men of several classes ceased work against the advice of the union officials. On the advice of the union officials and at the request of the Minister of Labour work was resumed after two days and negotiations as already arranged were proceeded with. A settlement was reached early in November providing for an agreement to be in effect until November 30, 1941, and from year to year thereafter until the cessation of hostilities. Wages for most of the trades are to be 70 cents per hour, helpers at 45 cents and 46 cents, and labourers at 42 cents. All overtime, and work on Sundays and holidays, to be at time and one-half rates. Any necessary work on New Year's Day, Christmas Day and Labour Day is to be paid for at double time rates.

SHIPYARD LABOURERS, ETC., MONTREAL, P.Q.—A number of employees in one shipbuilding plant ceased work on October 24 demanding recognition of the Independent Industrial Union of Shipyard Workers, the members being chiefly helpers, labourers, etc. The Montreal representative of the Labour Department was directed to deal with the dispute and informed the union officials that the dispute came under the provisions of the Industrial Disputes Investigation Act under the War Measures Act. Work was resumed after three days but in a few hours the men ceased work again as four men were reported not to have been taken back. The conciliation officer arranged for the re-employment of three of the men but the union held out for the reinstatement of all and for union recognition. The representative of the Department of Munitions and Supply arranged to take a vote of the workmen on October 31 as to whether the employer should continue to recognize the shop committee or this union. A large majority voted in favour of the shop committee and work was resumed immediately.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month bringing down to date that given in the March, 1940, issue, in the review of Strikes and Lockouts in Canada and Other Countries, 1939. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the Labour Gazette, August, page 760.

The number of disputes which began during August was 50 and 2 were unterminated at the end of July, making a total of 52 disputes in progress during August. The number of workers involved was 7,400 and the resultant time loss 13,000 man working days.

Of the 50 disputes which began during August 9 arose out of demands for increased wages and 22 were over other wage questions; 2 over questions as to working hours; 9 were over questions regarding the employment of particular classes or persons; 7 arose out of questions respecting working conditions; and one was a sympathetic strike. During August, final settlements were reached in the case of 47 disputes, of which 8 were settled in favour of workers, 27 in favour of employers and 12 resulted in compromise settlements. In 2 other disputes work was resumed pending negotiations.

Australia

The number of disputes in the year 1939, was 415, involving 505 establishments and directly involving 141,565 workers, with a time loss of 459,154 working days. During the first quarter of 1940, there were 110 disputes involving 424 establishments and 94,497 workers, with a time loss of 488,813 working days.

New Zealand

For the first six months of the year 1940, there were 33 disputes involving 6,769 workers with a time loss of 14,724 working days.

India

For the year 1939, the total number of disputes in progress was 406, involving 409,189 workers, with a time loss of 4,992,795 working days. Of these 406 disputes, 232 were over wage questions, 74 over personnel questions, 12 over leave and hours and the other 88 over other questions. Settlements were reached during the year in 392 disputes, in 63 of which the workers were successful, in 144 partially successful and in 185 unsuccessful.

United States

Preliminary estimates for July, which as the Bureau of Labour Statistics points out are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 200 strikes as having begun during July, which with 100 unterminated at the end of June, made a total of 300 in progress during the month. The number of workers involved in these disputes was approximately 70,000 with a resultant time loss of 500,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final show that there were 250 strikes in progress involving about 45,000 workers with a resultant time loss of about 390,000 man working days.

A strike of 12,000 painters in New York City demanding an increased wage rate, which began the first part of September was ended September 27, and the dispute submitted to joint arbitration board, the third member of which was to be named by the Mayor of the city.

RECENT REGULATIONS UNDER PROVINCIAL LEGISLATION

Minimum Wages in Alberta, British Columbia and Quebec—Hours in British Columbia—Public Health Regulations in New Brunswick and Saskatchewan

MINIMUM wage rates have been established for coal miners in the Edmonton district. British Columbia has revised and consolidated its minimum wage orders relating to loggers, shipbuilders, transport workers, first-aid attendants and Vancouver taxicab drivers and issued the usual seasonal order for women employed in hotels during the winter season with a revision upward in the overtime rate. In British Columbia laundries, overtime is no longer permitted. There have been amendments in the interpretation of General Order 4 under the Quebec Minimum Wage Act. New Brunswick has tightened the regulations governing housing of workers in camps, and Saskatchewan has dropped the requirement imposed last spring that those responsible for fumigating premises with hydrocyanic acid gas should insure employees and others against possible damage from negligence in the operation. Certain certificates under the Alberta Tradesmen's Qualification Act are to expire on March 31 instead of September 30.

Alberta Male Minimum Wage Act

Order 11 in effect from October 1 fixes minimum wages for certain employees in the coal mining industry in the Edmonton district. The minimum hourly rates apply to an eight-hour day with extra hours to be paid for at the rate of time and one-half the regular rate. When an employee works less than four hours in a day he must be paid at least $2.

The highest hourly minimum is 65 cents for machine men on long wall face. Power house engineers are to receive at least 55 cents an hour and a 50-cent hourly minimum is fixed for most other classes. For muckers, pumpmen, etc., and general labour inside the pay must not fall below 45 cents an hour. General labour outside and box car shovellers have a 40-cent hourly minimum. Boys over 16 and under 19 are to be paid at least 35 cents.

Deductions are allowed for board up to $5 for a week of 21 meals and 25 cents for single meals. Not more than $2 a week or 25 cents a day may be withheld for lodging.

Alberta Tradesmen's Qualification Act

The regulations governing the following trades in Alberta were amended from October 15, to change from September 30 to March 31, the expiry date of certificates issued pursuant to the regulations: barber, radiotechnician, gas fitter, refrigerator mechanic, plumber, steam fitter, electrician, mechanic engaged in one of the following, construction, building and repair of automobile engines or refrigerating machines, repair and construction of internal combustion engines or motor vehicles.

British Columbia Female Minimum Wage Act

An order for hotel employees allowing special arrangements as to wages and permitting longer hours up to ten a day and 54 a week during the winter season was issued on September 26 to be in effect until June 13. The overtime rate is now 37½ cents an hour instead of one and one-half times the regular rate, and is payable for time in excess of eight hours a day as well as after 48 hours' work in a week. Otherwise the order is identical with the one issued last year (LABOUR GAZETTE, 1939, p. 1231).

British Columbia Hours of Work Act

Regulation 9A governing laundries cancels from September 26 Regulation 9 which has, since June 14, 1934, allowed exemptions from the daily limit of eight hours "to avoid serious interference with the business of the industry" provided the 48-hour weekly limit was observed.

British Columbia Male Minimum Wage Act

On October 10 changes were made in several orders under this Act. To bring them in line with the 1936 amendment in the Act which dropped the word "adult" from the definition of "employee" the new orders governing workers in shipbuilding and transportation, first-aid attendants and Vancouver taxicab drivers are no longer expressly declared to apply to male employees under 21 as well as to "employees." New provisions in the logging and shipbuilding orders exclude indentured apprentices. As before, in the orders governing persons employed in work where uniforms are generally worn such as transport and taxi business, if this is required, employers must supply them without cost to the employee. However, the parties may apply to the Board for a different arrangement on which they have agreed. The new orders dealing with transport workers and taxi drivers in Vancouver both require semi-monthly payment of wages up to a day not more than seven days prior to payment. This provision is already in the

taxicab order for Victoria, Esquimalt, Oak Bay and Saanich. Other changes in the orders are noted below.

Order 1 deals with the logging industry. It consolidates the former order of the same number and amending orders. The minimum rates for the various operations fixed throughout the province are as set out in the LABOUR GAZETTE, 1938, p. 406, when Order 56 cancelling provision for lower rates in certain districts was summarized.

Order 20 covers shipbuilding and supersedes Order 20 which came into effect on June 14, 1935. The minimum rates are unchanged: 67½ cents an hour for ship carpenters, shipwrights, joiners, boat-builders and wood caulkers and 50 cents for other employees. As before, when an employer has paid 90 per cent of his men at not less than these rates he may employ men under 21 at a lower rate which may, however, never fall below 25 cents an hour.

A new *Order 26* for the transport industry meaning transport by any means other than rail, air and water consolidates the old Order 26 with amendments to date and makes some further changes.

Except for operators of motor cycles whose rates are set out below, and drivers for bread and milk delivery whose minimum rate is 40 cents an hour regardless of the type of vehicle used, motor vehicle operators are to be paid according to whether the vehicle weighs 2,000 pounds or over or is under that weight: in the former case, and also for drivers of horse-drawn vehicles, not less than 40 cents an hour for a week of 40 to 50 hours, 45 cents for a week of less than 40 hours and 60 cents for hours in excess of 50 a week up to and including 54, the maximum number of hours permitted these workers under the Hours of Work Act; for the same hours minimum rates for drivers of vehicles of the lighter class are 35 cents, 40 cents and 52½ cents, respectively. These rates are also fixed for the same hours for swampers and helpers.

Motor cycle operators must be paid at least 25 cents an hour when they work 40 to 48 hours and 30 cents when their hours fall below 40. Based on the same hours the minimum hourly rates for bicycle and foot messengers employed exclusively on delivery or messenger work except in the mercantile industry where they are governed by its order, are 17 and 20 cents.

When an employee provides his own vehicle the employer must pay reasonable cost of upkeep while it is in use on his behalf. Employees are to be paid for time spent waiting on call.

Order 33 for taxicab drivers in Vancouver replaces an order with the same number dated January 24, 1936, and amendments. The minimum daily wage remains at $2.75.

Order 39 supersedes former Order 39 fixing minimum wages for persons employed in industrial undertakings as first-aid attendants in accordance with regulations of the Workmen's Compensation Board. The terms are practically unchanged. The daily minimum is $4 except where part of the time is spent at other work for which a higher rate is fixed. Then that rate must be paid. The overtime rate is 50 cents an hour. Men employed part-time to assist a first-aid attendant are to be paid *pro rata* the rates fixed in this order. When a first-aid attendant accompanies a patient to hospital or to the office of a medical practitioner his expenses are to be paid by the employer.

New Brunswick Health Act

The regulations governing conditions to be observed in housing lumber, mining, construction or other workers in camps which have been in effect since 1918 have been revised and new regulations were gazetted on October 16. The more important changes are noted below.

Greater precautions are required to prevent dampness. No camp or connected building may be located within 100 feet of any lake, stream or other water. Floors which are to be tightly constructed with a smooth surface to permit washing must be at least a foot from the ground and properly drained. The minimum height required for walls is eight feet and they must be weatherproofed.

Lighting requirements are one square foot of window area for every 20 square feet of floor space and roof windows may not be located over bunks. The ventilation regulations continue to require at least 300 cubic feet of air space for every occupant. All windows must now be constructed to open and close. In addition to windows, each bunkhouse is to have a separate ventilating system to conform with specifications laid down in the regulations.

Bunks may be separate or double, either single or double deck, the lower bunks to clear the floor by at least 18 inches. A 24-inch passage is to be allowed between groups of bunks. Sufficient clean bedding is to be furnished. Suitable washroom space and facilities for heating water must be provided and also a container and cups for drinking water.

Other regulations give more express directions as to provision for a sufficient number of privies, garbage disposal and the location of stables.

Quebec Minimum Wage Act

A rule of interpretation, gazetted on October 5, extends to employees engaged part of the time at work governed by Order 4 and part of the time at work governed by another ordinance the article in Order 4 which provides that when an employee works at operations covered by different rates he is to be paid the higher rate.

On the same date was gazetted a resolution declaring 48 hours to be the work-period to which applies the minimum wage for employees in billiard-rooms, pool-rooms, bowling alleys, etc., operated independently or by clubs or other associations. This does not apply to pin boys who have a normal 54-hour work-week.

Saskatchewan Public Health Act

An order in council gazetted on October 31 strikes out from the regulations governing fumigation with hydrocyanic acid gas (LABOUR GAZETTE, July, 1940, p. 693) the provision which required an applicant for licence when fumigating any establishment other than the one where he was employed to furnish an insurance policy insuring him against liability arising out of the death of any employee or injury to or death of any other person resulting from negligence in fumigating.

LABOUR LEGISLATION IN NEW BRUNSWICK IN 1940

THE New Brunswick Legislature, sitting from April 4 to May 11, 1940, amended laws relating to workmen's compensation, regulation of wages and working conditions and co-operative societies.

Amendments in the Workmen's Compensation Act raise the scale of compensation from 55 to 60 per cent of average earnings, calculated as formerly on earnings not exceeding $1,500 per annum. The minimum weekly payment in total disability cases is raised from $6 to $8 per week, but where the average weekly earnings of the workman are less than $8 compensation is to equal the amount of such earnings. In cases of permanent partial disability compensation is to be, as formerly, on a scale established by the Board in proportion to the diminution of earning capacity and the degree of disability but the provision limiting the aggregate amount of such compensation to $2,500 has been repealed. Compensation payable to a widow or widower in respect of dependent children is raised from $7.50 to $10 per month for each boy under 16 and girl under 18. A new provision retrospective to January 1, 1940, entitles a widow to a lump sum of $100 in addition to any other compensation.

The list of matters which the Board, in addition to its general powers, has exclusive jurisdiction to determine, now includes the questions whether employment of a person in an industry under Part I is as a workman, sub-contractor or independent contractor and whether personal injury or death has been caused by accident. The Board is also empowered to determine whether an "accident" has arisen out of, or in the course of an employment within the scope of the Act instead of, as formerly, whether an "injury" has so arisen.

A clause added to the Labour and Industrial Relations Act provides that at any meeting of the Fair Wage Board the Chairman and two members representing respectively employers and employees, shall constitute a quorum.

Amendments in the Credit Union Societies Act enable shares to be issued and deposits accepted in trust and permit a member of a union to nominate a person or persons to whom his interest shall pass on his death. The amount of a surety bond required of an officer or employee handling money, must be approved by the Registrar.

Changes in the Co-operative Associations Act enable members to be expelled from an association and provide that an association whose business is seasonal may hold its annual meeting at such time as the Inspector may approve.

Under the heading, "Relation of Age to Industrial Injuries", the October issue of the *Monthly Labour Review,* official publication of the United States Department of Labour, contains an article dealing with the age factor in industrial accidents. An analysis of data covering nearly a million cases of industrial injuries both in the United States and in several foreign countries indicates that the older workers, on the average, are injured proportionately less frequently than the younger workers, although once injured, their injuries are likely to be more severe. The proportion of deaths increases sharply with advancing age; the percentage of permanent impairments is higher; and the healing period in temporary disabilities longer.

TRAINING INDUSTRIAL WORKERS IN WARTIME

Results of Programs in United States and Great Britain

THE rapid expansion of Canadian productive capacity and industrial plants to meet wartime requirements has necessitated the securing of an adequate supply of trained industrial workers. Since the experience of Great Britain and the United States in wartime training programs is of particular value to Canadian industry, two publications received recently dealing with training plans will be of special interest. The National Industrial Conference Board Inc., New York, has completed a report (No. 26) on its series of studies in personnel policy entitled *Quick-Training Procedures*; while the National Institute of Industrial Psychology, London, England, has issued a pamphlet on the subject entitled *Training Industrial Workers.*

U.S. INDUSTRIAL TRAINING PLANS

It is pointed out in the introduction of the report of the National Industrial Conference Board, that as a result of the requirements of the United States preparedness program many industrial concerns, particularly the metal-working industries, are finding it increasingly difficult to secure an adequate supply of trained and competent workers. "Most companies", the report declares, "have exhausted available sources of skilled men and as the defence manufacturing program unfolds, face the prospect of needing many more who are skilled in various crafts." It is suggested that the only practical method of meeting these labour requirements is to train new workers as quickly as possible.

With a view to making available for study some of the outstanding examples of quick-training methods now in use, nine training plans were reviewed. The report emphasizes however, that these plans should not be followed indiscriminately, and are presented as "methods that are working satisfactorily in the situations for which they were developed," but "may be susceptible of adaptation to other emergency situations."

Principles of Quick-Training

Summarizing the principles and objectives of the quick-training plans in operation the report declares:

"Most of the programs described in this survey are in existence only because normal, well-rounded, long-time training methods are unable to supply enough trained workers to meet emergency-dictated production demands. Men are and will be needed within a period of days or weeks, not months or years. Premiums are placed on getting the work out regardless of cost, rather than on efficient utilization of the labour force over an extended period of time.

"Under such circumstances usual training standards cannot be maintained. The question no longer is one of finding an ideal technique from the long-time point of view, but rather that of discovering some means of filling an immediate need. No one, however, least of all those who have been connected most intimately with the operation of quick-training programs, contends that an entirely satisfactory substitute yet has been found or probably ever will be found for thoroughly trained, all-round skilled workers, or that any way has been discovered to short-cut the usual method of training such workers, i.e., apprenticeship."

The following principles of quick-training plans "were selected" the report states "for brief description because they have been shown by experience to be worthy of consideration, not as rules to be adopted unquestioningly."

Necessity of Careful Planning

Stressing the importance of preparing the training plan with care the following procedures that have been successfully used are detailed.

(*a*) The preparation of a job analysis, from which the skills, abilities and knowledge necessary to perform the job may be determined objectively.

(*b*) The laying out and scheduling of a course of instruction, based on the job analysis, which will provide training and instruction in all the skills, abilities and knowledge necessary for successful job performance. It has been found desirable in many instances to provide courses that are flexible—in which the rate at which an individual may learn is limited only by his ability.

(*c*) The preparation of the most specific written outlines possible for instructors, to insure that the quality of instruction will be uniform, that no points will be missed and that there will be a uniform understanding of the purpose and scope of the training course.

Selection of Trainees

The report points out that in the selection of trainees it must be borne in mind that the best-planned and best-executed program cannot change persons incapable of learning into capable workmen. With the object of

obtaining the most highly capable trainees some concerns, the report states, have experienced success with the use of aptitude tests to forecast ability; more have used performance tests to eliminate the inapt. The experience of men who have worked closely with aptitude tests seems to be that they can be effective only when used by someone familiar with their administration and interpretation.

PROGRESS OF TRAINEES CHECKED

The systematic follow-up on the progress of the trainees is essential to the success and expeditious completion of a quick-training plan. The following four points according to the report should be covered.

(*a*) In practice, does the training adequately fit men for the job for which it is designed? In an emergency situation, changing production requirements may result in changed jobs.
(*b*) Is the instruction being absorbed by the trainees?
(*c*) Is the training schedule being adhered to? If not, either the schedule or the training should be changed.
(*d*) Are personal difficulties of trainees being given consideration and attention? This point may involve "selling" experienced workers on the necessity for training, or it may involve questions of personal behaviour and attitudes. It is one that experience has shown to be too important to be neglected.

The report then deals with World War experience of the United States Army in training soldiers as technicians in more than sixty trades; the training of Civilian Conservation Corps men in trades during their brief enlistment period; and the so-called "Connecticut Plan" which has been designed to overcome a shortage of skilled labour in a highly industrialized area through centralized quick-training; and finally the report reviews the training programs worked out by six companies to meet their specialized needs. Space requirement will only permit of a brief review of one of these—the "Connecticut Plan."

"Connecticut Plan"

One approach to the problem, which has attracted considerable attention and has been adopted in a number of cities in Connecticut, is known as the "Connecticut Plan." It represents a co-operative attempt on the part of employers and public officials of each city, to give carefully selected unemployed persons enough fundamental training in order that they may qualify in some capacity for employment in skilled jobs in local industries.

In the late summer of 1939, the Governor of Connecticut appointed a Commission to study employment. On the advice of this Commission, the Governor, in November, 1939, appointed local Councils in a number of larger cities of the state. The task of each Council being to facilitate the placement of the unemployed in industrial, commercial and other enterprises of the community, the Commission to act as a controlling and co-ordinating agency.

The Commission suggested "that in each city before setting up a local program, the Council perform two obvious, yet often neglected steps. First, find out who are the unemployed by using the files of the State Employment Service, the welfare agencies and the local manufacturers. Second, find out the present and the estimated labour needs of local manufacturers. Once these steps had been taken, it was suggested that various subcommittees be formed by each Council to approach the several phases of each local problem."

The report then proceeds to describe the Training Program of the City of Bridgeport; Emergency Training Courses in the City of Hartford; the first detailed description being intended to give a picture of a city program and the second the experience of two plants with specific special courses.

CITY OF BRIDGEPORT PLAN

In the city of Bridgeport, Connecticut, four separate, yet co-ordinated programs were put into operation as part of a scheme to relieve the labour shortages in local industries. These programs deal with "infiltration of learners, general apprenticeship training, special training for special jobs and intensive training for emergency work" respectively.

Infiltration of Learners.—The Bridgeport plan involves the systematic use by local industries of the State Employment Service and the Adult Guidance Service to select carefully for specific job openings the best qualified youths in the community. Three steps are involved in this stage of the plan: (1) Registration in the local office of the State Employment Service, (2) Adequate classification of these applicants by the Employment Service, (3) Use of the local Employment Service by industrial and commercial establishments to fill job openings. The program does not give job training, it being solely concerned with the selection and testing of applicants, the training of applicants being left entirely to the employer.

General Apprenticeship Training.—This part of the program calls for the continuation and expansion of the apprenticeship courses previously offered by the trade school. The trade school has inaugurated an eight-hour shift in which the regular apprentice-training courses offered during the day are duplicated, thus practically doubling the capacity of the apprentice-training program.

Special Training for Special Jobs.—Courses have been given in the trade school during the past year in 15 specified occupations such as automobile repairs, dressmaking, electric wiring, machine blue-print reading, printing and tool and jig designing. On the recommendation of the Bridgeport Employment Council and owing to the shortages still existing in many of these occupations the number of extension courses given is to be enlarged through an increase in the hours per day and the months per year during which the school will remain open.

Intensive Training for Emergency Work.—As pointed out in the report, the three programs outlined above do not represent innovations; they involve expanding existing facilities and making more efficient use of previously established procedures. To some extent, the same can be said about the program of intensive training for emergency work. The program was started chiefly in answer to the need of aircraft and machine tool industries, for men with some technical experience who could immediately be put to work on production operations. Men with the necessary basic experience were unobtainable in the Bridgeport area. The plants had available neither the facilities nor the personnel necessary to give raw applicants elementary training. Accordingly, the Employment Council arranged that a series of intensive "emergency courses," designed to give elementary training, be undertaken co-operatively by local manufacturers and by the Trade School.

The program was started on February 5, 1940. Its history may be divided into two periods—the first from February through the month of May, and the second from June 1 to the present. During the early period, while the program was "feeling its way" and proving its value, those companies for whom men were being trained contributed financially by paying the salaries of the instructors. This was necessary because public funds were inadequate. The expense was prorated among participating companies according to student enrolment, the average cost for each student being $3.30 for each 40-hour week of instruction. Since the beginning of the second period —following May 31, 1940—private concerns have ceased contributing directly to the cost of the program. This has been possible because increased public funds have been made available to the Trade School through both the State and the Federal Government. The nature of the program itself has remained unchanged. It has been and still is characterized by a close working relationship between all the parties concerned.

TRAINING INDUSTRIAL WORKERS IN GREAT BRITAIN

The National Institute of Industrial Psychology, London, England, has published a pamphlet entitled *Training Industrial Workers,* which deals specifically with the problem of training a sufficient number of skilled, semi-skilled and unskilled workers to meet the demands of the textile industries in Great Britain.

The pamphlet states that "long-accepted ideas of the time required to train workers are having to be radically changed; for it is essential to find and use quicker methods than those which served in peace time—methods of training which will still ensure a high standard of work. The Ministry of Labour Training Centres have already shown that sufficient training for certain types of specially skilled work can be given in much less time than was previously considered necessary."

The training problem is divided into two main sections (*a*) knowledge about the job and (*b*) facility and speed in making the necessary movements.

Knowledge of the Job

Dealing with the subject of the amount of knowledge necessary for a worker to acquire to do a particular job, it is pointed out that this varies very considerably between jobs, it being small in repetitive processes and very great in the skilled trades.

The importance of systematic instruction as opposed to trial and error methods with its unnecessary waste of time and material as well as the discouragement of the new worker is emphasized. The drawbacks of merely allowing a learner to watch an experienced operative are also stressed, it being stated that "such a procedure almost inevitably fails to achieve what should be its aim, namely, to cover the whole ground and to teach the correct answer to every problem which can be foreseen. It fails because these problems have never been systematically recorded, and studied; because the experienced worker who 'instructs' the novice happens to think of only some of the total number of possible problems; because very probably he does not always use the correct procedures himself; and because he may be temperamentally unsuited for teaching.

"It should also be recognized that the experienced worker, whose primary aim is production, is handicapped when called upon to train a learner at the same time; naturally he concentrates on production rather than on training. Other psychological obstacles to the progress of the learner may, and often do, arise. The skilled worker will often be

chary of teaching the newcomer really well, lest his own position be threatened; the learner will often be discouraged by the apparently unattainable standard of knowledge and skill of the experienced worker. Moreover, the newcomer is liable to become bored and idle because of being left for long periods with nothing to do but to watch and to listen to the occasional words of explanation which may be offered him."

Systematic Training

It is suggested in the pamphlet that these defects may be overcome by adopting the principle of systematic training. With this object in view it is stated that the first essential is to select a trainer whose abilities and temperament are suited for teaching young workers.

It is then suggested that suitable facilities should be provided so that the teaching of the necessary knowledge may be carried out away from the noise and distraction of the shops "for to attempt to teach in shops is to disturb the productive work and to make it more difficult for the learner to assimilate what is being taught."

Lastly it is pointed out that it is essential to study the job and to plan a systematic course of instruction.

There is then given an example of the kinds of information to be included in such a course.

Correct Movements

Turning to the other main section of training, instruction in correct, quick and easy movements, it is stated in the report that it was found that "it is still the custom in most factories to give no instruction at all in correct movements but either to allow the learner to work out his movements himself or to 'teach' him by making him copy an experienced worker." This practice, it is stated, results in slow learning. Even placing the learner under an experienced worker does not improve the speed with which the trainee adopts the correct movements for the experienced worker is often unconscious of the precise movements by which he carries out the work; examination of manual movements demands a specialized technique, good intelligence, certain special aptitudes and an adequate time to study the job; in demonstrating experienced workers often unconsciously change their movements; experienced workers sometimes do not use the best methods; learners are unable to practice accurately to observe and copy manual movements.

Movement Studies

One of the better methods suggested for teaching the correct movements is that founded upon the scientific use of movement study as the basis of training. In this regard the pamphlet states: "Movement study aims at economy of effort by the application of two groups of principles. The first group consists of those which apply to each individual element. They are too many and too detailed for quotation here. The second and more important group consists of general principles which can be applied to the job as a whole . . ."

The following are briefly the principles involved:—

(1) All unnecessary movement should be avoided.

(2) Movements should be confined to the lowest possible class.

(3) The two hands should be used conjointly for productive work.

(4) All materials and equipment should be kept in prescribed positions, so that they can be picked up without conscious thought.

From the resulting statistics and information, a standard procedure for training may be developed, and the suitable trainers selected. The trainers should then be instructed by the investigator of the movement study so that he fully understands why certain changes have been made and when the trainer has mastered the "standard procedure" and the general principles of movement study he will be in a position to assist learners greatly.

Conclusion

In conclusion the report declares: "These methods may, at first sight, appear unduly complicated; in fact they are not so. In practice, a repetitive job which is typical of modern industry can be studied in a few hours and a 'standard procedure' devised which will nearly always reduce the learning period to a fraction of that previously necessary."

Referring to the achievements obtained in a munitions factory by the adoption of the methods proposed in the report the pamphlet states:—

"A further example is provided by a munitions factory, in one department of which the manufacture of air-tight shell fuse cases demanded a large amount of very careful hand soldering of seams. It proved difficult both to obtain and to keep experienced solderers, and, in the early stages, the weekly output of the department was only 1,000 good cases together with several thousand rejects. At one time it seemed that the maximum output which could be hoped for was 10,000 good cases per week. However, the Works Director decided to install a systematic training scheme and to initiate certain other changes. These measures collectively caused the number of rejects to decline and the

output of good cases gradually to rise until, after several months, it was 20,000 a week. Obviously this result could not be attributed solely to systematic training, but those concerned are agreed that the training school has played a major part in the department's rapid progress. It is noteworthy that the foreman in charge is now much in favour of a training section separate from the production departments. Other jobs for which training schemes of this kind have been devised include condenser winding, handkerchief finishing, and mass clerical work. In the national interest they should be used wherever rapid but effective industrial training presents a problem."

EFFECTIVE INDUSTRIAL USE OF WOMEN IN DEFENCE PROGRAM

UNDER the title "Effective Industrial Use of Women in the Defence Program", the Women's Bureau of the United States Department of Labour has published recently Special Bulletin No. 1 dealing with the major factors attendant upon the employment of women workers in war industries. With the rapid gearing of Canadian industrial plants to increased war production, paralleled by the increased demands upon man power both in the fighting services and in industry, the importance of the subject in this country is obvious.

The Women's Bureau of the United States Department of Labour prepared its report in co-operation with the Labour Advisory Committee on Standards for the Employment of Women in the Defence Program, representing: the Amalgamated Clothing Workers of America, the International Association of Machinists, the International Brotherhood of Electrical Workers of America, the National Women's Trade Union League, the Steel Workers Organizing Committee, the Textile Workers Union of America, the United Automobile Workers of America, and the United Rubber Workers of America.

Since the findings of the report are of particular importance to Canadian industry and labour, the following summary is extracted from a review of the Bulletin appearing in the *Monthly Labour Review*, official publication of the United States Department of Labour.

The expansion of defence industries now in progress will, if experience follows that in the first World War, result in a sharp increase of woman workers in these industries and the employment of women in skilled crafts which are practically closed to women in peace times. In order that the participation of woman workers in the defence program may be most efficient, the United States Women's Bureau, in co-operation with the Labor Advisory Committee on Standards for the Employment of Women in the Defence Program, representing eight large union groups, has prepared a report on general standards for such employment of women. The report states that for some of the particular defence industries, further provisions are also essential and that continual investigation and consultation will be necessary.

The following factors are stated to be of the greatest importance in a program for the successful utilization of woman workers in defence industries:

I. Physical characteristics of the job must be suited to woman's physique.

II. Safety assures continuous production.

1. Machinery should be carefully guarded.
2. Speed is a powerful factor in causing fatigue and accidents.
3. Muscular strain should be avoided if woman workers are to produce at their maximum.
4. Minors must not be employed on hazardous processes.

III. Women require special protection where industrial poisons are used.

IV. The fine work many women perform calls for special lighting.

V. Seats are vitally important for woman workers.

VI. General plant sanitation and safety are essential.

VII. Practical work clothing for women prevents injury.

VIII. Moderate hours of work result in quality and quantity production.

IX. Minimum-wage standards and prevailing-wage standards should be maintained.

X. Training and employment policies should be adjusted to women's needs.

XI. Industrial home work should be prohibited on Government contracts.

Jobs Suited to Women's Physiques

Certain types of work are considered to be especially suited to women, as they do them particularly well. Among these are types of work requiring (1) care and constant alertness, good eyesight, and use of light instruments (such as gauges, micrometers, etc.), but not much physical exertion; (2) manipulative dexterity and speed, but allowing the individual, who sits at her work, to set her own pace; (3) skill but not much strength, either in handling parts or setting up machines. Women also operate large machines well on heavy work, when lifting devices and pneumatic chucks are customarily used for such

work. Specific jobs in these different types of work are pointed out in the report.

Safety and Protection Against Industrial Poisons

Many women engaged in defence industries will be employed on processes new to them, which will bring them into contact with complicated machinery, or where they will have to handle dangerous substances or sharp and irregular objects. All possible measures should be taken to protect them against injury from excessive speed, muscular strain, unguarded machinery, explosive chemicals, fumes, acids, dusts, or other injurious substances or conditions.

Certain poisons affect women more seriously than men, and some of these poisons are employed to a considerable extent in various processes suited to women's capacities. Among the industrial poisons which especially affect women are benzene, TNT, carbon disulphide, lead, mercury, arsenic, and silica dust.

The report stresses the need for constant study of materials and substances—and especially of new substances—of the manner in which they are employed, and of the use of more commonly known substances in new processes. In the case of poisonous substances which have been used in industry for a long time, known protective measures should be adopted.

Plant Health and Sanitation Measures

Good lighting in factories is considered necessary for quality output. Minimum requirements for certain occupations are set forth in the report. Special lighting should be provided for the fine work which many women do.

Seats are stated to be vitally important for women workers, so that the individual worker can change from a standing to a sitting position. Also, the chair provided should be suitable for the worker and for the occupation.

General plant sanitation and safety are considered essential, not only for the health of women workers, but also for their greatest productivity. The importance of observance of State safety, sanitary, and factory-inspection laws is stressed, and it is recommended that particular problems be referred to State divisions of industrial hygiene, where there are such agencies.

The need for practical work clothing, such as safety hats, gloves, uniforms, shoes, leggings, spats, aprons, and goggles, in certain occupations and industries, for the prevention of injury, is emphasized. The following general standards are recommended:

1. Clothing must be reasonably comfortable in any temperature in which it is worn.
2. It must fit and not interfere with workers' movements.
3. It must afford adequate protection against the hazard for which it is designed.

Standards as to Hours and Wages

The importance of the maintenance of established hour and wage standards for women is stressed. The upholding of hour standards not only is possible but is considered vital to the defence program. Such a policy means that more persons are given employment as production is expanded, and fewer are left unemployed. Efforts to speed up production by longer hours or overtime for those already employed proved, during the World War, to be a short-sighted policy. Safeguarding the workers from excessive fatigue and conserving their energies, through moderate and regular hours of work, make it possible for them to produce steadily under pressure for a long period.

The basic standards as to working hours which are recommended are as follows: Not over 8 hours a day and 40 hours a week; 1½ and preferably 2 days of rest in every 7 days; from 30 to 60 minutes, at a regular time, for meals eaten at the plant; a minimum rest period of 10 minutes in the middle of each 4-hour period, without lengthening the workday or losing pay therefor; avoidance of overtime where possible, but if necessary, such excess time to be spread over all available workers and paid for at 1½ times the regular rate for the hours over 8 a day and 40 a week.

Women's wages should be sufficient to purchase the necessaries of life and should be commensurate with the work performed, in order to maintain their health, morale, and efficiency. Compliance with existing State and Federal minimum wage rates by all establishments covered must be required. Periodic revision, and adjustment to any decided increase in the cost of living, are recommended.

The following wage policies apply especially in regard to women:

Rates should be based on occupation and not on sex or race of the worker.

The standard of wages prevailing for men should not be lowered where women are employed.

Certain uniform practices in setting wage rates are essential to the good of all concerned. Effort should be made to arrive at clearly defined occupations or standard rates, whether computed by the hour or by the piece.

Employment and Training Policies

During the rapid expansion of defence industries, sound employment policies are considered to be most important, in order that there may be a satisfied and satisfactory body of workers, that dislocation among workers may be avoided, and that output may be increased. Carefully worked out policies

should take into consideration the men and women having jobs and those seeking jobs, and also present and future needs, especially as to the period immediately after the completion of the emergency program.

Training in the plant, at the expense of the employer, should be given to women who are employed for processes new to them. In many instances this training may need to be more extensive than it would be for men, because women do not have the same opportunity in vocational schools for general mechanical training and background.

Industrial Home Work

Industrial home work on Government contracts should be prohibited, the report declares. "Home manufacture of industrial products is not likely to result in best production methods." Experience during the World War showed that dirt and disease were present in many homes where sewing on Army clothing was done. Ordinarily, pay for industrial home work is low, and frequently this means that the labour of several members of the family, including small children, is necessary to obtain the small earnings. Twenty States now regulate home work: California, Colorado, Connecticut, Illinois, Indiana, Maryland, Massachusetts, Michigan, Missouri, New Jersey, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Tennessee, Texas, Utah, West Virginia, and Wisconsin.

Plant Protection in U.S.A.

The National Industrial Conference Board Inc. of New York in a report issued recently in its studies concerning the employment of aliens and policies of plant protection in personnel policy reviews information provided by 149 United States companies, mainly in metal-working industries that might be expected to be quickly affected by the national defence program.

The following is a summary of the information presented in the report which is entitled *Employment of Aliens and Plant Protection*:

1. In a little over 30 per cent of the companies, aliens constitute not more than 1 per cent of the total working force. In only four companies do aliens number over 20 per cent of the total. The largest proportion of aliens in any of the reporting companies is 27 per cent.

2. Complete information regarding the citizenship status of employees has been secured by 112 of the 149 companies. In some cases it was already available and in other cases a special citizenship census of employees was taken.

3. Employment has been restricted to citizens in 93 companies, while no such restriction has been imposed by 51 of the 144 companies reporting on this point. In 32 of the 93 companies which restrict employment, the policy would apply to employees already on the payroll as well as to applicants. In the other 61 companies persons now employed would be exempt from the restriction.

4. Restriction of employment to citizens is not necessarily connected with production for defence. Of the companies that refuse employment to aliens, 65 are engaged in defence work directly or indirectly, and 23 are not. Among those that do not restrict employment to citizens, 21 are engaged in work for the defence program and 28 are not.

5. Information about methods of identifying employees was given by 144 companies, of which 85, or more than half, have found it unnecessary to provide special identification devices. A metal badge, usually carrying the employee's number, is the symbol most often used. Other devices, in order of use, are photographic badges, identification cards, photographic passes, pass checks, signature passes and buttons. Variations of colour and style in some cases indicate the areas to which particular identification devices will give access.

6. In only five of the 149 companies have employees been fingerprinted.

7. Responsibility for detecting the presence of unauthorized strangers was placed most frequently on gate-guards, foremen, supervisors or department heads, and roving patrols.

8. The procedure most often followed in regard to a person who arouses suspicion is to report the matter to the foreman, department head or the individual's superior. This superior may notify the plant police or gate-guard, or may conduct the stranger to the superintendent's office.

9. Most plant protection programs are based on a standard procedure calling for guards at all gates during the daytime and one or more night watchmen covering specified beats during the period that the plant is closed. Some variations and extensions of the basic program are: enclosing the entire plant area with a high fence; adequate lighting of the property, sometimes floodlighting certain areas; and adding extra guards or patrols, operating on no fixed schedule, to supplement the work of the regular night watchmen.

OLD AGE AND BLIND PENSIONERS IN CANADA

Financial and Statistical Summary as at September 30, 1940

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at September 30, 1940. (The text of the Old Age Pensions Act was given in the LABOUR GAZETTE for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288.)

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $365 a year and who has resided in Canada for 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (LABOUR GAZETTE, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $240 per annum. If, however, a blind person marries another blind person after March 31, 1937, maximum pension is reduced to $120. If a pensioner is unmarried, the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

OLD AGE PENSIONS—FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA, AS AT SEPTEMBER 30, 1940

	Alberta Act effective Aug. 1, 1929	British Columbia Act effective Sept. 1, 1927	Manitoba Act effective Sept. 1, 1928	New Brunswick Act effective July 1, 1936	Nova Scotia Act effective Mar. 1, 1934	Ontario Act effective Nov. 1, 1929

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, SEPTEMBER, 1940

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on October 1 was 12,304, the employees on their pay-rolls numbering 1,335,705 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were employed in the period under review. The number of unions reporting for September was 1,990 having an aggregate membership of 261,247 persons, 4·4 per cent of whom were without employment on October 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of October, 1940, as Reported by Employers

Industrial employment showed further substantial improvement at October 1, according to statements received by the Dominion Bureau of Statistics from 12,304 firms, whose staffs aggregate 1,335,705 persons, as compared with 1,290,530 in the preceding month. This increase of 45,175 workers, or 3·5 per cent, was the largest indicated at the beginning of October in any of the twenty years for which data are now available.

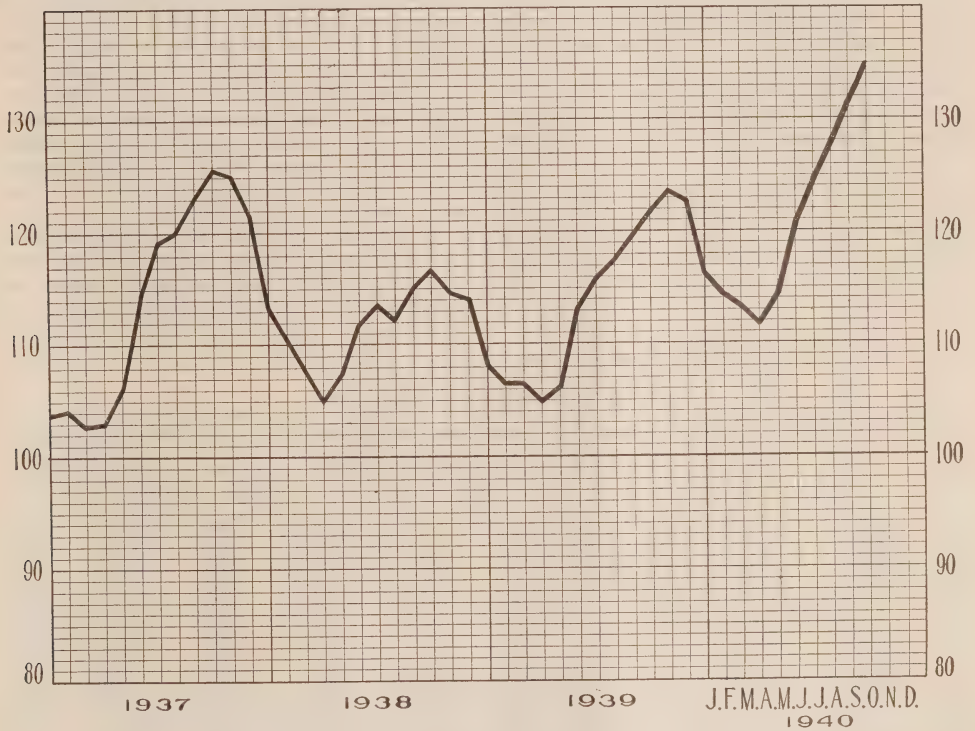
The crude index, based on the 1926 average as 100, rose from 131·6 at September 1 to a new high of 136·2 at October 1, when it was 11·9 per cent above the October 1, 1939, figure of 121·7. The previous maximum index for October had been that of 125·7 in 1937, while in 1929, the figure was 125·6.

In the years, 1921-1939, the average change at the beginning of October has been an increase of rather less than one per cent. Since the expansion at the latest date considerably exceeded this average advance, the seasonally-adjusted index also showed an important gain, rising from 126·5 at September 1, 1940, to 129·6 at October 1, 1940. It was then higher than the corrected figure for any other month of the record.

The response of Canadian industry to the demands made on it during the first year of the war is shown in the record of employment during the last twelve months. During most of this period, the movement has been decidedly upward, while the only general losses were those of a seasonal character reported last winter. The October 1, 1940, index, at 136·2, was, as already stated, nearly twelve per cent higher than at the same date in 1939, and was 23½ per cent above the average for October in the years 1927-1939.

The outstanding feature of the situation since the outbreak of hostilities has been the great expansion in manufacturing, in which activity in recent months has risen to unprecedented levels. The index for October 1, 1940, was 20 per cent above that for the same date in 1939, while the increase in the personnel of the co-operating manufacturers during the year may be estimated at some 125,000 men and women; of these, over 56,000 have been absorbed into the iron and steel industries. The latest index of employment in manufacturing was over 36 per cent above the average index for October 1 in the years 1927-39.

The industrial distribution within the manufacturing division has undergone considerable change; thus the proportion of workers engaged in the production of durable goods has risen from 396 per 1,000 in October of last year to 443 in the latest report. In the same period, the number of employees on the pay-rolls of factories turning out non-durable goods has fallen from 604 per 1,000 last autumn to 557 at October 1, 1940. This variation in industrial distribution is associated with an increase of 32·9 per cent during the twelve months in those employed in the manufacture of durable goods, as compared with that of 9·3 per cent in the non-durable classes.



Most of the non-manufacturing industries have also shown heightened activity in the first year of the war. The logging, mining, communications, transportation, services and trade divisions have reported considerable gains; the only exception has been the construction group as a whole. The lag in this industry is due to curtailment of unemployment relief projects and other work on the roads which can be postponed for the duration of the war, while building has shown marked improvement, the October 1, 1940, index being some 55 per cent higher than that for the same date in 1939.

ing some 27,700 additional employees; this increase of 3·9 per cent was decidedly greater than in any earlier October and has, in fact, rarely been exceeded in any month in the years since 1920. The most noteworthy expansion at the date under review took place in iron and steel, fruit and vegetable preserving and textiles.

Among the non-manufacturing industries, logging, mining, building and trade reported greatly increased activity, while shipping, highway and railway construction and maintenance and services showed curtailment, the largest decline being in road work. The expansion in

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

An analysis of the data for October 1 shows widespread gains over September 1, 1940, both geographically and industrially. Employment advanced considerably in seven of the provinces, the exceptions being New Brunswick and Manitoba, where small declines were reported. The most marked improvement was in Quebec and Ontario.

There was an exceptionally large increase over the preceding month in manufacturing, the establishments furnishing statistics reporting logging and trade exceeded the average in the experience of past years, while that in mining was below normal.

A fuller analysis of the situation in the various industries as at October 1, 1940, is given following the text dealing with conditions in the economic areas and the leading cities.

The records show that for October 1, 1939, 11,891 employers has reported payrolls aggregating 1,186,786 workers, or 20,544 more than at

September 1, improvement had then been indicated in manufacturing, logging, mining, transportation and trade, while employment in construction and service had declined.

The unadjusted index, (based upon the average for the calendar year 1926 as 100), has been as follows at October 1 in recent years: 1940, 136·2; 1939, 121·7; 1938, 116·7; 1937, 125·7; 1936, 110·1; 1935, 106·1; 1934, 100·0; 1933, 90·4; 1932, 86·7; 1931, 103·9; 1930, 116·2; 1929, 125·6; 1928, 118·8 and 1927, 110·3.

Employment in Financial Institutions

For some months, statistics of employment have been collected from banks, trust companies and stock market operators. For October 1, 403 firms and branches in these lines of business reported staffs aggregating 33,689 persons, compared with 33,810 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade industries bring the total number of employees included in the October 1 survey of employment to 1,369,394, in 12,708 establishments, and slightly lowers the index of 136·2 in the industries above enumerated, to 135·5; when the employees of the co-operating financial organizations were added to the figures for September 1, 1940, the index was lowered from 131·6 to 131·0. The October 1, 1939, index had stood at 121·7 without the figures from financial institutions, and at 121·3 when they were included.

Estimates of Total Number of Wage-earners in Employment and Unemployed

The Social Analysis Branch of the Dominion Bureau of Statistics prepares monthly estimates of the total number of wage-earners, of those in employment and those unemployed throughout the Dominion. The estimates are based upon the census definition of wage-earners as one who has or has had a job from an employer in any field of work, including the following and all other classes of industry: agriculture, fishing, trapping, forestry, mining, manufacturing, construction, transportation, communications, trade, finance and services—professional, public, domestic, personal, etc., etc. Also according to the definition given in the census volumes, the unemployed are those who have at one time had gainful employment but are no longer employed. This definition automatically excludes young persons just leaving school and others who have never had a job; persons who have retired; those living on income, those reporting themselves at the census in the class, "No occupation"; employers and persons working on their own account are also excluded.

It may be noted that the estimated number of wage-earners shows some variation from month to month, the figure expanding or contracting in response to seasonal, secular and

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY PROVINCES AND ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Oct. 1, 1927	110·3	108·1	110·0	111·1	111·7	107·8

[1]The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

cyclical influences. The variation is largely at the expense of the workers classed as "on their own account"; it is, however, also true that when employment is active, either generally or in a particular industry, persons not normally belonging to the wage-earning class (in the broad sense of the word), will take positions, later to retire therefrom without actively seeking work at other periods, and without experiencing the privations frequently associated with unemployment. An illustration of such cases may be found during the canning season, when work of this nature will call forth a considerable body of workers who do not ordinarily look for employment outside their homes in other parts of the year; another example is the employment of students and others in summer hotels during the active season, and in retail trade during the Christmas rush.

It should be noted that the information available does not permit allowance to be made in these calculations for enlistments in the armed forces since the outbreak of war. Thus the estimates of the total number of wage-earners include some enlisted men who were unemployed wage-earners prior to enlistment. The estimates of wage-earners in employment are entirely exclusive of enlisted men, but the estimates of unemployed wage-earners include a considerable number of previously unemployed wage-earners who have now enlisted. Since enlisted men are not included as wage-earners, there is in these figures an overstatement of the total number of wage-earners and also a corresponding overstatement of the number of unemployed wage-earners. Accordingly, the estimates of unemployment in recent months are exaggerated by the number of enlisted wage-earners who were without jobs when they joined the active forces. Such factors as unrecorded emigration within the last year or two may have an effect on figures based on the Census, which is now nine years away; no adjustment can be made for these factors.

The following table shows, in thousands, the estimated total number of wage-earners, and of those employed and those unemployed, in recent months, together with figures for August in the period, 1928-1939:—

August	Total Estimated Number of Wage-earners (in thousands)	Estimated Number of Wage-earners in employment (in thousands)	Estimated Number of Wage-earners unemployed (in thousands)
1928	2,465	2,438	27
1929	2,647	2,599	48
1930	2,759	2,395	364
1931	2,611	2,201	410
1932	2,459	1,815	644
1933	2,483	1,872	611
1934	2,515	2,035	480
1935	2,566	2,114	452
1936	2,592	2,206	386
1937	2,781	2,536	245
1938	2,746	2,378	368
1939	2,793	2,461	332
1940	2,910 1/	2,709 2/	201 3/
Jan. 1940	2,732 1/	2,355 2/	377 3/
Feb.	2,725 1/	2,338 2/	387 3/
Mar.	2,695 1/	2,304 2/	391 3/
Apr.	2,720 1/	2,353 2/	367 3/
May	2,794 1/	2,489 2/	305 3/
June	2,843 1/	2,568 2/	275 3/
July	2,872 1/	2,634 2/	238 3/
Aug.	2,910 1/	2,709 2/	201 3/

1/ Includes enlisted men who were previously unemployed wage-earners.
2/ Exclusive of enlisted men.
3/ Including a considerable number of enlisted men who were previously unemployed wage-earners.

The total estimated number of wage-earners increased by some 38,000 between July and August; the figures for these two months were higher than in any other month for which an estimate has been made. The estimated number in employment, at 2,709,000, was also greater than in July, 1940, or any earlier month for which an estimate has been prepared.

The estimated number unemployed was 201,000, a decrease of 37,000 from the preceding month, and of 131,000 from August, 1939; the latest figure was the lowest for August in any year since 1929.

Employment by Economic Areas

There was considerable improvement in seven of the nine provinces; New Brunswick and Manitoba, both showing moderate losses, were the exceptions to the generally upward movement. The greatest gains were those of 18,204 persons, or 4·7 per cent, in Quebec and 23,976, or 4·4 per cent, in Ontario. These additions to the personnel were the largest ever reported in those provinces at October 1. Employment generally was brisker than at the same date last autumn. In the Maritime Provinces, the index was higher than in any other month since the latter part of 1937; in the Prairie area, the favourable comparison goes back to 1931, while in Quebec, Ontario and British Columbia employment was at its maximum for any month in the almost twenty years for which statistics are available.

Maritime Provinces.—A further increase was indicated in Prince Edward Island and Nova Scotia, but there was a falling-off in New Brunswick; the tendency in the Maritime Provinces as a whole, however, was favourable. The 863 co-operating employers enlarged their

payrolls from 94,661 persons at September 1, to 95,346 at the beginning of October. This gain was not so large as that indicated at the same date of last autumn, but it compares favourably with the small decline reported, on the average, in the Maritime area at October 1 in the years since 1920. The index, at 128·2 at the latest date, was over ten points higher than at October 1, 1939; it was also higher than in any other October of the record, except that of 1937.

Manufacturing as a whole showed a considerable advance at the date under review, mainly in iron and steel. Vegetable food, pulp and paper and some other plants were also busier, while animal foods recorded seasonal curtailment. Among the non-manufacturing groups, logging and trade afforded more employment; there were, however, reductions in transportation, construction and services.

The 832 firms furnishing data for October 1, 1939, had employed 87,208 men and women, or 1,159 more than in the preceding month.

Quebec.—Another important gain was reported in Quebec, where industrial activity reached a new maximum. There were large increases in manufacturing, (notably of food, chemical, non-ferrous metal, electrical apparatus, textile and iron and steel products) and in logging, shipping, building and trade. Mining and quarrying, services, communications and railway and highway construction, on the other hand, were quieter, but the losses in employment were generally moderate. Statistics were compiled from 3,083 establishments in Quebec with 409,310 workers, compared with 391,106 at the beginning of September. The index rose from 136·4 at September 1, 1940, to 142·8 at the date under review, as compared with 126·4 at October 1, 1939. Returns were then tabulated from 2,950 firms having 360,815 persons in their employ, a decline of 6,131 from their preceding report.

Ontario.—The trend continued decidedly upward in Ontario, according to 5,332 employers of 562,807 men and women, or 23,976 more than at the beginning of September. These additions to the staffs were decidedly larger than those reported at October 1 in 1939, or any other year for which information is available. The index rose from 134·8 in the preceding month, to 140·9 at the date under review; this figure, which constituted a new high, was 16·1 per cent above that of October 1, 1939.

There were important advances in manufacturing at the beginning of October, 1940, most industrial groups sharing in the expansion. The largest gains were in the vegetable food and iron and steel divisions, but there was also heightened activity in textile, beverage, chemical, pulp and paper, electrical apparatus, non-ferrous metal and other classes. On the other hand, lumber and miscellaneous non-metallic mineral products showed some slackening.

Among the non-manufacturing industries, logging, mining, building and trade recorded decided improvement, but there were contractions in shipping, hotels and restaurants, laundries and dry-cleaning businesses and highway and railway construction and maintenance.

For October 1, 1939, 5,195 establishments had reported a staff of 482,631, as compared with 461,991 in the preceding month. The index then stood at 121·4, substantially below the latest figure of 140·9.

Prairie Provinces.—There were increases in Saskatchewan and Alberta, but employment in Manitoba was rather quieter. An analysis of the returns by industry in the Prairie Provinces as a unit shows heightened activity in manufacturing (mainly of vegetable food and textile products), and in mining, transportation, building construction and trade, while hotels and restaurants and highway construction released some employees. Returns for the date under review were received from 1,730 firms with an aggregate working force of 154,883 persons, compared with 153,482 at September 1. The index at the latest date, 118·1, was the highest for any month since November, 1931, being slightly above that for the beginning of October in 1939, when the 1,687 co-operating employers had reported 151,713 men and women on their payrolls, compared with 148,699 in the preceding month.

British Columbia.—Employment in British Columbia showed marked improvement chiefly in lumber, vegetable food and iron and steel factories, and in building and trade. On the other hand, coal-mining, transportation, hotels and restaurants, highway and railway construction and maintenance indicated lowered activity. Data were tabulated from 1,296 firms, whose staffs rose from 112,450 at September 1, to 113,359 at the beginning of October. A larger advance had been noted at October 1, 1939, but the index, at 118·7, was then much lower than at the date under review, when it stood at 127·8. An aggregate working force of 104,419 men and women was reported by the 1,227 employers furnishing statistics for October 1, 1939; this was an increase of 1,862 from their September 1, 1939, staffs.

Table 1 gives indexes by economic areas.

Employment by Cities

The trend at the beginning of October was upward in Montreal, Quebec City, Toronto, Ottawa, Hamilton, Windsor and Vancouver, while there was a slight decline in Winnipeg. Employment in each of these centres was decidedly more active than at October 1, 1939. In Montreal, Quebec, Toronto and Vancouver, the indexes were also higher than in any other month for which information is available; in Ottawa, the favourable comparison goes back to 1930, while in Hamilton and Windsor, the volume of employment reported exceeded that in any other period of the record, with the exception of two months in 1929.

Montreal.—There was a further large increase in the number at work in Montreal, where the 1,795 co-operating establishments employed 190,684 persons, or 7,204 more than at September 1. Manufacturing on the whole was much brisker, there being considerable gains in iron and steel and textile plants, together with smaller increases in food, tobacco, leather, electrical apparatus, non-ferrous metal and some other lines. Transportation, construction, services and trade also afforded more employment.

Improvement on a smaller scale had been noted at the beginning of October of last year, when the index stood at 110·2, compared with 122·4 at the latest date; this is the highest figure recorded up to the present. For October 1, 1939, statistics had been furnished by 1,715 firms having 171,034 employees, compared with 169,628 in the preceding month.

Quebec.—Continued expansion in industrial activity was indicated in statistics received from 218 employers with a staff of 20,156, or 812 more than at September 1. There were losses in services and shipping, but building, trade and manufacturing afforded more employment; the increase in the last-named took place mainly in textile and chemical plants. The index, at 144·7, was many points higher than at the beginning of October, 1939, when 210 establishments had reported 15,509 men and women on their paylists.

Toronto.—Further improvement was reported in Toronto, resulting in a new, all-time high index of employment. Statements were tabulated from 1,828 firms employing 172,986 workers, compared with 167,166 in their last report. Manufacturing showed very marked gains, particularly in the metal, electrical apparatus, textile, vegetable food and printing divisions. Building construction and retail trade also absorbed more workers. Much smaller additions to staffs had been made at October 1 of a year ago, when 1,761 employers had reported a combined working force of 146,697 persons; the index had stood at 114·1, or 16·6 per cent below the latest figure of 133·0.

Ottawa.—Manufacturing and trade were rather more active, while other industries showed little change on the whole. The forces of the 237 establshiments furnishing data aggregated 17,335, or 457 more than at September 1, 1940. A smaller increase had been recorded at the same date in 1939 by the 231 co-operating firms, whose payrolls had included 15,063 workers; the index of employment was then considerably lower than the latest figure of 127·8, which was the highest since 1930.

Hamilton.—Important expansion was indicated in Hamilton, mainly in manufacturing, where there was improvement in food, electrical apparatus and iron and steel factories, that in the last-named being particularly pronounced. Building and trade were also busier, while other industries showed little general change. Statements were tabulated from 335 businessmen with 43,478 employees, compared with 42,312 in the preceding month. A substantial increase in personnel had also been reported at October 1 last year by the 331 employers whose statistics were then received, and who had a staff of 35,265. The index calculated from their returns was decidedly lower than that of 133·2 at the date under review, when it was higher than in any preceding month since the summer of 1929.

Windsor.—There was a marked increase in the number working in Windsor, chiefly in automobile and other iron and steel plants. One hundred and ninety-five concerns employed 24,558 persons, as against 23,386 at September 1. A larger advance had been indicated at the beginning of October of last year, when the 196 co-operating establishments had 17,260 employees. The index of 124·8 at October 1, 1939, was many points lower than that of 177·6 at the date under review; the latter has only once been exceeded since the record for Windsor was commenced in 1925.

Winnipeg.—A slackening was shown in Winnipeg at October 1, when the 537 firms furnishing data employed 46,107 men and women, or 114 fewer than in the preceding month. Manufacturing, building and some other industries were more active, but road work and communications released some workers. Improvement had been recorded at the beginning of October a year ago by the 529 employees whose statistics were

received, and who had 43,112 workers on their paylists; the index then, however, was several points lower, standing at 98·8, as compared with 105·3 at October 1, 1940.

Vancouver.—Employment in Vancouver at October 1 was brisker than in the preceding month, establishing a new maximum for the period since 1922, when the record for Vancouver was commenced. Information was tabulated from 563 firms with an aggregate staff of 44,035 persons, compared with 43,824 at September 1. Manufacturing, particularly of lumber and vegetable foods, reported improvement, and trade also afforded more employment; transportation, construction and services, however, showed moderate curtailment. A general reduction had been indicated at the beginning of October, 1939, when the index stood at 115·8, as compared with 129·5 at the date under review. Statements for October 1 of last year had been received from 523 establishments, whose employees had numbered 38,689.

Employment by Industries

Manufacturing.—As already stated, there was very pronounced expansion in employment in factories at October 1, when the 6,744 co-operating establishments reported a staff of 739,945 persons, or 27,664 more than in the preceding month. This increase of 3·9 per cent has seldom been exceeded in any previous month of the record; the comparatively few exceptions are almost entirely the gains indicated at February 1 in several years, which represented partial recovery from the usual, year-end losses. The index (1926=100), rose from 138·4 at September 1 to a new all-time maximum of 143·8 at October 1, when it was 20 per cent above the figure of 119·7 at the same date of last year.

On the average, employment generally in manufacturing at the beginning of October in the period, 1921-1939, has shown only a slight advance, the tendency having been downward in nine, and upward in ten of these years. The unusually large increase at the date under review therefore resulted in an important gain in the seasonally adjusted index, which rose from 134·6 in the preceding month, to 139·4 at October 1; this was the highest seasonally-corrected figure on record.

The most important expansion at October 1, 1940, was in textile, vegetable food and iron and steel, which showed gains rarely exceeded in any previous month; the persons added to the reported payrolls of firms in these industries aggregated 4,766, 9,359 and 10,277, respectively. Heightened activity was also indicated in the leather, lumber, pulp and paper, beverage, chemical, electrical apparatus, non-ferrous metal and other manufacturing divisions, and in central electric stations. The only exception to the generally upward movement was in edible animal products, in which there was moderate seasonal curtailment.

The manufacturers making returns for the beginning of October of last year, numbering 6,468, had employed 613,558 men and women, compared with 591,324 in the preceding month. The most marked gains had then also been reported in vegetable food, textile and iron and steel factories.

The unadjusted index numbers in manufacturing at the beginning of October in recent years, based on the 1926 average as 100, are as follows:—1940, 143·8; 1939, 119·7; 1938, 112·5; 1937, 121·7; 1936, 109·0; 1935, 103·3; 1934, 94·4; 1933, 86·7; 1932, 84·1; 1931, 91·8; 1930, 107·8; 1929, 120·2; 1928, 115·7 and 1927, 106·4.

Animal Products—Edible.—There were losses in dairies and fish-preserving establishments, but moderate improvement was indicated in meat-preparing and packing plants. Statistics were received from 334 manufacturers in the animal food group, employing 33,560 persons, as compared with 34,355 in the preceding month. This contraction, which was most marked in New Brunswick, was on a smaller scale than that registered at the corresponding date of last year, and the index was then many points lower.

Leather and Products.—An increase was reported in leather plants at October 1, mainly in Quebec and Ontario. The 339 employers making returns had 24,757 workers, or 291 more than at September 1. Employment at the beginning of October a year ago had shown a greater advance from the preceding month; the index number then stood at 119·5, compared with 121·0 at the date under review.

Lumber and Products.—Contra-seasonal improvement was indicated in the lumber group, in which employment was at a much higher level than at October 1 in 1939; it was, indeed, more active than in any other month since June, 1930. There were reductions at the date under review in rough and dressed lumber mills, but furniture and other wood-using factories showed gains. A combined working force of 58,252 persons was reported by the 991 co-operating manufacturers, as compared with 58,055 at the beginning of September. The tendency was downward in Quebec, Ontario and Alberta, while firms in British Columbia showed considerable improvement.

Musical Instruments.—Little general change was noted in musical instrument plants, in which the level of employment was decidedly higher than in last autumn. Thirty-six establishments reported 2,171 employees, as compared with 2,161 in the preceding month.

Plant Products, Edible.—The canning of vegetable foods showed a marked advance, and flour and cereal, sugar and syrup, bread and bakery, chocolate and confectionery factories were also more active. The staffs of the 566 reporting firms aggregated 52,824 persons, or 9,359 more than in their last return. There were important gains in all given economic areas, the largest being in Ontario. The general improvement greatly exceeded that noted at the corresponding date in 1939; the index was then eleven points lower than the latest figure of 171·3, which is the maximum in the record of twenty years.

Pulp and Paper Products.—An upward movement was indicated by 718 employers in this group, who had 75,679 workers on their payrolls, as compared with 75,418 at the beginning of September. The additions to the staffs in paper product manufacturing were most pronounced. A larger increase had been reported at the beginning of October a year ago, but the index number then was ten points lower.

Rubber Products.—Employment in rubber goods showed further but slight expansion at October 1, 1940; data were compiled from 53 firms with 14,806 employees, as against 14,747 in their last return. A larger gain had been recorded at the same date in 1939, when employment was, however, at a lower level.

Textile Products.—Woollen, silk, hosiery and knitting, headwear, garment, bedding and other textile factories reported greatly heightened activity; 1,251 manufacturers enlarged their payrolls from 127,456 workers at the beginning of September, to 132,222 at the date under review. Quebec and Ontario recorded the bulk of this expansion, although the trend was generally favourable. Larger increases had been noted at the beginning of October last year, but the index then was lower by 25½ points than at October 1, 1940.

Beverages.—An upward tendency was in evidence in these industries at the beginning of October, according to the 150 establishments furnishing statistics, which employed 10,495 workers, or 308 more than in the preceding month. Employment was rather brisker than at October 1, 1939, when improvement had also been indicated.

Tobacco.—There was no general change in tobacco manufacturing, the 47 factories whose data were tabulated having a staff of 8,746 at October 1, compared with 8,735 at the beginning of September. The index was higher than at the same date in 1939, when a decline had been recorded.

Chemicals and Allied Products.—Further expansion was noted in chemical factories, 325 of which had a working force of 25,408, as compared with 24,807 in the preceding month. Most of the increase took place in Quebec. Employment was in greater volume than at the first of October of last year, or indeed than in any other month in the twenty years for which data are available.

Clay, Glass and Stone Products.—Stone product and glass factories showed rather heightened activity, while the clay product division of this group reported some curtailment. Statements were received from 222 manufacturers employing 12,782 persons at October 1, compared with 12,696 at the beginning of September. The index was rather higher than at the corresponding date in 1939, or any other year since 1930.

Electric Light and Power.—There was a further advance in electric light and power plants at October 1, when 103 establishments reported 18,847 workers, compared with 18,578 in the preceding month. A decline had been noted at the same date of last year, and the index number then stood at 141·7, compared wih 148·5 at the beginning of October in 1940.

Electrical Appliances.—In the electrical apparatus division, 128 works employed 23,122 men and women, or 1,204 more than in their last report. A smaller gain had been indicated at October 1, 1939, when the index was much lower than the October 1, 1940 figure of 169·4, the all-time maximum to date.

Iron and Steel Products.—Increases were shown at the beginning of October in the crude, rolled and forged, automobile, aeroplane, ship-building, machinery, agricultural implements, heating appliance, wire, hardware, structural iron and steel, and many other divisions of the iron and steel group, in which the general expansion was especially large for the time of year. Statements were received from 973 manufacturers, whose payrolls aggregated 189,630 persons, as compared with 179,353 in the preceding month. Employment advanced in most provinces, the improvement in Ontario being particularly pronounced. A rather smaller increase had been shown at the first of October of last year, when activity was at a decidedly lower level, the index then standing at 101·5, compared with 144·3 at the latest date; this figure has never been exceeded.

Non-ferrous Metal Products.—A combined working force of 33,358 persons was reported by the 207 co-operating employers, who had 32,707 at the beginning of September. There

was an upward movement in the precious and the base metal product divisions, while smelting and refining were rather quieter. The index was many points higher than in the autumn of 1939.

Non-metallic Mineral Products.—The personnel of the 100 firms furnishing data in these industries aggregated 14,117, or 88 fewer than in the preceding month; most of the falling-off was in the petroleum division. On the whole, a gain had been noted at October 1, 1939, but employment was then in smaller volume.

Logging

Statements were tabulated from 393 logging companies, whose staffs were enlarged by 15,793 workers to 53,357 at the date under review. This expansion was not equal to that indicated in the early autumn of 1939, but exceeded the usual seasonal increase from September to October in the years since 1920. The index, at 180·2 at October 1, 1940, was higher than at that date in 1939, or in any other year of the record except 1937. Camps in Quebec and Ontario reported most of the gain.

Mining

Coal Mining.—There was a seasonal advance in coal-mines, in which the index of employment was fractionally higher than at October 1, 1939, although a larger increase from September had then been shown. Returns were received from 105 operators employing 25,582 persons at October 1, 1940, as compared with 25,038 in their last report. The gains took place mainly in the Albertan coalfields.

Metallic Ores.—Employment in this group showed considerable improvement, 211 companies reporting 44,684 workers, or 430 more than at the beginning of September. Quebec, Ontario and British Columbia mines were rather more active, but there was a falling-off in the Western Provinces. A slight gain had been noted at the corresponding date last year, when the index number stood at 352·0, compared with 350·3 at the latest date.

Non-Metallic Minerals, other than Coal.—A moderate decline was reported in this group, in which statistics were received from 107 firms employing 10,646 persons, compared with 10,739 in the preceding month. Activity in these industries was higher than at October 1, 1939, when a falling-off had also been indicated.

Communications

Telegraphs and telephones showed reduced activity; the companies and branches furnishing data recorded a staff of 24,235 employees, as compared with 24,608 at September 1. The index was rather higher than at the same date in 1939, although employment in communications had then slightly gained.

Transportation

Street and Electric Railway, Cartage and Storage.—Considerable additions to payrolls were indicated in local transportation and storage, 378 persons being taken on by the 307 co-operating firms, who employed 32,398 men and women. Employment in this industry was in greater volume than at October 1 of last year, although a larger advance had then been shown.

Steam Railways.—Statistics were tabulated from 102 employers in the steam railway operation group, whose payrolls were reduced from 64,977 at September 1 to 64,854 at the beginning of October. There were decreases in British Columbia, Quebec and Ontario, while improvement was shown in the Maritime and Prairie Provinces. An exceptionally large increase had been indicated at the same date of last year, due in part to the employment of guards following the outbreak of war; this index, at 84·3, was then rather higher than at the latest date, viz., 81·3.

Shipping and Stevedoring.—Curtailment was recorded in the water transportation group, in which 125 companies employed 17,681 workers; this was a reduction of 689 from September 1. A slight decrease had beeen noted at October 1 of last year, when the index stood at 91·2, as compared with 93·9 at the beginning of October of the present year.

Construction and Maintenance

Building.—There was a further large increase in employment in building, 4,578 persons being added to the forces of the 937 co-operating contractors. They had 54,790 employees; this number was above that reported at the beginning of October of a year ago, employment, being, in fact, at a higher level than in any other month since the late autumn of 1930. Considerable improvement was recorded at the date under review in Quebec, Ontario and the Western Provinces.

Highway.—Activity in this group was curtailed in most provinces, New Brunswick and Prince Edward Island being the exceptions; the losses in personnel in Quebec and Ontario were the largest. Statements were tabulated from 427 employers throughout the Dominion, whose payrolls, standing at 60,154, were smaller by 4,021 workers than at September 1. The number employed on road work was below that reported at October 1, 1939, although a much greater reduction had then been noted.

Railway.—There was a falling-off in railway construction and maintenance. The forces of the 29 companies and divisional superintendents furnishing returns declined from 32,753 at the beginning of September, to 32,168 at the date under review. A larger falling-off had been registered at October 1, 1939, and the general level of employment in this industry was then slightly lower.

Services

The closing of summer hotels caused a considerable contraction in employment, while laundries and dry-cleaning establishments were also slacker. The staffs of the 599 service firms whose returns were received, aggregated 32,583 at October 1, as against 34,737 in the preceding month. The seasonal shrinkage indicated at the same date last year had been on a larger scale, and employment in the service division was then at a lower level than at the date under review.

Trade

Retail and wholesale trading establishments largely increased their personnel; 2,133 firms reported 142,628 employees, compared with 138,802 in the preceding month. The percentage advance approximated that recorded at October 1, 1939, but considerably exceeded the average gain noted at the beginning of October in the years, 1921-1939. The index at the date under review stood at 146·8, compared with 138·6 at October 1, 1939.

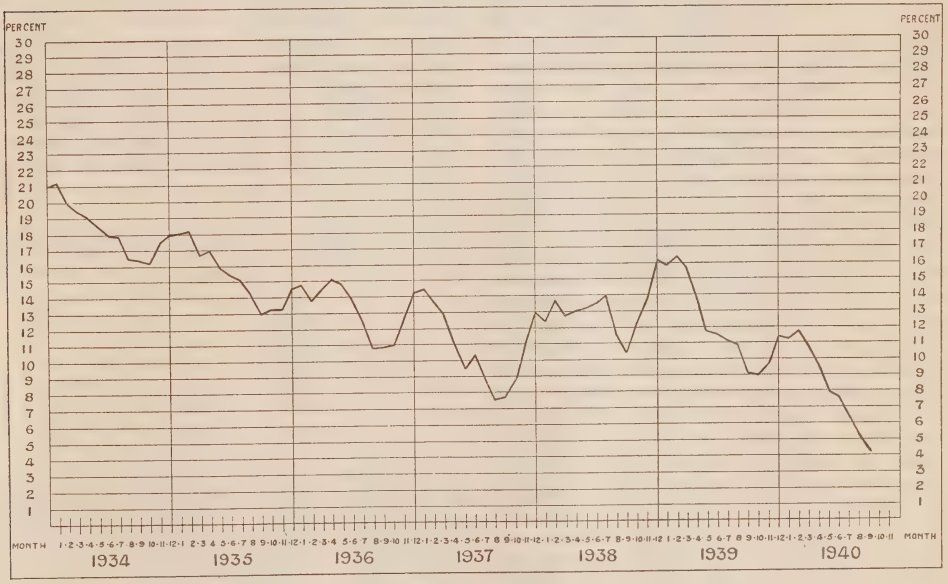
TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of September, 1940

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle on account of illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Continuing the progressively more favourable trend of activity for local trade union members which has obtained since the close of February this year, the situation during September showed improvement on a small scale from the August returns. Reports for the month under review were forwarded by 1,990 labour organizations with 261,247 members, 11,625 of whom or 4·4 per cent were without work, in contrast with a percentage of 5·2 in August. This percentage reported for September was the lowest that has been recorded in any month since September, 1929. Impressive gains, however, were manifest from September last year when 9·1 per cent of idleness was registered. Alberta unions, with an increase in work afforded of 2·4 per cent, showed the greatest provincial variation from August, the determining factor in this advance being the recovery noted in the coal mines of the province. In Nova Scotia, Quebec and Ontario the changes from August, though in a favourable direction, were still quite slight. Fractional recessions only in available work were apparent among Manitoba, Saskatchewan and British Columbia unions, and in New Brunswick the percentage of idleness remained identical with that of August. Contrasted with the returns for September last year Nova Scotia, Quebec and Ontario unions all reported a substantially better volume of work afforded during the month under review, the majority of trades and industries participating in this expansion. Fair-sized gains in activity were recorded also in British Columbia, and in New Brunswick and Alberta some improvement was apparent. Manitoba and Saskatchewan members, however, showed a slight tendency toward retarded activity from September last year, mainly in steam railway operation.



A separate compilation is made each month of unemployment among local trade unions in the largest city in each province, with the exception of Prince Edward Island. Of these, Halifax unions showed a rise in employment of over 4 per cent during September from the previous month, and in Saint John and Montreal the increases recorded were around 2 per cent. A more favourable trend of activity was manifest from Toronto, Edmonton and Vancouver, though the variations from August were less than one per cent. On the other hand, employment for Winnipeg and Regina members subsided slightly. When contrasted with the returns for September, 1939, Halifax members were much more busily engaged during the month under review, and a substantially better situation

prevailed for Montreal members. In Toronto and Vancouver also the expansion recorded was quite noteworthy. An upward movement of employment was manifest by Edmonton and Saint John members, though the advances were of lesser degree. Slight losses in work afforded, however, were registered from Winnipeg, and in Regina the tendency was toward lessened employment, but the change from September last year was practically negligible.

From the chart which accompanies this article and shows the trend of unemployment by months from January, 1934, to date, it will be seen that the curve during September proceeded in the downward course manifest since the close of February though the variation from August was slight. A marked drop in the level of the curve was apparent, however, from September last year when conditions were less favourable than during the month reviewed.

Continued gains in employment were evident in the manufacturing industries during September, the 590 local unions from which reports were tabulated, with an aggregate of 103,037 members, showing that 4,559 or 4·4 per cent were unemployed in comparison with 5·1 per cent of inactivity in August. Quite substantial improvement was reflected from September last year when 10·8 per cent of idleness was recorded. No outstanding changes were apparent in the various groups of industries during September from the previous month, leather workers showing a moderately better situation, and iron and steel workers, metal polishers and general labourers increases in activity on a rather small scale. A fractional rise only in available work was indicated by jewellery, wood and garment workers, and printing tradesmen. Adequate work was provided for cigar and tobacco, fur, rubber and gas workers, and mill and smeltermen, as was the case in August. Brewery workers also were busily engaged during September compared with a nominal percentage of unemployment in the preceding month. Some slowing up in activity, however, was manifest by hat, cap and glove workers, and the situation declined slightly for textile and carpet, and glass workers, bakers and confectioners, paper-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

makers, and meat cutters and butchers. In making a comparison with the returns for September, 1939, large scale expansion was evident during the month reviewed among iron and steel, wood, glass, leather, and hat, cap and glove workers. General labourers were also considerably busier during the period under review, and noteworthy gains were reported by papermakers. Activity increased more moderately for metal polishers, while printing tradesmen and jewellery workers showed heightened employment on a small scale. Minor advances were apparent among garment workers, and bakers and confectioners. Fur workers were fully employed, compared with a rather noteworthy percentage of idleness in September last year, and among brewery and cigar and

tobacco workers, and mill and smeltermen also, no inactivity was apparent, while in September, 1939, unemployment was in slight volume. Rubber and gas workers were quite busy during the two months under comparison. Textile and carpet workers, and meat cutters and butchers were the only tradesmen to reflect a lowering in employment volume accorded, though the changes were small.

In coal mining there was a slight rise in activity during September over both the previous month and September a year ago, unemployment standing at 4·6 per cent, as compared with percentages of 6·4 in August and 6·0 in September, 1939. The percentage for the month under survey was based on the reports received from 57 local unions, comprising a membership of 21,547 persons, 1,000 of whom were reported as idle on the last day of the month. Conditions for Alberta miners were decidedly busier during September than in the preceding month, and in Nova Scotia there was a slightly upward tendency. Considerably curtailed activity, however, was manifest by British Columbia members. New Brunswick unions reported all members at work as in August. When compared with the returns for September, 1939, Nova Scotia and Alberta unions indicated gains in work afforded on a small scale during the month reviewed. British Columbia locals, as in the previous comparison, suffered losses of rather noteworthy proportions. In New Brunswick a fully engaged situation was reflected in both months under comparison.

The building and construction trades, which have shown much stimulation in employment for some time, due to war-time demands on industry, indicated a moderately better situation during September than in the previous month, as apparent from the returns tabulated from 231 associations, combining a membership of 28,677 persons. Of these, 2,032 or 7·1 per cent were without employment as compared with a percentage of 11·1 in August. Decidedly improved conditions were manifest from September last year when 21·3 per cent of unemployment was recorded. Bricklayers, masons and plasterers were much busier during September than in the previous month, and among painters, decorators and paperhangers the employment gains were noteworthy. Moderately better conditions prevailed for carpenters and joiners, and the tendency for electrical workers, plumbers and steamfitters, and hod carriers and building labourers was also in a more favourable direction. Curtailment of work afforded on a small scale, however, was manifest by steam shovelmen, tile layers, lathers and roofers, granite and stonecutters, and bridge and structural iron workers. Compared with returns in the building and construction trades for September last year, the situation was extensively improved during the month reviewed for painters, decorators and paperhangers, tile layers, lathers and roofers, hod carriers and building labourers, bridge and structural iron workers, steam shovelmen, bricklayers, masons and plasterers, carpenters and joiners, and plumbers and steamfitters. Granite and stonecutters also recorded considerable employment expansion, and among electrical workers there was a small gain in activity.

The transportation industries showed a nominally adverse tendency during September from the previous month, according to the reports tabulated from 846 local unions with a membership numbering 72,726 persons. Of these, 2,497 were without employment at the end of the month, a percentage of 3·4 as contrasted with 3·2 per cent of idleness in August. The trend of activity from September last year, however, was in a more favourable direction, though the change was slight, unemployment for that month standing at 4·2 per cent. In the steam railway division, which constituted about 80 per cent of the entire group membership reported in the

transportation industries, and among teamsters and chauffeurs activity was but nominally retarded during September from the preceding month. In the navigation division there was a moderate reduction in work afforded, while street and electric railway employees indicated an unchanged volume of work from August. The navigation division showed a decidedly better situation during September, however, than in the corresponding month of last year, and slight improvement was apparent among steam railway employees and teamsters and chauffeurs. As in the previous comparison, no variation was evident among street and electric railway employees.

The 4 unions of retail shop clerks from which reports were tabulated at the close of September including a membership of 1,864 persons showed that only 0·2 per cent were without work, as compared with a fully employed situation in August and with 0·1 per cent of inactivity in September last year.

Civic employees were quite actively engaged during September as in the previous month, the reports received from 83 associations of these workers, with 9,522 members, showing that only 4 were idle on the last day of the month, in contrast with 0·2 per cent of unemployment in August. In September last year 1·2 per cent of the members were reported out of work.

From unions in the miscellaneous group of trades 139 reports were compiled at the end of September, covering a membership of 10,806 persons, 425 of whom, or a percentage of 3·9, were unemployed compared with 3·3 per cent of idleness in August. Theatre and stage, and hotel and restaurant employees, and barbers all showed some slight falling off in activity from August, while among stationary engineers and firemen, and unclassified workers the percentage of idleness remained identical in the two months compared. A moderately better situation prevailed in the miscellaneous group of trades as a whole from September last year when 6·5 per cent of unemployed members was reported. In this comparison unclassified workers showed a considerable rise in the volume of employment afforded during the period reviewed, and a more favourable movement was manifest by stationary engineers and firemen, theatre and stage, and hotel and restaurant employees. Barbers, however, reflected fractional employment cessation.

In the fishing industry during September activity subsided slightly from August, as manifest by the returns forwarded from 6 associations involving a membership of 2,816 persons. Of these, 140 or 5·0 per cent were out of work at the end of the month in contrast with a percentage of 2·1 in August. The level of employment, however, was somewhat above that of September last year when 7·9 per cent of idleness was reported.

The 4 unions of lumber workers and loggers from which reports were tabulated at the end of September, with a membership totalling 2,446 persons showed that 354 or 14·5 per cent were idle as compared with a percentage of 13·0 in August. Considerable improvement in the situation was apparent from September last year when 21·2 per cent of unemployment was recorded.

Table I shows by provinces the percentage of members who were on an average unemployed, each year, from 1929 to 1939 inclusive, and also the percentages of unemployment for September of each year from 1929 to 1938 inclusive, and for each month from September, 1939, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for September, 1940

The volume of business transacted by the offices of the Employment Service of Canada, as shown by the average daily placements effected during September, 1940, recorded very substantial gains over the work of the previous month and also over that of the corresponding month a year ago, the increase in the former case being 50 per cent and in the latter 74 per cent. Under both comparisons all groups, except farming and mining, showed gains, the most outstanding being in construction and maintenance, where National Defence projects had greatly increased the demand for labour. Logging, services and manufacturing also showed fair gains over August, but those in trade and transportation were not so marked. Farming, however, recorded a noticeable decline. When compared with the corresponding month a year ago, in addition to the increase in construction and maintenance mentioned above, many more placements were effected during September of this year in manufacturing, services, logging and transportation. Trade also showed a moderate increase under this comparison, and the losses in farming and mining were fairly small.

The accompanying chart shows the trend of employment since January, 1938, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work at the offices of the Service throughout Canada, compilations being made semi-

monthly. It will be seen from the graph that the curve of vacancies in relation to applications followed an upward trend during the first half of September, but declined slightly during the latter half, while that of placements rose steadily throughout the month. At the end of the period under review both curves had attained levels from 17 to 20 points higher than those recorded at the close of the corresponding period a year ago. The ratio of vacancies to each 100 applications was 66·9 during the first half and 74·9 during the second half of September, 1940, in contrast with the ratios of 58·4 and 54·9 during the corresponding periods of 1939. The ratios of placements to each 100 applications during the periods under review were 69·6 and 70·5, as compared with 55·1 and 53·1 during the corresponding month of 1939.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during September, 1940, was 2,983, as compared with 2,065 during the preceding month and with 1,658 in September a year ago.

The average number of applications for employment received daily by the offices of the Service during the month under review was 3,933, in comparison with 2,969 in August, 1940, and with 2,928 in September last year.

The average number of placements made by the offices of the Service during September, 1940, was 2,758, of which 2,126 were in regular employment and 632 in work of one week's duration or less, as compared with a total daily average of 1,903 during the preceding month. Placements in September a year ago averaged 1,585 daily, consisting of 1,099 placements in regular and 486 in casual employment.

During the month of September, 1940, the offices of the Service referred 67,717 persons to vacancies and effected a total of 66,192 placements. Of these, the placements in regular employment were 51,021, of which 44,357 were of men and 6,664 of women, while placements in casual work totalled 15,171. The number of vacancies reported by employers was 54,767 for men and 16,814 for women, a total of 71,581, while applications for work numbered 94,389, of which 72,453 were from men and 21,936 from women. Reports for August, 1940, showed 55,747 positions available, 80,147 applications made and 51,368 placements effected, while in September, 1939, there were recorded 41,433 vacancies, 73,178 applications for work and 39,608 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1930, to date:

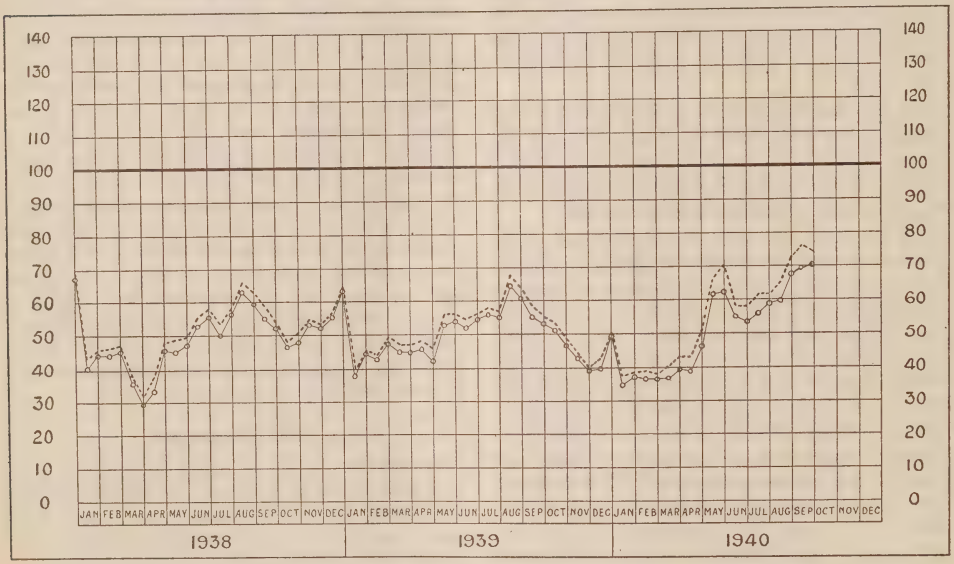
Year	Placements		
	Regular	Casual	Totals
1930	187,872	180,807	365,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940 (9 months)	235,077	109,705	344,782

Nova Scotia

During September, employment offices in the Province of Nova Scotia received orders for over 5 per cent more workers than in the preceding month and nearly 237 per cent more than in the corresponding month of last year. There was an increase of nearly 8 per cent in placements when compared with August and of nearly 238 per cent in comparison with September, 1939. The substantial increase in placements over September of last year was almost entirely due to extensive construction work undertaken by the Department of National Defence. In addition, there was a moderate gain in services and minor increases in logging and trade, but the changes in all other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were logging 103; farming 67; construction and maintenance 3,268; trade 51 and services 793, of which 650 were of household workers. Placements in regular employment numbered 3,297 of men and 175 of women.

New Brunswick

The demand for workers, as indicated by orders received at employment offices in New Brunswick during September, was nearly 1 per cent less than in the preceding month, but nearly 9 per cent above that of the corresponding month of last year. Placements were over 1 per cent fewer than in August, but nearly 8 per cent above September, 1939. The only increase of importance in placements over September of last year was in services, supplemented by small gains in transportation, logging and manufacturing. The improvement in these groups was reduced for the province as a whole by a decline in construction and maintenance, the highway division of which showed a sharp decrease which was offset in part by an increase in building. Placements by industrial divisions included transportation 62; construction and maintenance 280 and services 800, of which 583 were of household workers. During the month 257 men and 81 women were placed in regular employment.



QUEBEC

There was an increase of nearly 118 per cent in the number of positions offered through employment offices in the Province of Quebec during September when compared with the preceding month and of over 256 per cent in comparison with the corresponding month of last year. There was an increase also in placements of nearly 147 per cent when compared with August and of over 262 per cent in comparison with September, 1939. All industrial divisions participated in the increase in placements over September of last year, although the abnormal improvement for the province as a whole was mainly due to a substantial gain in the highway division of construction and maintenance. In other industrial groups the largest gains were reported in building construction, logging, services and manufacturing. Placements by industrial divisions included manufacturing 730; logging 2,440; farming 154; transportation 883; construction and maintenance 17,384; trade 240 and services 4,406, of which 3,915 were of household workers. There were 20,863 men and 2,362 women placed in regular employment.

ONTARIO

There was an increase of over 7 per cent in the number of positions offered through employment offices in Ontario during September when compared with the preceding month and of nearly 38 per cent in comparison with the corresponding month of last year. Placements were nearly 2 per cent higher than in August and nearly 31 per cent above September, 1939. With the exception of nominal declines in mining and communication, all industrial divisions showed gains in placements over September of last year, the most important increases being in manufacturing, construction and maintenance, services, logging and farming. Placements by industrial divisions included manufacturing 3,322; logging 1,708; farming 2,643; mining 139; transportation 279; construction and maintenance 5,782; trade 525 and services 4,715, of which 2,837 were of household workers. During the month 10,263 men and 2,589 women were placed in regular employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

MANITOBA

Positions offered through employment offices in Manitoba during September were nearly 39 per cent fewer than in the preceding month and over 23 per cent below those of the corresponding month of last year. There was a decrease also in placements of over 36 per cent when compared with August and 21 per cent in comparison with September, 1939. Placements in the railway division of construction and maintenance were considerably fewer than during September of last year and accounted for the decline for the province as a

* 118 Placements effected by offices now closed.

whole under this comparison. The decrease in this group was partly offset by a fairly large increase in farming. Small changes only were reported in all other groups. Industrial divisions in which most of the placements were effected during the month were manufacturing 86; logging 156; farming 1,088; construction and maintenance 965 and services 854, of which 681 were of household workers. Placements in regular employment numbered 2,072 of men and 263 of women.

Saskatchewan

Orders received at employment offices in Saskatchewan during September called for 30 per cent fewer workers than in the preceding month and over 21 per cent less than during the corresponding month of last year. There was a decline also in placements of over 29 per cent in comparison with August and of nearly 23 per cent when compared with September, 1939. Farm placements were considerably less than during September of last year. The decline in this group was partly offset by gains in all other industrial divisions, the most important of which were in construction and maintenance and services. Placements by industrial divisions included manufacturing 70; farming 1,344; transportation 83; construction and maintenance 635; trade 82; and services 789, of which 520 were of household workers. There were 1,839 placements for men and 360 for women in regular employment.

Alberta

Employment opportunities, as indicated by orders received at employment offices in Alberta during September, were about 29 per cent better than both in the preceding month and the corresponding month of last year. There was a similar percentage of gain in placements when compared with August, but an increase of nearly 25 per cent when compared with September, 1939. Except for a small decline in mining and nominal losses in trade and finance, all industrial divisions showed gains in placements over September of last year, the most important increases being in construction and maintenance and services. Placements by industrial divisions included manufacturing 128; logging 156; farming 2,606; transportation 85; construction and maintenance 765 and services 863, of which 543 were of household workers. During the month 3,718 men and 362 women were placed in regular employment.

British Columbia

Opportunities for employment, as indicated by orders received at employment offices in British Columbia during September, were 15 per cent better than in the preceding month and over 22 per cent above the corresponding month of last year. Placements also showed an increase of nearly 16 per cent when compared with August and over 21 per cent in comparison with September, 1939. Small declines in placements from September of last year were reported in mining, trade and farming, but there were gains in all other industrial groups. The most important of the increases were in manufacturing, services and construction and maintenance. Placements by industrial divisions included manufacturing 475; farming 128; transportation 127; construction and maintenance 2,188; trade 100 and services 1,216, of which 731 were of household workers. Placements in regular employment numbered 2,048 of men and 472 of women.

Movement of Labour

During the month of September, 1940, the offices of the Employment Service of Canada made 51,021 placements in regular employment, 34,712 of which were of persons for whom the employment located was outside the immediate vicinity of the offices at which they were registered. Of the latter, 1,501 were granted the Employment Service reduced transportation rate, 1,026 travelling to centres within the same province as the despatching office and 475 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4.00, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

Taking advantage of the reduced rate in Quebec during September 423 bushmen received certificates at the Hull office for transportation to centres in Ontario. Of these, 193 were bound for Pembroke, 119 for Port Arthur and 111 for Sudbury. Offices in Ontario granted 832 certificates for reduced transportation during September, all provincial. The Port Arthur office issued 460 of these to 336 bushmen, 103 building construction workers, 10 mine workers and 11 cookees proceeding to employment within the Port Arthur zone. From Fort William 98 bush workers, and from Sudbury 109 bush workers travelled to centres

within their respective zones. Destined to the Sudbury zone also, were 37 bushmen, 1 cook and 2 cookees sent from Pembroke, 25 mill labourers and one cook from North Bay, and one bushman from Toronto. The Sault Ste. Marie zone received 4 mill hands from North Bay and 3 bushmen from Sudbury. From Toronto, in addition, 74 building construction workers went to Parry Sound, 15 building construction workers to North Bay, and 2 bricklayers to Stratford. The labour movement in Manitoba during September emanated from Winnipeg, from which centre 52 persons were transported to points in the Port Arthur zone, among whom were 45 bushmen, 3 bricklayers, 2 restaurant cooks, one garage mechanic and one farm hand. In Alberta during September the Edmonton office was instrumental in the transfer of 19 workers to points within its own zone. These included 14 mine workers, 4 bushmen and one labourer. British Columbia offices effected 175 transfers at the reduced rate during September, all to provincial centres. On certificates received at Vancouver 8 carpenters travelled to New Westminster and 87 carpenters, 4 mine workers and one hotel waiter to various points within the Vancouver zone. For employment within its own zone the New Westminster office despatched 68 carpenters. From Prince George 4 carpenters and one plumber went to Prince Rupert, while from Nelson one sawmill engineer was carried at the reduced rate to Penticton and one mill labourer to a point within the Nelson zone.

Of the 1,501 workers who profited by the Employment Service reduced transportation rate during September 674 travelled by the Canadian National Railways, 826 by the Canadian Pacific Railway, and one by the Pacific Great Eastern Railway.

In addition to the 2·5 cent rate referred to in the above, the special harvest transportation facilities afforded by the railway companies in the Prairie Provinces during the month of August and mentioned in the report for that month prevailed throughout September. Under this arrangement the railway companies granted a special harvest rate of 1·5 cents per mile to all applicants upon presentation of certificates furnished by the offices of the Employment Service in Manitoba and Alberta, the movement being confined entirely to the localities within their respective provinces. During September 39 persons in Manitoba and 210 in Alberta took advantage of this special rate, a total of 249. Of these 148 were transported by the Canadian National Railways and 101 by the Canadian Pacific Railway.

(4) Building Permits issued in Canada during September, 1940

The September report of building permits compiled by the Dominion Bureau of Statistics includes returns from 166 of the 204 municipalities in Canada which have systems for issuing such permits and of this number 158 reported detailed operations. The remaining 8 advised that no permits had been issued during the month of September, while 38 municipalities had failed to report at the close of October 10.

The total value of permits reported as issued in the month of September is $10,014,340. Revised values for the month of August include returns from 187 municipalities and aggregate $11,555,102. Reports were received from 56 of the original 58 municipalities and show a value of $6,426,220 for the last month. The corresponding revised value for August includes 57 returns and is $7,693,732, while the September, 1939, value was $4,135,624.

The total value of permits issued by all municipalities during the nine elapsed months of the current year is $81,324,052. The value for the 58 municipalities for the same period is $57,749,872, while their corresponding value in 1939 was $43,911,494.

During the month of September new construction of all types amounted to 82·1 per cent of the total value, while the percentage of new residential construction was 37·6.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JULY TO SEPTEMBER, 1940

THE business of the offices of the Employment Service of Canada during July to September, 1940, showed a gain over that transacted during the corresponding quarter last year, as there was an increase of nearly 48 per cent in vacancies listed and of 43 per cent in placements effected in regular and casual employment. A very substantial increase was recorded in construction and maintenance, where National Defence projects throughout Canada had required much additional labour, but manufacturing and services also showed marked gains, followed by others which were fairly substantial in logging and transportation. The increase in trade was of moderate proportions, while that in mining was nominal only. The one group to indicate a decrease was farming and this was quite large. Provincially, Manitoba and Saskatchewan alone reported declines, which were of fair proportions, the remaining provinces registering increases, the highest being in Quebec and Ontario, where construction and maintenance showed marked improvement; Nova Scotia also reported a substantial gain in this group, but the increases in the remaining provinces were much more moderate in volume, that in New Brunswick being very small.

From the chart on page 1174, which accompanies the article on the work of the Employment Service offices for the month of September, it will be noted that the trend in the curve of vacancies in relation to applications was upward throughout the quarter, except during the second half of July, when no change was registered, and the latter half of September, when a slight decline was shown. The curve of vacancies, however, followed an upward course throughout the entire three months and at the close of the period under review the levels attained by both curves were from 17 to 20 points higher than those recorded at the end of September a year ago.

During the period July to September, 1940, there was an average of 69·4 vacancies and 64·3 placements for each 100 applications for employment, as compared with 59·9 vacancies and 57·4 placements for each 100 applications for work during the same period of 1939.

The average number of positions offered daily during the third quarter of 1940 was 2,286, of applications registered, 3,291, and of placements effected, 2,116, in contrast with the daily average of 1,548 vacancies, 2,583 applications and 1,482 placements in regular and casual employment during the corresponding quarter of 1939.

During the three months July to September, 1940, the offices reported that they had made 167,343 references of persons to positions and effected a total of 162,912 placements, of which 121,671 were in regular employment and 41,241 in casual work. Of the placements in regular employment 103,249 were of men and

18,422 of women, while casual work was found for 23,176 men and 18,065 women. Comparison with the corresponding quarter of 1939 showed that 114,080 placements were then made, of which 81,343 were in regular employment and 32,737 in casual work. Applications for employment during the period under review were received from 191,287 men and 62,113 women, a total of 253,400, in contrast with a registration of 198,833 persons during the same period of 1939. Employers notified the Service during the quarter July to September, 1940 of 175,986 vacancies, of which 131,067 were for men and 44,919 for women, as compared with 119,133 opportunities for work during the corresponding period a year ago.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of September, 1940.

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF OCTOBER, 1940

Reports of the Superintendents of the Employment Service

THE employment situation at the end of October was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces continued fall ploughing and the harvesting of late crops. Unfortunately, heavy frosts had damaged to quite an extent large quantities of apples and potatoes and had delayed farm work. However, evaporators had opened and would handle about 80,000 barrels of these slightly frosted apples. Fox ranchers of the Fredericton area had recently held a field day, when discussions had taken place on fox breeding problems, this industry having expanded considerably within a short time. Fishing for the most part was quiet. Scallops and oysters, the greater per cent of which was shipped to the United States, and mackerel were plentiful, but green dry cod was very scarce. Potential losses to fishermen in the sardine catch had been caused by the silver hake which had driven these fish out of the Harbour de Loutre area. Shipments to England of fresh and cured smoked fillets from Grand Manan and other centres promised to be of great importance, this being a new venture. Several logging camps were under construction, and those in the Miramichi district were filled to capacity, contractors reporting no scarcity of men for winter bush work. As the result of war orders a much larger cut was expected during the coming months, the demand for pit props being particularly urgent. Some sawmills, having completed the season's cut, had closed down, while others would continue to operate during November, but sash and door factories were working overtime owing to the demand for dressed lumber. Coal mines in the New Glasgow area worked five and six days per week, while those in Cape Breton and vicinity worked from two to six days. Factories in nearly all centres were operating to capacity, there being the usual contraction in refreshment manufacturing concerns. All building under way was well advanced and highway paving also continued. Transportation was fair, shipments of lumber continuing from the Eastern ports. Trade was good. Charwomen featured largely in female placements in the Women's Division, as suburbanites, who were re-opening their town houses, had requested a large number of this class of applicants.

In the Province of Quebec much activity was apparent in logging, manufacturing and construction. At La Tuque, the demand for bushmen was so heavy that men were being called from other districts, more than 500 workers already having been placed and 5,000 additional men needed. Chicoutimi, likewise, reported a shortage of men, as wood cutting there was very active, as well as in the districts served by Hull, Matane, Rouyn and Sherbrooke. The call for fuel wood cutters at Montreal, too, was very heavy. All industrial establishments were busy at Chicoutimi, Hull, Matane, Sherbrooke and Three Rivers, but at La Tuque and Rouyn manufacturing concerns, on the whole, were slack. At Levis, the aluminum plant had re-opened and at St. Romuald many workers had been recalled. Sash and door factories throughout the province, too, were busily engaged. Numerous construction workers were employed in the erection of training camps and few skilled tradesmen were idle. Many labourers, also, had been hired for highway construction in order to rush completion of road work before the winter season began.

There was a much smaller demand for farm help in Ontario and with the completion of the harvest season for fruit and vegetables, the calls for casual help also were fewer; however, some men had been placed as plough hands. More bushmen were seeking employment in the woods and lumber camps were gradually filling. In the North Bay district greater commitments for future delivery had been accepted by the logging operators, necessitating the opening of more camps. The fact, that the number of those now operating had already reached the peak of last season, had caused wages to stiffen somewhat and late starting operators had raised them from the usual $35 to $40 per month to $40 and $45. Mining was quiet except at Timmins, where only a nominal demand existed for this class of workers. The general industrial situation remained very satisfactory, as practically all manufacturing concerns were operating at full capacity, especially those handling war orders. Skilled workers in the metal trades were greatly in demand, particularly those employed in aeroplane manufacture, but these men were secured in many instances by transference from one district to another through clearance orders listed at the various employment centres. Building construction steadily continued with little unemployment, but the volume of work available on road construction had decreased greatly. National Defence

projects in some localities were nearing completion and in others were progressing favourably, carpenters, millwrights, pipe fitters and welders constituting the chief call amongst skilled tradesmen, many of whom, like the others mentioned above, were brought in from outside districts; unskilled labour, however, was plentiful. The movement of freight by lake and rail was brisk and this furnished employment for a number of men. Trade was very satisfactory. Orders for women in domestic service were steady, with capable household servants much in demand. Some factory and clerical positions, also, were available and quickly filled.

With harvesting about completed in the Prairie Provinces, requests for farm help had declined considerably, although a steady call existed for young and middle-aged men, under and over military age, for dairy and general farm work during the winter months. At Lethbridge, numerous men were engaged in the sugar beet harvest and the result of their labour was an estimated delivery of 200,000 to 225,000 tons of beets to the sugar refineries, the payroll of which would approximate $1,250,000, this million and a quarter pay day being split among some one thousand farmers. An abundance of feed was also reported, more than sufficient for the cattle on hand, so that the Southern Alberta farmers were enjoying a sellers' market for the first time in years. A good demand existed for loggers and this was likely to improve with the colder weather. Mining and manufacturing also showed increased activity. Various National Defence projects were nearing completion, with consequent reductions in the number of men employed, but little road work was under way. Railroad shops at Lethbridge were fairly busy and freight haulage active. Trade was good. A slight decrease was reported in the household section of the Women's Division and even then, capable domestics were not always easily obtained. Some factory and clerical work, too, was available and this was eagerly sought after by many of the applicants.

Although unusually mild weather in British Columbia had prolonged the season for fall work in farming, there were few requests for farm hands and at Vancouver, for the first time in many months, all orders on hand for experienced milkers had been filled. Apple picking was about completed, but packing houses were very busy. The majority of lumber camps and sawmills was working to capacity and while the production from these was extremely high, a shortage of lumber for domestic projects was seriously curtailing construction. Herring fishing continued, with catches fair and mining was steady. Building was very active, though some of the larger construction jobs had been hampered, as mentioned above, through lack of building material. National Defence projects were well advanced. Shipyards were busy, but the waterfronts, except at Victoria, were quieter. Trade was fair. Little change was recorded by the Women's Division, there being the usual demand for household domestics, as well as a few openings for hotel employees and factory hands.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

July-August Record

From the September issue of the British *Ministry of Labour Gazette* the employment situation may be summarized as follows:

Between July 15 and August 12, there was a decrease of 27,814 in the number of unemployed persons on the registers of Employment Exchanges in Great Britain. There was a reduction of nearly 50,000 in the numbers of men and women registered as unemployed, but the number of boys and girls rose nearly 22,000, owing mainly to the registration of juveniles who had reached the school-leaving age at the end of the summer term. The total of 799,452 persons registered as unemployed at August 12 was 432,240 less than the figure for August 14, 1939.

The number of insured persons, aged 16 and over, recorded as unemployed in Great Britain and Northern Ireland at August 12, 1940, represented 5·4 per cent of the total number of insured persons, aged 16-64 at July 1939, as compared with 5·6 at July 15, 1940; at August 14, 1939, the percentage unemployed was 8·5. For persons within the general scheme the corresponding percentages were 5·5 at August 12, 1940, 5·7 at July 15, 1940 and 8·7 at August 14, 1939. For persons within the agricultural scheme the percentages were 2·4, 2·5, and 3·9 respectively.

United States

On October 24, Miss Frances Perkins, United States Secretary of Labour, reported in an official press release, that employment in non-agricultural industries in September, 1940, was at an exceptionally high level, following an increase of more than 600,000 jobs between August and September.

The following paragraphs taken from the official report indicate the employment situation in the United States to be as follows:

This increase followed a gain of 400,000 jobs between July and August. While employment usually increases in the summer and early autumn, the gain this year is one of the largest ever recorded. Month by month employment has been increasing since the winter low point in February. Nearly 2,000,000 people returned to work this year between February and September. More than 36,600,000 persons were working in non-agricultural employment in September. This does not include an additional 2,242,000 working on CCC, WPA, and NYA.

Industry	Estimated number of wage earners September 1940	Gains in number of workers between— August and September 1940	Average for 1937 and September 1940
Aircraft	108,400	+9,000	+84,400
Shipbuilding	103,000	+4,500	+40,700
Machine tools	69,600	+2,400	+22,400
Engines	58,000	+2,100	+25,100
Aluminum manufactures	30,000	+1,100	+ 6,300
Explosives	8,700	+ 400	+ 3,300

The major factor conrtibuting to the current gain of 600,000 workers was the rise in factory employment, which was about half again as great as the usual seasonal increase. Over 285,000 factory wage earners were returned to jobs in September. This gain in employment was accompanied by a rise of 5·4 per cent, or $10,700,000 in weekly wages. The latter increase is about five times the customary pay-roll increase of 1·0 per cent from August to September. With but few exceptions, the September gains in factory employment and pay-rolls are the largest aggregate increases in any single month since 1919.

As in the preceding month the increases in factory employment and pay-rolls were widespread. Of the 90 manufacturing industries regularly surveyed, 76 reported more workers, and 77 larger pay-rolls.

The expansion of non-agricultural employment is by no means confined to the defence industries. This is true not only of the last month but also of the period since 1939. Employment in the primary defence industries such as shipbuilding, aircraft, and ordnance has increased 203,000 over the last 12 months. Employment in what may be called secondary defence industries, such as the iron and steel and chemical industries, primarily engaged in supplying civilian needs but also supplying semi-finished products for primary defence industries, has expanded 268,000. The percentage expansion of employment in the primary defence industries has, of course, been much greater than in industries that are engaged almost exclusively in supplying civilian needs in which aggregate employment increased 507,000. This is 2½ times as great as the increase in the primary defence industries.

In the following war-materials industries employment reached new highs in September:

Other industries stimulated directly or indirectly by war orders and in which large employment gains were shown included foundries and machine shops (11,100), electrical machinery (10,900), sawmills (6,300), brass, bronze, and copper products (5,100) and steel (4,500). The increased production of new models was reflected in the gain of 96,300 workers in the automobile industry, while seasonal factors contributed to the increase of 11,900 workers in cotton goods, 10,100 in confectionery, 8,700 in women's clothing, and 5,900 in furniture. The few manufacturing industries showing declines included beverages (4,300), boots and shoes (3,800), and ice cream (2,300), in each of which seasonal curtailment is expected in September.

Gains were also reported in other major fields of non-agricultural employment. In wholesale and retail trade combined, there was a seasonal increase of more than 150,000 workers. About 37,000 additional workers were employed by the transportation and public utility group, and 30,000 workers were added in the field of Federal and private construction. In the group of mining industries, a gain of 11,000 was reported and in the finance, service, and miscellaneous group 30,000 workers were added. Employment in the Federal, State, and local government service increased by about 51,000 from August to September. This figure includes the armed forces except for additions resulting from the calling of the National Guard for active service.

The increase in wholesale and retail trade combined was predominantly in retail stores which took on 4·6 per cent more workers to handle fall business and increased pay-rolls by 4·3 per cent. Employment increase of 1·1 per cent in wholesale trade between mid-August and mid-September represented the usual fall gain in this industry.

Employment in the private building construction industry showed a larger-than-seasonal increase of 3 per cent from August to September.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the Labour Gazette for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Law require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. This clause relating to wages and hours in the last named statute is in the terms following:—

> "All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages:
>
> The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance, or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for buliding and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for governmental supplies

and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

War Contracts

All contracts awarded by the Department of Munitions and Supply are subject to labour conditions for the protection of the workpeople concerned.

In the case of building and construction contracts, the labour conditions include fair wages schedules based on the rates current in the particular district where the work is being performed, and provide that the working hours shall not exceed eight per day and forty-four per week.

In the case of contracts for the manufacture and overhaul of aircraft, the labour conditions include one scale of minimum wage rates which has been approved for all work of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and a separate and higher scale for all such contracts undertaken in Western Canada (comprising the area from Fort William to the Pacific Coast). These contracts are subject also to a working week of not more than forty-eight hours, provision being made that any necessary and authorized overtime work shall be paid for at a rate of not less than one and one-half times the regular rate.

Contracts for shipbuilding and repair are all subject to labour conditions including fair wages schedules based on the rates current in the district where the work is being executed. Provision is made for the observance of working hours of not more than forty-eight per week and for a wage rate of not less than one and one-half times the regular rate for any overtime that is necessary and authorized by the Dominion Government inspector in the plant.

Contracts for the manufacture of equipment and supplies for the defence forces are subject to the "B" labour conditions of the Fair Wages Order in Council referred to in the introduction to this article.

As complete lists of the contracts awarded by the Department of Munitions and Supply are being issued weekly through the office of the Director of Public Information, and are being published in the press, this information will not be duplicated here. Particulars of the contracts which have been awarded recently by various other departments of the Government of Canada, however, appear hereunder:—

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

NATIONAL HARBOURS BOARD

Construction of repairs to roadway expansion joints, Jacques Cartier Bridge, Montreal, P.Q. Name of contractors, Western Waterproofing Co., Montreal, P.Q. Date of contract, October 17, 1940. Amount of contract, $6,230. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 77
Cement finishers	0 61
Compressor operators	0 55
Drill runners	0 50
Engineers, operating, steam:	
single or double drums	0 72
three or more drums	0 80
Engineers on steel erection	0 83
Firemen, stationary	0 55
Labourers	0 44
Painters	0 70
Structural steel workers	0 83
Timbermen and cribmen (measuring, scribing and, by the use of the axe, adze, etc., cutting and fitting timber	0 50
Motor truck driver	0 45
Motor truck driver and truck	1 45
Watchmen	0 35
Welders and burners:	
acetylene or electric	0 60
on steel erection	0 83

DEPARTMENT OF PUBLIC WORKS

Construction work at Port Atkinson, Vancouver, B.C. Name of contractors, Messrs. Allen & Viner Construction Co., Ltd., Vancouver, B.C. Date of contract, October 7, 1940. Amount of contract, $5,725. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement finishers	0 90
Cement and concrete mixer operators (gas or electric)	0 60
Drivers	0 45
Drivers, horse and cart	0 60
Drivers, team and wagon	1 00
Electricians (inside wiremen)	1 00
Labourers	0 45
Motor truck drivers	0 50
Motor truck drivers and truck	1 50
Painters and glaziers	0 80
Plumbers and steamfitters	1 00
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Roofers—composition	0 50
Roofers—sheet metal	1 00
Roofers—shingles (wood, asbestos)	0 90
Sheet metal workers	1 00
Stonemasons	1 10
Stonemasons' helpers (mixing and tempering mortar)	0 50

Installation of a power plant at Port Atkinson, Vancouver, B.C. Name of contractors, Allen & Viner Construction Co., Ltd., Vancouver, B.C. Date of contract, October 7, 1940. Amount of contract, $1,345. A fiar wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 90
Drivers	0 45
Drivers, horse and cart	0 60
Electricians (inside wiremen)	1 00
Labourers	0 60
Motor truck drivers	0 50
Motor truck drivers and truck	1 50

Construction of a new pavilion at Lancaster Hospital, Saint John, N.B. Name of contractors, Stewart Construction Co., Ltd., Sherbrooke, P.Q. Date of contract, August 21, 1940. Amount of contract, $71,278 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 60
Cement finishers	0 70
Cement and concrete mixer operators.	
Steam	0 65
gas or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 65
Firemen, stationary	0 45
Hoist operators-tower (gas or electric)	0 50
Labourers	0 40
Lathers, metal	0 60
Linoleum layers	0 55
Motor truck driver	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 60
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 70
Roofers, felt and gravel: patent, composition	0 45
Roofers, sheet metal	0 65

	Per hour
Roofers, shingles (wood, asbestos)	0 60
Sheet metal workers	0 65
Terrazzo layers	0 70
Terrazzo finishers and helpers	0 55
Tile setters (ceramic)	0 90
Tile setters (asphalt)	0 70
Tile setters' helpers (all men assigned to help tradesmen)	0 45
Watchman	0 35
Waxers and polishers (floor)	0 45

Erection of a travelling, electrically operated Hammerhead Crane, Halifax, N.S. Name of contractors, Hamilton Bridge Co., Ltd., Hamilton, Ont. Date of contract, August 30, 1940. Amount of contract, $129,500. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 45
Driver, horse and cart	$ 55
Driver, team and wagon	0 75
Driver	0 40
Electricians	0 85
Engineers on steel erection	0 75
Firemen, stationary	0 45
Labourers	0 40
Machinists	0 70
Machinists' helpers	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Plumbers and steamfitters	0 85
Painters	0 60
Structural steel workers	0 75
Welders and burners on steel erection	0 75
Watchman	0 35

Construction of an instrument and model shop, storage building and gate house at the National Research Council's new annex laboratories, Ottawa, Ont. Name of contractor, Alex. I. Garvock, Ottawa, Ont. Date of contract, August 21, 1940. Amount of contract, $108,200 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Boilermakers	$0 85
Brick and hollow tile layers	1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Gas or electric	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Electricians, inside wiremen	0 80
Engineers, operating, steam:	
Single or double drums	0 70
Three or more drums	0 80
Engineers on steel erection	0 85
Firemen, stationary	0 50
Hoist operators, tower (gas or electric)	0 55
Labourers	0 45
Lathers, metal	0 70
Linoleum layers	0 60
Marble setters	1 00
Marble setters' helpers (all men assigned to help tradesmen)	0 50
Motor truck drivers	0 50
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 70
Plasterers	0 85
Plasterers' helpers (mixing and tempering material	0 50
Plumbers and steamfitters	0 95
Roofers, felt and gravel	0 50
Roofers, sheet metal	0 85
Sheet metal workers	0 85
Stonecutters	0 80
Stonemasons	1 00
Stonemasons' helpers (mixing and tempering mortar)	0 50
Structural steel workers	0 85
Shovel operators—gas	1 00
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Terrazzo layers	0 75
Terrazzo finishers and helpers	0 60
Tile setters, asphalt	0 80
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Watchmen	0 40
Waxers and polishers (floor)	0 50
Welders and burners—on steel erection	0 85

Construction at Esquimalt, B.C. Name of contractors, Victoria Pile Driving Co., Ltd., Victoria, B.C. Date of contract, August 19, 1940. Amount of contract, approximately $100,465.35. A fair wages schedule was included in the contract as follows:—

	Per hour
Cement and concrete mixer operators (gas)	$0 55
Cement finishers	0 60
Firemen	0 68¾
Labourers	0 45
Electricians	0 75
Pile driver foreman	1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Pile driver boomman	1 00
Pile driver bridgeman	1 00
Plumbers and steamfitters	0 90
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 45
Wharf and dock builders	1 00
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	20 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	7 00

Note.—Working hours must not exceed *8 per day* and *44 per week*.

Construction at Esquimalt, B.C. Name of contractors, Horie-Latimer Construction Co., Vancouver, B.C. Date of contract, August 19, 1940. Amount of contract, approximately

$174,769. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver, foreman	$1 25
Pile driver, engineer	1 12½
Pile driver, man	1 00
Pile driver, boomman	1 00
Pile driver, bridgeman	1 00
Pile driver, fireman	0 68¾
Labourers	0 45
Wharf and dock builders	1 00
Plumbers and steamfitters	0 90
Plumbers' helpers (all men assigned to help tradesmen)	0 50
Cement and concrete mixer operator (gas)	0 55
Cement and concrete mixer operator (steam)	0 70
Cement finishers	0 60
Painters	0 65
Road grader operators (gas)	0 60
Rock drillers (machine)	0 55
Sheet metal workers	0 75
Motor truck drivers	0 50
Motor truck drivers and truck	1 50
Steam roller operator (steam or gas)	0 70
Track layers	0 50
Track layers foreman	0 60
Watchman	0 45

Construction of building No. 59 at Halifax, N.S. Name of contractors, Fundy Construction Co., Ltd., Halifax, N.S. Date of contract, $74,345 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers—walls	0 85
Cement finishers—floors	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gas or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 95
Elevator constructors	0 97
Elevator constructors' helpers	0 68
Engineers, operating steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineers on steel erection	0 75
Hoist operators—tower (gas or electric)	0 50
Firemen, stationary	0 45
Labourers	0 40
Lathers (metal)	0 60
Linoleum layers	0 55
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 95
Roofers, felt and gravel: patent: composition	0 45
Roofers, sheet metal	0 70
Sheet metal workers	0 70
Stonecutters	0 70
Stonemasons	1 00
Stonemasons' helpers (mixing and tempering mortar)	0 45
Structural steel workers	0 75
Shovel operators (gas)	1 00
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Terrazzo layers	0 70
Terrazzo finishers and helpers	0 55
Tile setters (asphalt)	0 70
Tile setters (ceramic)	1 00
Tile setters' helpers (all men assigned to help tradesmen)	0 45
Watchman	0 35
Waxers and polishers (floor)	0 45
Welders and burners (on steel erection)	0 75
Welders and burners (acetylene or electric)	0 70

Construction of a general storehouse building at Halifax, N.S. Name of contractors, Stewart Construction Co., Ltd., Sherbrooke, P.Q. Date of contract, September 4, 1940. Amount of contract, $262,970 and unit prices.

	Per hour
Brick and hollow tile layers	$1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers—walls	0 85
Cement finishers—floors	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gas or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 95
Elevator constructors	0 97
Elevator constructors' helpers	0 68
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plumbers and steamfitters	0 95
Rodman—reinforced steel	0 50
Roofers, felt and gravel: patent: composition	0 45
Roofers, sheet metal	0 70
Sheet metal workers	0 70
Stonemasons	1 00
Stonemasons' helpers (mixing and tempering mortar)	0 45
Watchman	0 35
Engineers operating steam:	
Single or double drums	0 65
Three or more drums	0 75
Hoist operators—tower (gas or electric)	0 50

Construction of repairs, renewals and renovations to the public building at Chicoutimi, P.Q. Name of contractors, Riverin and Riverin, Enrg., Chicoutimi, P.Q. Date of contract, August 24, 1940. Amount of contract,

$9,690. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 55
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Gas or electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Electricians (inside wiremen)	0 60
Labourers	0 35
Lathers (metal)	0 55
Lathers (wood)	0 50
Motor truck drivers	0 40
Motor truck drivers and truck	1 35
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 60
Roofers, felt and gravel: patent: composition	0 40
Sheet metal workers	0 60
Watchman	0 30

Construction of an extension at Halifax, N.S. Name of contractors, Standard Construction Company, Halifax, N.S. Date of contract, September 9, 1940. Amount of contract, $10,562 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 60
Brick and hollow tile layers	1 00
Brick and hollow tile helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers: walls	0 85
Cement finishers: floors	0 60
Cement and concrete mixer operators.	
Steam	0 65
Gas or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 95
Engineers, operating, steam:

Engineers, operating steam:	
Single or double drums	0 70
Three or more drums	0 80
Engineers on steel erection	0 85
Firemen, stationary	0 50
Hoist operators—tower (gas. or electric)	0 55
Motor truck drivers	0 50
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 70
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Roofers: felt and gravel; patent; composition	0 50
Sheet metal workers	0 85
Structural steel workers	0 85
Watchman	0 40
Waxers and polishers, floor	0 50
Welders and burners on steel erection	0 85

Construction of alterations to shed and new film vaults at the Motion Picture Bureau, National Research Council annex, Ottawa, Ont. Name of contractors, Reginald A. Crain and George E. Crain, Ottawa, Ont. Date of contract, September 16, 1940. Amount of contract, $6,421.00. The preceding fair wages schedule was also included in this contract.

Construction of fireproof vaults in sub-basement of Temporary Building No. 2, Ottawa, Ont. Name of contractors, Messrs. R. Taylor & Son, Ottawa, Ont. Date of contract, October, 10, 1940. Amount of contract, $5,400.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 00
Brick and hollow tile layers' helpers	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Gas. or electric	0 55
Driver	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 80
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters (spray)	0 85
Painters and glaziers	0 70
Plasterers	0 85
Plasterers' helpers	0 50
Plumbers and steamfitters	0 95
Structural steel workers	0 85
Watchman	0 40
Welders and burners on steel erection	0 85

Construction of wharf improvements at Baie Comeau (Manicouagan), Saguenay Co., P.Q. Name of contractors, Donat Dimard & Maurice Michaud, Quebec, P.Q. Date of contract, October 15, 1940. Amount of contract approximately $7,185.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Labourers	$0 35
Motor truck driver	0 40
Motor truck driver and truck	1 35
Drillers (machine)	0 45
Dynamite men	0 45
Driver	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60

Construction of water mains, etc., at Sydney, N.S. Name of contractors, Hall Construction Co., Ltd., Halifax, N.S. Date of contract, October 15, 1940. Amount of contract, approximately $7,534.14. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 95
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 90
Compressor operators (gas. or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 70
Drill runners	0 50
Hoist operators (gas. or electric)	0 50
Labourers	0 40

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Fishing

BRITISH COLUMBIA.—SALMON CANNERS OPERATING COMMITTEE AND THE UNITED FISHERMEN'S FEDERAL UNION, LOCAL 44 (SALMON PURSE SEINE FISHERMEN).

This agreement is for the fall salmon season of 1940; and fixes prices to be paid for the two varieties of salmon in the different areas at 10 to 25 cents each for chums and 40 to 60 cents each for cohoes.

Union members are to "fish for and sell their catches only to the operators to whom they are individually attached, unless otherwise instructed by the accredited representative of the operators."

Manufacturing: Pulp, Paper and Paper Products

HULL, QUEBEC.—E. B. EDDY COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCALS 35 AND 243) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 50).

This agreement which is similar to the 1937 agreement (which was summarized in the LABOUR GAZETTE, October, 1937, page 1150) is to be in effect from January 1, 1940, to December 31, 1940, and thereafter from year to year, subject to notice.

Hourly wage rates for a few classes of labour: beater room—beater engineers 68 to 97½ cents, beatermen 54 and 55½ cents; electrical department—power house operator 73 cents, shift electricians 58 and 63 cents, electricians apprentices 28 to 49 cents; finishing department—rewinders 46 and 50 cents, cuttermen 51 cents, broke hustler and floorman 43 cents; female sorters 25 to 30 cents; groundwood department—grindermen 53 cents, labourers 43 cents; mechanical department—machinist 68 cents, roll grinder 70½ cents, millwright 61 to 70 cents, carpenters 60 cents, pipefitters and painters 58 cents; newsprint paper mill—machine tender $1.58, back tender $1.32, third hand $1.00½, fourth hand 64½ cents, fifth hand 59½ cents, broke hustler 49 cents, core machine 53 cents; specialty mills—machine tenders 91 to 99½ cents, back tender 71 and 78½ cents, third hand 51 to 63½ cents, fourth hand 47 to 53 cents, fifth hand 47 cents, broke hustler 51 cents; steam department—firemen 52 and 61½ cents, labourer 43 cents; sulphite department—cook 79 cents, acid maker 68 cents, blow pits and screen men 51 cents, wet machine 48 cents, chippermen 51 cents; wood room—saw filer 58 cents, sawyer 46 cents, chipperman 49 and 51 cents; tissue department—machine operators 39½ and 43½ cents, female workers 25 to 36 cents; bag department—bag machine 34 cents, machine adjuster 64 cents.

OTTAWA, ONTARIO.—J. R. BOOTH LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 34) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 73) AND THE INTERNATIONAL ASSOCIATION OF MACHINISTS (LOCAL 412).

Agreement to be in effect from May 1, 1940, to May 1, 1941.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1938, page 940, with these exceptions:

Vacation: all employees with at least one year's service to receive one week's vacation annually with 48 hours' pay.

Wages are increased by 3 cents per hour to workers then earning 40 to 44½ cents per hour, and by 2 cents per hour to all workers then earning 45 cents per hour or more.

CORNWALL, ONTARIO.—HOWARD SMITH PAPER MILLS LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, LOCAL 212 AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL NO. 338.

Agreement to be in effect from January 1, 1940, to December 1, 1940, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, April, 1939, page 432 and November, 1938, page 1295, with a number of changes.

Hours for all workers not normally to exceed 50 per week (as in the previous agreement) but it is now provided that a change to more or less hours may be made on one week's notice.

The wage scale does not form part of this agreement, but it is provided that the wages and bonus system in force at January 1, 1940, are to remain in effect for the duration of the agreement, except that if business conditions and prospects justify it, an increase or decrease in wages may be made by mutual consent.

Thorold, Ontario.—The Beaver Wood Fibre Company Limited and the Beaver Company Ltd. and the International Brotherhood of Paper Makers (Local 192) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local 228).

Agreement to be in effect from May 1, 1940, to May 1, 1941, and thereafter from year to year, subject to notice. The agreement is similar to the one previously in effect and summarized in the Labour Gazette, November, 1939, page 1178, with these exceptions:

Vacation: employees with at least one year's service to be given a week's vacation with pay (48 hours).

The new wage scale shows increases of from 3 to 5 cents per hour over the wage scale of the previous agreement.

Thorold, Ontario.—Brantford Felt and Paper Company and the International Brotherhood of Paper Makers (Local 368) and the International Brotherhood of Firemen and Oilers (Local 329).

Agreement to be in effect from April 1, 1940, to May 1, 1941, and thereafter from year to year, subject to notice. The agreement is similar to the one previously in effect and summarized in the Labour Gazette, October, 1939, page 1059 and December, 1938, page 1404, with this exception:

The wage scale shows increases of 4 cents per hour, except for millwright for whom the increase is 6 cents, and for watchman for whom the rate is unchanged.

Thorold, Ontario.—The Ontario Paper Company Ltd. and the International Brotherhood of Paper Makers (Local 101), the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local 84) and Other Unions.

The agreement which was noted in the Labour Gazette, October, 1937, page 1152, and August, 1939, page 849, has been renewed for the period May 1, 1940, to May 1, 1941, and thereafter from year to year subject to notice with these changes:

Vacation: all permanent employees to receive one week's vacation with pay.

Wages: all hourly wage rates are increased by 2 cents per hour, with further special adjustment for groundwood repair men and helpers and for the foreman and casual gang.

Thorold, Ontario.—The Ontario Paper Company Ltd. and the International Longshoremen's Association, Local 1477.

This agreement which came into effect July 20, 1939, to be effective to May 1, 1941 or 1942, if no notice of change given, and concerns the unloading of pulpwood from boats and the loading of paper boats.

Hours to be based on a 10-hour day.

Overtime: time and one-half for all work over 10 hours, and for all work on Sundays and on three holidays.

Hourly wage rates were set out in the agreement, with the provision that if any change in hourly wage rates were made for other employees of the company at Thorold, a similar change be made for longshoremen. Accordingly, from May 1, 1940, the hourly wage rates were increased 2 cents per hour, making the hourly rates from May 1, 1940, as follows: head stowers, signalmen and paper roll off men 63 cents; boat hold labourers 62 cents; all others, 57 cents.

Disputes which cannot be directly settled between the parties will be referred to arbitration.

Thorold, Ontario.—Provincial Paper Limited, Montrose Division, and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local 290).

This agreement which came into effect May 26, 1937, and was summarized in the Labour Gazette, November, 1938, page 1295, remains in effect to May 1, 1941, and thereafter from year to year, subject to notice.

Vacation: on the copy of the agreement received in 1940, it is provided that employees with one year's service receive one week's vacation with pay.

Wages: the wage scale effective from May 1, 1940, shows wage increases of 2 cents per hour for all except those formerly receiving the lowest rate of 46 cents (labourers, etc.) for whom the rate is increased to 49 cents per hour.

Merritton, Ontario.—Alliance Paper Mills Limited and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local 77).

Agreement to be in effect from May 1, 1940, to April 30, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, November, 1938, page 1295, with certain exceptions:

Vacation: all employees with at least one year's service to receive one week's vacation with pay.

Wages: except for those formerly receiving 46 cents per hour, for whom the increase is 3 cents per hour, and a few adjustments where the increase is higher, all classes of workers governed by this agreement received wage increases of 2 cents per hour from May 1, 1940.

MERRITTON, ONTARIO.—INTERLAKE TISSUE MILLS COMPANY LTD. AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 289) AND INTERNATIONAL BROTHERHOOD OF FIREMEN AND OILERS (LOCAL 329).

A supplement to the agreement which has been in effect since June 4, 1937 (and which was summarized in the LABOUR GAZETTE, October, 1937, page 1151) became effective from May 1, 1940, and the amended agreement remains in effect to May 1, 1941, and thereafter from year to year, subject to notice.

Vacation: all employees with at least one year's service to receive one week's vacation with pay.

Wages are increased by 2 cents per hour from May 1, 1940.

SAULT STE. MARIE, ESPANOLA AND STURGEON FALLS, ONTARIO.—ABITIBI POWER AND PAPER COMPANY LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 133 SAULT STE. MARIE), THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 67 AT SAULT STE. MARIE, 74 AT ESPANOLA AND 71 AT STURGEON FALLS) AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS.

Agreement to be in effect from May 1, 1940 to May 1, 1941, and thereafter from year to year, subject to notice.

When hiring new employees, preference to be given to union members. All new employees and all permanent employees are to become and remain union members.

Hours: 8 per day, a 48 hour week for both day workers and tour workers.

Overtime for day workers and also for tour workers when these are engaged at other than tour work, and all work on Sundays and on three holidays, time and one-half.

An apprenticeship system to be maintained in the mechanical trades; apprentices to be paid from 35 per cent of minimum rate in the first year of apprenticeship to 85 per cent during the fourth year.

Disputes which cannot be settled by the employees with the management will be referred to arbitration, one arbitrator from each party and the third chosen by the other two, or if they are unable to agree, by the Minister of Labour for Canada.

Hourly wage rates for a few classes: sawyer 71 cents, tablemen 57 cents; wood room—all 56 cents; groundwood mill—stone sharpener 72 cents; grindermen 57 cents, screen and deckers 60 cents, wood handlers 56 cents, wet machines 56 cents; sulphite mill—cook 96 cents, cooks' helpers 56 and 69 cents, blow pits 56 cents, acid maker 81 cents, wet machines 56 cents; paper machines—machine tenders $1.19 to $1.45; back tenders $1.02 to $1.27, third hands 84 to 98 cents, fourth hands 71 to 78 cents, fifth hands 68 to 72 cents, beater engineers $1.03 and $1.05, broke beater man 56 cents, oilers 69 cents; finishers 56 and 57 cents; weighers 71 cents, cuttermen 67 cents, core maker 56 cents; boiler house—firemen 70 cents, oilers 56 and 59 cents, repairman 82 cents; electrical repairman and armature winders 82 to 90 cents; mechanical—journeymen machinists, millwrights, carpenters, blacksmiths, patternmakers, 82 to 90 cents; board machine—machine tender 97 cents, back tender 75 cents, third hand 62 cents, fourth hand 59 cents, fifth hand 56 cents, labourers 56 cents. (These rates are 2 cents per hour higher than in the previous agreement.)

Collective Labour Agreements Act, Quebec

The following agreements, amendments and corrections to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:—

Fur Manufacturing, Quebec City.
Men's and Boys' Clothing Industry, Province of Quebec (amendment).
Women's Cloak and Suit Industry, Province of Quebec (amendment).
Dress Manufacturing Industry, Province of Quebec (amendment).
Sash and Door, Wrought Wood and Casket Manufacturing, Jonquière and Kenogami.
Elevator Constructors, Quebec City and District (Eastern Quebec).
Elevator Constructors, Hull District (Western Quebec).
Building trades, Montreal (amendment).
Longshoremen, Sorel (correction).
Shipliners (ocean navigation), Montreal.
Clerks and Accountants, Jonquière, Kenogami, Arvida and St. Joseph d'Alma (amendment).
Retail Stores, Bakeries, Hotels, etc., Magog.
Barbers and Hairdressers, Chicoutimi (amendment).
Barbers and Hairdressers, Sherbrooke, Lennoxville and Magog (amendment).

Industrial Standards Acts

One schedule has recently been made binding by Order in Council and five others revoked, as summarized in a special article on page 1204. These schedules are:—

SASKATCHEWAN

Coal and Wood Industry, Regina.

ALBERTA

Loggers and Saw and Planing Mill Workers, Flatbush, Chisholm, Spurfield and Faust Zones (revoked).
Loggers and Saw and Planing Mill Workers, Whitecourt Zone (revoked).
Loggers and Saw and Planing Mill Workers, Rocky Mountain House (revoked).
Painters, Edmonton (revoked).
Plumbers, Calgary (revoked).

COLLECTIVE AGREEMENT ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Agreement Act was assented to June 22, 1940, and was summarized in the Labour Gazette, August, 1940, page 812. It replaces the Collective Labour Agreements Act, 1938. Agreements and regulations under the "Collective Labour Agreements Act," the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Agreement Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act made obligatory on all employers and employees in the trade, industry, commerce or occupation throughout the province or within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date the Order in Council is adopted. The Order in Council may be amended or revoked by a further Order in Council on the recommendation of the Minister of Labour after consulting the parties to the agreement and after the required notice has been published in the *Quebec Official Gazette*. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette*, the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues from May, 1938, to July, 1940. Proceedings under the Collective Agreement Act are noted in the issues beginning August 1940.

Recent proceedings under the Act include the extension of six agreements, the correction of one agreement and the amendment of seven other agreements, all of which are noted below. A request for the extension of a new agreement in the lithographing industry throughout the province was published in the *Quebec Official Gazette* of October 26. Requests for the amendment of certain agreements were published in the *Quebec Official Gazette* as follows: the shoe manufacturing and the furniture manufacturing industries throughout the province in the issue of October 5; hardware stores at Quebec city, the corrugated paper box and the dress manufacturing industries throughout the province and building trades at Montreal in the issue of October 12; building trades at Montreal in the issue of October 19; garages at Quebec and building trades at Montreal in the issue of October 26. In addition, Orders in Council were published in the *Quebec Official Gazette* during October approving or amending the constitution of three joint committees and others approving the levying of assessments by two joint committees, as listed below.

Manufacturing: Vegetable Foods

Bakers, Magog.—*See* below under "Trade".

Manufacturing: Fur and Leather Products

Fur Manufacturing, Quebec City.—An Order in Council, approved October 17, and published in the *Quebec Official Gazette*, October 19, makes obligatory the terms of an agreement between La Section de Fourrure de l'Association des Marchands détaillants du Canada, inc., district de Québec (The Fur Section of the Association of Retail Merchants of Canada, Inc., Quebec district) and l'Union nationale et catholique des Travailleurs en Fourrure de Québec (The National Catholic Union of Fur Workers of Quebec).

Agreement to be in effect in Quebec City, Levis and four neighbouring municipalities,

from October 19, 1940, to October 18, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, September, 1938, page 1042 and October, 1939, page 1065, with these exceptions:

Minimum wage rates for 48 hour week: shop foreman $32, cutter and tailor (first class) $29 (an increase of $2), cutter and tailor (second class) $25 (an increase of $1), cutter and tailor (third class) $19 (an increase of $1); male pattern maker $35, female pattern maker $30, hide sorter $18; blocker $21 (an increase of $1); first class male and female operators and female finishers $15, second class male and female operators and female finishers $13 (increases of $1 per week); messenger $6, clerk in the shop and pressed hide work department $8 for men, $7.25 for women.

One apprentice allowed to every two journeymen. The wages for apprentices are unchanged at $6 to $16 for male apprentices and $6 to $10 for female apprentices, male apprentices to serve six years, female apprentices three years.

Piece work is again prohibited, but the bonus system based on the production of the employees is authorized.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved October 4, and published in the *Quebec Official Gazette,* October 12, amends the previous Orders in Council (LABOUR GAZETTE, December, 1937, page 1385 and December, 1939, page 1279).

The amendment provides that any manufacturer or contractor who produces garments for women, whether carried out completely by men's tailoring methods or otherwise, to the extent of over 50 per cent of his total annual output shall be subject to the conditions of the ladies' cloak and suit industry. All men's and boys' clothing manufacturers who make garments for women but to an extent of less than 50 per cent of their total output shall be governed by the joint committee of the men's and boys' clothing industry, but all employees engaged in the manufacture of garments for women to be paid at least the minimum wage rates provided in the cloak and suit industry agreement, except that these rates may be 10 per cent less in zone II and 15 per cent less in zone III.

Any men's and boys' clothing contractor may separate his factory into distinct sections, one for men's clothing and one for women's, and in such case the women's clothing section will be governed by the cloak and suit agreement.

WOMEN'S CLOAK AND SUIT INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved October 4, and published in the *Quebec Official Gazette,* October 12, amends the previous Orders in Council (LABOUR GAZETTE, October, 1937, page 1157, May, 1940, page 496 and August, page 866) by the same provisions relating to men's and boys' clothing manufacturers who also make women's clothing as summarized above under the "Men's and Boys' Clothing Industry".

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved October 9, and published in the *Quebec Official Gazette,* October 12, amends the previous Order in Council for this industry (LABOUR GAZETTE, October, page 1075) by adding the following parties to the agreement: The Association of Washable Cotton Service Apparel Manufacturers of the Province of Quebec and L'Union National du Vêtement, section de la Robe (The National Clothing Union, Dress Section).

Manufacturing: Miscellaneous Wood Products

SASH AND DOOR, WROUGHT WOOD AND CASKET MANUFACTURING, JONQUIÈRE AND KENOGAMI.—An Order in Council, approved October 4, and published in the *Quebec Official Gazette,* October 12, makes obligatory the terms of an agreement between certain wood working plants and Le Syndicat national catholique des employés de l'industrie du bois ouvré de Jonquière et Kenogami, Inc. (The National Catholic Union of Employees of the Wrought Wood Industry of Jonquière and Kenogami, Inc.).

The agreement is to be effective from October 12, 1940, to October 11, 1941. It is similar to the one previously in effect and summarized in the LABOUR GAZETTE, July, 1939, page 728, and November, page 1183, with these exceptions:

In addition to the manufacture of doors, window sashes, caskets, there is now added the manufacture of boxes, panels, shops engaged in sawing operations and all other manufacture of wood products.

The hourly wage rates are unchanged for the classes formerly covered except that "helpers" are not mentioned, and the following classes are added: master sawyer on carriage 40 cents, lathe operator 30 cents, first yardmen 35 cents, labourers 16 to 20 years 20 cents, labourers 20 years and over 25 cents, team driver 45 cents. As in the previous agreement the minimum wage rate for shop foreman is 50 cents, journeymen 40 cents, apprentices 10 to 30 cents, carter with one horse 40 cents, truck driver 35 cents.

Construction: Buildings and Structures

ELEVATOR CONSTRUCTORS, QUEBEC CITY AND DISTRICT (EASTERN QUEBEC).—An Order in Council, approved October 17, and published in the *Quebec Official Gazette,* October 19, makes obligatory the terms of an agreement between the elevator contractors of the Builders' Exchange and the International Union of Elevator Constructors, Local 101.

The agreement covers: (*a*) the erecting and assembling of all elevator machinery, that is electric, hydraulic, steam, belt elevators, electric dumbwaiters, residence elevators, compressed air and hand power elevators, escalators, electric stairways, organ and orchestra elevators; (*b*) general repairs and modernization work on the above apparatus; and (*c*) contract service for care of this apparatus. (Elevator maintenance men are not covered.)

It is to be in effect from October 19, 1940, to April 30, 1941, and if necessary 30 days longer pending the adoption of an Order in Council to replace this one.

The territorial jurisdiction comprises all of the province east of a line running due north and south through a point 25 miles due west of the city of Quebec.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. On contract service where contracts require 2 shifts per day, hours 48 per week with payment for 52 hours; one shift on holidays, so that each man works every second holiday.

Overtime: all work on Sundays and holidays, double time. Call backs on contract service on overtime except Sunday and legal holidays, time and one-half.

Minimum hourly wage rates: on construction, repair and modernization work, mechanic 79 cents, helpers 55 cents; on contract service and contract inspections, mechanic 71 cents, helper 50 cents.

Elevator Constructors, Montreal District (Central Quebec).—These were included in the agreement for all building trades in the Montreal district summarized in the Labour Gazette, July, 1940, page 733.

Elevator Constructors, Hull District (Western Quebec).—An Order in Council, approved October 17, and published in the *Quebec Official Gazette,* October 19, makes obligatory the terms of an agreement between the elevator contractors members of the Builders' Exchange, Inc. and the International Union of Elevator Constructors, Local 96.

The agreement is to be in effect from October 19, 1940, to April 30, 1941, and if necessary for a further 30 days pending the adoption of an Order in Council to replace this one.

The territorial jurisdiction comprises all that part of the province west of a line running due north and south from the western limits of the town of Hawkesbury.

The terms of this agreement are the same as for this trade in the Quebec district summarized above except for the wage rates:

Minimum hourly wage rates: on construction, repair and modernization work, mechanic 95 cents, helpers 67 cents; on contract service and contract inspections, mechanic 86 cents, helper 60 cents.

Building Trades, Montreal.—An Order in Council, approved October 17, and published in the *Quebec Official Gazette,* October 26, amends the previous Order in Council for this industry (Labour Gazette, July, 1940, page 732), by cancelling the provision for wage rates for apprentice electricians.

Transportation and Public Utilities: Water Transportation

Longshoremen, Sorel.—A correction of the Order in Council which was summarized in the Labour Gazette, September, page 972, was published in the *Quebec Official Gazette,* October 12, but does not affect the Labour Gazette summary.

Shipliners (Ocean Navigation), Montreal.—An Order in Council, approved October 4, and published in the *Quebec Official Gazette,* October 12, makes obligatory the terms of an agreement between certain shipping and stevedoring companies and the International Longshoremen's Association, Local 1552.

The agreement covers all fitting of ocean vessels lying in the harbour for grain and cattle and woodwork in connection with the stevedoring gear except where permanent gear men are employed. It is to be in effect from October 19, 1940, to December 31, 1940, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, December, 1938, page 1424, with these exceptions:

Hours: the parties to take steps to ensure that the average number of hours per week do not exceed 48.

Wages: the basic rates of 77 cents per hour for day work, 87 cents for evening work and 97 cents for night work are unchanged but there is now added a war bonus of 8 cents per hour, making the current rates 85 cents, 95 cents and $1.05 per hour respectively. As in the previous agreement 10 cents per hour extra is payable for work in holds of steamers in which bulk sulphur or bulk fertilizer has been stowed and where old wood is being used.

Trade

Clerks and Accountants, Jonquiere, Kenogami, Arvida and St. Joseph d'Alma.—An Order in Council approved October 4, and published in the *Quebec Official Gazette,* October 12, corrects the previous Order in Council for these workers (Labour Gazette, October, 1940, page 1076, January, page 69, and July, 1939, page 730) by providing that all female employees other than those mentioned in the September Order in Council be governed by Ordinance No. 4 of the Minimum Wage Commission.

Retail Stores, Bakeries, Hotels, etc., Magog.—An Order in Council, approved October 3, and published in the *Quebec Official Gazette,* October 12, makes obligatory the terms of an agreement between certain employers and Le Syndicat catholique et national des commis de Magog (The National Catholic Union of Clerks of Magog).

This agreement is to be in effect from October 12, 1940, to October 11, 1941, and for another year if no notice of change given. It is similar to the one previously in effect and summarized in the Labour Gazette, October, 1939, page 1067, January, 1939, page 97, and October, 1938, page 1173, with certain exceptions, among them:

Minimum weekly wages for a 65-hour week in bakeries and pastry shops: baker and pastry cook $16, first baker $15, second baker $12, apprentices from $5 to $9; deliveryman (70-hour week) $15, deliveryman's helper (70-hour week $5 and $10.

Service: Business and Personal

Hotels and Restaurants, Magog.—See above under "Trade".

BARBERS AND HAIRDRESSERS, CHICOUTIMI, ETC.—An Order in Council, approved October 4, and published in the *Quebec Official Gazette*, October 12, amends the previous Orders in Council for these trades (LABOUR GAZETTE, October, 1937, page 1156, June, 1939, page 630, and September, 1940, page 972).

The term of the agreement is extended to September 4, 1941, and thereafter from year to year, subject to notice.

The territorial jurisdiction is enlarged to include St. Joseph d'Alma, Ile Maligne, Riverbend and St. Gedeon, as well as the towns previously covered, which are Chicoutimi, Arvida, Bagotville, Port Alfred, Grand Baie, Jonquière, Kenogami. For barbers the area within 2 miles of all these centres are included; for hairdressers the area within 20 miles of them.

Hours in the newly added centres are one hour per day longer than in the other towns.

Wages: for journeymen barbers the rate is still $15 per week plus 10 per cent of gross receipts made by the employee, but there is now added an extra 15 per cent on gross receipts in excess of $20 made by the journeymen.

Vacation: employees with at least one year's service with an employer to receive 6 days vacation with pay.

Apprenticeship for hairdressers to be 3 years of study and two years practice under direction.

BARBERS AND HAIRDRESSERS, SHERBROOKE, LENNOXVILLE AND MAGOG.—An Order in Council, approved October 4, and published in the *Quebec Official Gazette*, October 12, amends the previous Order in Council (LABOUR GAZETTE, July, 1938, page 800, and November, 1938, page 1300) by providing that the territory within three miles of each of the above towns be also included.

Hours: some changes in the hours for closing are made.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved or amended by Orders in Council and published in the *Quebec Official Gazette*, October 12 and 19:

Building trades, Sorel (amendment).
Shipliners, Montreal.
Longshoremen, Quebec.

Notices were published in the *Quebec Official Gazette*, October 12, that authorization was given by Orders in Council for the joint committees to levy assessments on employers and employees, parties to the following agreements:

Barbers and hairdressers, Chicoutimi.
Bakers, Granby.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Saskatchewan and Alberta

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and of amendments to them are given in the LABOUR GAZETTE, October, page 1077. Schedules of wages and hours recently made binding or revoked by Orders in Council under these Acts are summarized below.

Saskatchewan

Trade

COAL AND WOOD INDUSTRY, REGINA.—An Order in Council, approved October 22 and published in *The Saskatchewan Gazette*, October 31, makes binding the terms of a schedule for the handling, hauling or transporting of coal and wood by motor truck or horse drawn vehicle, in the city of Regina, to be effective from November 10, 1940, "during pleasure."

Hours: 9 per day, 6 days per week, a 54 hour week from October to February inclusive; 9 per day, 4 on Saturdays, a 49 hour week from March to September inclusive.

Overtime for truck drivers, teamsters and common labourers, 50 cents per hour.

Minimum wage rate for truck drivers or teamsters: 50 cents per hour, $20 per week or $80 per month as the employer and employee concerned may agree. For truck drivers or teamsters who supply their own trucks or teams, maintaining and operating them at their own expense, $1.50 per hour. For common labourers, 40 cents per hour, $17 per week or $65 per month as the employer and employee concerned may agree.

By agreement between the employer and employee concerned, wages may be based on quantity of coal and wood delivered instead of on time worked. For such type of payment, a scale of prices which must be paid employees for deliveries is included in the schedule.

Alberta

Logging

Loggers and Saw and Planing Mill Workers, Flatbush, Chisholm, Spurfield and Faust Zones.—An Order in Council, dated October 25, and published in *The Alberta Gazette*, October 31, revokes the schedule for loggers in these zones, which schedule was summarized in the Labour Gazette, January, 1939, page 99, and June, 1939, page 632.

Loggers and Saw and Planing Mill Workers, Whitecourt Zone.—An Order in Council, dated October 25, and published in *The Alberta Gazette*, October 31, revokes the schedule for loggers in this zone, which schedule was summarized in the Labour Gazette, October, 1939, page 1070.

Loggers and Saw and Planing Mill Workers, Rocky Mountain House.—An Order in Council, dated October 25, and published in *The Alberta Gazette*, October 31, revokes the schedule for loggers in this zone, which schedule was summarized in the Labour Gazette, August, 1939, page 864.

Manufacturing: Miscellaneous Wood Products

Saw and Planing Mill Workers, Flatbush, Chisholm, Spurfield and Faust Zones.—The schedule governing these workers (Labour Gazette, January, 1939, page 99, and June, 1939, page 632) was revoked, as noted above under "Logging".

Saw and Planing Mill Workers, Whitecourt Zone.—The schedule governing these workers (Labour Gazette, October, 1939, page 1070) was revoked, as noted above under "Logging".

Saw and Planing Mill Workers, Rocky Mountain House.—The schedule governing these workers (Labour Gazette, August, 1939, page 864) was revoked, as noted above under "Logging".

Construction: Buildings and Structures

Painters, Edmonton.—An Order in Council, dated October 25, and published in *The Alberta Gazette*, October 31, revokes the schedule for this trade, which was summarized in the Labour Gazette, May, 1939, page 531.

Plumbers, Calgary.—An Order in Council, dated October 25, and published in *The Alberta Gazette*, October 31, revokes the schedule for this trade, which was summarized in the Labour Gazette, July, 1939, page 733.

Minimum Wages in Laundries and Drycleaning Establishments in U.S.A.

American State minimum wage orders applying to persons employed in laundries and drycleaning establishments in the United States have been analysed in a recent publication of the United States Women's Bureau.

The minimum weekly rates established for the general class of workers in such establishments in Colorado, Illinois, New Jersey, New York and Ohio apply to a 40-hour week; in Arizona to a work-week of from 32 to 40 hours except in certain counties at specified seasons of the year when there is a minimum hourly rate; in Massachusetts to a week of 35 hours or over; in North Dakota to a work-week of between 38 and 48 hours; in Oregon to a 44-hour week; in California to 48 hours and in Oklahoma to a 48-hour week in the case of women and to 54 hours in the case of men. In the District of Columbia, any hours worked between 16 and 44 in a week qualify the worker for the minimum weekly wage. In Minnesota, New Hampshire, Pennsylvania and Rhode Island, only minimum hourly rates are fixed.

Overtime must be paid for at the rate of time and a half after 44 hours in Illinois and Oregon, after 45 hours in Colorado and New York and after 48 hours in Connecticut. Time and one-third must be paid after 45 hours in Ohio. There is a maximum 48-hour week in Arizona, California, Colorado, Connecticut, Illinois, Massachusetts, New York, North Dakota (towns of 500 or more), Ohio, Rhode Island, Washington, the District of Columbia and for women in Oklahoma and a maximum 44-hour week in Oregon and Pennsylvania. In Minnesota, New Hampshire and New Jersey and for men in Oklahoma there is a legal maximum of 54 hours a week. In Connecticut, Minnesota, North Dakota and Oregon the State labour authorities may permit longer hours in cases of emergency.

No special learners' rates are provided for in Connecticut, Illinois, New Jersey, New York, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island or in the District of Clumbia.

PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1940

Cost of Living, Prices of Staple Articles and Index Numbers

THE new official index number of the cost of living was slightly higher at the beginning of October than at the beginning of September due to increases of less than one per cent in each of four groups namely, food ·6 per cent, rent ·7 per cent, clothing ·9 per cent and home furnishings ·7 per cent. The miscellaneous group was unchanged while a slight decline was recorded in the fuel group. The "total index" was ·6 per cent higher than in the previous month, 3·4 per cent higher than for October one year ago and slightly more than six per cent higher than at the beginning of September, 1939. As compared with September, 1939, the clothing group was about 14 per cent higher in the month under review, home furnishings 9 per cent, fuel 9 per cent, food 7 per cent, rent 4 per cent and miscellaneous 1 per cent.

The index number was constructed on the basis of a survey of the expenditure of 1,439 families of wage earners and salaried workers with incomes between $450 and $2,500 in 1938. The average expenditure was $1,453.80 divided as follows: Food (31·3%) $443; Shelter (19·1%) $269.50; Fuel and Light (6·4%) $90.50; Clothing (11·7%) $165.80; Home Furnishings (8·9%) $125.70; Miscellaneous (22·6%) $319.40, including Health (4·3%) $60.80, Personal Care (1·7%) $23.90, Transportation (5·6%) $79.30, Recreation (5·8%) $82.10, Life Insurance (5·2%) $73.30. Other expenditure, not directly represented in the index, was $40.

The table of index numbers of changes in the cost of living published in this monthly statement from January, 1927, to September, 1940, has been discontinued and replaced by the new official cost of living index number calculated by the Dominion Bureau of Statistics. Those who have been using the old index number of the Department for special purposes and cannot immediately change to the new may bring the old series down to date each month by applying the percentage changes shown by the new index to the figures for August, 1940, for the old index. The group figures may be similarly adjusted. For the "Sundries" group figure the indexes for the new "Home Furnishings" and the "Miscellaneous" should be combined using the weights. By this method of calculation the figures of the old index for October are Food 120, Fuel and Light 147, Rent 153, Clothing 133, Sundries 161, All Items 138, as compared with the September figures published in the October issue of the LABOUR GAZETTE namely: Food 119, Fuel and Light 148, Rent 152, Clothing 132, Sundries 161, All Items 138.

Publication of the table showing the cost per week of a list of staple foods, fuel and lighting, and rent entering into a family budget which appeared in the LABOUR GAZETTE from August, 1915, to September, 1940, has also been discontinued. The cost of the list in terms of average retail prices in 69 cities in Canada at the beginning of October was: Food $8.71; Laundry starch 4·1 cents; Fuel $2.95; Rent $6.17; and Total $17.87. The average cost of staple foods by provinces at the beginning of October was: Nova Scotia $8.87; Prince Edward Island $8.37; New Brunswick $8.98; Quebec $8.12; Ontario $8.74; Manitoba $8.44; Saskatchewan $8.19; Alberta $8.43; and British Columbia $9.63.

Wholesale Prices

The Dominion Bureau of Statistics weekly index number of wholesale prices on the base 1926 as 100 showed a slight increase week by week during October. At the end of the month the index was at the highest point recorded since the outbreak of the war but was still lower than during the greater part of 1937. Changes since the end of 1939 have been relatively slight following the advance after the opening of hostilities. For the week ended November 1 the index was 83·6 as compared with 83·0 for the week ended October 4; 82·9 for that ended September 6; 82·2 for that ended December 29, 1939; 72·8 for the week ended September 1, 1939 and 87:7 for the week ended July 16, 1937. During the month under review little change occurred in most of the groups in the classification according to chief component materials. The Animals Products Group rose from 78·8 to 81 influenced to a large extent by higher prices for hides, butter, cheese and eggs which more than offset declines in live stock and meats. The Vegetable Products Group rose from 69·5 to 70, there being increases in the prices of grains and milled products but a decline in potatoes. The Wood Products Group rose from 91·3 to 91·9 due mainly to an advance in the price of Maritime spruce. The other five groups in this classification were practically unchanged.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of October of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada.

All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

Localities in the list of cities on page 1213 affected by the "standstill" rental order (LABOUR GAZETTE, October, 1940, page 995) issued on September 24 by the Wartime Prices and Trade Board are: Sydney, New Glasgow, Halifax, Thetford Mines, Ottawa, Kingston, Windsor, Brandon, Vancouver and Victoria. The rental figures in the table for the beginning of October are, therefore, for these cities, the same as the beginning of January, 1940. (LABOUR GAZETTE, February, 1940, page 183.)

(Continued on page 1214)

DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

Average prices in 1935–1939=100

—	Food	Rent	Fuel and Light	Clothing	Home Furnishings	Miscellaneous	Total

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended November 1, 1940, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 1207*)

Retail Prices

Beef prices changed little in the average at the beginning of October as compared with the previous month but were somewhat higher than in October, 1939. Sirloin steak averaged 30·8 cents per pound as compared with 30·7 cents at the beginning of September and 29·9 for October, 1939. Corresponding figures for shoulder roast are 17·4, 17·5 and 16·9 cents per pound. The price of lamb at 28 cents per pound at the beginning of October was one cent lower than for September. Fresh pork and bacon, both averaged higher than for September but lower than in October, 1939. The former was 23·9 cents per pound at the beginning of October, 23·4 cents for September and 24·5 cents for October, 1939. Corresponding figures for bacon are 29·7, 29·3 and 32·4 cents per pound. The marketing of hogs was in greater volume in the first 9 months of 1940 than in the corresponding period of 1939 and the exports of bacon and hams to the United Kingdom were about double the figures for the same period in 1939.

Considerable seasonal advance was recorded in the price of fresh eggs in all localities, but the Dominion average price, 38 cents per dozen, was about the same as at the beginning of October, 1939, as compared with 34·4 cents per dozen at September 1, 1940, and 26·5 cents for June. Exports for the first seven months of 1940 amounted to more than seven million dozen as compared with about one-half million dozen in the same period of 1939. Stocks in storage at the beginning of October were considerably reduced from the previous month and a further substantial reduction was recorded at November 1. In the latter month stocks were about 25 per cent less than at November 1, 1939. No changes were reported in the price of milk the Dominion average being 11 cents per quart. The price of creamery butter rose from an average of 26·5 cents per pound in September to 27·6 cents in October increases being reported from all localities. Total production for the first 10 months of the year was only slightly lower than in 1939 but the production in September and October, 1940.

was substantially less than for the same months in 1939. Consumption of butter in September was reported to be about 5 per cent lower than in September last year. Cheese was unchanged from the previous month at an average price of 23·8 cents per pound as compared with 22·3 cents in October last year. The Dominion average price for bread has been unchanged month by month at 6·7 cents per pound since March while flour also has changed little in this same period being only fractionally higher. The price of onions continued downward averaging 3·7 cents per pound in October, 4·6 cents in September and 8·4 cents in July. The price for October, 1939, was 3·8 cents per pound. The 1940 potato crop was estimated to be larger than in 1939. The price per 100 pounds at the beginning of October was $1.44 as compared with $1.52 for September and $1.73 for October, 1939. Granulated sugar was unchanged since August at an average price of 7·5 cents per pound. Anthracite coal at $15.71 per ton was little changed from the level of September as compared with $14.57 for October last year.

The following are the prices reported for Welsh coal, "cobbles" and "French nuts" at the beginning of October, 1940: Halifax, $17.50; Charlottetown $16.40; Moncton $17; Saint John $16; Quebec $16; Three Rivers $16.50; Sherbrooke $16.75; Thetford Mines $17; Ottawa $18; Kingston $17.50; Belleville $17.50; Peterborough $18.50; Oshawa $17.50; Toronto $16; St. Catharines $15.75; Hamilton $16.25; Brantford $17.75; Galt $17.50; Sudbury $19.75; Cobalt $21.50; Timmins $21.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

The following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the October issue of the Labour Gazette. Since these monthly notes are all compiled from British and foreign sources the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the Labour Gazette. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

In most of the continental European countries some measure of control over prices and distribution has been put in force. In some of these countries the publication of price data has been suspended and in other countries direct information is now unobtainable, although information contained in the publications of neutral countries is noted.

Great Britain

Cost of Living.—The *Ministry of Labour* index number, on the base July, 1914=100, was 187 at the end of August, an increase of one per cent for the month. Food prices were one per cent higher due to advances in the prices of sugar, eggs and fish, but the price of potatoes declined. Clothing prices were also slightly higher than at the beginning of August.

India

Wholesale Prices.—The index number of the Labour Office, Government of Bombay, of wholesale prices in Bombay, on the base July, 1914=100, was 114 for June, a decline of 3 per cent for the month, due to decreases in oilseeds and certain other of the "non-food groups," notably cotton (both raw and manufactured) and metals.

Cost of Living.—The Labour Office, Government of Bombay, publishes figures for cost of living in Bombay, on the base July, 1933-June, 1934=100, showing no difference between the May and June levels, at 111.

New Zealand

Wholesale Prices.—The index number of the Census and Statistics Office, on the base 1926-1930=1000, was 1205 for July, an advance of 1 per cent for the month. Of the seven main groups, five showed increases, one (non-metallic minerals and their products) was unchanged, while animal products were slightly lower.

United States

Cost of Living.—The index number of the Bureau of Labour Statistics of the cost of living in large cities, on the base 1935-1939=100, was 100·4 on September 15, a decrease of 0·1 per cent from the June 15 level. In this period food prices declined 1·2 per cent, clothing 0·2 per cent, while the other items, namely rent, fuel, housefurnishings and miscellaneous commodities were slightly higher.

The index number of the cost of living in Massachusetts of the Department of Labour and Industries of Massachusetts on the base 1913=100, was 138·1 for September, an increase of less than one-half of one per cent over the previous month. Increases in food prices were partly offset by lower prices for fuel oils.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1940

DURING the third quarter of 1940 there were 309 fatal industrial accidents (including deaths from industrial diseases reported by workmen's compensation boards, etc., as well as fatalities incidental to occupational pusuits) as compared with 273 fatal accidents in the third quarter of 1939. Of the 309 fatalities in the third quarter of 1940, 104 occurred in July, 121 in August, and 84 in September. Fatal accidents during each year are recorded by quarterly periods in the issues of the Labour Gazette for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred contains one fatality for 1939, and 13 for the first half of 1940.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners of Canada, certain other official sources, as well as from the correspondents of the Labour Gazette, and newspaper reports.

Classified by groups of industries, the fatalities occurring during the third quarter of 1940 were as follows: Agriculture, 48; Logging, 32; Fishing and Trapping, 8; Mining, Non-Ferrous Smelting and Quarrying, 33; Manufacturing, 31; Construction, 67; Electric Light and Power, 5; Transportation and Public Utilities, 56; Trade, 10; Service, 19.

Of the mining accidents, 18 were in the classification, "metalliferous mining," seven in "coal mining," four in "non-metallic mineral mining and quarrying, n.e.s.," and four in "structural materials."

Of the accidents in manufacturing, two were in "vegetable foods, drink and tobacco," three in "animal foods," two in "textiles and clothing," one in "leather, fur and products," eight in "saw and planing mill products," one in "wood products," two in "pulp, paper and paper products," six in "iron, steel and products," three in "non-ferrous metal products," and three in "non-metallic mineral products."

In construction there were 29 fatalities in "buildings and structures," four in "railway," three in "shipbuilding," 15 in "highway and bridge," and 16 in "miscellaneous construction."

In transportation and public utilities there were 23 fatalities in "steam railways," one in "street and electric railways," 16 in "water transportation," 13 in "local and highway transportation," and three in "telegraphs and telephones."

In trade there were five fatalities in "wholesale," and five in "retail."

Of the fatalities in service, seven were in "public administration," 11 in "personal, domestic and business," and one in "professional establishments."

There was no serious disaster resulting in the loss of a large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:

Four loggers were drowned when a boat was wrecked in a storm, near Zeballos, B.C., on August 11.

Four labourers engaged on dam construction, near Cedars, Quebec, were drowned when a rowboat capsized on August 30.

When a motorboat capsized on August 10, two fishermen were drowned off Murray Harbour, B.C.

On August 11, at Ryley, Alberta, a cheese factory manager and a labourer were burned following an explosion of well gas in a reservoir plant and died several days later.

Two labourers lost their lives when they fell from a building in Quebec on August 14.

When their truck was struck by a train on July 6 near Durham, Ontario, a truck driver and a helper were killed.

At Calgary, Alberta, two stenographers employed in a chemical warehouse became ill about August 16 from mercurial poisoning, inhaled from some chemical fertilizer. One of the girls died on September 24 and the other on October 17.

On July 26, a milk deliverer and his helper were killed when struck by a truck at Waterdown, Ontario.

During this quarter five fatalities occurred in Canadian waters which are not included in the statistical record, since they were seamen employed on ships not registered in Canada. A stoker on a British coal boat fell from a gangplank and was drowned at Mont-

real on July 1. A seaman on a British ship was killed when he fell from a rigging to the deck on July 3 at Halifax. On August 20 a Danish seaman fell from a pier and was drowned at Montreal. A British seaman fell from a gangplank of a British collier and was drowned at Montreal on September 4, and a Norwegian seaman fell through a hold of a ship at Halifax on September 9.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first half of 1940 has been compiled which contains 13 fatalities, of which five were in logging, one in fishing and trapping, two in mining, non-ferrous smelting and quarrying, two in manufacturing, two in transportation and public utilities, and one in trade. One of these accidents occurred in January, two in April, one in May and nine in June.

A further supplementary list of accidents occurring in 1939 has been made. This includes one fatality which was in mining, non-ferrous smelting and quarrying, and it occurred in October.

RECENT LEGAL DECISIONS AFFECTING LABOUR

British Columbia Supreme Court Dismisses Administrator's Action for Damages for Fatal Accident to Workman without Dependants

On January 3, Mr. Justice Fisher of the British Columbia Supreme Court dismissed an action brought under the Administration Act by the administrator of the estate of a deceased workman who was killed through the negligence of the defendants or their servants while employed in an industry within the scope of the British Columbia Workmen's Compensation Act and leaving no dependants within the meaning of the Act. The claim was for damages for loss by the deceased of his normal expectancy of life.

The plaintiff relied on a section of the Administration Act which allows the representatives of a deceased person to bring action for injuries to the person or property of the deceased with the same rights (some exceptions being made) as the deceased would be entitled to if living. However, it continues: "(6) This section shall be subject to the provisions of sec. 12 of the Workmen's Compensation Act." That section states:—

(1) The provisions of this Part shall be in lieu of all rights of action to which a workman or his dependants are entitled either at common law or by any statute, againt the employer of the workman for or by reason of any accident which happens to him arising out of and in the course of his employment, and no action against the employer shall lie in respect of the accident.....

(3) Where an action in respect of an injury is brought against an employer by a workman or a dependant, the Board shall have jurisdiction upon the application of any party

to the action to adjudicate and determine whether the action is one the right to bring which is taken away by this Part, and such adjudication and determination shall be final and conclusive; and if the Board determines that the action is one the right to bring which is taken away by this Part the action shall be for ever stayed.

After reviewing many English authorities involving a similar section of statute law the Court held that the section of the Administration Act on which the plaintiff relied could only make survive a cause of action which was vested in the worker when alive and under the Workmen's Compensation Act the workman at the moment before he died had no right of action. This last point had been determined by the Workmen's Compensation Board on June 1, 1939, after the plaintiff had applied to the Board for a ruling as to whether his right to bring the action was taken away by Part I.

The Court observed that Section 12 of the Workmen's Compensation Act does not make an exception of a case where no compensation is payable either to the workman or dependants even though there was negligence and the result is a paradoxical situation, as remarked in an English case, that "it is cheaper for an employer to kill than to maim or cripple a workman without dependents." *Munro* v. *Bloedel, Stewart and Welch,* Ltd. (1940) 3 Western Weekly Reports 161.

Action Dismissed for Wider Injunction against Picketing by Toronto Milk Drivers' Union

On August 19, Mr. Justice Mackay of the Supreme Court of Ontario refused the application of Canada Dairies Ltd. for a permanent injunction in broader terms than the interlocutory injunction granted by Mr. Justice Kelly on February 19 to restrain picketing in the manner described in his order. The Court, however, made permanent the injunction as issued by Mr. Justice Kelly. The defendant and his agents are forbidden to exhibit any sign or sandwich board or any other printed or written material indicating that the plaintiff's employees are on strike or containing any libellous or false statement concerning the plaintiff company or its business or to molest, speak to or approach any persons with a view to dissuading them from working for or doing business with the plaintiff or from observing or performing any existing contract with the plaintiff.

The trouble between the parties originated in a strike of some fifty employees in 1937 for recognition of the milk drivers' union. The strike was lost, the employees either returning to work or being replaced by others. The company was reorganized in October, 1939. The defendant, however, continued to carry in front of the plaintiff's premises a sandwich board displaying a sign with the words, "Canada Dairy on Strike, International Milk Drivers' Union, Local 647, A.F.L." When the plaintiff applied for an injunction in February, 1940, the inscription on the sandwich board was changed to read: "Milk Drivers and Dairy Employees of Canada Dairies Limited are not members of the Milk Drivers and Dairy Employees' Union, Local 647, Local A. F. & L. International Brotherhood of Teamsters C.S.H. of America." A motion by the defendant to strike out an amendment in the statement of claim based on this change in the wording on the sandwich board was dismissed. (LABOUR GAZETTE, May, 1940, p. 517).

At the hearing the defence counsel agreed to an order prohibiting the exhibition of any sign to the effect that a strike was in progress or containing any untrue statements and the threatening, accosting or intimidating of any person seeking to do business with the plaintiff for the purpose of inducing such person to refrain from doing any business or from observing any contract with the plaintiff. The order made by Mr. Justice Kelly was in the terms indicated above. Leave to appeal from the order was refused whereupon the plaintiff sought an injunction wider in scope.

At the trial, plaintiff's counsel argued that picketing as carried on by the defendant would of itself imply labour trouble at the plant and that it was definitely annoying and exasperating to the plaintiff. He argued further that the fact that there was no contractual relationship between the plaintiff and the defendant was also of itself sufficient to warrant an injunction and damages.

Mr. Justice Mackay held that there was no authority for declaring that the exhibiting of signs under such circumstances was illegal or, in other words, that peaceful picketing, unless contractual relationship was established, was restrainable. He stated:—

> I agree that the case is unusual in that the acts complained of are not the result of a dispute between employer and employee as to wages, working conditions or otherwise. There is, at the present time according to the evidence, the happiest and most desirable relationship existing between the employer and his employees, nor has it been established in evidence that there is any difference or dispute between the plaintiff and the union....

After reference to certain English cases and to s. 501 of the Criminal Code of Canada, which is similar to a section of the Imperial Conspiracy and Protection of Property Act, 1875, under which, with the necessary reference to the common law, the English cases were decided, Mr. Justice Mackay pointed out:—

It must first be kept in mind that all of these provisions and authorities establish general legal propositions, and that they apply to such situations only as come within their compass. They do not refer, specifically, exclusively, or otherwise to trade disputes only. Thus s. 501 contains no word or term which restricts its application to trade or labour disputes. Its application to such a situation is determined entirely by the fact that the specific acts in question do or do not come within the general legal principles or provisions laid down by the authority or statute applicable. This does not support the argument advanced by plaintiff's counsel that there is some defined, exclusive or limited set of circumstances within which "picketing," or, more specifically as in the case at bar, displaying a sandwich board, may be permitted. I am of opinion that the law proceeds quite contrary to this argument and ascertains only what conduct is wrongful. The right to peacefully picket or to make a truthful statement is assured and the authorities and statutory provisions deal only with the limitations upon such accepted right.

Referring to *Collard v. Marshall,* an English case decided in 1892, the Court pointed out that in that case the picket signs were defamatory, but it was expressly stated in the judgment that an injunction against the exhibiting of such signs could not restrain the carrying of a sign exhibiting a truthful statement.

The *Lyons* v. *Wilkins* case, decided in 1899, Mr. Justice Mackay stated,

proceeded entirely upon the fact that the conduct of the defendants amounted to more than merely attending at the place in question for the purpose of obtaining and communicating information; in other words that the conduct of the defendants was excessive and that under the guise of merely attending to communicate information they were in fact carrying on coercive activities.

In the *Ward, Lock* case, decided by the English Court of Appeal in 1906, Lord Justice Fletcher Moulton, in quoting s. 7 of the Conspiracy and Protection of Property Act, commented:—

I cannot see that this section affects or is intended to affect civil rights or civil remedies. It legalizes nothing and it renders nothing wrongful that was not so before. Its object is solely to visit certain selected classes of acts which were previously wrongful, that is, were at least civil torts with penal consequences capable of being summarily inflicted .... I am therefore of opinion that in support of the plaintiffs' claim with regard to picketing, it must be shown that the defendants or one of them were guilty of a wrongful act, i.e., that the picketing constituted an interference with the plaintiffs' action wrongful at common law, or, as I think it may accurately be phrased, were guilty of a common law nuisance.

Mr. Justice Mackay continued—

The effect of this decision is to establish that the matters prohibited in s. 501 of the Criminal Code indicate the acts or type of conduct which, under common law, would be regarded as constituting nuisance, and that in the absence of a finding, based upon proper evidence, that such nuisance has been committed, picketing is not wrongful.

Such Ontario cases as *Robinson* v. *Adams* (1924-25), *Dallas v. Felek* (1934) and *Rex* v. *Baldassari* (1931)

have recognized the distinction between "excessive" conduct which may be restrained and at the same time the necessity of so framing any injunction order as to avoid restraining acts which in themselves are not wrongful.

Reference was made also to the opinion of Mr. Justice Trueman of the Manitoba Court of Appeal in *Allied Amusements, Ltd.* v. *Reaney*:

Picketing being lawful so long as it is conducted peaceably, I cannot think that the mere statement on placards, posters, or sandwich boards, that an employer is unfair to the trade union or does not pay union wages, is unlawful *per se* or a proper subject for injunction or damages.

It was considered that the authorities establish that picketing is only wrongful: (*a*) If it is featured by defamatory statement or (*b*) if it is carried on in such manner as to disclose a purpose other than peacefully "obtaining or giving information," or (*c*) if it is part of a conspiracy to injure. In the Court's opinion there was no evidence of such forms of wrongful conduct in the case at bar. Neither was there evidence of damage to or interference with the plaintiff's business.

Reverting to the plaintiff's argument that picketing or an act of displaying a truthful statement on a sandwich board which would otherwise be lawful becomes illegal unless there is some relationship, present or past, between the plaintiff and the defendant, the Court considered that there is no authority for that position but that conduct is only wrongful if it comes within the categories of wrongful conduct established by the Courts. "Mere non-relationship in itself has in no case been held to establish proof of 'wrongful purpose'." In any case, it was pointed out that the fact that picketing began when a labour dispute did exist and continued thereafter was evidence of a relationship antecedent to the present company taking over the business and the employees of the former company.

The interest which the defendant formerly felt he had in the employment of this personnel was neither aggravated by or lessened by the transfer of ownership interest. It is not suggested that the defendant pursued anything but an honest interest of his own and his fellow unionists, in carrying a sign board before the ownership transfer and there is no suggestion that his conduct has altered or been aggravated since. . . The evidence indicates in fact, that the defendant was acting only in furtherance of the interests which he honestly regards as his own.

Costs of the action until the granting of the interlocutory injunction were awarded to the plaintiff and costs thereafter to the defendant. *Canada Dairies Ltd.* v. *Seggie* (1940) 74 Canadian Criminal Cases 210.

Ontario Court Holds Invalid Municipal By-law Forbidding Distribution of any Printed Matter

On October 2, Mr. Justice Urquhart of the Ontario High Court of Justice allowed the appeals and, in ordering that the town pay the costs, set aside the conviction of two workers, who distributed pamphlets outside a factory in New Toronto, under a town by-law which purported to prohibit distribution to pedestrians of printed matter.

The accused, trade union officers, were first prosecuted under a clause of the by-law forbidding distribution of leaflets or other printed matter "likely to cause discomfort or unrest to or among the inhabitants or disturb the general peace of the community." When the literature was held not to be such as was prevented by this clause, a new charge was laid under the part prohibiting distribution on the streets of printed matter of any kind. Appeals from conviction on this charge were made by way of stated cases.

The conviction was attacked on two grounds: (1) that the by-law is not one that the Municipal Act authorizes; (2) that the Provincial Legislature itself cannot totally prohibit the distribution of literature which would restrict the freedom of the press.

The preamble to the by-law, which was made on July 15, 1938, declares it to concern "the health, safety, morality and welfare of the inhabitants" of New Toronto for which purposes a section in the Municipal Act allows every council to pass by-laws "in matters not specifically provided for" in the Act.

"The pamphlet," in the opinion of the Court, was unobjectionable. In fact it was rather patriotic in its nature. . . In the argument little or nothing was urged in favour of the legality of the by-law, the evils of the C.I.O. and their supposed infringement of the by-law being stressed. However, even if the operation of that body is objectionable to the municipality, it cannot interfere with it except on clear legislative authority.

A section of the Municipal Act, other than the general one indicated above on which counsel for the town relied, permits councils to prohibit "distributing of posters, pictures or hand bills which are indecent or tend to corrupt morals." Another section of the Act authorizes councils to license, regulate and govern bill distributors generally. The power to license does not, it has been held, confer the power to prohibit. These sections taken together indicated, the Court held, that the Legislature did not give municipal councils power to prohibit the distribution to pedestrians of any printed matter and this section of the by-law, at least, was beyond the powers of the council.

Having decided this point, the Court did not find it necessary to express an opinion as to whether the Province could grant the powers which it was alleged to have given to the Council. *Rex* v. *Mustin, Rex.* v. *Millard,* (1940) 33 Ontario Weekly Notes 391.

Ontario Appeal Court Reverses Judgment Awarding Damages to Injured Employee

With Mr. Justice McTague dissenting, the Ontario Court of Appeal on October 17 allowed the appeal with costs and reversed the judgment of Mr. Justice Roach of the Ontario High Court of Justice and a jury who had awarded $2,889.75 damages and costs to a woman employed by the defendant department store who was injured on February 1, 1938, through alleged defective working of an escalator in her place of employment.

On the morning of the accident she was proceeding on the escalator from the first floor to the second when she slipped and fell, her left hand going out to save her. Before she was able to rise to her feet she arrived at the second floor and her hand was caught in the steel comb and the tread of the stairs. The resulting injury incapacitated her for her former work.

The jury found on the evidence that a defect in the escalator and failure to have an attendant to control the escalator in an emergency caused the accident and reluctance to upset the jury's verdict as to the facts led Mr. Justice McTague to dissent. The other two judges on appeal held that it had not been shown that the accident was due to defect in the apparatus and Mr. Justice Masten said "unless it is the law that though unsupported by evidence, the finding of a jury that black is white is unimpeachable by a Court of Appeal in Canada" he felt bound to allow the appeal. Mr. Justice Riddell observed that what the jury found was not a fact but rather a statement of what they considered an employer should do to ensure against any defective apparatus or operation.

None of the judges appeared to be convinced that the fall was due to a defect in the machinery. Neither did the jury specify any defect although it found the defendant negligent in failing "to have regular inspection to ensure that the machinery was in perfect working order." Mr. Justice Riddell was of the opinion that the cause of the accident was the non-stopping of the escalator on her slipping. It could have been stopped by simply pressing a button at the bottom and there was no attendant provided to do this; but

in view of the evidence of the use made by hundreds and of the length of time in which the apparatus was used without casualty the jury could not fairly find that the omission to place an attendant in charge was actionable negligence. Mr. Justice Masten added that the plaintiff having used the escalator for many years, knew there was no attendant and voluntarily took the risk (if any).

Plaintiff's counsel argued that although the common law would have obliged her to take all ordinary risks of employment as well as extraordinary risks of which she knew, Part II of the Workmen's Compensation Act applied which makes an employer liable for injury to his employees caused (1) by "defect in the condition or arrangement of the. . . plant. . ." used for his business, and (2) "by reason of the negligence of the employer. . ." Neither Mr. Justice Masten nor Mr. Justice Riddell express an opinion as to the applicability of the Workmen's Compensation Act; the latter felt that in any event it would not advance the plaintiff's claim as neither condition had been proved. The dissenting judge took the view that the Act did apply and that responsibility was on the employer to see that the equipment was not defective. *Steven v. The Robert Simpson Co. Ltd.* (1940) 35 Ontario Weekly Notes 415.

Saskatchewan Court of Appeal Affirms Award of Damages to Farm Worker

A judgment (Labour Gazette, 1939, p. 1294) awarding damages to a farm labourer for injuries received while operating a straw-cutter was affirmed by the Saskatchewan Court of Appeal on June 28. The Appeal Court held that there was ample evidence to justify the finding by the trial judge of negligence on the part of the employer in pushing straw to the plaintiff too quickly and in not having the machine equipped with a safety device so that it could be stopped in case of accident. The only method of stopping the machine was to stop the engine by which it was run. *Mazurkewich* v. *Bakowry* Saskatchewan Court of Appeal (1940) 4 Dominion Law Reports 78.

VOLUME XL] DECEMBER, 1940 [NUMBER 12

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

THERE was a substantial, contra-seasonal expansion in industrial activity at the beginning of November, according to returns furnished to the Dominion Bureau of Statistics by 12,392 firms with 1,364,720 employees, as compared with 1,336,181 at October 1. Each of these firms ordinarily employs a minimum of 15 workers. The index (based on the average for the calendar year 1926, as 100), advanced from 136·2 in the preceding month, to 139·2 at the date under review, as compared with 123·6 at November 1, 1939; the latest figure was the highest ever recorded. At that date in recent years, the index was as follows:—1938, 114·6; 1937, 125·2; 1936, 111·0; 1935, 107·7; 1934, 100·2; 1933, 91·3; 1932, 84·7; 1931, 103·0; 1930, 112·9; 1929, 124·6; 1928, 118·9 and 1927, 108·8.

Since the improvement over October 1 was a reversal of the usual seasonal trend from October to November in the last nineteen years, the seasonally-adjusted index showed an important advance, rising from 129·6 in the preceding month, to 133·2 at the beginning of November.

Unemployment in Trade Unions.—At the beginning of November, 1940, the percentage of unemployment among local trade union members stood at 5·0, in contrast with percentages of 4·4 at the beginning of October and 9·0 at the beginning of November, 1939. The percentage for November was based on returns compiled from 1,971 labour organizations with a total membership of 262,922.

Employment Office Reports.—Reports received from the offices of the Employment Service of Canada showed a decrease in the work transacted during October, 1940, when a comparison was made with that of the preceding month, but a gain was noted over that of the corresponding period of 1939. The industrial group mainly responsible for the decline from September was construction and maintenance, where various government projects were nearing completion, while nearly all industrial divisions participated in the favourable expansion shown over October a year ago, the highest gains being reported in construction and maintenance and services. Vacancies in October, 1940, numbered 55,895, applications 83,525, and placements in regular and casual employment 51,789.

Prices.—In retail prices the new official cost of living index calculated by the Dominion Bureau of Statistics and based upon average prices in 1935 to 1939 as 100 was 107·8 at the beginning of November as compared with 107·0 for October; 103·8 for November, 1939; and 100·8 for September, 1939. In wholesale prices the weekly index number also calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 continued slightly upward during November, the figures being 84·1 for the week ended November 29 as compared with 83·6 for the week ended November 1 and 83·0 for that ended October 4. Figures on a monthly basis for certain earlier dates are 80·3 for November, 1939; 72·4 for August, 1939 (pre war); 73·5 for November, 1938; 83·1 for November, 1937; and 63·5 for February, 1933, the low point in recent years.

Business Statistics.—The table on page 1224 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business at 156·7 in October was slightly higher than in the preceding month and higher also than at any time since 1919, the period covered by the record. The index in August, 1939, was 125·2 so that the advance in the volume of business as indicated by this index was about 25 per cent since the outbreak of war. Marked increase was recorded in the month under review over the preceding month by the index of the volume of manufacturing which was up from 159·7 to 174·2. The production of foodstuffs was higher due mainly to increases in the operations of sugar making plants and in meat packing. Greater activity in the rubber industry and in the woollen textile industry in the same comparison was indicated by the figures of the imports of raw rubber and of raw wool while the production of pig iron and of steel ingots also showed marked advance. The index of the manufacturing group as a

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended November 29, 1940.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending November 26, 1940, and corresponding periods.

(6) Sugar production given in periods of four weeks ending November 2, October 5, and September 7, 1940; November 4, October 7, and September 9, 1939. (7) MacLean's Building Review.

(8) Index numbers are adjusted when necessary for seasonal variation. (9) Excluding gold.

(11) Now based on 203 municipalities instead of 58 as formerly.

whole was about 21 per cent higher in October, 1940, than in October, 1939, and about 50 per cent higher than in August, 1939. Somewhat lower volume was indicated by the index of mineral production than in the preceding month but increased volume as compared with October, 1939. Construction also was lower than in the preceding month but still substantially higher than in October, 1939 although marked improvement for November was indicated for the group by the figures as to the value of construction contracts awarded in that month. In the group indicating the trend in the distribution of commodities increase was recorded in freight car loading and in imports while exports were lower than in the preceding month. Car loadings were slightly lower than in October, 1939, but both imports and exports were higher. Little information is available for November but wholesale prices and employment as well as the value of contracts awarded were higher than in the preceding month and higher also than in November, 1939. Employment in November continued the upward movement in evidence since April and the index was at the highest level on record. The number of cars of revenue freight was smaller than in October but greater than in November, 1939.

Strikes and Lockouts.—The number of strikes and lockouts recorded as in existence during November was 16, involving 3,646 workers, with time loss of 15,964 man working days, as compared with 25 disputes during October, involving 7,609 workers with time loss of 19,830 days. Most of the time loss in November was due to three strikes of coal miners in Nova Scotia and two strikes of highway truck drivers in Ontario. In October strikes of coal miners and shipyard workers accounted for most of the time loss.

In November, 1939, there were 14 disputes, involving 4,863 workers with a time loss of 36,351 days. The important disputes involved fish handlers in Nova Scotia, clothing and textile workers in Quebec, coal miners in Saskatchewan and Nova Scotia and gold miners in British Columbia.

Of the sixteen disputes in November, 1940, fifteen were recorded as terminated during the month. Four resulted in favour of the employers and six in favour of the workers involved. Compromise settlements were reached in three cases and in two cases the results were indefinite. One dispute, involving approximately 125 workers, was recorded as unterminated at the end of the month.

These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions involved.

Establishment of basic wage levels with cost of living bonuses

The Government has issued (on December 16) an Order in Council designed to avoid the development of inflationary tendencies as a result of wartime industrial and economic conditions. With that objective, and acting on the advice of the National Labour Supply Council and the Committee on Labour Co-ordination, a plan has been formulated whereby a standard of wages will be established in terms of wage rates which have been demonstrated to be reasonable in the past.

Accordingly, the standard is to be the general wage levels established during the period 1926-29, or any higher level established thereafter with two exceptions. (1) In a case where it can be clearly shown that when such level was established the wages of the workers in question were depressed and subnormal, or (2) Where it can be clearly shown that in particular instances wages, which otherwise might have been considered a standard, have heretofore been unduly enhanced and out of line with the general level in the particular trade or calling.

In other words, the standard is to be interpreted in terms of general levels and not of either subnormal or abnormal rates that may have been established in a particular period in some trade, locality or industry.

Wherever it is found, however, that the purchasing power of basic rates has been impaired as indicated by the Cost of Living index of the Dominion Bureau of Statistics, an offsetting cost of living bonus may be granted.

The principle on which the bonus is based is a democratic one which recognized that the burden of a rise in the cost of the necessaries of life falls without distinction on all classes, and the bonus is therefore to be a flat amount uniform for all workers not recognizing any differentials in wages or salaries.

(In order that this issue of the LABOUR GAZETTE may be sent to press it is impossible to give a detailed review of this important Order, but this will be done in the January number).

Industrial Disputes Investigation Act

During the past month Boards of Conciliation and Investigation presented reports to the Minister of Labour in connection with four disputes. Four applications for boards were received and three boards were established.

Particulars of proceedings under the Industrial Disputes Investigation Act will be found in the section commencing on page 1232.

Appointment and functions of Unemployment Insurance Advisory Committee

Further action towards the completion of the unemployment insurance administrative structure resulted on December 4 by the issuance of an Order in Council (P.C. 7129) establishing the Unemployment Insurance Advisory Committee. (The Commission itself was appointed on September 23 and its personnel consists of Dr. J. Sirois, Mr. R. J. Tallon and Mr. A. M. Mitchell). The Act provided also for the appointment of an Advisory Committee, consisting of a chairman and not less than four, nor more than six, other members, and by its terms the following are to hold office for a period of five years:

Chairman—Dr. W. A. Mackintosh, Economic Adviser, Department of Finance, Ottawa.

Members—Mr. Harold Brownhill, manager, Building Supplies and Milling Company, Limited, Halifax.

Mr. M. M. Maclean, vice-president, Canadian Congress of Labour.

Mr. V. M. Smith, general manager, Confederation Life Association, Toronto.

Mr. J. F. MacMillian, president, Chisholm Sawmills Limited, Edmonton.

Mr. Percy Bengough, vice-president, Trades and Labour Congress of Canada.

Miss Estelle Hewson, executive secretary, Red Cross Society, Windsor.

The Committee, under the provisions of the Act, must make an annual report (not later than the end of February each year) to the Governor-in-Council on the financial condition of the fund "as of the thirty-first day of December last preceding," and is also to report on the financial situation whenever it considers that the fund is, or is likely to become, insufficient to discharge its liabilities. In the event of the Committee reporting the fund as insufficient it is empowered to make recommendations for the amendment of the Act or of any regulations in order to make the fund sufficient. Conversely, the Committee is authorized to make recommendations in event of over-sufficiency. In either case "the report shall contain an estimate of the effect which the amendments recommended will have on the financial condition of the fund."

Release of key men to war industries from Canadian army

In conformity with the announcement by Hon. Norman A. McLarty, Minister of Labour, in the House of Commons on November 28, the Department of National Defence has issued instructions governing the release of key men to war industries from the Canadian Army.

(A summary of the Minister of Labour's address is given elsewhere in this issue commencing on page 1248).

In a memorandum to all District Officers Commanding, to the G.O's C. Atlantic and Pacific Commands, and others concerned, the Adjutant General has stated "It has been decided to allow key men from essential industries in Canada, who are serving in the C.A.S.F. to be granted leave (without pay) during the forthcoming winter to return, temporarily, to those industries in order to help increase production in relation to the war effort."

"Essential industries" under this arrangement will be those defined as such by the Department of Munitions and Supply. Further, the applications for the temporary release of men for return to civil employment must originate with the employer who will be requested to submit his application to the Officer Commanding the Unit in which the soldier is serving. Only applications for craftsmen will be in order and they must give complete information as to the position the man will fill in the factory, as well as verifying that employers have been unable to obtain suitable help from employment bureaux.

Applications so submitted finally will reach National Defence Headquarters where decision as to the release or otherwise of the men concerned will be made.

Soldiers released temporarily for essential work in war industries will forego their pay and allowances while engaged in such work. They also cease to be eligible to receive at the expense of the Government medical or dental treatment.

There are certain other restrictions imposed on applications, mainly with a view to prevent the denudation of the technical services of their experienced personnel. In the Ordnance Branch, for instance, skilled tradesmen must be retained and it is ruled that in view of the present shortage of such personnel in the Royal Canadian Ordnance Corps, no application for the release of men from that Corps will be entertained.

In all cases the soldiers' wishes will be consulted and none will be compulsorily returned to industry. Those who do go back to their civilian occupations will be permitted to wear uniforms, while not actually engaged in their work, and they will be re-absorbed in their Units on return to Active Service.

Regulations enforcing payment of fair wages on Dominion Government Contracts

Action by the Department of Labour to enforce the payment of fair wages on government contracts has been taken by an Order in Council (P.C. 6801) under the Fair Wages and Hours of Labour Act. Drafted as a result of representations by labour, the regulations under the Order in Council establish a procedure whereby claims shall be investigated and settlements made.

Under the new regulations when it is ascertained, through Labour Department investigation, that employees have not been paid the required rate of wages the contractor must deliver to the Deputy Minister of Labour a cheque payable to the Receiver General of Canada for the amount due. If payment has not been made by the Government to the contractor, the amount due his employees will be held back and paid over to the Deputy Minister of Labour to be deposited with the Receiver General in a Fair Wages Suspense Account. Cheques on this account payable to the workers concerned will then be issued. The Deputy Minister of Labour is required to endeavour to ensure safe delivery of these cheques to the workers concerned.

Regulations.—The text of the new regulations are as follows:

1. The Deputy Minister of Labour shall be responsible for the investigation of all claims for the payment of wages at the rates set out in the fair wage schedule embodied in Government contracts and in any case where the actual rates have been less than the rates so set out in the fair wage schedule he shall ascertain the difference between the amounts actually paid to employees and the amounts which they would have received had they been paid at the rates set out in the fair wage schedule.

2. The contractor shall deliver to the Deputy Minister of Labour a cheque payable to the Receiver General of Canada for the total amount of differences ascertained under regulation No. 1, or if settlement has not yet been made with the contractor concerned, then the Department of Government concerned with the contract shall withhold payment of such amount from the contractor and shall deliver to the Deputy Minister of Labour a cheque in the required amount payable to the Receiver General of Canada.

3. The amounts so collected or deducted from contractors and/or other Departments of Government shall be paid to the Receiver General of Canada to be deposited in an account, known as the Fair Wages Suspense Account. In settlement of all claims of individual workers the Deputy Minister of Labour shall authorize the issue of cheques in the appropriate amount in the name of the worker concerned, these cheques to be charged to the Fair Wages Suspense Account.

4. The Deputy Minister of Labour shall endeavour to ensure the safe delivery of these cheques to the workers concerned.

5. In cases where Departments other than that of Labour have occasion through default by the contractor to seize his security and pay off claims direct for wages, then any unclaimed cheques for payment of such wages shall be delivered to the Deputy Minister of Labour with all relevant information concerning each case to be deposited in the Fair Wages Suspense Account.

6. It shall be the responsibility of the Deputy Minister of Labour to maintain adequate records of receipts and disbursements connected with both funds referred to above.

Further extension of rent control

On November 25, the Wartime Prices and Trade Board announced the extension of the rent-pegging order of September 24 (LABOUR GAZETTE, October, 1940, pages 995-6) to include four British Columbia cities of North Vancouver, New Westminster, Nanaimo and Prince Rupert.

Again on December 5 a further extension of the rent control was announced to include the city of Calgary, Alberta.

These latest extensions are in addition to those outlined in the November issue of the LABOUR GAZETTE (page 1103) and in all cases the Board Order provides that the maximum rentals in force in these enumerated municipalities are automatically those prevailing on January 2, 1940, and that no tenant need pay any higher rent unless so advised in writing by the Rentals Administrator.

Local Rentals Committees are being established to hear appeals in all areas coming within the jurisdiction of the rent control order.

Regulations of Wartime Prices Board governing eviction of tenants

Supplementing the original order issued on September 24 (LABOUR GAZETTE, October, 1940, pages 995-6) and effective November 23, the Wartime Prices and Trade Board issued an order on November 21 embodying new regulations relating to the eviction of tenants in controlled rental areas.

Although the first Order provided that no tenant could be evicted for refusing to pay more than the "the maximum rent", cases have come to the Rentals Administrator's attention where landlords have attempted to evade this provision by alleging other and often specious reasons for eviction.

Following closely the general principles adopted by both the British and Australian Rent Controls, this new Order respecting evictions gives any tenant in a "controlled

area" subject to certain exceptions, the right to renew his present lease on the same terms and conditions, provided he gives his landlord adequate and proper notice of his intention to renew.

Tenants' notices of renewal must be given in writing and, in the case of monthly or yearly leases, must be within ten days after the receipt of a landlord's notice to vacate. Where a lease is fixed for a term of years or for six months or more, at least three months' notice of renewal is required, and in the case of a lease for a fixed term less than six months, at least thirty days notice must be given.

A tenant will not be entitled, however, to a renewal of his lease if the landlord can satisfy the provincial court of competent jurisdiction that his notice to vacate is for any of the following reasons: that the tenant has not paid his rental, has broken the terms of his lease, or is not willing to pay the rental authorized by the local Committee or Administrator; that the tenant or some one living with him is committing a nuisance or has been convicted of using the property for immoral or illegal purposes; that he is not taking reasonable care of the property and allowing it to deteriorate; that the tenant, himself, has given the landlord notice of intention to vacate; or that the housing accommodation is bona fide required by the landlord as a residence for himself or for members of his family or a dependent or for any person employed by him.

Where a landlord proposes to make major alterations, to remodel or subdivide any housing accommodation, the tenant is not entitled to remain in occupation unless he is willing to accept the altered accommodation and pay any new maximum rental prescribed by the local Rentals Committee or the Rentals Administrator.

If a tenant is using the property for other than housing purposes, or if the landlord has made a bona fide sale under the terms of which he has agreed to give possession to the buyer, the tenant is not entitled to a renewal of his lease.

Notices to vacate given by a landlord must be in writing, and must contain the reason for the notice. In the case of month to month or year to year leases, the time of notice must be the time prescribed by the law of the province in which the accommodation is situated. In the case of a fixed term lease for six or more months, at least three months' notice is required, and in the case of a lease for a fixed term of less than six months, not less than thirty days.

The Order further provides that any notice to vacate given by a landlord prior to November 23, 1940, respecting housing accommodation in areas where maximum rentals are fixed, and not followed by actual vacation, will have no effect unless the landlord satisfies the Court as to the existence of one or more of the circumstances invalidating the extension of renewals.

All leases are deemed to have been amended in so far as it is necessary to give effect to the provisions of this Order, and any agreement by a tenant to waive his rights under this Order is null and void.

No increase in rental will be effective under such renewals unless approved by the local Rentals Committee or by the Rentals Administrator where no local Committee is operating.

Statistics of relief recipients for October

The grand total of all classes of persons on urban and agricultural relief across Canada in October of this year showed a reduction of 4·4 per cent from September and 53·9 per cent from October a year ago, according to figures released by the Department of Labour. The grand total for October, as shown by the preliminary results from the registration of all direct relief cases carried out for the Department of Labour by the provinces and municipalities, stood at 251,000. This total represented a decrease of 67·5 per cent from the peak figure of the year which occurred in the month of March: in October, 1939, the decrease from the peak month of that year was 47·1 per cent, while October, 1938, showed 38·6 per cent decrease from March, 1938.

Unemployed but fully employable persons on relief in October this year numbered 44,500, a decrease of 11·0 per cent from the revised September total. The figure for October this year showed a decrease of 64·4 per cent from October a year ago, and a decrease of 64·1 per cent from October, 1938. From the peak figure of 172,683 in March of this year, the October total of fully employable persons was down by 74·2 per cent.

A total of 226,000 persons were receiving non-agricultural relief in October, a decrease of 8·5 per cent from the corrected figure for the previous month: October, 1939 had shown a decrease of 1·0 per cent from September, 1939. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a decrease of 53·3 per cent from the figure for October, 1939, and a decrease of 52·2 per cent from the figure for October

two years ago. In relation to the high month of 1940, the October total on urban relief showed a decrease of 65·2 per cent.

The Dominion total on agricultural relief continued to show a major decline from the year before, following improved crop conditions in 1939 in the Prairie Provinces. A total of 5,500 farmers who, together with their dependents, accounted for a farm population of 25,000, were reported as receiving agricultural relief for subsistence in October; this total indicated a decline of 80·8 per cent from the high month of this year. The Dominion total on agricultural relief in October increased by 61·3 per cent from the revised September figure, and was 58·0 per cent less than October, 1939, and 85·1 per cent less than in October, 1938. Figures for October for Saskatchewan alone showed decreases of 53·2 per cent and 88·4 per cent from October, 1939 and from October, 1938, respectively; the Saskatchewan total of 16,500 persons on agricultural relief accounted for 66·0 per cent of the Dominion total in October this year.

Ship building industry under direction of Controller of Ship Construction

Extending its industrial mobilization for war purposes the government issued on November 27 an Order in Council appointing Mr. David Ballantyne Carswell, of Montreal, as Controller of Ship Construction and Repairs. Mr. Carswell is at present Director General of the Ship Building Division of the Department of Munitions and Supply, and will continue in this post as well as assuming his new duties as Controller of Ship Construction. (In the July issue of the LABOUR GAZETTE, page 631, there was a review of the establishment of the Wartime Industries Control Board, and the functions of the various Controllers comprising it).

By the terms of the Order in Council it was "deemed necessary to organize, mobilize, coordinate, regulate and conserve the ship construction and ship repair industry of Canada and the docks, plant, shops, tools, equipment and facilities in order to fulfil the present and potential needs of Canada and her Allies, and for such purpose to appoint a Controller of Ship Construction and Repairs. . . . "

As in the case of the Controllers of Steel, Metals Production, Timber, and Oil, the powers conferred on the Controller of Shipping are detailed. These are comprehensive in scope, practically empowering him to direct the entire activities of the ship building industry in this country toward the major purpose of the effective prosecution of the war.

Establishment of Wartime Requirements Board

Under the provisions of the Department of Munitions and Supply Act and the War Measures Act, an Order in Council was issued on November 16 establishing a Wartime Requirements Board. The Board's main functions are detailed in the Order, but its chief purpose is to speed up urgent war projects "with a minimum disturbance to Canadian export trade in particular and Canadian economy in general by planning the most productive and direct use for war purposes of available supplies of materials, power, manufacturing plant and facilities and transportation facilities"; and, more specifically, to examine and appraise "the economic significance of the various projects as and wherever they originate, in relation to the maximum war effort of which Canada is capable."

The following comprise the personnel of the Board:

Mr. Harvey R. MacMillan, chairman; and Dr. W. C. Clark, Mr. Graham F. Towers, Dr. Bryce M. Stewart, Mr. Robert A. C. Henry, Major-General L. R. LaFleche, Colonel George S. Currie, Lt.-Col. K. S. MacLachlan, Mr. Herbert G. Colebrook and Mr. H. Carl Goldenberg, the last named being secretary.

Appointment of Mr. A. MacNamara as Associate Deputy Minister of Labour

On November 19, the Minister of Labour, Hon. Norman A. McLarty, announced the appointment of Mr. Arthur MacNamara as Associate Deputy Minister of Labour.

Mr. MacNamara was Deputy Minister of Public Works and Labour in Manitoba until about a year ago when he was loaned to the Department of National Defence as Chairman of the Dependents' Allowance Board. With 25 years' experience in dealing with labour and social problems, Mr. MacNamara has for 10 years administered the unemployment relief and relief works program in Manitoba.

His first position with the Government of Manitoba was that of chief inspector of the Bureau of Labour, in which capacity he established the Province's industrial inspection service. He also administered Manitoba's minimum wage and fair wage laws. During the last war Mr. MacNamara served three years in the Air Force.

In making the announcement Mr. McLarty said Mr. MacNamara was reluctant to sever his connection with the Manitoba Government and accepted the new position as a part of war service. The Minister added that the appointment was a permanent one and Mr.

MacNamara would not be specially assigned to any phase of departmental work but would be available for consultation on unemployment insurance or any other matter.

In his new position Mr. MacNamara will be associated with Dr. Bryce M. Stewart, who recently accepted the appointment as Deputy Minister of Labour for the duration of the war.

Civilian re-establishment of soldiers under Veterans' Welfare Division

Reference was made in the November issue of the LABOUR GAZETTE (page 1102) to the appointment of a General Advisory Committee on Rehabilitation. This General Advisory Committee developed out of a Special Committee of the Cabinet (under the chairmanship of the Minister of Pensions and National Health) to give "early and thorough consideration" to questions which will arise from the demobilization and discharge of members of the Canadian forces, and the rehabilitation of such members into civil life."

The Minister of Pensions and National Health, Hon. Ian Mackenzie, as chairman of the Special Cabinet Committee, has received recently a report from the chairman of the General Advisory Committee with recommendations which have been approved. Based on these recommendations, an Order in Council (P.C. 6282) was issued on November 27. As pointed out in this Order, the recommendations of the General Advisory Committee concern only former members of the forces who served in the present war, but it is considered that such services and assistance as is recommended in the report "should be equally available to those persons who served with the forces during the Great War, and who may not have been successfully re-established in civil life."

The Order in Council established in the Department of Pensions and National Health a Veterans' Welfare Division "to advise and assist former members of the forces in matters pertaining to re-establishment in civil life."

Among the specific duties designated as coming within the functions of the Veterans' Welfare Division are:

To establish sub-divisions at such points throughout Canada at which the Department of Pensions and National Health maintains offices and/or where the establishment of such sub-divisions is deemed to be advisable;

To interview, advise and assist former members of the forces;

To become conversant with all the regulations relating to pensions, allowances, medical treatment, employment, training, social welfare, aids, housing scheme, land settlement, and all policies that may be of assistance to such former members of the forces;.

To make a study of all occupational opportunities in the several areas at which sub-divisions may be established pursuant to the provisions of sub-paragraph (*a*); to encourage employers to re-employ persons who, previous to their enlistment, were in their service; to endeavour to secure preferences in employment for former members of the forces, to co-operate and keep in constant touch with the Employment Service of Canada in regard to available employment.

Annual Report of Dominion Department of Labour

On December 6 the Minister of Labour laid on the table of the House of Commons the report of the Deputy Minister of Labour for the fiscal year ending March 31, 1940. The report contains a review of the work of the Dominion Department of Labour during the year in connection with the administration of the following statutes: Labour Department Act; Conciliation and Labour Act; Industrial Disputes Investigation Act; Government Annuities Act; Employment Offices Co-ordination Act; Technical Education Act; Combines Investigation Act; Unemployment and Agricultural Assistance Act; and Youth Training Act. Other activities of the Department covered in the report include the administration of the Fair Wages Policy of the Government of Canada and the work arising out of Canada's relations with the International Labour Organization.

United States labour supports defense program

From time to time there have appeared in the LABOUR GAZETTE references to the United States National Defense Advisory Commission (LABOUR GAZETTE, October 1940, page 1002; September, page 894 and August, page 761).

On December 9, the Labour Policy Advisory Committee of the National Defense Advisory Commission made public a statement pledging labour's continued co-operation in a country-wide program of uninterrupted production in defense industries. This statement was unanimously adopted at a regular meeting of the Labour Policy Advisory Committee (LABOUR GAZETTE, August 1940, page 761), which comprises sixteen representatives of the three great labour groups—6 representing the A. F. of L., 6 representing the C.I.O., and 4 representing the railroad brotherhoods.

The session was presided over by Mr. Sidney Hillman chairman of the committee, and Commissioner in charge of the Labour Division for the National Defense Advisory Commission.

The statement follows:

"In this time of world crisis, American labour is awake to the crucial need for a

strong national defense program. Labour recognizes fully that if the democratic way of life is to be preserved, and enlarged, our country must prepare itself for total defense—morally and materially. Labour knows that it is the first to be trampled under the march of dictatorship. Labour knows that if workers are to remain free men, and keep their free choices, democracy—as a living faith, as a living reality—must be equipped to meet the threat of totalitarianism, within and without. Labour has been—and is—co-operating wholeheartedly throughout the entire defense effort. Until very recently no single serious interruption of production in defense industries had occurred; and then only two such work-stoppages took place—the first lasting six working days, and the second four days.

"This record is ample evidence that labour recognizes the importance of continuous production to meet defense needs. Labour again re-affirms its assurance of co-operation with the national defense program and further pledges itself to take no action which may in any way impede production before all conciliation facilities of the Federal Government for resolving any existing controversy have been exhausted."

Mr. Hillman declared that "the point of view expressed by this committee, which speaks for all sections of organized labour, again confirms, and underscores, what has been and remains the serious determination of labour's leaders and its rank and file to give unstinted support to insure the success of the National Defense program."

"Skilled Workers for U.S. Defence Industries"

There has recently been received a report made by the Personnel Research Federation, New York, entitled *Skilled Workers for Defense Industries*. The report is divided into two parts, the first section dealing with the hiring of skilled workers; upgrading of skilled workers; special emergency training; progression training; time taken to learn jobs; selecting men to be trained, and skilled labour supply inventory. Part II of the report deals with such subjects as placement bulletin for plant; improved toolroom practices; speeding up training; training on the job; apprentice training costs; Wright aeronautical plan; doubling the labour supply; output per skilled worker increased; recommendations and National Defense Commission plans.

In presenting this report, it is stated that when the United States defence program reaches its peak in twelve to eighteen months there will be jobs for six million more workers in industry and it is counselled that preparations by industry, business, trade and transportation should be started immediately.

In Part II of the report, the following recommendations are made as a means to better meet the needs for skilled labour.

1. Make studies to forecast, as far in advance as possible, requirements for skilled labour by occupational classifications.

2. Inventory available skills and abilities within the plant; study occupations objectively to determine skill and training requirements; through tests and performance ratings select candidates most likely to benefit by training; and carry out organized programs to develop potential skills available through rotational and progression training.

3. Establish and maintain apprentice training programs for higher skilled jobs, where it is apparent that requirements cannot be met by progression and other training programs.

4. Survey toolroom and machine shop practices to improve, where possible, the effectiveness of skilled labour groups. Study of the efficiency and practicability of improving existing practices in the toolroom in relation to engineering, tool design and production departments.

It is apparent that specialization in toolrooms in large plants has increased, although they are still largely run on traditional lines. This suggests that industry is finding it difficult to break down the tool jobbing shop concept to increase specialization of work. This would decrease training requirements for the most highly all-around skilled labour. On the other hand, there is a question as to how far management can go in breaking down this concept, because if it were to do so it might unfavourably affect attitudes generally associated with craftsmanship in skilled trades, such as pride in workmanship, sense of responsibility, etc.

Regardless of these factors, studies should probably be undertaken to consider the possibilities and practical results of training more specialists rather than all-around skilled craftsmen.

5. Companies should make continued studies of transferable skills, learning periods, training methods and procedures, to seek ways and means of reducing training times.

6. Companies should use practical selection tests—intelligence, trade knowledge and aptitude—in employment and training programs to aid in obtaining a higher probability of worker success.

In the November issue of the LABOUR GAZETTE there appeared two detailed articles entitled "Training Industrial Workers in Wartime" (pages 1149-1152) and "The Effective Industrial Use of Women in the Defence Program" (pages 1153-1155). The first of these two articles dealt with the methods and results of training programs in the United States and Great Britain while the second outlined the major factors attendant upon the employment of women workers in war industries.

16416—2½

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

FOUR applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From employees of H. F. McLean, Limited, at Ile de Salaberry, near St. Timothée, P.Q., being members of Local Union 144 (Montreal), United Association of Plumbers and Steamfitters. Failure of the company to pay an allowance for board and transportation from Montreal in accordance with an agreement with the Master Plumbers' Association of Montreal is stated to be the cause of the dispute, 95 plumbers, steamfitters, sprinklerfitters and general pipefitters being directly affected, and 120 helpers and labourers indirectly affected.

(2) From employees of the Goodyear Tire and Rubber Company, at Bowmanville, Ontario, being members of Local 189, United Rubber Workers of America. The dispute arises out of the refusal of the company to negotiate an agreement with the union covering grievance procedure, increased wages, and improved working conditions. Three hundred and sixty employees are stated to be directly affected, and fifty indirectly. A Board of Conciliation and Investigation was established by the Minister of Labour on December 5 to deal with this dispute, and Mr. Andrew Brewin, of Toronto, Ontario, was appointed a member thereof on the recommendation of the employees.

(3) From 20 bus operators, garage mechanics, etc., in the employ of the Guelph Transportation Commission, being members of Division 1189, Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America. The cause of the dispute is stated to be the refusal of the Commission to negotiate an agreement with the employees' representatives providing for increased wages, improved working conditions, and union recognition.

(4) From employees of the following shoe manufacturers in Quebec City, namely, A. E. Marois, John Ritchie, Children Shoe, Gale Bros., Lachance and Tanguay, and Quebec Stitchdown. Twelve hundred and fifteen workers are directly affected by the dispute, the majority of whom are stated to be members of l'Union Protectrice des Travailleurs en Chaussure de Quebec. They request increased wages, shorter hours of labour in certain cases, and improved working conditions, and protest against the alleged unjust dismissal of certain employees.

Other Proceedings Under the Act

The application for a Board of Conciliation and Investigation received on September 5 from employees of the Kingston Shipbuilding Company, Limited, members of Lodge 210, International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America (LABOUR GAZETTE, September, 1940, p. 895), was held in abeyance for several weeks pending receipt of the report of a Board which was dealing with a similar dispute involving the Collingwood Shipyards, Limited, in the expectation that, should an agreement be reached in the latter case, it would serve as the basis for a settlement at Kingston. An agreement was reached at Collingwood, following rejection of the Board's recommendations and a strike of two days' duration. Subsequently terms of settlement were negotiated by a representative of the union with the management of the Kingston Shipbuilding Company. This proposed agreement, however, proved unacceptable to the employees at the Kingston shipyard. A Board was established by the Minister of Labour on November 27, and Mr. J. A. McClelland, of Valois, P.Q., was appointed a member thereof on the recommendation of the employees. A number of the boilermakers, welders, etc., ceased work on November 28 in contravention of the provisions of the Industrial Disputes Investigation Act. They were joined by a group of electricians, plumbers, carpenters and machinists. Details of the strike will be found in the article on Strikes and Lockouts in Canada during November, 1940, commencing at page 1242. Work was resumed on December 2 and the Minister widened the scope of the Board's enquiry to embrace the additional classes of labour involved in the strike. The member of the Board appointed on the company's recommendation is Mr. F. Curzon Dobell, of Montreal, P.Q. The chairman is the Honourable Mr. Justice Wilfrid Daniel Roach, of the Supreme Court of Ontario, Toronto, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members, Messrs. McClelland and Dobell.

On November 21 the Minister established a Board to deal with a dispute between the Dominion Steel and Coal Corporation, Limited, and the employees in its Peck Rolling Mills Division, and appointed Mr. R. A. Ballantyne, of Montreal, P.Q., a member thereof, on the recommendation of the employees. Mr. Ballantyne subsequently resigned and Mr. J. L. Cohen, K.C., of Toronto, Ontario, was, on

the employees' nomination, appointed Board member in his stead. The member appointed on the company's nomination is Mr. Lionel A. Forsyth, K.C., of Montreal. Messrs. Cohen and Forsyth will endeavour to agree upon a person for appointment as chairman of the Board. An application for the establishment of a Board in this case had been received on September 5 (LABOUR GAZETTE, September, 1940, p. 895), but was defective in certain respects. A revised application received in October was challenged by the company on the ground that it also did not meet the requirements of the Industrial Disputes Investigation Act. As a strike appeared imminent, the Minister of his own motion established the Board under the provisions of Section 65 of the statute.

The personnel of the Board established to deal with a dispute between the Sullivan Consolidated Mines, Limited, at Sullivan, Abitibi, P.Q., and its employees, was completed on November 22 by the appointment of His Honour Judge Albert Constantineau, of Ottawa, Ontario, as third member and chairman. This appointment was made by the Minister of Labour in the absence of a joint recommendation from the other Board members, Messrs. Guy Valiquette and Paul d'Aragon, nominees of the employees and company respectively.

On April 20 the Minister of Labour established a Board of Conciliation and Investigation to deal with differences between a number of shipping companies operating on the Great Lakes and Saint Lawrence River and the unlicensed personnel in their employ, members of the Canadian Seamen's Union. The board has not yet filed its final report, but from time to time has informed the Minister as to the progress of its work. In June the board reported that an agreement had been signed by the union and seven of the companies involved in the dispute, as follows: Algoma Central Steamship Line; Canada Steamship Lines, Limited; Northwest Steamships, Limited; Quebec and Ontario Transportation Company, Limited; Tree Line Navigation Company, Limited; Union Transit Company, Limited; and Upper Lakes and Saint Lawrence Transportation Company, Limited. In July the board requested the Department of Labour to conduct a secret ballot among the unlicensed personnel in the employ of Paterson Steamships, Limited, as to the desire of these workers to be represented by the union for purposes of collective bargaining. The Department complied with this request, and the balloting revealed a large majority to be in favour of representation by the union. Subsequently an agreement was signed by Paterson Steamships Limited, and the Canadian Seamen's Union.

It was reported in the November issue of the LABOUR GAZETTE, p. 1107, that an application for a Board had been received from Locals 193, 670, and 21 of the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America on behalf of employees of Martin Transports, Limited, a highway trucking company operating in Ontario and Quebec. An inter-union dispute was involved, the applicants claiming that the Canadian Brotherhood of Railway Employees and Other Transport Workers, which had a signed agreement with the company embodying "closed shop" and "check off" provisions, did not represent a majority of the employees. On November 11, while enquiries were being made by the Department to ascertain if a majority of the workers supported the application, a number of the employees ceased work. For details of this strike see the article on Strikes and Lockouts in Canada during November, beginning at page 1242.

Settlements

Early in November a settlement was reached in the dispute between the Collingwood Shipyards, Limited, Collingwood, Ont., and certain categories of its employees, members of Local 343, International Brotherhood of Boiler Makers, Iron Ship Builders, Welders and Helpers of America, Local 632, International Association of Machinists, Local 559, International Brotherhood of Blacksmiths, Drop Forgers and Helpers, and Local 468, United Association of Journeymen Plumbers and Steam Fitters of the United States and Canada. The dispute had been referred to a Board of Conciliation and Investigation, which submitted its findings to the Minister of Labour in September, the employees' nominee dissenting (LABOUR GAZETTE, October, 1940, pp. 1009-14). The employer indicated willingness to implement the board's recommendations, but the employees insisted that the minority report of the board be the basis of agreement. Negotiations broke down and a two-day strike began on October 24. With the assistance of the Department of Labour, negotiations were resumed upon termination of the strike and an agreement was reached covering all matters in dispute (LABOUR GAZETTE, November, 1940, p. 1144).

On July 29 the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with disputes between the Algoma Steel Corporation, Limited, Sault Ste. Marie, Ont., and three groups of its employes, as follows: (1) its steel workers, members of the Algoma Steel Workers' Union (Local Union No. 2251, Steel Workers' Organizing Committee); (2) its transportation employees, members of the

Brotherhood of Locomotive Firemen and Enginemen and the Brotherhood of Railroad Trainmen; and (3) certain of its maintenance employees, members of Lodge 485, International Association of Machinists. (*See* LABOUR GAZETTE, August, 1940, pp. 779-86). On October 9 the board was instructed to reconvene for the purpose of adducing further evidence in connection with the steel workers' dispute, and elsewhere in this issue will be found the text of the report of the reconvened board, together with the text of the accompanying memorandum of agreement reached before the board. (*See* p. 1237.) In addition, the Department of Labour is in receipt of information to the effect that the company has negotiated settlement of the disputes with the other two aforementioned groups of its employees, namely, its transportation employees and its machinists.

A Board of Conciliation and Investigation was established on July 24 to deal with differences between Canadian Vickers, Limited, Montreal, P.Q., and its boiler makers, welders and boiler makers' helpers, members of Lodge 271, International Brotherhood of Boiler Makers, Iron Ship Builders, Welders and Helpers of America. The board's findings (LABOUR GAZETTE, October, 1940, pp. 1007-9) were generally acceptable to the employees, but unacceptable to the employer. On November 7 the employees ceased work in an effort to obtain implementation of the board's recommendations and on November 11 the strike terminated with the signing of an agreement summarized in this issue under "Recent Industrial Agreements".

It is understood that a settlement has also been reached recently in the dispute between the Dominion Coal Company, Limited, and its employees, members of District 26, United Mine Workers of America. The dispute was referred to a Board of Conciliation and Investigation, which submitted a unanimous report (LABOUR GAZETTE, April, 1940, pp. 321-3). The company indicated its intention to accept the board's recommendations and to implement them immediately upon notification of the employees' acceptance of the recommendations. On November 19 the employees voted in favour of acceptance.

During November an agreement was reached ending the dispute between the Canadian Pacific Railway Company and the Canadian National Railways, on the one hand, and their freight handlers employed on the Montreal Wharf, members of the Brotherhood of Railway Clerks, Freight Handlers, Express and Station Employees, on the other hand. In July the dispute had been referred to a Board of Conciliation and Investigation, which later submitted its report, the employers' nominee dissenting (LABOUR GAZETTE, November, 1940, pp. 1114-37). The employees indicated their willingness to accept the recommendations of the board, but the employers refused to do so. Subsequent negotiations, in which officials of the Department of Labour participated, resulted in a mutually satisfactory settlement.

The recommendations of the Board of Conciliation and Investigation established to deal with a dispute between the John Inglis Company, Limited, Toronto, Ont., and its boiler makers, iron ship builders, welders, machine hands and helpers, members of Local 637, International Brotherhood of Boiler Makers, Iron Ship Builders, Welders and Helpers of America (LABOUR GAZETTE, October, 1940, pp. 1104-7), were not accepted by the employing company. Subsequently, however, the company put into effect certain wage increases, retroactive to August 1, 1940.

On July 15 a unanimous report was received from the Board of Conciliation and Investigation established to deal with disputes between the Canadian Car and Foundry Company, Limited, and Canadian Vickers, Limited, on the one hand, and certain employees in their aeronautical divisions, members of Lodge No. 712, International Association of Machinists, on the other hand. The board's report stated that the Canadian Car and Foundry Company, Limited, and its employees had reached an agreement disposing of all matters in dispute, and that in the dispute involving Canadian Vickers, Limited, agreement had been reached on all matters except the question of wages. (LABOUR GAZETTE, August, 1940, pp. 763-8.) The Department of Labour is now in receipt of information to the effect that an agreement has been signed by Canadian Vickers, Limited, and those of its employees who were involved in the aforementioned dispute.

A strike occurred on November 11 of certain employees of Direct-Winters Transport, on whose behalf an application for a Board of Conciliation and Investigation had been received on the 5th of that month (LABOUR GAZETTE, November, 1940, p. 1107). These employees desired to secure an agreement with the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America, providing for higher wages and better working conditions. The application covered also a dispute with the Toronto St. Catharines Transport, Limited, and its employees, but a direct settlement had been

made with that company within a few days of its receipt. A statement concerning the strike of employees of Direct-Winters Transport, appears in the article commencing on page 1246. The dispute was settled towards the end of November following a meeting of the strikers' committee with the management, which had been arranged by the Department of Labour.

The application for a Board received at the close of July from employees of the Chromium Mining and Smelting Corporation, Ltd. (LABOUR GAZETTE, August, 1940, p. 762), was withdrawn early in December, an adjustment of the matters in dispute having been reached between the parties concerned as a result of mediation by an officer of the Department of Labour.

A settlement was also reached through the good offices of a departmental mediator in the case of differences between the Robson Leather Company, Ltd., and its factory employees, members of Local 205, International Fur and Leather Workers' Union of the United States and Canada. An application for the establishment of a Board of Conciliation and Investigation had been received from the employees during October (LABOUR GAZETTE, November, 1940, p. 1107).

Correction

The report of the Board of Conciliation concerning the dispute between the Canadian Pacific Railway Company and the Canadian National Railways and their freight handlers on the Montreal Wharf as given in the November issue of the LABOUR GAZETTE (page 1118, paragraph 26) contained an error in the rate for junior checkers. In regard to this category of employees, the rate in the Board report was 50 cents per hour. This should have been 57 cents per hour.

Report of Board in Dispute between Howard Smith Paper Mills, Limited, and Employees in Its Beauharnois Division

A unanimous report was received by the Minister of Labour on November 22 from the Board of Conciliation and Investigation established to deal with differences between the Howard Smith Paper Mills, Limited, and the employees of its Beauharnois Division, members of Local Union 225, International Brotherhood of Paper Makers.

Members of the board were Honourable Paul Mercier, Chief Justice of the Circuit Court of the District of Montreal, chairman, appointed by the Minister in the absence of a joint recommendation of the other two members, Mr. Paul E. Dufresne, Montreal, nominated by the employer, and Mr. John A. McClelland, Valois, P.Q., nominated by the employees.

The report of the board was accompanied by a memorandum setting forth the terms of a settlement reached by the parties to the dispute and concurred in by the board. The memorandum is signed on behalf of the employer by Mr. Harry S. Spencer, Manager of the Beauharnois Mill, and on behalf of the employees by Mr. J. Arthur D'Aoust, Vice-President of the International Brotherhood of Paper Makers, and Mr. F. Verth, President of Local Union 225 of the Brotherhood.

The settlement provides for the signing of an agreement by the Company and the Union along the lines of the Cornwall Mill agreement (LABOUR GAZETTE, November, 1940, pages 1198-9, April, 1939, page 432, and November, 1938, page 1295), with the following stipulations:—

(1) that the agreement run for at least a year;
(2) that it be written into the agreement that the Union recognize the fact that the Beauharnois Mill is in a different economic field from other mills;
(3) that the Union accept wage increases amounting to not less than two cents per hour for every employee and bringing the minimum base rate for men up to forty-two cents per hour and for girls up to twenty-two cents per hour; and
(4) that holidays with pay be given during the Company's standard holiday season to those persons on hourly rates who have had eighteen months or more of continuous service previous to the beginning of their vacation.

In addition to the aforementioned wage increases, the Company undertakes "to examine into the special cases of jobs that have been presented to us out of court" and states that it "is agreeable to spending an additional thousand dollars per year approximately for raising rates on these jobs where we feel raises are justified." The Company also states its intention to continue its efforts to improve the working conditions of its employees, such as the provision of better ventilation and cleaner places for keeping clothes.

Report of Board in Dispute between McKinnon Industries, Limited, and Employees in Its Heat Treat Department

A unanimous report has been received from the Board of Conciliation and Investigation established to deal with a dispute between McKinnon Industries, Limited, St. Catharines, Ont., and its employees in the Heat Treat Department (continuous furnace operations), members of Local Union No. 199, United Automobile Workers of America. The dispute concerned overtime pay rates.

Members of the board were His Honour Judge C. A. Cameron, Belleville, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Mr. L. B. Spencer, K.C., Welland, Ont., nominated by the employer, and Mr. J. J. Bench, St. Catharines, nominated by the employees.

The report states that as a result of the efforts of the board towards reaching an amicable settlement of the matter, the parties to the dispute have executed an agreement which will continue in effect, so far as the matters in dispute are concerned, for the duration of the war.

Supplementary Report of Board in Dispute between Trenton Steel Works, Limited, and Its Employees

The Board of Conciliation and Investigation established to deal with differences between the Trenton Steel Works, Limited, Trenton, N.S., and its employees, members of Local 1231, Steel Workers' Organizing Committee, made its report in August (LABOUR GAZETTE, September, 1940, pages 898-907). Members of the board were Professor Norman A. M. MacKenzie, University of Toronto, chairman, appointed on the joint recommendation of the other two members, Mr. Russell McInnes, Halifax, nominated by the employer, and Mr. Drummond Wren, Toronto, nominated by the employees.

Early in October the Minister of Labour instructed the board to reconvene in order that it might consider the employees' request for an interpretation of the following clauses of the board's report:—

(1) "After careful consideration of the financial position of the Company and its prospects, and having in mind the offer made by the Company to its Employees in March last, the majority of the Board recommends that the offer of the Company as made on that date be accepted."

(2) "The Board further recommends that a minimum daily rate for all employees who do not benefit by bonus, check rates, tonnage or otherwise, and excluding apprentices, boys and women, be fixed at $3.20 for a full shift."

The supplementary report of the board, made by the chairman and Mr. Wren, was received early in November. It recommends that the wage increase offered by the company on March 11, 1940, be made effective as from that date. Mr. McInnes dissented on this point, contending that the offer had been made by the company on the understanding that the employees would work six days a week, which the employees had not done until July, 1940; in addition, he is of the opinion that the board was without authority to recommend retroactive payment.

With respect to the recommendation regarding a minimum daily rate, all members of the board agree that the recommendation does not apply to employees who derive benefit from bonus, check rates, tonnage or otherwise.

Supplementary Report of Board in Dispute between Algoma Steel Corporation, Limited, and Its Steel Workers

The Board of Conciliation and Investigation in the dispute between the Algoma Steel Corporation, Limited, and its steel workers, which reconvened pursuant to instructions issued by the Minister of Labour (LABOUR GAZETTE, November, 1940, p. 1108), has submitted its report. The employees concerned are members of the Algoma Steel Workers' Union (Local Union No. 2251, Steel Workers' Organizing Committee).

The report of the board is signed by all three members, namely, His Honour Judge A. H. Dowler, Port Arthur, Ont., chairman, Mr. L. B. Spencer, K.C., Welland, Ont., nominated by the employer, and Mr. J. L. Cohen, K.C., Toronto, Ont., nominated by the employees.

Accompanying the report is a memorandum of agreement reached by the parties to the dispute and concurred in by the board.

The text of the board's report and the memorandum of agreement are given below.

Supplementary Report

To: The Hon. Norman A. McLarty, K.C.,
Minister of Labour,
Ottawa, Canada.

In the matter of The Industrial Disputes Investigation Act, and re *differences*

between the Algoma Steel Corporation, Limited, and its employees being members of the Algoma Steel Workers' Union (Local Union No. 2251, Steel Workers' Organizing Committee).

Sir:

Pursuant to instructions in your letters of October 9th and November 8th last respectively, the Board of Conciliation and Investigation herein, composed of His Honour Judge Dowler, L. B. Spencer, K.C., and J. L. Cohen, K.C. (appointed in the place of Charles Beattie, resigned), reconvened at Toronto, Ontario, on November 25, 1940, to consider and break down the items in the Company's financial statement known as (*a*) Production Costs and (*b*) Depreciation Allowance, and to permit both parties to the dispute to make such further representations as they desired.

The Board met at Toronto on November 25th, and continued its sittings on the 26th, 27th and 28th of November, and at the request of the parties adjourned until December 2nd. The Board continued its sittings on December 2nd, 3rd, 4th and 5th at Toronto.

The Board received the Auditors report, briefs presented by both parties, and heard further representations by both parties.

The Board endeavoured to have the parties themselves, by conference and discussion, agree upon a settlement of their differences, and are pleased to report that due to their mutual co-operative efforts they arrived at an agreement. In approving of this agreement the Board should state that it has been advised by the Company that its agreement to pay further increases is not premised on any further ability of the Company to pay than prevailed in July last when the Board last met, but that the agreement reached is based upon other considerations including those which arise out of the present national stress, and the advantages of mutual understanding and goodwill between the Company and the employees.

The Board, as to the Chairman and Mr. L. B. Spencer, are still of the opinion expressed in the July report of the Board as to the Company's financial position. Mr. J. L. Cohen, who has only participated in the reconvened sessions of the Board, feels it necessary for this reason to reserve and refrain from any expression of opinion on the question of ability to pay.

All members of the Board concur and approve of the arrangement concluded in the signed memorandum attached to this report, to be followed by a formal agreement between the parties themselves.

Respectfully submitted,

(Sgd.) A. H. DOWLER,
Chairman.

(Sgd.) LYNN B. SPENCER,
Member.

(Sgd.) J. L. COHEN,
Member.

Toronto, Ontario,
December 5, 1940.

MEMORANDUM OF AGREEMENT

Made between Algoma Steel Corporation, Limited, and Local Union No. 2251, Steel Workers Organizing Committee of Sault St. Marie, Ontario.

1. This Agreement is to be in effect from December 1, 1940, to November 30, 1941, and from year to year thereafter, subject to cancellation or change upon notification by either party not later than thirty (30) days prior to expiration date.

2. All wage rates in effect at the Sault Ste. Marie plant of the Algoma Steel Corporation, Limited, on November 30, 1940, are to be increased two cents per hour, excepting the wage rates paid to machinists, standard railway locomotive engineers, firemen, conductors and brakemen.

3. It is agreed between the parties that if by June 1, 1941, or at the end of any six months' period thereafter, the cost of living advances by 5 per cent or any multiple thereof over November 30, 1940, the wages on June 1, 1941, or at the end of any such six months, shall be increased by the amount by which the cost of living shall have increased over the cost of living on November 30, 1940. For the purpose of arriving at any such increase in the cost of living the "cost of living index" of the Dominion Bureau of Statistics, published by the Dominion Department of Labour, shall be used, taking as the base figure the "total index" number as at November 30, 1940.

4. In the event that the war ceases during the term of this Agreement, the Company shall have the right, upon giving the Union thirty (30) days' notice in writing, to enter into negotiations with the Union for a revision of wage rates paid under this Agreement.

This Agreement shall be binding upon the parties hereto and their successors and assigns.

Dated at Toronto, December 5, 1940.

ALGOMA STEEL CORPORATION, LIMITED,
(Sgd.) T. F. RAHILLY,
Managing-Director.

WITNESS: (Sgd.) R. BARBER.

LOCAL UNION NO. 2251, STEEL WORKERS' ORGANIZING COMMITTEE,
(Sgd.) IVAN J. CAMPBELL,
(Sgd.) WM. A. ROSS,
(Sgd.) E. DALRYMPLE,

WITNESS: (Sgd.) C. H. MILLARD.

SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

THE tables presented below summarize proceedings under the Industrial Disputes Investigation Act for the fiscal year ending March 31, 1940, and from March 22, 1907, to March 31, 1940.

The proceedings under the Act during the fiscal year 1930-40 include two cases in which proceedings had taken place during the preceding year. On March 31, 1940, results were still pending in connection with ten applications.

I. TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1939, TO MARCH 31, 1940

Industries affected	Number of applications for boards	Number of boards established	Number of strikes not averted or ended
I. Disputes affecting mines, transportation and communication, other public utilities and war work:—

JOINT BOARD OF ADJUSTMENT ESTABLISHED FOR NOVA SCOTIA MINING INDUSTRY

New Grievance Procedure Adopted at Halifax Conference of Dominion and Provincial Government Officials and Representatives of the Union and Coal Operators

ESTABLISHMENT of a Joint Board of Adjustment to deal with grievances arising out of employment contracts in District 26, United Mine Workers of America, was announced on December 12 following a conference at Halifax between officials of the Dominion Department of Labour and the Nova Scotia Department of Labour and representatives of the union and the major coal operators of the area. This conference was the culmination of recent efforts to remove the causes of the friction which have resulted in frequent interruptions of production.

The problems of absenteeism and unauthorized pithead strikes, together with the inadequacy of existing grievance machinery, have been the subject of comment by recent Boards of Conciliation and Investigation which have dealt with disputes in this coal mining region. With the increased coal requirements attendant upon wartime industrial activity, these problems have become intensified in recent months.

Among those present at the Halifax conference were the following:—

Hon. L. D. Currie, Minister of Mines and Labour, Nova Scotia, chairman;
Dr. Bryce M. Stewart, Deputy Minister, Dominion Department of Labour;
M. S. Campbell, Chief Conciliation Officer, Dominion Department of Labour;
J. McGregor Stewart, Dominion Coal Administrator;
F. G. Neate, Technical Adviser to the Dominion Coal Administrator;
T. J. Casey, Inspector of Mines, Nova Scotia;
T. L. Kennedy, International Secretary-Treasurer, United Mine Workers of America, Washington, D.C.;
D. W. Morrison, President, District 26, U.M.W.A.;
Silby Barrett, International Board Member, District 26, U.M.W.A.;
P. G. Muise, Vice-President, District 26, U.M.W.A.;
A. A. Mckay, Secretary-Treasurer, District 26, U.M.W.A.;
Wm. Carey, D. C. McLeod, T. M. McColl, John Morrison, Dominic Nearing and Howard Tattrie, all of District 26, U.M.W.A.;
Arthur Cross, President, Dominion Steel and Coal Corporation;
H. J. Kelly, Vice-President, Dominion Steel and Coal Corporation;
J. C. Nicholson, General Superintendent, Dominion Steel and Coal Corporation;
Michael Dwyer, President, Nova Scotia Steel and Coal Company;
E. B. Paul, Superintendent, Cumberland Railway and Coal Company.

Text of Official Statement

The following is the text of the official statement issued at the conclusion of the conference:—

T. L. Kennedy, International Secretary of the United Mine Workers of America declared that it had been the traditional policy of the Union to secure strict performance of its contractual obligations, and that he was proud of the Union's record on this point. He assured those present that the International Union and the Board of District No. 26 would assume full responsibility for the strict observance by the men under present nad future contracts with the Company, and in particular would take all such steps as might be necessary to prevent strikes and stoppages of work in violations of the agreement.

These assurances were particularly gratifying to the representatives of the Government. They mean that, for the future, markets supplied this year by imported coal will be supplied by Canadian coal to the extent of some 400,000 tons, and foreign exchange saved for use in purchasing necessary war equipment.

The representatives of the Union and the Company agreed upon a new procedure for the settlement of grievances arising out of the employment contract. By this procedure it is hoped that grievances will be disposed of much more speedily. A joint Board of Adjustment is to be appointed whose decision is to be final and binding upon all parties. The new clause reads as follows:

"The conference recommends that the first four steps of the method of settling any question of disputes under Clause Four of the agreement shall remain unchanged except that a time limit of 30 days shall be established for the disposition of all cases through the four stages.

"The conference further recommends that there shall be established a joint Board of Adjustment, one of whom shall be appointed by the company from the management of one of the companies operating in District 26, United Mine Workers of America, and a representative appointed by and from the District Executive Board of U.M.W.A. District 26 and a chairman selected by the two aforesaid members.

"If the two representatives of management and the Union fail to agree upon a chairman, the chairman shall be named by the Minister of Labour of Canada.

"The chairman and members of the Board shall serve for the term of the agreement. The Board shall render its decision in any case within 15 days after its submission to the

Board. If the majority of the Board agrees, their decision shall be final. In case of disagreement the decision of the chairman shall be the decision of the Board and shall be equally final and binding on the respective parties. No suspension of work shall take place by lockout or strike pending the adjudication of any matter taken up for adjustment.

"The representatives of both the men and the operators agreed to co-operate loyally in order to make the procedure effective."

It was also agreed that the McTague Conciliation Board, consisting of Mr. Justice McTague, Ralph B. Bell and Prof. Frank Scott, should act as a tribunal to settle the terms of a new contract should operators and men fail to reach an agreement on or before January 15, 1941.

The appointment of such a tribunal was recommended by the award of the McTague Board in the spring of this year (LABOUR GAZETTE, April, 1940, pp. 321-3), and it is considered to be a fine tribute to the Board that both parties should agree upon the same personnel to settle the terms of the new contract.

It was the view of all the parties, and it was so agreed, that the McTague Board should be requested to assist the parties in drawing up new contracts not only for the Dominion Coal Company, but also for the Old Sydney collieries and Acadia Coal Company.

Consideration was also given to a number of other matters, including the machine shop at Glace Bay, longwall rates and the Intercolonial Pier.

Throughout the conference, which lasted until midnight, there was apparent a spirit of co-operation and mutual goodwill, which forms the basis of a real hope for the development of improved industrial relations in the coal fields of the Maritimes.

CANADIAN RAILWAY BOARD OF ADJUSTMENT NO. 1

Summary of Recent Decisions

REPORTS have been received of two cases heard recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the LABOUR GAZETTE, October, 1940, page 1019, and in previous issues, and the seventh report of the proceedings of the Board covering the period from October 1, 1936, to September 30, 1939, was recently issued as Bulletin No. 14 in the Industrial Relations Series published by the Department of Labour.

The Board was established under a voluntary agreement concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war of 1914-18. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No 489—Canadian National Railways (Western Region) and the Order of Railway Conductors.—This case, which was first heard at Montreal on December 14, 1939, and again on November 14, 1940, dealt with a controversy regarding the application of provisions of the trainmen's mileage limitation agreement covering yardmen to the earnings of the conductor employed in Biggar yard as yard foreman.

In a joint statement it was explained that Biggar yard is an open yard, there being no regular assigned yardmen. Positions of yard foremen and helpers are filled by a road conductor and road brakemen holding seniority rights on the Alberta District. Under an agreement with the Conductors' and Trainmen's Joint General Committee, Biggar yard positions are bulletined semi-annually (March 1 and September 1), foreman's position preference to G.T.P. protected conductors, and helpers' positions preference to G.T.P. protected brakemen. Successful applicants hold positions for the full period of six months, regardless of reduction in road crews.

Subsequent to the inauguration of a Trainmen's Mileage Limitation Agreement during 1939, the earnings of the conductors assigned to work as yard foremen in Biggar yard have been restricted by the application of the provisions of the Brotherhood of Railroad Trainmen's Mileage Limitation Agreement covering yardmen.

The Railways contended that any agreement or understanding regarding the manning of yard crews or seniority rights of conductors or trainmen to positions of yard foremen or yard helpers cannot interfere with the application of the agreement or supplementary agreements covering rates and conditions for yardmen to the men actually working as yard foremen or yard helpers.

The employees held that there is no yardmen's roster covering Biggar yard, and that

the foreman's position is a protected conductor's position and filled by a conductor from the road conductors' roster in accordance with a joint agreement arrived at with the Brotherhood of Railroad Trainmen in 1929, and that the Railway Company was not within their rights in applying the Trainmen's Mileage Limitation Agreement to the conductor filling this position, thereby restricting his earnings. The Order of Railway Conductors held that the contract covered conductors employed on the property, and, regardless of the affiliations of the individual conductor, he would be governed by the Conductors' agreements in filling a conductor's position in any class of service.

Representatives of the parties to the dispute appeared before the Board and presented further oral evidence. Statements were made that the conditions with respect to the application of mileage limitations to men employed in yard work either in open or closed yards now in effect had been generally in effect since the year 1931. It was noted by the Board that an agreement covering the application of mileage limitations to open yards was agreed upon in July, 1931 by representatives of the organizations interested and the Railways on the Eastern lines and the Board did not feel that evidence submitted warranted a decision which would effect a change from a practice which in this case had been followed since 1931. The claim of the employees was therefore not sustained.

Case No. 490—Canadian National Railways (Atlantic Region) and the Brotherhood of Maintenance-of-Way Employees.—This dispute involved the claim of employees for sectionmen's rate of pay for laid off sectionmen who took work on an extra gang. During 1938 a number of men for class "B" sectionmen not working as such, were employed in an extra gang on the St. Quentin Subdivision of the Campbellton Division and were paid 25 cents per hour. The employees claimed payment at sectionmen's minimum rate of 38 cents per hour for the time it is claimed this gang performed section maintenance work.

The employees contended that class "B" sectionmen working on an extra gang doing the same class of work that had previously been done by section gangs should be paid at 38 cents per hour as provided in Wage Agreement No. 9, covering Maintenance of Way employees.

The company maintained that, as the regular maintenance work was performed by regular section crews the fact that an extra gang set up to do special work performed a small percentage of maintenance work does not entitle laid off sectionmen to sectionmen's rate of pay when the extra gang in which they were employed could not be properly classified as a special maintenance gang. The company requested that the claim of the employees be denied.

The Board's decision sustained the employees' claim "subject to a re-check by representatives of the Railways and the employees of the classes of work performed on the dates for which the claim is submitted."

Manufacture of New Models Involving Use of Machine Tools Prohibited

An order in council announced on November 21 by the Department of Munitions and Supply prohibits, except under licence, the manufacture of new models of any type of appliance or equipment which, directly or indirectly, involve in their manufacturing processes the use of any machine tools, dies, jigs, gauges, moulds, patterns, or templates. The order was passed upon the recommendation of the Machine Tool Controller in order to augment the supply of tools essential to the war effort, and at the same time to provide sufficient skilled and trained men for the rapidly expanding war industries of the Dominion.

The "new model" order covers vehicles, railway rolling stock, bicycles, refrigerators, cooking and heating equipment, sewing and washing machines, radio sets, vacuum cleaners, humidifiers, typewriters, glass and other containers, and virtually all appliances and equipment in use in the Dominion. Existing models in current use in Canada will thus be "frozen". No changes will be permitted except for good and sufficient reason and then only under permit from the Machine Tool Controller who may authorize minor changes or betterments in existing designs which do not involve too great a use of machine tools or skilled labour.

Commenting on the steps which have been taken, Hon. C. D. Howe, Minister of Munitions and Supply, said: "The capacity of Canada to produce machine tools, jigs, and dies for war purposes will thus immediately be expanded tremendously. Without the machine tools which this measure will provide, our war effort would be retarded. We are thus avoiding, also, that economic wastage of machines and men which mere whims, fads, and fancies of fashion often produce.

"We have in Canadian industry", continued Mr. Howe, "a large number of skilled artisans and highly-trained men whose entire energies have been devoted to the development of improvements in the appearance and the structural design of a wide variety of products. We propose to divert this ingenuity and high degree of mechanical and other skills to the more important end of winning the war."

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1940

THE following table shows the number of disputes, workers involved and time loss for November, 1940, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time lost in man working days
*Nov. 1940	16	3,646	15,964
*Oct. 1940	25	7,609	19,830
Nov. 1939	14	4,863	36,351

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Substantial decreases appear in the number of disputes as well as in the number of workers involved and in time loss for November as compared with the figures for October. Strikes of coal miners in Nova Scotia accounted for over one-half of the workers involved and the time loss incurred. There was also considerable time loss due to two strikes of highway truck drivers in Ontario. In October most of the time loss was due to strikes of coal miners in Nova Scotia, shipyard workers at Collingwood, Ont., and Montreal, P.Q., of coal miners in New Brunswick and Alberta, and of gold miners in Quebec. In November, 1939, the important disputes involved fish handlers at Lockeport, N.S., coal miners at Estevan, Sask., and at Springhill, N.S., gold miners at Pioneer Mines, B.C., men's clothing factory workers at Montreal, P.Q., and knitting factory workers at St. Jerome, P.Q.

Six disputes, involving 1,407 employees, were carried over from October, and ten disputes commenced during November. Of these sixteen disputes, fifteen were terminated during the month. Four resulted in favour of the employers and six in favour of the workers involved. Compromise settlements were reached in three cases and the results of two disputes were recorded as indefinite. At the end of the month, therefore, there was one strike or lockout recorded as in progress, namely: truck drivers, transport company, Toronto, etc., Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not yet declared terminated. Such disputes are listed in this paragraph for a period up to one year after their removal from the table of current strikes. Information is available as to four disputes of this nature, namely: hotel chambermaids, Montreal, P.Q., one employer, July 19, 1940, to September 15, 1940; taxicab drivers, Toronto, Ont., one employer, September 23, 1940, to November 30, 1940; packing plant employees, Toronto, Ont., one employer, September 24, 1940, to November 30, 1940; and dairy employees, Toronto, Ont., one employer, October 8, 1940, to November 30, 1940; the last three being added to the list this month.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employee being involved.

Correction.—A one day strike of workers in an automobile parts factory at Oshawa, Ont., was reported in the LABOUR GAZETTE for November, 1940, p. 1143, as having occurred on October 15. Information was received later that the strike occurred on September 14, the agreement in settlement being signed on October 15.

In connection with the strike of coal miners at Westville, N.S., from October 19 to October 28, 1940, information was received as to a number of brief strikes earlier in the year which had not been reported to the Department and, therefore, were not included in the record in the LABOUR GAZETTE. A one day strike occurred on April 2 in support of one worker who stayed off one day owing to a temporary change in duties. On August 9 a one day strike occurred in protest against an alleged delay in conveying the men out of the mine. Twice in August stoppages for a short time in minor disputes occurred. In each case about 500 miners were understood to be involved and work was resumed without any changes.

A strike of employees in a knitting factory at Dunnville, Ont., from July 25 to July 28 was not reported to the Department until the occasion of a strike in October. The workers protested against a new wage incentive plan. As a result of conciliation by the Ontario Department of Labour it was arranged that the management would meet with a committee of the employees to deal with any grievances,

there being provision for the assistance of a representative of the Ontario Department of Labour.

A cessation of work by herring fishermen near New Westminster, B.C., for a few days about October 18, was reported to have been called in order to complete negotiations for a new agreement. This had been provided for in the expiring agreement. A stoppage of work in a cannery by three girls was reported to be in protest against the canning of fish brought in during the above stoppage by non-union fishermen.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to November

COAL MINERS, GLACE BAY, ETC., N.S.—A number of employees of alien enemy origin had been stopped from working since June as a result of objections by the other miners, pending investigation by the authorities. In August at the district union convention a resolution was adopted providing that all who had been approved by the authorities should be re-employed. Some of these reported for work but the miners objected to this and three mines were idle for short periods, the men objected to finally withdrawing.

At Glace Bay one mine was idle from October 30 to November 6.

At Reserve the mine was idle on October 31, and November 1 was a holiday, operations being resumed on Monday, November 4.

At Glace Bay another mine was idle on November 5.

KNITTING FACTORY WORKERS, DUNNVILLE, ONT.—A number of employees, 128 out of 375, ceased work on October 30 against the discharge of a number of cutters, alleged to be for union acivity, and to secure a ten per cent increase in wages and an agreement with the Canadian Full Fashioned Hosiery Workers' Association. Those discharged were members of a shop committee. As a result of conciliation by the federal Department of Labour work was resumed on November 3, the discharged employees to be taken back as required without discrimination, the employer to deal with a committee of employees under the supervision of the Ontario Department of Labour. A strike in July had occurred and is referred to elsewhere in this article.

COAL MINERS, NEW WATERFORD, N.S.—A number of coal miners in one colliery, approximately 27, ceased work on November 19 owing to a dispute as to payment of wages for delayed work and waiting time due to a breakdown. Some of the other employees ceased work in sympathy and others were unable to work because of the stoppage so that the colliery was idle. On November 22 at a union meeting it was decided to resume work pending investigation by a provincial mine inspector but enough men to operate the colliery did not report until Monday, November 25.

SILK FACTORY WORKERS (WEAVERS, ETC.), TORONTO, ONT.—Employees in one silk factory, weavers, etc., ceased work on November 1 to secure a closed shop union agreement with the Canadian Textile Workers' Union, Local 17 of the Canadian Full Fashioned Hosiery Workers' Association, with increases in wages, and a reduction in hours from 55 per week to 48. Work was resumed next day, the demands of the workers having been conceded.

CHEMICAL PLANT WORKERS, WINDSOR, ONT.—A number of employees, girls engaged in packaging goods, in a chemical plant producing proprietary toilet goods and medicines, ceased work at noon on November 4 to secure an increase in wages and seniority rights. It was agreed that a committee of employees would be set up to deal with the management, seniority rights were granted and wages were increased from 20-32½ cents per hour to 30-42½ cents. Work was resumed on the next day at noon.

AUTOMOBILE FACTORY WORKERS, WINDSOR, ONT.—A number of workers in one section of one plant ceased work on November 8 against the transfer of a worker to their section, claiming that one of themselves should have been promoted. Later a number of workers in other parts of the plant ceased work in support of those already on strike. The employer reported that the man was transferred because of his particular qualifications for certain new work. All were replaced by men from other sections. The establishment was picketed and a number of the members of the picket were arrested on charges of loitering, after a warning, in the vicinity of an establishment declared to be an essential service under the Defence of Canada Regulations. These were released on bail pending trial and on November 17 a number were fined $20 and costs. It was stated that appeals would be made. On November 20 the union to which the strikers belonged, the United Automobile Workers of America, telegraphed the Minister of Labour requesting the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The Minister replied that without a formal application giving the facts it could not be determined whether the Board could be established under the Act. At the end of the month employment conditions appeared to be no longer affected.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1940*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to November, 1940				
MINING, ETC.—				
Coal miners, Glace Bay, N.S.	1	900	4,500	Commenced Oct. 30, 1940; against employment of miners of alien enemy origin; terminated Nov. 6; return of workers; in favour of workers.
Coal miners, Reserve, N.S.	1	250	(a)	Commenced Oct. 31, 1940; against employment of miners of alien enemy origin; terminated Nov. 1; return of workers; in favour of workers.
MANUFACTURING				
Textiles, Clothing, etc.—				
Knitting factory workers, Dunnville, Ont.	1	128	256	Commenced Oct. 30, 1940; against discharge of certain employees and to secure increase in wages and union agreement; terminated Nov. 2; conciliation (federal); compromise.
TRANSPORTATION—				
Local—				
Taxicab drivers, Toronto, Ont.	1	3	30	Commenced Sept. 23; for union agreement, increased wages and reduced hours; employment conditions no longer affected by Nov. 30; replacement; in favour of employer.
TRADE—				
Poultry buyers (packing plant), Toronto, Ont.	1	36	400	Commenced Sept. 24; *re* union dues and against recognition of another union; employment conditions no longer affected by Nov. 30; replacement; in favour of employer.
Dairy employees, Toronto, Ont.	1	90	1,000	Commenced Oct. 8, 1940; for union agreement with increased wages, reduced hours and changes in working conditions; employment conditions no longer affected by Nov. 30; replacement; in favour of employer.
(b) Strikes and Lockouts commencing during November, 1940				
MINING, ETC.—				
Coal miners, Glace Bay, N.S.	1	550	550	Commenced Nov. 5; against employment of miners of alien enemy origin; terminated Nov. 6; return of workers; in favour of workers.
Coal miners, New Waterford, N.S.	1	900	4,500	Commenced Nov. 19; dispute as to wage payment following accident; terminated Nov. 23; return of workers pending investigation; indefinite.
MANUFACTURING—				
Textiles, Clothing, etc.—				
Silk factory workers, (weavers), Toronto, Ont.	1	40	40	Commenced Nov. 1; for union agreement, increased wages and reduced hours; terminated Nov. 1; negotiations; in favour of workers.
Metal Products—				
Boilermakers (marine), Montreal, P.Q.	1	176	440	Commenced Nov. 7; for increased wages, etc.; terminated Nov. 9; negotiations; compromise.
Automobile factory workers, Windsor, Ont.	1	60	60	Commenced Nov. 8; dispute as to seniority rights in transfer of worker; employment conditions no longer affected by Nov. 9; replacement; in favour of employer.
Non-metallic Minerals, Chemicals, etc.—				
Chemical plant workers, Windsor, Ont.	1	70	70	Commenced Nov. 4; for increased wages and seniority rights; terminated Nov. 5; negotiations; in favour of workers.
CONSTRUCTION—				
Shipbuilding—				
Shipyard workers, Kingston, Ont.	1	200	600	Commenced Nov. 28; for increased wages; terminated Nov. 30; referred to I.D.I. Board; indefinite.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1940*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during November, 1940—*Concluded*				
TRANSPORTATION—				
Local and Highway—				
Truck drivers, etc. (highway transport), Toronto, etc., Ont.	1	125	2,000	Commenced Nov. 11; against closed shop agreement with another union and for increased wages and reduced hours; unterminated.
Truck drivers, etc. (highway transport), Toronto, etc., Ont.	1	100	1,500	Commenced Nov. 11; for union agreement, wage increase and reduced hours; terminated Nov. 30; conciliation, federal; compromise.
TRADE—				
Dairy employees (drivers), London, Ont.	1	18	18	Commenced Nov. 14; for increased wages and against losses in collections; terminated Nov. 14; negotiations; in favour of workers.

* In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.
(a) Holiday.

BOILER MAKERS (MARINE), MONTREAL, P.Q.—Employees in one establishment ceased work on November 7 to secure increased wages and an agreement with the International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America. The dispute had been referred to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, and the report of the Board and a minority report by the member nominated by the employer were outlined in the LABOUR GAZETTE for October, 1940, pp. 1007-1009. The employer and the union representatives agreed upon all the clauses of an agreement except the wage scale and the majority of the Board recommended certain increases which the other member recommended against. Negotiations between the parties were carried on and on November 6 conciliation officers of the Department of Labour met with the management and a committee of employees to effect a settlement. The terms arranged were rejected at a union meeting and the strike occurred on the next morning. As a result of further negotiations the compromise previously arranged was accepted and an agreement was signed. This is outlined elsewhere in this issue. Work was resumed on November 11.

SHIPYARD WORKERS, KINGSTON, ONT.—A number of employees, boilermakers, welders, etc., ceased work on November 28 to secure an increase in wages. They were joined by a number of electricians, plumbers and carpenters. The boilermakers' union had applied for a Board of Conciliation on September 3 but it had been agreed that proceedings would be postponed with the expectation of reaching a settlement along with that of a similar dispute at Collingwood already referred to a Board. Following the settlement of the dispute at Collingwood on October 26 (LABOUR GAZETTE, November, 1940, p. 1143) terms of settlement were negotiated with the management of the plant at Kingston but these were not accepted by the employees, who decided to cease work until an inquiry by a Board was commenced. The Board was established on November 27 and a conciliation officer met the workers at Kingston with assurances that the Board would be completed and proceed promptly with the inquiry but that if a strike occurred proceedings would not be carried further until work was resumed, a strike under the circumstances being contrary to the Act. A ship which had been launched was taken elsewhere to be finished before the close of navigation. On December 2 work was resumed pending reference of the dispute to the Board, the wages of the other classes to be dealt with as well as those of the boilermakers.

TRUCK DRIVERS (HIGHWAY), TORONTO, ETC., ONT.—A number of the employees of one highway trucking company (Martin Transports Limited) operating between Toronto and points throughout Ontario east and west ceased work on November 11 to secure an agreement with the international union of truck drivers, etc., providing for increases in wages, reduced hours and improvements in working conditions and against being compelled to join another union with which the

employer had a closed shop agreement. An application for a Board of Conciliation had been made on October 18, it being claimed that the other union did not represent a majority of the workers. The Department made inquiries as to whether the application for a Board was supported by a majority of the workers but before this had been completed the strike occurred. To some extent the strikers were replaced and a number of men were arrested on charges in connection with interference with drivers, being released on bail. Toward the end of November at the request of the international union, conciliation officers of the Department discussed the possibility of a settlement with the management and a conference was arranged. The management insisted that those returning to work should apply for membership in the union with which there was an agreement. At the end of the month the dispute was unterminated. From time to time a number of those on strike had resumed work and early in December it was reported that operations were nearly normal.

TRUCK DRIVERS (HIGHWAY), TORONTO, ONT., ETC.—A number of employees of one highway company (Direct-Winters Transport Company) ceased work on November 11 to secure an agreement with the international union of teamsters, truck drivers, etc., providing for increases in wages, reduced hours, etc. An application for a Board of Conciliation had been made on November 4 on behalf of employees of this firm and of another company. The dispute with the latter employer was settled in a few days and it was reported that Direct-Winters Transport Company had an agreement with a different union. Before the proceedings for the establishment of a Board had been completed as required under the Act, a strike occurred involving the employees of still another company as outlined in the paragraph above (Martin Transports Limited). Some employees of Direct-Winters Transport ceased work also, apparently to some extent in sympathy. As in the other stoppage, some of the strikers were replaced and there were a number of arrests in connection with interference with drivers. A meeting of the strikers' committee with the management was arranged by the Department of Labour toward the end of November and a settlement was reached. The union agreed to call off the strike, the company to take back all on strike without discrimination as business permitted and to discuss any differences. Work was resumed on December 1.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month bringing down to date that given in March, 1940, issue, in the review of Strikes and Lockouts in Canada and Other Countries, 1939. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain

The *British Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, page 760.

The number of disputes which began during September was 83 and 2 were unterminated at the end of August, making a total of 85 disputes in progress during September. The number of workers involved was 20,900 and the resultant time loss 52,000 man working days.

Of the 83 disputes which began during September, 13 arose out of demands for increased wages and 22 were over other wage questions; one over a question as to working hours; 26 were over questions regarding the employment of particular classes or persons; 19 arose out of questions respecting working conditions; one on questions of trade union principle; and one was a sympathetic strike. During September final settlements were reached in the case of 61 disputes, of which 10 were settled in favour of workers, 34 in favour of employers and 17 resulted in compromise settlements. In 14 other disputes work was resumed pending negotiations.

United States

Preliminary estimates for August which as the Bureau of Labour Statistics points out are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 225 strikes as having begun during August, which with 115 unterminated at the end of July made a total of 340 in progress during the month. The number of workers involved in these disputes was approximately 73,000 with a resultant time loss of 615,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final show that there were 296 strikes in progress involving about 66,000 workers with a resultant time loss of about 485,000 man working days.

A two day strike of 4,300 employees of a steel plant at Midland, Pennsylvania, was called off November 15, pending joint conferences over the demand for increased wages and other concessions.

A compromise settlement on November 30 ended a week's strike of 7,500 employees of an aluminium plant at New Kensington, Pennsylvania, who had demanded the discharge of one worker.

A strike of 3,700 employees of an aircraft factory at Downey, California, began November 15 and no report of a settlement has been noted. An agreement over the increased wages question was reached by compromise but other provisions relating to the prevention of further strikes had not been settled.

After two months, a strike of crews of steam vessels on the Pacific Coast which had seriously affected the lumber trade ended December 5.

Published under the auspices of the Canadian Association for Adult Education, *Vocational Guidance* is the title of a booklet by E. K. Ford. In the introduction it is pointed out that vocational guidance has become a topic of serious interest to adults who realize the problem of job selection which faces youth to-day. It is suggested that organized group study offers a logical approach and outlines given are intended for the use of adult study clubs. Chapter I of the book suggests methods for the organization and conduct of study clubs and was prepared by Professor B. A. Fletcher, formerly of the Dalhousie University staff. Chapters II and III open up the vocational guidance field and show its relation to the public school program. Chapters IV, V and VI give a general resumé of the main features of a vocational guidance program, while Chapter VII deals with method. Chapters VIII, IX, X and XI are designed to assist in the planning of a definite local program and Chapter XII emphasizes the importance of appraisal.

Availability of Labour Supply in United States Defence Industries

Federal Security Administrator Paul V. McNutt announced on November 25 that a check of available labour in more than 500 occupations essential to defence production revealed that about 218,000 qualified workers, most of whom were unemployed, were registered in the 1,500 State-operated employment offices of the U. S. Employment Service on September 28. A considerable number of these workers were equipped for jobs in more than one of the occupations surveyed.

This most recent of the special monthly labour inventories taken by the Social Security Board's Bureau of Employment Security covers many of the skilled and semi-skilled jobs in aircraft manufacturing, shipbuilding, construction, metal-working, machine shop and machine tool work, munitions and several other important defence activities. Apprentices and helpers in these occupations are also included.

Workers in the construction trades and in the machine shop and machine tool class made up the two most numerous groups of job seekers—roughly 25 and 20 per cent of the total, respectively. Comparatively few job seekers, however, had skills which could be utilized in shipbuilding, aircraft manufacturing, or munitions and ordnance work.

In the individual occupations, the largest groups of workers registered were automobile mechanics—21,200; machinists, millwrights, and maintenance mechanics—16,300; and welders—11,000. Other occupations for which relatively large numbers of job seekers were reported were form builders, timbermen, and shorers; punch-press operators; electricians; cement finishers; molders; drill-press operators; plumbers; pipe fitters. Tool makers and die makers, who have been in great demand by defence industries, each numbered about 1,000.

Comparing the September survey with a similar groups of occupations included in the count taken August 31, there appears to have been a decrease of 9 per cent during September in the supply of skilled labour available to defence industries through the State employment offices.

LABOUR SUPPLY IN CANADIAN WAR INDUSTRIES

Minister of Labour Reviews Action Taken in Meeting Labour Requirements in War Production—Possibility of Extended Working Week

THE Minister of Labour, Hon. Norman A. McLarty, speaking in the House of Commons on November 28, dealt comprehensively with the labour situation in Canada under the accelerated tempo of war production. In particular, the Minister analysed the situation from two important aspects, viz.: (1) the problem of labour supply, especially skilled labour; (2) the possible temporary relinquishing of certain labour standards under the necessity of maintaining the maximum national effort.

Emphasizing that "the problem of labour supply is a vital factor in our war achievement", the Minister observed that "there are necessarily limitations to the productive capacity of any country comprising twelve million people, but within that maximum limitation it is our duty to ensure the very greatest possible production and to develop our man-power capacity to the maximum degree of efficiency. This war imposes that definite imperative."

Paradox of Unemployment in War

Touching on the dislocation of economic and industrial life resulting from a drastic change to a wartime basis—a problem intensified by the world's greatest depression—the Minister noted the effect of that long depression upon labour in the loss of incentive and skill. From that, he proceeded to the paradox of "unwilling idleness" in the midst of war-time employment, in the following paragraphs:

"Nor will I deal to-day with a strange phenomenon, namely, that notwithstanding the increased industrial activity there are still, according to the latest available figures, 52,500 employables receiving unemployment aid, to which figures must be added those unemployed who are not in receipt of relief. The degree of employability of those employables receiving unemployment aid must be seriously questioned, but notwithstanding that the paradox exists.

"A similar situation exists in the United Kingdom, and the paradox has been referred to by Sir William Beveridge, Chairman of the advisory committee on unemployment insurance, and explained in the following words:

> The explanation of this paradox of mass overwork and mass idleness in war time is not far to seek. War, while it abolishes some types of peace-time unemployment, such as that due to cyclical depression, enormously increases another type. This is the qualitative unemployment due to the labour demanded being of one kind while the supply available is of another kind. War adds a new type of unemployment which may be described as bottle-neck unemployment, arising from the fact that the demand for labour is never a demand for labour alone, but for labour in conjunction with particular machines and particular raw materials.

"This statement of Sir William Beveridge, too, explains the circumstances that in June of this year there were in Great Britain, when the maximum of war effort was admittedly being put forth, 800,000 unemployed registered.

"This paradox of unwilling idleness of many citizens in the midst of the great demands in war is surprising, but it is a definite fact. Bad in itself as a waste of strength, it is even worse psychologically, as suggesting to those who are being urged to additional efforts and sacrifices that these cannot really be required.

"But the cure of unemployment in war is not as easy as the statement that it exists. It raises technical problems of great complexity; it involves necessarily the intimate co-operation of service and supply departments and the ministry of war services and of the ministry of labour and of the educational authorities; the organization of man-power is in the last resort a replanning and reorganizing of our whole production. The state is compelled to exert a dynamic control in the interests of the community and with the supreme object of maximum production of war requirements."

Problem of Labour Supply

In spite of this paradox, the Minister stated that there is a steadily diminishing margin in the reserve of skilled and semi-skilled labour, as indicated in statistical returns to the Department. Though there was this decline in the supply of skilled labour, the Minister emphasized that there was no general shortage of labour and declared:

"I do not suggest that there is existing at present a general shortage of labour. There is not. But I do suggest there are certain specialized branches of labour in which this shortage to-day exists and which, unless adequate measures are taken to deal with its growth, will produce a situation and create a condition which will be extremely difficult to meet.

"Having endeavoured to paint a reasonably fair and accurate picture of the situation as it affects labour supply, there are only two observations I desire to make:

1. While the shortage of labour generally is not yet acute, a shortage of tool and die makers and mechanics generally is imminent, if not already at hand in some occupations.

2. In the second place I would point out that two methods are being followed to ensure the maximum use of available labour and the training of additional skilled labour; the first is by governmental action; the second is by industry itself."

In the sphere of government action, the Minister referred to the registration of skilled and semi-skilled labour available to war industries and to the canvass made by various engineering and technical organizations as to the available number of technicians. Lists of these had been referred to employers in answer to requests and many had been utilized.

The Minister then informed the House on the general problem of labour supply which he stated resolved itself into three parts as follows:—

1. What has been done.
2. What is being done.
3. What it is proposed to do.

"I would first like to tell the house," continued the Minister, "what this government has done in connection with the basic training and development of expert labour during this war."

Expansion of Training Program

Indicating the scope of this expanded training program, the Minister stated:

"Through an expansion and redirection of the youth training program and through the use of funds voted by parliament for that particular program, and drawing upon the war appropriation, the energies and work of this branch of the Labour department were all developed to the end of promoting our war work from the outset. During this past summer every one of the sixty-four technical schools in Canada possessing the required equipment and the necessary instructors was utilized for the purpose of promoting the training in war work of the young people of this country.

To-day our annual rate of training is in excess of 26,000 trainees per year, and this number is being constantly augmented and increased.

In the four months' training, which is the average time afforded, young men of this country are being given an education which will form the basis of the technical work which they are called upon to perform. The training so provided comes under two main categories:

1. The training which is being done in the aircraft mechanics' course for entry into the Royal Canadian Air Force will develop 6,000 trainees per year at the present rate of training.

2. The training for work in the war industries will produce an additional 24,000 basically trained workers per year.

We are, of course, hopeful of exceeding this objective, and every effort is being made I believe to bring this about.

This program has been and is being carried out by the Department of Labour in co-operation with the various provincial governments in Canada. And might I here pay a tribute to the provincial governments for the wholehearted and loyal co-operation which they have afforded in connection with this work. It has, of course, been necessary for the dominion to increase its contribution to the carrying out of this program."

Necessity of Training by Industry

After outlining the arrangements for the transference of certain trainees trained in non-industrial areas to industrial employment, the Minister dealt with a complementary part of industrial training—programs initiated by industry itself. On this point the Minister observed:

"There is too, a second and very vital consideration, and that is to the extent to which industry itself has been willing to undertake and participate in the training of men for war-time industry. The duty of industry in respect of this important work was emphasized some months ago. Speaking in this house on June 17 last I pointed out that while the government might do its share in the basic training of skilled mechanics, the primary responsibility in regard to this accelerated training rested upon the shoulders of industry itself.

A canvass has been made of industry by the national labour supply council to determine the number of additional employees which will be required in carrying out the war work and the number of men which each industry is training for this purpose. While the number being trained is somewhat disappointing, there is definite evidence that industry is now co-operating both with the vocational schools and in providing the necessary training in their own plants. I am confident that with this co-operation the training of workers will greatly increase during the next few months.

In addition the government has appointed and is appointing officials whose duty it is to facilitate co-operation between employers and the trainees in vocational schools, as well as to promote and increase the training being given in essential industrial plants. The work in this regard is being increased as rapidly as circumstances permit."

In connection with industrial programs, the Minister lauded the case of an industry engaged in shipbuilding in the maritime provinces. This industry had undertaken on its own initiative to train the necessary measure of skilled labour it required, and the Minister believed that this example "might well be followed by many other industries in Canada."

Determination of Labour Requirements

Tracing the functions and activities of the National Labour Supply Council and the Inter-departmental Committee on Labour Co-ordination (LABOUR GAZETTE, July, 1940, page 630, and November, page 1101) the Minister stated that in the determination of labour requirements the demand from three main sources must be satisfied—the recruiting services, government agencies giving civilian employment, and firms working on government contracts. He dealt with them individually, thus:

1. The demand from the recruiting services, such as defence, the naval and air services, will be enlisting men. The total number of men to be enlisted during the next six months' period, the skilled occupations necessarily included and the number of men in each is being ascertained.

2. The demand from government agencies giving civilian employment. Men will be taken on for work in the arsenals, shipyards, the construction of airports, and other direct employment under the government. The total number and the requirements in the skilled trades for the next six months is made available to the committee by the departments concerned.

3. The third demand, namely from government contractors and sub-contractors, is no doubt the greatest of the three. The matter of enticing of skilled labour by employers, which, if allowed to continue, would have produced a chaotic situation in industry, has already been dealt with by order in council on the recommendation of the committee. The labour needs, more especially for skilled workers, of all firms on government contracts are being ascertained and placed before the committee. These returns give the skilled occupations and the numbers required in each for the next six months or until present commitments are completed.

The Minister explained that the data thus secured will give the committee (on Labour Co-ordination) some measurement of skilled labour requirements at present and for some months ahead and will indicate in what occupations and locations the labour is needed. This information is being supplemented by reports from all departments of government concerned. As soon as the enlistment of a quota of men, or a new governmental project or a new contract, is, decided upon, the committee is to be advised so that the necessary labour may be determined and measures to secure it considered before the project is launched.

In addition, the Minister stated that this Inter-departmental Committee on Labour Co-ordination is engaged in the determination of the present labour reserve; and various possible sources of labour are being canvassed to learn the number and location of required workers available.

This is being done through the following channels:

1. Through trade unions. The unions which have members in the occupations required are being asked to furnish the committee with lists of unemployed or partially employed members or members working in non-essential industries, or men with required skills now employed in other occupations.

2. Through the use of the provincial employment offices. The cards of the active files in the employment offices are being examined to discover applicants in the required occupations or in allied occupations, and the result of this survey is available to the committee.

3. The same procedure as has been adopted in connection with the employment offices will be followed in connection with the national registration cards as and when they become available.

4. The approximate dates upon which firms can complete their commitments is being given to the committee so that new contracts may be given them without any call on the labour market, so that if new contracts are not assigned them some part of their labour force may be used elsewhere.

Conserving and Augmenting Labour Supply

The methods by which the committee are endeavouring to conserve and augment the supply of labour were thus detailed by the Minister:

1. In the recruiting policy they are endeavouring to ensure that men in the required occupations should not be recruited unnecessarily, and any already with the forces not being used in their trades should be returned to war industries as needed. A survey of the number of enlisted men in Canada in the scarce trades is being undertaken and the results made available to the committee.

2. Apprenticeship. As a rule apprenticeship training covers too long a period to afford any important increase in the number of skilled workers in the emergency. Intensive instruction may speed up the completion of courses and make a number available to industry somewhat sooner. The character of the instruction is being checked to ensure

that so far as possible the men are being trained in the required occupations.

3. Pre-employment training in technical schools, to which I have already referred. A survey is being made to ascertain that the training is being directed to the scarce trades; that it is not putting undue stress on theory; that the men are being trained in a short range of skills rather than all the skills of an occupation; that the facilities are being used in shifts in order to train the maximum number; that there is proper co-operation with local industry for use of plant equipment, and to ascertain when students will graduate and in what numbers.

4. The fourth step that the committee is taking has to do with training in industry. Government contractors with proper facilities may be required to train stated numbers of workers in the scarce trades as a condition of the contract. This training should take the form of upgrading. Jobs should be broken down, and the trained mechanics should do only the most skilled part of the work. The rest of the job should be divided among a few others nearest to him in line, each of whom should be broken in on his part of the job with a few weeks' training. Others behind them should move into their places, and so on through the plant. New employees should be taken on at the lower levels and moved up as rapidly as their abilities and the circumstances permit.

A survey is being made to determine plant facilities for training in the required occupations, the instructors available and how their number may be increased, and the number of trainees that may be graduated in a given period. This survey will be first applied to war industries and then to others if deemed advisable.

5. Training by federal government agencies. To meet their needs for skilled workers in the navy, army and air force, the arsenals and shipyards through the departments concerned must undertake to upgrade men as required of industry.

6. Transfer of workers. Provision to facilitate transfer of available workers to points where they can be placed must be made. I have already dealt with this transfer of trainees.

7. A survey has been initiated to determine the number and locations of employees in the scarce trades now attached to non-essential or depressed industries who could be drawn into work on government contracts if that should become necessary.

8. Recruiting of women for industry and war auxiliary to the services. The extent to which women may be substituted for men in war industries should the need arise is being studied with a view to provision for their training. As men are upgraded into higher jobs many women might be employed on jobs at the lower levels. Similarly in non-war industries, upgrading would release skilled men for war plants and, in many, women could be taken on to replace them.

9. Labour priority for war industries. A survey is being made to establish a list of the non-essential industries which employ labour in the scarce trades and to determine the number of such workers employed. It may be found necessary to deny such industries the right to engage any additional men required in the essential occupations and, secondly, to transfer some of their skilled labour to war industries.

In replying to Mr. H. C. Green (member for Vancouver South) who asked if it would be possible to give training to older workers and so release younger men for the forces, the Minister stated that the committee is considering the training of older people.

Possibility of Extending Working Week

The Minister then proceeded to another important function of the Committee on Labour Co-ordination upon which it will have to report, and which as a matter of policy becomes a direct responsibility of the Government, viz.—the question of lengthening the standard working week. On this matter the Minister stated:

"In Canada to-day our war effort depends on two great services—our fighting services and our producing services. Each is essential, each is interdependent, and each is determined to back the other to the utmost degree. But maximum production depends on the most efficient possible use of the human and material resources at our disposal. Manufacturing plants must be well equipped with modern tools and machinery and skilled men and women. They must operate to capacity within the limits of sustained efficiency. Wherever possible they must operate on two or even three shifts and in many instances production is continuous so that operation subject to another day being finished even on Sunday is necessary.

These conditions do not obtain generally in peace time, and it is but natural that the transition to war-time conditions raises problems concerning relations between employer and employee, principally the problem of remuneration for work done. In peace time, when the supply of labour has been plentiful, the tendency has been towards a shorter day and working week. That purpose has been twofold; originally to reduce fatigue and provide leisure for recreations; and later to spread the work and reduce unemployment.

The working day has been reduced to eight hours generally and the week to forty-four hours. Provision exists for the working of hours in excess of those outlined above, under special conditions, and overtime rates of pay have been established. These rates usually provide for payment of rates fifty per cent higher than straight time and in the case of work performed on Sundays, one hundred per cent higher. These last are punitive rates, designed to discourage the working of a seven day week. We must now give careful consideration to the question of the application of such punitive rates when war conditions have practically eliminated the reasons which originally necessitated their introduction. In the case of work which has to be performed on Sundays, some employees will be so employed but if they are given another day off during the week instead, it would be hard to defend the payment of punitive rates for Sunday work.

To-day we are approaching the point where, even generally speaking, a labour shortage will exist, and under the circumstances we must consider the question of lengthening the standard working week from forty-four hours to forty-eight or even higher, as the new basis for calculating what overtime rates shall be payable. We have reached the point at which, instead of planning to spread the work, we are actually seeking workers to man our rapidly expanding war industries.

With the distressing news concerning havoc wrought by the enemy in such centres as Coventry, Birmingham, Bristol and Southampton still ringing in our ears, and with the Minister of Shipping admitting that sinkings are going on at a greater rate than replacements, I suggest that this is no time for us to be thinking of maintaining standards which do not take into account the urgency of the situation.

In considering the possibility of lengthening the working week we appreciate that this involves the possible temporary—I should like to emphasize that—the temporary relinquishing of certain standards which labour has established over the years. The only excuse for asking that these temporary concessions—and it must be admitted that they are temporary and for the emergency period only—be considered is that we must win the war, and sacrifice is unavoidable."

Hours and Productive Capacity

Replying to Mr. Angus MacInnis (Vancouver East) in regard to any intention by the government to make definite by legislation any temporary concessions, the Minister stated it would not be necessary; that "if you start from the fundamental basis that labour is willing and anxious to co-operate you do not need legislation." Upon Mr. MacInnis further pointing out that in Great Britain every concession is registered, the Minister added:

"In the order in council passed by this government on June 19, in which we made certain observations as to what we considered was the best method of preserving the best possible relations between industry and labour in war time, we made it very clear that any concession made by labour in this emergency period would be for the emergency only. In his address a couple of weeks ago to this house the Prime Minister (Mr. Mackenzie King) reinforced that statement of policy by stating that when labour was making these concessions it was our definite duty when the emergency was over to see that labour did not suffer as a result. I do not think there can be any question about this government's attitude.

If lengthened, the working week must not be made inordinately long, as experience has taught us that beyond certain limits, fatigue more than offsets any advantage gained in production as a result of longer hours. The present working week is short of the point at which fatigue becomes a factor, and it may be found desirable to lengthen progressively the working week as the available labour supply diminishes.

Should these steps be found desirable, the sacrifice involved will be offset to a very large extent by increased incomes due to steady work and longer working hours, and by the controls adopted which have effectively protected all from unduly increased living costs. A study of workers' incomes in certain industries reveals the fact that where wage increases have been ten per cent since the outbreak of war, actual incomes have increased much more, and I suggest therefore that it is a problem of adjusting labour standards in the war effort by rational and logical approach on the part of all concerned.

The interest of the public in the situation is a very definite one indeed, exceeding in some cases the interest of the employer. This interest is, of course, evident from the fact that the government is the principal buyer and in addition because of the policy which the government has followed to prevent the exploitation of war-time needs by any form of profiteering. One of the means to this end adopted by the government was to require all those who tender on government orders to do so on the basis of existing prices for labour and material, the government undertaking in some instances to protect the contractor against increases in either labour or material. This has saved the taxpayers of Canada a considerable amount of money."

Co-operation by Labour

Hon. Mr. McLarty then put on *Hansard* two resolutions from labour bodies "to show the attitude of labour and the co-operative viewpoint that now exists." The resolutions were as follows:

From the International Brotherhood of Electrical Workers in Toronto:

That we notify all employers of our members we have decided to temporarily suspend the provision of our now existing agreement, which limits the hours of work, and will work eight hours per day, six days per week at straight time, during the present crisis, these to be between the hours of 8 a.m. and 5 p.m. on Monday, Tuesday, Wednesday, Thursday, Friday and Saturday (holidays not included). It being distinctly understood that our agreement, as at present constituted, shall remain unchanged and the suspended provision shall immediately, at the end of this crisis, automatically become effective.

From a carpenters' union in Regina:

Therefore be it resolved that we, the carpenters of Regina, represented by the above mentioned local union, do hereby promise, from this date and until this present war is won by the British empire of which we are proud to be a part, "to work on government war work only for straight time for ten hours each day and for six days per week, including Sundays and holidays, for the rate of wages as set out in the agreement and signed by all parties concerned" for all carpenters and for all carpenter work.

Maintenance of Industrial Relations

In concluding, the Minister dealt with the general subject of industrial relations as follows:—

"There is a right way and a wrong way to deal with and adjust every problem of human relations. It has been urged upon the government that by some fiat, by some ukase, we should order labour to do certain things in the matter of wages paid or hours of labour worked. There might be conceived some circumstances in which the government might be required to take such action. But those circumstances do not exist to-day. What labour is looking for is not regimentation but direction. It has made that abundantly clear. Dealing as we are with a co-operative body, why should such action be necessary? That is the wrong way.

I was interested in reading a report of the remarks made by the Minister of Labour in Great Britain, in the House of Commons yesterday, in which he said:

Had we applied conscription of labour in the manner suggested, we should have made direct for defeat. Compulsion does not give the desired result.

"The right way is to assume that this is fundamentally labour's war, and that being so, that labour—organized and unorganized—is willing to contribute its maximum effort in this critical time. It involves a definite consultation with labour, a testing-out of the viewpoint of labour. The use of the big stick is unnecessary when we are all engaged in a common purpose. I am convinced that that is the right way. And I am equally convinced that if we adopt it, it will redound to the benefit of the Canadian people during war time, it will be of definite assistance in the aftermath of war, and it will immeasurably promote the happiness and prosperity of our Canadian people."

At the conclusion of the Minister's speech, Dr. H. A. Bruce (Toronto-Parkdale), asked that, in view of the difficulty of obtaining instructors for technical schools, if anything had been done to enable the release for that purpose from the army of men who are skilled mechanics.

Hon. Mr. McLarty replied that it is receiving consideration at the present time, along with the problem of withdrawing those who might be more useful in industry than in the army.

(Since the Minister of Labour's address in the House of Commons an order in council was issued on December 1 governing the release of key men to war industries from the Canadian army as recorded elsewhere in this issue on page 1226).

There were 8,006 accidents reported to the Ontario Workmen's Compensation Board during the month of November, as compared with 8,543 during October, and 6,195 during November a year ago. Benefits awarded amounted to $643,487.37, of which $511,853,35 was for compensation and $131,634.02 for medical aid.

This year's record to date shows a total of 73,456 accidents reported, as compared with 55,382 during the same period last year, and total benefits awarded to date this year amount to $6,560,711.78, as compared with $5,571,028.61 to the end of November last year.

The Division of Labour Standards of the United States Department of Labour has recently issued a Bulletin (No. 38) entitled *Qualifications for General Labour-Law Inspectors.* In the bulletin a committee of labour-law administrators and others concerned with sound enforcement of labour legislation has recommended specific qualifications and methods of selection of inspectors. The bulletin supplements another one entitled *Factory Inspection Standards and Qualifications of Factory Inspectors,* which deals specifically with safety and health inspectors. Copies of Bulletin No. 38 may be obtained from the Superintendent of Documents, Washington, D.C., the price per copy being 5 cents.

TRADE UNIONISM IN CANADA

Summary of the Twenty-Ninth Annual Report on Labour Organization

THE Department of Labour has published recently the twenty-ninth annual report on Labour Organization in Canada, covering the calendar year 1939. In this report certain statistical and other information concerning the trade union movement in the Dominion has been given, as well as particulars of labour organizations throughout the world, Canadian associations of wage-earners other than trade unions and incidents of special interest to labour.

According to the report labour organizations in Canada are placed in two main groups: (1) local branches of international bodies having membership in the United States and Canada; and (2) unions the membership of which is wholly in the Dominion.

Likewise, there are two principal types of organizations: (1) the craft union, which includes workmen in a single craft or a number of closely related crafts or trades, for example, bricklayers and stone masons; and (2) the industrial union, having members in the various occupations in a particular industry, such as coal mining.

Trade Union Membership.—The total membership of all classes of trade unions in Canada, as at December 31, 1939 was 358,967, a decrease from the previous year of 26,072, comprised in 3,296 locals, a loss of 22 as compared with the figures for 1938.

The international union group, consisting of the Canadian members of 95 organizations, 3 less than recorded in 1938, had 2,091 branches in the Dominion, an increase of 5, with a combined membership of 216,661, a loss of 13,886.

The group of Canadian central organizations (including the National Catholic Unions) had 1,120 branches, a loss of 50, with a combined membership of 122,886, a decrease of 19,066.

The independent units numbered 85, a gain of 23, the membership reported by 74 units being 19,420, an increase of 6,880.

Percentage of Trade Unionists and Organized Wage-earners to Population.—According to the latest estimate of population (June 1, 1939), trade unionists in 1939 represented 7·97 per cent of the gainfully occupied in Canada; adding 157,369, the number of members in the non-trade union associations, the organized wage-earners in the Dominion at the close of 1939, represented 11·5 per cent of the gainfully occupied.

Twenty-nine Years of Trade Unionism in Canada.—The accompanying chart based on the membership figures indicates the fluctuations which have occurred in the standing of organized labour in the Dominion for the past twenty-nine years.

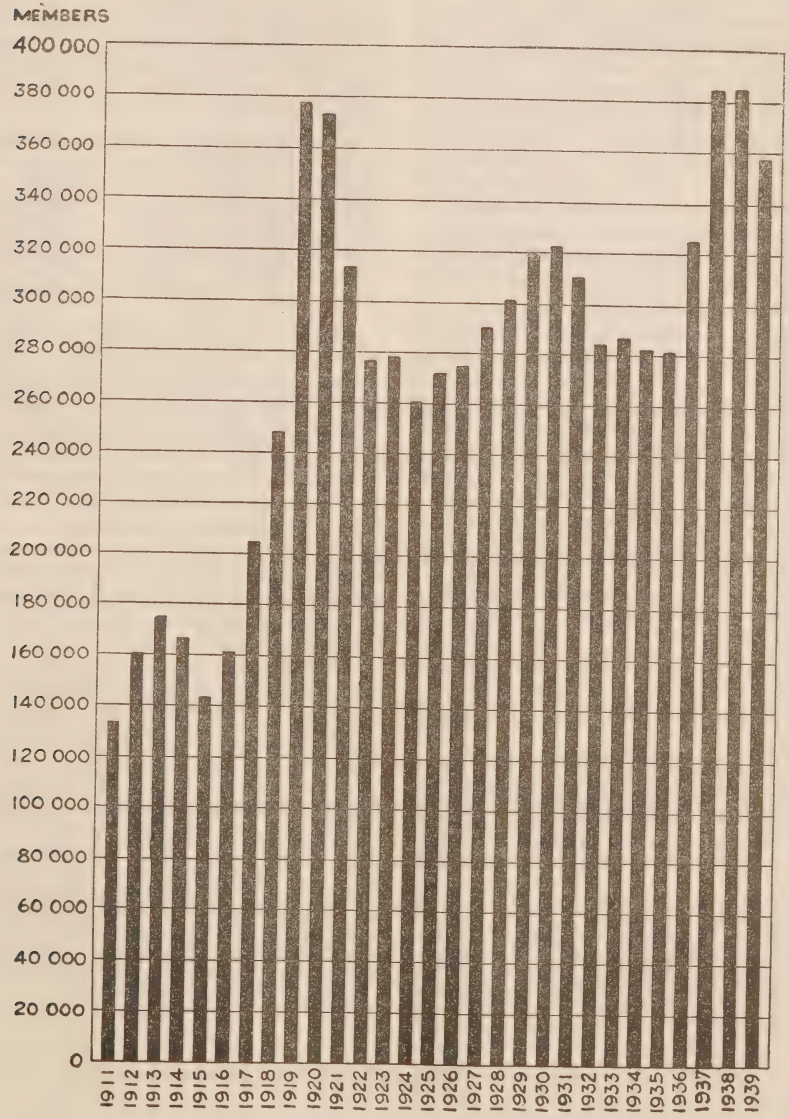
Union Membership by Industrial and Trade Groups.—The accompanying table shows the division of union membership among the various industries and trade groups. The membership of each central body is included in the trade group in which most of its members are employed.

Groups of Industries	Membership	Percentage
Mining and Quarrying	27,611	7·7
Building	26,987	7·5
Metal	31,064	8·7
Printing and Paper Making	26,484	7·3
Clothing, Boots and Shoes	27,438	7·7
Railroad Employees	81,177	22·6
Other Transportation and Navigation	35,734	10·0
Public Employees, Personal Service and Amusement	39,485	11·0
All other trades and general labour	62,987	17·5

Trade Union Branches by Provinces.—The division by provinces of the 3,296 local branch unions of all classes in Canada for 1939 was as follows: Ontario, 1,184; Quebec, 726; British Columbia, 350; Alberta, 281; Manitoba, 205; Saskatchewan, 186; Nova Scotia, 181, New Brunswick, 170; and Prince Edward Island, 13.

Trade Union Membership in Canadian Cities.—There were 31 Canadian cities having not less than 20 trade union branches, one more than the number recorded in 1938. The 1,861 branches in these 31 cities contain about 68 per cent of the entire trade union membership, and the 1,675 reporting branches in these cities represent 58 per cent of all reporting branches in the Dominion.

Trade Union Benefits.—Of the twenty-nine Canadian central organizations making returns to the department, 7 reported expenditures for benefits, the total amount disbursed being $12,488.64, a deacrease of $74,421.80 as compared with the figures furnished by the same number of organizations in 1938. Disbursements in Canada and the United States by fifty-nine of the ninety-five international organizations amounted to $19,870,873, an increase of $573,417 as compared with the previous year. The following statement shows the total expenditures made in the United States and Canada on account of benefits by the various international organizations operating in Canada:—



Death benefits	$11,792,077
Unemployed and travelling benefits	445,638
Strike benefits	577,439
Sick and accident benefits	1,510,974
Old age pensions and other benefits	5,544,745

In addition to the expenditure made by the central organizations, the local branch unions disbursed benefits to their own members. The aggregate amount of such expenditure by 913 local branches was $442,073, which was $60,845 larger than that reported in 1938 by 883 local branch unions. The outlay for the various classes of benefits by local branches was:—

Death benefits	$158,112
Unemployed benefits	55,188
Strike benefits	31,034
Sick and accident benefits	132,050
Other benefits	65,689

Non-Trade Unions Associations.—There are in Canada a large number of associations of wage-earners which are not identified with the labour movement of the Dominion but are of such importance as to warrant reference being made to them in a publication designed in part to indicate the numerical strength of organizations of wage-earners operating in Canada. Reports were received from 131 such bodies, including associations of school teachers, government employees and commercial travellers, with a combined membership of 157,369.

TWENTY-NINE YEARS OF TRADE UNIONISM IN CANADA

16416—3½

Complete Labour Organization Directory.— As in previous issues, the twenty-ninth annual report on Labour Organization in Canada includes a complete labour organization directory, containing not only the names and addresses of the chief officers of local branch unions and delegate bodies in the Dominion, but also those of the central bodies with which Canadian trade unionists are identified. Another feature of this directory is the recording of the names and addresses of the chief officers of those local unions concerning which information was received, in the department, which were formed during the interval between the dates at which reports were received from the central organizations and the publication of the review. So far as possible the names and addresses of all officers mentioned in the directory are corrected to date of printing.

Copies of this report may be obtained from the Department of Labour at a nominal charge of 50 cents per copy.

Labour Policy of United States National Defense Advisory Commission

The National Defense Advisory Commission of the United States, which is the operating body of the Cabinet Council of National Defense, has recently enunciated its labour policy. This important Commission has a number of Divisions each of which is assigned a definite part in the defence production program. These major sections of the Commission are: Industrial materials division, production division, labour division, transportation division, consumer protection division, agricultural division, prices division, and purchasing co-ordination.

The Labour Division is under the chairmanship of Sydney Hillman, president of the Amalgamated Clothing Workers, and its subsections are committees on labour relations; labour requirements (employment standards), labour policy, and co-ordination. The general policy of the Commission in regard to hours of work, wages, working conditions and other questions relating to labour is as follows:—

Primary among the objectives of the Advisory Commission to the Council of National Defense is the increase in production of materials required by our armed forces and the assurance of adequate future supply of such materials with the least possible disturbance to production of supplies for the civilian population. The scope of our present program entails bringing into production many of our unused resources of agriculture, manufacturing, and manpower.

This program can be used in the public interest as a vehicle to reduce unemployment and otherwise strengthen the human fibre of our Nation. In the selection of plant locations for new production, in the interest of national defence, great weight must be given to this factor.

In order that surplus and unemployed labour may be absorbed in the defence program, all reasonable efforts should be made to avoid hours in excess of 40 per week. However, in emergencies or where the needs of the national defence cannot otherwise be met, exceptions to this standard should be permitted. When the requirements of the defence program make it necessary to work in excess of these hours, or where work is required on Saturdays, Sundays, or holidays, overtime should be paid in accordance with the local recognized practices.

All work carried on as part of the defence program should comply with Federal statutory provisions affecting labour wherever such provisions are applicable. This applies to the Walsh-Healey Act, Fair Labor Standards Act, the National Labor Relations Act, etc. There should also be compliance with State and local statutes affecting labour relations, hours of work, wages, workmen's compensation, safety, sanitation, etc.

Adequate provision should be made for the health and safety of employees.

As far as possible, the local employment or other agencies designated by the United States Employment Service should be utilized.

Workers should not be discriminated against because of age, sex, race, or colour.

Adequate housing facilities should be made available for employees.

The Commission reaffirms the principles enunciated by the Chief of Ordnance of the United States Army, during the World War, in his order of November 15, 1917, relative to the relation of labour standards to efficient production:

In view of the urgent necessity for a prompt increase in the volume of production . . . , vigilance is demanded of all those in any way associated with industry lest the safeguards with which the people of this country have sought to protect labour should be unwisely and unnecessarily broken down. It is a fair assumption that for the most part these safeguards are the mechanisms of efficiency. Industrial history proves that reasonable hours, fair working conditions, and a proper wage scale are essential to high production. . . . every attempt should be made to conserve in every way possible all of our achievements in the way of social betterment. But the pressing argument for maintaining industrial safeguards in the present emergency is that they actually contribute to efficiency.

RECENT REGULATIONS UNDER PROVINCIAL AND DOMINION LEGISLATION

Minimum Wages in Alberta, British Columbia and Quebec—Hours in Alberta, British Columbia and Saskatchewan—Employment of Women in Northwest Territories and Saskatchewan

N the lumbering industry in Alberta, minimum wages have been raised and hours lengthened. British Columbia has issued the usual Christmas orders allowing longer hours in certain shops and beauty parlours for the Christmas season and fixing minimum wages for temporary employees of the former class. The minimum wage order for the British Columbia construction industry was consolidated and the rules governing wages and hours of motorcycle operators delivering goods in British Columbia cities have been revised. In Quebec, the minimum wage order for employees engaged in the manufacture of shoe counters has ben renewed for another year. In Saskatchewan the prohibited hours for employment of females in restaurants in the smaller towns have been relaxed. Women and minors in the Northwest Territories may not serve beer to customers.

Alberta Hours of Work Act

An order gazetted on November 30 and made on request of the Dominion Government Timber Controller, allows persons employed in sawmills, planing mills, box factories and woodworking plants in rural districts more than 10 miles from any city and in small towns of less than 1,000 people to work one hour in a day beyond the nine hours fixed by the Act.

A similar order to the one issued last year for certain persons employed in the lumbering industry and by logging and railway tie contractors in small towns and rural districts exempts for the six months from October 31 cooks, night watchmen and barn bosses from the nine-hour day and 54-hour week fixed in the Act as well as from the weekly rest-day requirement. The order allows exemption from the limits on hours but not from the weekly rest provision in the case of blacksmiths, engineers, teamsters, truck drivers and millwrights in these industries.

Alberta Male Minimum Wage Act

The former minimum wage order governing employees of sawmills, box factories, woodworking plants, logging and railway tie contractors in small towns and rural districts (LABOUR GAZETTE, 1938, p. 174) is rescinded by an order gazetted on November 30 and allowance is made for the longer hours now permitted. The new order raises the minimum monthly wages where operations are on a nine-hour day basis from $30 to $35 and the $35 rate applies also to employees in planing mills. Where operations are on a 10-hour day basis as permitted under the Hours of Work order above the monthly rate is $37.50. As before, board and lodging are to be provided on Sundays and holidays as well as on working days. The minimum monthly wage for cooks, night watchmen and barn bosses in all cases is $35. Employees who do not receive board and lodging are now entitled in lieu thereof to 75 cents for each day of employment. Not more than 35 cents may be deducted for meals and nothing when work is stopped due to circumstances outside the employee's control.

British Columbia Hours of Work Act

Extended hours are again allowed during the last few days before Christmas for workers in shops. Instead of permitting throughout the province two hours extra work on December 22 and three hours on December 23 as last year, the order now extends the regular eight-hour limit to 10 in Vancouver, Victoria, Esquimalt, Oak Bay and Saanich on the last three shopping days and in the smaller centres there is a two-hour extension on the last two shopping days and three hours longer may be worked on the Saturday preceding Christmas. The provision for a 50-hour week immediately preceding Christmas instead of the regular 48 is the same as last year.

From December 2 to the end of the year, messengers may work up to 10 hours a day but the weekly limit of 48 hours may be exceeded only in the week before Christmas by two hours. Similar conditions were allowed last year from December 7.

British Columbia Minimum Wage Acts

The usual special orders for men and women in shops during the Christmas season were gazetted on November 14. Except that they went into effect on that date, about three weeks earlier than in 1939, the orders are identical with last year's. The minimum weekly rates of $12.75 for 40 hours or more and when employment is for less than 40 hours a rate of 35 cents an hour, regularly applied to experienced female employees 18 years of age and over, are made applicable to all females for the Christmas season.

The Christmas order for men allows no special rates for inexperienced full-time employees 21 years of age or over. All adult males must be paid $15 for a week of 37½

hours or more. The hourly rate is 40 cents for less than 37½ hours and the daily minimum is $1.60. Boys from 17 to 21 are to be paid from $6 to $13 for a full week of 37½ hours. Part-time workers must be paid for at least four hours. Boys under 17 have a minimum hourly rate of 15 cents and it rises five cents for every year of age until the 35-cent minimum is reached for 20-year-old boys.

For the last full week before Christmas, women in hairdressing and beauty parlours may work four hours beyond the regular 44 in a week without obtaining a permit from the Board.

Order 12 under the Male Minimum Wage Act relating to the construction industry which has been amended several times since its issue on September 28, 1934, was consolidated, the new order to take effect November 28. Subject to exemptions granted under the Act employees 21 years of age or over must be paid at least 45 cents an hour and those under 21, 35 cents in Vancouver and district, Victoria, New Westminster, Nanaimo, Prince Rupert, Esquimalt, Oak Bay and Saanich. Elsewhere the minima are 40 cents and 30 cents. The order does not apply to indentured apprentices.

Order 26A amends Order 26 (LABOUR GAZETTE, November, 1940, p. 1147) from November 28 by applying the minimum wages and normal hours fixed for operators of commercial motor-vehicles of less than 2,000 pounds net weight to operators of motorcycles with side-cars or wheeled attachments in Greater Vancouver and Victoria and adjacent municipalities who are employed to deliver goods. The changes do not apply to such motorcycle operators throughout the remainder of the province or to operators of "solo machines" in the city districts. Their minimum wages remain unchanged and their maximum weekly hours are 48 as before.

Manitoba Trade Schools Regulation Act

The regulations under this Act (LABOUR GAZETTE, August, 1940, p. 809) were amended on November 2 to provide that the five character references required of an applicant for registration as the keeper of a trade school need no longer be from Manitoba residents.

Northwest Territories Liquor Ordinance

Among the provisions in this Ordinance, gazetted on November 23, is one prohibiting the employment of women and minors in the sale, handling or serving of beer in any licensed premises.

Quebec Minimum Wage Act

Order 7 dealing with employees manufacturing shoe counters (LABOUR GAZETTE, 1938, p. 1350) has been renewed for another year from November 26, 1940.

Saskatchewan Minimum Wage Act

The new provision which from October 21 prohibited employment of females in restaurants in the towns of Canora, Estevan, Kamsack, Lloydminster, Melville, Shaunavon and Wynyard between 12.30 a.m. and 5 a.m. is relaxed from December 16 to allow them to work until 1.30 a.m.

LABOUR LEGISLATION IN PRINCE EDWARD ISLAND AND NORTHWEST TERRITORIES IN 1940

THE Prince Edward Island Legislature in session from March 28 to May 2, 1940, amended the Public School Act to require children in rural districts to attend school on 75 per cent of the days on which the school is open instead of 60 per cent as formerly. The clause of the Charlottetown Incorporation Act was repealed which stipulated that work done in return for relief should not be work of a permanent nature or such as is ordinarily done by the City by hired labour.

An amendment in the Credit Union Societies Act provides that the fiscal year of all credit unions shall end on September 30 instead of December 31 and that annual reports must be made not later than October 31 instead of January 31.

The Electrical Inspection Act no longer requires that appointment of inspectors shall be recommended by the Provincial Board of Fire Underwriters. The section was omitted which exempted Charlottetown from operation of the Act while that City had in force an inspection by-law based on the Canadian Electrical Code.

Northwest Territories

The Workmen's Compensation Ordinance, 1940, of the Northwest Territories was amended on November 28, 1940, with regard to the section which authorizes the Commissioner of the Northwest Territories to make an order directing employers in any business, calling, trade or occupation to enter, if possible, into an arrangement satisfactory to the Commissioner for the protection of their workmen with a Workmen's Compensation Board of a province or territory other than the Northwest Territories. The amendment enables the Commissioner, if satisfied that it is not possible for an employer to make such an arrangement to order such employer to obtain satisfactory accident insurance for the workmen in an approved insurance company. If the employer refuses to carry out the order the Commissioner may refuse to grant him a licence to carry on business or may cancel such licence if already granted.

ANNUAL CONVENTIONS OF NEW BRUNSWICK AND ALBERTA FEDERATIONS OF LABOUR

NEW BRUNSWICK

THE twenty-eighth annual convention of the New Brunswick Federation of Labour was held in Edmundston, N.B., on October 29, with Mr. Christopher P. Kingston, chairman of the Local Arrangements Committee, presiding.

Following the opening proceedings, Mr. Kingston called upon the President of the Federation, Mr. Jas. A. Whitebone, to take over the convention. Mr. Whitebone declared the convention officially open and announced the appointment of the Credential and Constitution and Law Committees. The Credential Committee reported that 28 local unions and two Councils had sent in credentials for 63 delegates and that 26 locals and two Councils were represented by 52 delegates present. Fraternal delegates were also present from a number of organizations.

Resolutions Adopted

The following is a summary of the resolutions adopted by the convention:

Instructing the Executive to draw up an impartial lease form and ask that it be given legal status as the only form to be used in leasing homes.

Requesting the Government to enact a property and liability insurance feature into the Motor Vehicle Act to be operated by the Government.

That free school books be granted up to and including Grade nine.

Requesting that the Landlord and Tenant Act be further amended so that it would be impossible for a landlord to deprive a tenant of his goods and chattels until the debtor's ability to pay has been established by a civil court.

That the Provincial Government be requested to take joint action with the Federal Government in promoting a low cost home building programme.

Requesting the Provincial Government to make representation to the Federal Government to more strictly enforce the laws respecting profiteering.

Urging the Provincial Government to proclaim and put into operation the Mothers' Allowance Act.

Urging the Provincial Government to amend the Labour and Industrial Relations Act so as to make it compulsory for employers to recognize and bargain collectively with members of a trade union representing the majority choice of the employees eligible for membership in said trade union; and that the words "trade union" be substituted for the word "organization" in the Act.

That the Industrial Standards Act be amended by changing the words and figures "One Hundred Dollars ($100.00)" to "Twenty-five Dollars ($25.00)".

That the Federation concurs in the principle of an Apprenticeship Act, and that the Executive Board investigate the various Acts and draft one they deem suitable for this Province, copies of which are to be submitted to the affiliated locals for approval.

That the Steam Boilers and Operating Engineers Act be amended to provide for issuing first, second and third class engineers' licences.

The Federation, in a resolution adopted unanimously, reaffirmed its pledge given at the outbreak of the war of unwavering support to the Government in the prosecution of the war and commended the Government "for its efficient and fearless dealing with those guilty of subversive actions and harmful talk, and that the fullest support of New Brunswick organized labour be extended to the Government in rooting out and prosecuting to the limit every person guilty of attempts to retard Canada's war effort regardless of where they may be found or of their position in society."

The following Executive Officers were elected for the ensuing year: President, Jas. A. Whitebone, Saint John; first vice-president, G. W. Roy Myles, Moncton; second vice-president, Fred. C. Sherwood, Campbellton; third vice-president, James Coffey, Milltown; legislative representative, J. S. MacKinnon, Saint John; secretary and treasurer, Geo. R. Melvin, Saint John. District vice-presidents were elected for each county in which there are affiliated unions. The town of Bathurst was chosen as the next convention city, and President Whitebone was chosen to represent the Federation at the next convention of the Trades and Labour Congress of Canada in Winnipeg, Man.

ALBERTA

The annual convention of the Alberta Federation of Labour was held on November 18-21 in Lethbridge, the delegates being welcomed by Mr. David Horton Elton, K.C., Mayor of the city.

Following the opening proceedings Mr. Fred White, president, took over the chairmanship of the convention. The Credential Committee reported that 28 affiliated organizations were represented at the convention and that five fraternal delegates were present.

Resolutions Adopted

A summary of some of the more important resolutions adopted by the convention is as follows:

Requesting amendment of Provincial Safety Regulations, to have two persons in attendance when workmen are exposed in the handling of chlorine gas or such other gases; and amendment of Provincial Statutes to make it obligatory that where four or more workmen are employed in such places proper facilities with hot and cold water be available for the use of the workers.

Amendment of the Hours of Work Act to provide for a maximum eight-hour day and 44-hour work week.

Requesting Parliament "to state in no uncertain terms that fair wages regulations were intended to be strictly enforced and that all contracts shall carry the statutory provisions and that they shall be adhered to and enforced."

Instructing the executive to communicate with the Minister of Labour in Great Britain that workers' rates of pay, hours of labour, as well as the recognition of the employees' right to organize, be protected by agreement in the erection of plants for war work financed by the British Government.

Requesting that the executive petition the Alberta Government for an increase in the minimum wages contained in the Male Minimum Wage Act.

Advocating that working hours should not be increased without mutual consent.

Endorsing the suggestion that the Government embark upon a building program to make homes available to workers of low and medium incomes.

Condemning the present provisions for wheat marketing adopted by the Federal Government and urging "that the Government purchase outright this year's crop and advance the guaranteed minimum in full as by this means only will the cost of the carry over be borne equitably by all sections of Canada's population, rather than the unfair burden under present arrangements."

Amending the Provincial Industrial Conciliation Act in order that "when parties after accepting office fail to proceed immediately with their trust that the Government shall forthwith demand from the party naming such representative a substitute person to the end that immediate action can be taken on the question for which the Board was created."

Deploring "the present set-up as between the Government and the manufacturers of war supplies and services" and instructing the executive "to convey to the Prime Minister of Canada and other leaders in the House of Commons the immediate necessity of having Canada's war work undertaken on an actual cost basis, or in lieu thereof the taking over of the industries and operating of them for the duration of the war as a Government activity."

Instructing the executive to petition the Provincial Government for an increase in Mothers' Allowances.

Legislation providing holidays with pay for all classes of workers in the Province of Alberta.

Requesting legislation providing that all products be marked as to the country of their production or manufacture.

That free transportation be granted to members of His Majesty's Canadian Forces when proceeding on furlough, sick or compassionate leave.

That legislation and regulations that may be enacted altering established wage and working conditions under War Measures Regulations be carefully safeguarded with a view to maintaining working conditions established through agreements.

There were also ten resolutions seeking amendments to the Workmen's Compensation Act.

The following Executive Officers were elected for the ensuing year: President, Alfred Farmilo; secretary-treasurer, Carl E. Berg. Three delegates were elected to attend the convention of the Trades and Labour Congress, these being, Fred Smeed, Malcolm Ainslie, and D. B. McKenzie. Ellis Moore was named as alternate delegate.

Minimum Wage Order for Hotel Employees in New York State

A directory minimum wage order for women and minors employed in hotels in New York State, which may be made mandatory after a public hearing after it has been in effect for three months, took effect November 25, providing that employers must keep employment records and give statements to employees along with payment of wages. No provision is made for apprenticeship or learners' rates and a special licence must be obtained to pay handicapped workers less than the ordinary minimum. No deductions may be made except as authorized by statute. Employers are to supply uniforms and keep them in order unless an arrangement is made with non-residential service employees to care for them for a fixed sum. Gratuities are not to be counted as wages.

Part-time rates at three cents an hour above the regular minimum rates are provided for those working 24 hours a week or less and the minimum weekly pay is to be for 24 hours at this higher rate. Non-residential employees reporting for duty at the beginning of a work shift must be paid for at least three hours and waiting time is to be paid for. The rate for all overtime beyond 45 hours a week is time and a half. An additional sum is payable to non-residential employees for days on which the spread of hours exceeds ten or there is more than one interval off duty.

The wage rates vary according to the number of meals provided each day. For employees who do not live in, the lowest hourly rates are for service employees. There are slightly higher rates for chambermaids and bathmaids with "all other employees" receiving the highest fixed minimum. Establishments outside New York City are given until March 3, 1942, to adjust their rates for the two first-named classes to those payable immediately in New York City. For all non-residential employees rates are fixed for New York City until March 2, 1941, after which date they rise to the regular minimum under the order. Establishments outside the city have another year, i.e., until March 3, 1942, within which to come into line with the New York City rate.

For residential employees the rates are uniform throughout the state except that outside the city employers have until March 3, 1942, to reach the minimum.

The provisions for resort hotels are generally similar except that rates are lower than for regular establishments.

EFFECT OF WAR ON LABOUR STANDARDS IN GREAT BRITAIN

Address of Sir Walter Citrine, Fraternal Delegate of British Trades Union Congress to Convention of American Federation of Labor

IN an impressive address before the 60th convention of the American Federation of Labor, Sir Walter Citrine, general secretary and fraternal delegate of the British Trades Union Congress, graphically portrayed for the representatives of the trade union movement of the United States a picture of a Britain fighting for the democratic way of life. He touched on all phases of the changing social, industrial and economic life in Great Britain, but in particular he detailed the adjustments in labour legislation and regulations enforced by the exigencies of war. Since what this eminent British trade unionist stated is a revealing cross-section of the effect of the war on labour standards in Great Britain, extracts from his speech are given as follows:

Now I want to talk to you about the responsibility that was imposed upon us in the labour movement. Every section of the community was ready to defend our institutions. Could labour, with all its insistence upon the necessity of standing up to Hitler, do less than that? When our Prime Minister sent for us and told us first hand the problem, he said, "We have to think now in terms of the next 24 hours. Long range policy is not our concern at the moment. We have to think of what we are going to do to defend our shores." He said, "We can't haggle with the property owner as to whether or not we shall build a line of fortifications across his property. We can't haggle at a time like this, we have got to act." He said in the same way: "Is it reasonable to suggest that we have got to hold up this kind of work because this particular job happens to be a mason's, a bricklayer's, or a carpenter's, because we can't get men on these particular trades except from the other end of the country?" We said this to him: "We are prepared to surrender such rights on the clear understanding that full restoration will be legislatively given to us, and provided that all sections of the community are equally treated." We said to him, "Let's see your legislation and the powers you propose to take. If you propose to take rights over property equal to those you propose to take over labour, then we will support you."

And our Prime Minister, even before the House of Commons, our legislative assembly or even the full cabinet, had seen the proposals, submitted them to the Trade Union Congress for approval, and we approved them.

I know it is impossible to redramatize the situation. You are 3,000 miles away, and vivid as your imaginations may be, it can't quite carry you in flight to the position we were in in those days. But how could we haggle in a situation like that? How could we argue? We had said so many times that we would be destroyed if Naziism succeeded. Could we, now that the moment had arrived to throw our weight into the struggle as never before, stop and bargain and argue?. . . . .

We had already explained our proposals in respect of demarcation and such questions. We had already agreed to training and dilution. Now we were asked to agree to a new principle, a very important and dangerous one. That the state should be given the power by Parliament, to order any person to put his services at the disposal of the state in whatever capacity the state needed it. Side by side with that, that all forms of property, irrespective of what they were, must equally be put at the disposal of the state.

Relinquishing of Right to Strike

Now, that is a terrific power for any government to have at its disposal. But our confidence in the wise use of this power rested upon two things: Firstly, that we had our men inside the government, and on the fact that our movement had never been stronger, and its capacity to resist any mis-use of those powers had never been greater. We felt confident that we could in the circumstances sacrifice the right to strike.

I read with interest what President Green said yesterday on that subject, and I say this to you, that never in any other circumstances than the actual hazard of war, would the British trade union movement have surrendered its right to strike.

But could we claim—and I put this to you as practical people—could we claim that because some dispute existed as to the prices to be paid for certain classes of work on airplanes, for example, at a time when the Germans were sending their airplanes over in clouds, justify our men laying down their tools and refusing to manufacture the airplanes we needed to defeat those Germans? Could we do that? I think the question has only to be asked to be understood.

We surrendered the right to strike in the consciousness that we were doing a communal service which would entitle us to recognition at the hands of the community when the ordeal was over, and in the confidence that we were defending our own trade union institutions in the process.

Hours and Overtime

We allowed the working of practically unlimited hours. Hours in Great Britain, except for women and young persons, have never been regulated by law. We have no 40-hour week. We have collective agreements covering our people for a 47-hour week in the case of engineering, shipbuilding and metal trades generally, down to 44 hours per week in the case of the building trades. . . .

Here is an airdrome being built. It needs runways, concrete runways, it needs hangars, it needs roads for the cars to get near it, it needs all of the normal equipment of building. Were we to say, "Builders shall work on this job 44 hours only, and at the end of that they must knock off and go home," knowing that home meant some hut that had been erected near the airdrome, because these places have been put in the most remote situations in the country. Could we say that? Of course we could not. What we had to do was to find

some means of keeping control over overtime. I would remind you that overtime is in itself framed upon the conception that the employer exploits the workman. Your overtime rates, I presume, are the same as ours, based upon the principle that when a man has done 40 or 44 hours' work in a week he is entitled to some leisure and recreation. If the employer wants him to work longer, then you say to the employer, "Well, we are going to make it expensive for you, because if we don't make it expensive, you will exploit these people, and in effect you will have a long working week." So you make him pay double time or time and a half, until the use of overtime labour becomes uneconomical from the view of the employer. We do not believe the conditions are the same as those which apply when the state is practically the sole employer, when the purpose of the overtime, is to equip and to defend your country. Consequently we agreed to the extension of the working hours.

We took good care that the employer should not get away with it. We insisted that he should not be the authority who would determine whether overtime would be needed or not, but that it must be done in consultation with trade union officials acting through the government inspectors. That principle has been freely accepted and extensively applied.

Another restriction we put upon the employer was this. We said that if this was a war to defend *democracy* it was not going to be a war to create a *plutocracy*. Employers are not going to make extensive profits out of this war. We induced the government to impose a 100 per cent excess profits tax so that no employer now can make greater profit out of the war than he did in the years preceding it.

Wages, Earnings and Prices

You may be interested to know our system of wage regulation. We have, as I said, abandoned the right to strike. The government, the employers and ourselves in conference have said that we will be governed in our relations by voluntary collective agreements. But supposing there are employers who are outside those collective agreements, who are not affected, and over whom the employers' federation has no control. Is it right that such employers should be able to employ labour under different and inferior conditions? Oh, no. We of the British Trades Union Congress said, "We expect you to lay it down that where a collective agreement has been arrived at between the employer and the trade unions, or by arbitration or any other means, that collective agreement must become legally binding on all other employers in the trade or industry."

The principle was willingly accepted, both by the employers and the government. I think it is sufficient to say that to deal with disputes which may arise in industry we have provided arbitration, whether through a single arbitrator or a national arbitration tribunal whose proceedings have scarcely commenced yet and whose work we are to review at the end of the year.

What has been happening to wages during this period? You have all given considerable attention to the question of the wages spiral. You know what happens, wages go up and the cost of commodities goes up still more, and the result is that wages are always chasing prices but never catch up with them.

We tried to find ways and means of offsetting that process. One of the things we have tried to do is to get the government to subsidize basic commodities which go into the standard of life. In other words, instead of prices rising rapidly, as they did at the beginning of the war, if they rise at all, due to conditions which the government cannot control, then those prices should be kept down in so far as possible by means of subsidy. I said commodities whose prices are rising and over which the government has no control. You surely know that practically the whole of our eastern ports are no longer usable from the point of view of large ships. Practically all of our shipping has to be concentrated now, as far as imports are concerned, on the western seaboard. We have to send them in large convoys.

You can see in these circumstances that the cost of transport alone is outside the government's control to a very large extent, because of the circumstances.

We insisted upon a system of rationing, and I do hope that you will observe that these proposals originated with us and not with the government. We are the people who asked for this system and we must take full responsibility for the consequences. Nowadays everybody is rationed in our country, no matter who they may be, and although there are substitute commodities which people may have, every class of the community is on the same level so far as basic commodities are concerned.

I want to make it plain to you that the Trades Union Congress is represented on every form of administration which deals with these problems. Our democratic machinery, in other words, from a trade union point of view, is fully in operation.

The wages of 4,000,000 of our people are regulated by sliding scales based upon the cost of living, so that if the cost of living goes up wages go up proportionately. Despite this, and owing to the fact that these subsidies and rationing were not applied at the beginning of the war, the cost of living has risen approximately 23 per cent since the beginning of the war. Wages have not risen by more than about 12 per cent on the whole. The index that we, the Trades Union Congress keeps, shows that money wages have risen from 104 points to 119 points from September, 1939, to September, 1940. But real wages as measured by purchasing power, have fallen from 113 points to 107·5 points.

Now I have been speaking of wages, but earnings are very considerably higher. They are higher for two reasons: One, there has been a vast extension of piece work; and, two, the working of extended hours by agreements, such as I spoke of.

Unemployment and Labour Shortage

I know in the minds of some of you there will be the query, "why work extended hours when there are people still unemployed?" We have a total of something like 600,000 people still out of work. But what sort of people are they? There are some builders among them, not the skilled builders, but what we call labourers, for want of a better term. There are people in the boot and shoe industries, in the distributive industries, and coal miners—coal miners because of loss of export markets. It is a very difficult job to train these people in a short period so that

they can automatically fit into some industry where there is a shortage. The shortage to-day is mainly in the metal trades, the highly skilled precision work of engineers, and tool makers. With the greatest respect in the world, you cannot take a bootmaker and train him in two or three months into a man sufficiently expert to do that class of work. So it is that temporarily you must agree to an extension of the working hours of the people already employed.

Our policy as I said, is to insist upon the use of the unemployed labour wherever possible, because we don't want to build up in the minds of our people a disregard for shorter hours of work. There isn't a trade-union official in this room who doesn't know that there are certain types of men who will go to the employer and demand overtime, not that they like the hours, but they like the money attached to it. We of the trade unions want to keep control of this and prevent our people overlooking the importance of the shorter hour week. Long hours are a strain upon anybody. They are bad for production. The attraction of the compound rates is bad for the morale of the people, and it is something that we want to control as far as we can.

We have told the government that the hours are far too long. When I tell you that in a certain works men have been working 12 hours per day and seven days per week for over twelve months, you begin to realize what I mean by long hours. We said, "This is nonsense. These men will break down. Not only is it uneconomical production, but it will mean physical deterioration to the community." Thus the government has given instructions to all their managers that wherever possible the work week should not exceed 60 hours. You know that 60 hours is far beyond what we consider reasonable, but in the circumstances in which we exist to-day, coupled with a rest day, it may well be that we can stand this strain for some time longer.

Union Recognition

On the third point of our policy, the trade unions have secured from the government the fullest recognition of their claim to represent the worker in every phase of communal life. We claim we represent the working people, irrespective of where they are to be found. We are not only thinking of the workshop, but in terms of the whole communal life, the control of prices, air raid protection, rationing and supply of food, the welfare of the armed forces, refugee problems, the supply of munitions—our trade union representatives are already there serving in every phase of life. . . . .

I went to the government and said, "You are not allowing people to go into certain areas without proof that they have work or that they are there on business." They were doing that in order to control the spies. I said, "You have factories where you have sentries outside the door with bayonets and rifles, and I don't want our trade union officials to be held up by that sort of thing. If there is any doubt about our claim, let's have it out now. Our claim is a matter of right. We demand the right to visit any factory, workshop, warship, any form of activity where our members are employed, without vexatious restrictions. If that principle is challenged, let's have it out now." It was not challenged, and as a consequence all our full time officials were given a card of identity, which not only takes them into the protected areas, but which allows them to visit any works whatever. That card is issued by the Trades Union Congress, with the government's approval and stamp. That is something that you may find useful in organizing people.

Our principal claim, that we should be consulted in every form of activity, has been accepted by both of the governments that have so far served in this war. We are helping by this means to shape policies. We are trying to take some of the square pegs out of the round holes, because I find that once these men of great reputation, these marvelous business organizers, get into a different environment service they sometimes act with a stupidity that is incomprehensible. One wonders where reputations have come from sometimes. We are going to take a hand in that. We are not having Mr. Jones or Mr. Brown who, because he was accustomed to pressing a button and ordering people about in his own business, to do just as he likes now that he is in government service. We are gradually making good democrats of some of these people.

Sir Walter concluded this part of his address with a reference to the necessity of rebuilding the international trade union movement as represented in the International Federation of Trade Unions.

He then told the epic story of how the people of his islands have conducted themselves and ordered their lives under almost constant and savage attack. He emphasized the high morale of factory employees "working all through that" and added:

"We have a system of spotters, people we put on the roofs to watch until they are pretty certain airplanes are on top of them. That takes a bit of judgment with planes coming along at the rate of 150 yards a second. Yet our people are taking these risks."

(Sir Walter Citrine's appeal to the convention of the American Federation of Labor is given elsewhere in this issue commencing on page 1265).

According to a study in the *Monthly Labor Review*, published by the United States Department of Labor, an analysis of data covering nearly a million cases of industrial injuries both in the United States and in several foreign countries indicates that the older workers, on the average, are injured proportionately less frequently than the younger workers, although once injured, their injuries are likely to be more severe. The proportion of deaths increases sharply with advancing age; the percentage of permanent impairments is higher; and the healing period in temporary disabilities longer.

CONVENTION OF AMERICAN FEDERATION OF LABOR

Proceedings Featured by Resolutions on Defence Problems and Industrial Training—Prominent British Trade Unionist Wins Convention Support—"All Possible Aid to Great Britain" Urged by Delegates

MEETING in a period of accelerated industrial production on defence projects, the 60th annual convention of the American Federation of Labor held at New Orleans November 18-29, reflected in its discussions and resolutions the issues confronting American labour in the struggle for freedom now in progress. This was evident in the opening "key-note" speech of its president, William Green, who defined the challenge to American trade unions and announced that "we stand with those that express themselves through an overwhelming public opinion in favour of extending to Great Britain in her hour of need all the help America can give her, short of war."

It was also in evidence in the reaction of the convention to the speech of Sir Walter Citrine who stirred the delegates with a moving story of Britain and the British labour movement under the impact of a war against the same forces that had crushed trade unionism in Europe; and it was further emphasized in the message of President Roosevelt, urging that labour close its ranks as its contribution in presenting "in any emergency which might be enforced upon us the solid imposing front of a great and united democracy."

In addition to these manifestations of the attitude of American trade unionists toward the struggle, were a number of resolutions concerning the intensified industrial program engendered by defence requirements. In particular, there was a special report, unanimously adopted, containing specific recommendations on defence training. There were other resolutions dealing with the matter of adequate housing in defence industry areas and with prevailing wages in defence construction, while featuring the executive committee's report were sections on defence production and living standards.

Address of A.F. of L. President

In his opening address, President Green, analysing the causes of the present struggle, stated: "We in America and the working people in particular stand immovably in opposition to totalitarianism and in defence of democracy. We do that for national reasons as well as for economic reasons. We have learned from a study of the situation that trade unionism can only flourish and live where men are free. Freedom is the basis upon which our movement rests. Our democratic trade unions cannot live, they cannot exist under the totalitarian form of government, for the record shows that the dictator attacked, first of all, the trade unions when he seized power. And so we are praying this morning as we pray every day and every night that, in this heroic struggle between the forces of democracy and totalitarianism, Great Britain will win that heroic struggle in which she is engaged." Then he made his declaration (quoted above) of the stand of the A.F. of L. in support of Britain.

Continuing, Mr. Green dealt with the matter of unity in the trade union movement, and outlined a formula for adjustment to be worked out by committees representing conflicting groups.

President Roosevelt on Labour's Contribution to Democracy

It had been the intention of President Roosevelt to address the convention, but owing to the pressure of international events he was unable to do so. Accordingly, he sent a personal message in which he declared in part:

> Now we have come to a period which demands intense and sustained co-operation so that our beloved Republic can present, in any emergency which might be forced upon us, the solid, imposing front of a great and united democracy. In order to do this successfully all of us are called upon to work together in a common purpose and for the common good that these United States shall stand forever free and that the institutions, we as a free people enjoy, shall ever be preserved. To this end labour can make its contribution along with the rest of the American people. I am confident that this contribution will be generously and gladly given without reservation.
>
> Labour will lend its aid in planning for full efficiency of industrial production, in planning for selection, training and placement of new workers, in planning for full labour supply, in maintaining the social gains of recent labour and social legislation, in maintaining sound and uninterrupted work in the defence industries and in promoting sound employer-worker relationship at a time like this when the steady flow of production may be our greatest need. . . .
>
> Among the things which labour will contribute, is I venture to suggest, an unselfish, a far sighted and a patriotic effort to bring about a just and honourable peace within the now divided labour movement. Labour leaders, with the interest of the nation at heart and the advantage of their followers in mind, can, I am sure, find the way to reach such a peace.

In reply, President Roosevelt was pledged the full support of the American Federation of Labor in the execution of the government's defence plans and policies, and was informed that the Executive Council had recommended to the convention that a committee representing the American Federation of Labor was authorized to meet with a committee representing the C.I.O. for the purpose of negotiating an honourable peace and the re-establishment of unity and solidarity within the ranks of labour.

Appeal of Sir Walter Citrine to American Labour

In extending fraternal greetings from the British Trades Union Congress, Sir Walter Citrine (its secretary) pointed out that the relationship between the A.F. of L. and the T.U.C. was more than an exchange of delegates; that it had grown into the intimacy of a close friendship, "enabling me to talk to you with the frank intimacy of an old friend." He traced the back-ground of both the British and American labour movements and their close affinity, based upon common ideals of a democracy that was not so much a form of government as it was a way of life.

Outlining the development of democracy in both countries through the trade union movement, Sir Walter declared "no country, no movement, has made greater progress towards the attainment of its ideals than has the British trade union movement." He indicated how in Great Britain "the instrument of taxation had been used to effect a very extensive redistribution of the wealth of the country," until "out of every five dollars of income of the richest people of our country, $4.37 is taken in taxation." He dispelled an impression that "our country is governed by old and very rich families" . . . "The families may be old but very few of them are rich. Nor do they exclusively govern our country. The development of our political democracy has meant that on two occasions Labour has formed the government of our country. Our men are to-day serving in the highest posts in the state in the present cabinet. . . ."

In a frank and dramatic summary, Sir Walter reviewed the effects of totalitarian war upon the lives of British people and upon the edifice of labour standards established through the years. (This particularly interesting and informative section of Sir Walter's address is extracted from the verbatim report of the proceedings of the convention and is given elsewhere in this issue commencing on page 1261). In concluding his address, Sir Walter made a direct appeal to his American colleagues in the trade union movement. "Our need is urgent and extensive," he stated, and added: "It may be true that the first line of defence of American democracy is the British Navy. I want you to make the American workshop the first line of defence of all democracy. This battle will be fought out in the workshops. . . ."

Stating that much "depended on the resources, the capacity, the expedition with which you can produce munitions", the speaker thanked American labour "for the generous help we have received from you," and declared that "American labour can conquer the Nazis without firing a shot."

"All Possible Aid to Great Britain"

At the conclusion of Sir Walter's address, President Green, paying tribute to the British people, promised that "the American Federation of Labor will make it our chief objective to send a steady stream of war materials of the things that Britain needs most of all, in this great hour of their deepest need so that they can successfully win this great fight." Endorsing the words of its president, the convention unanimously adopted the following resolution calling for all possible aid to Great Britain:

> Whereas, the totalitarian nations are everywhere imposing their rule of violence and terror, and
>
> Whereas, the successes of the totalitarian nations have everywhere been followed by the destruction of democracy and the free trade union movement, and of all the moral, ethical and religious values upon which our civilization rests, and
>
> Whereas, the outcome of the war now being fought by the totalitarian powers against the Democracies will affect the lives of members of free trade unions and the generations to succeed us, we believe that, to protect our security and our way of life, Great Britain and her Allies must win and Democracy survive, therefore be it
>
> Resolved, that this convention calls upon the President and Congress to take steps to provide all possible moral and material aid to Great Britain and her Allies.

(Sir Walter Citrine was honoured by the convention which instructed that his address be printed in pamphlet form and made available not only to all affiliated labour bodies but also "given the widest circulation to business, educational and religious groups throughout the land").

Recommendations on Defence Training

With the rapid expansion of United States industry in defence projects, the problem of "defence training" (or training for industries engaged in war production as it is known in Canada) has suddenly become of major importance. One of the features of the convention was a special report on defence

training by the A.F. of L. Conference on Education. This report, which contained specific recommendations, was referred to the Committee on Resolutions. This Committee's report, which was adopted, deals especially with the problem of providing an adequate supply of skilled workers to meet urgent requirements. Since this situation is paralleled in Canada considerable space is accorded here to the recommendations of the A.F. of L. on this problem.

The Committee reviewed the back-ground of the problem, intensified by a decade of depression in which practically no apprentices were trained, and during which skilled craftsmen had either lost their trade or had found other occupations. In order to meet the demands of stupendous production "in which the time element is of critical importance", the Committee considered that "the agency through which defence labour must be mobilized is the United States Employment Service with the co-operation of unions and employers."

Training to be on the job.—The first recommendation was that "all defence training must be on the job," and on this point the Committee observed:

Training must take place in work surroundings and under the conditions work is to be done. There is no time for school instruction which must be unlearned on the job before the learner can properly be taught for his job. Schools should be equipped and ready to give related and supplementary instruction on the problems of work and equipping the worker to be ready for advancement in assignments and in status. Control over training on the job and related supplementary instruction in the school must be under representatives of the union and management, and should be provided for through union agreement. This committee should be responsible for the training program.

Apprentice Training.—Regarding apprentice training, the Committee stated:

Training on the job includes apprentice training as well as training for specific operations. Apprentice training looking to all-round craftsmen requires study and experience over years. There are no short cuts even in an emergency, but apprentice training systematically carried on over the years is necessary to assure industries an adequate supply of workers for this machine age. Plans have already been initiated Federally for the expansion of the apprentice training program but we urge adequate funds for still further expansion in the coming year. We must start now to overcome scarcity of apprentices due to ten years of depression as well as to meet increased needs.

Co-ordinated Programs.—The Committee's second recommendation dealt with co-ordinated defence programs, thus:

Training must be based on a program of defence production submitted by the Advisory Commission on Defence. At the present time with separate agencies given independent appropriations and launching their programs outside of established controls there is a competition in training, irritating and confusing to employers and workers that has well nigh bred revolt. Plans for training on the job should center in the United States Department of Labor with related training centered in the Federal Board of Education and cleared through the U. S. Employment Service with the Defence Commission co-ordinating in advance estimates of needed workers. Joint advisory committees consisting of equal representation from employers and labour should function at every level. . . .

The same type of co-ordination should be operative at state and local levels with representative committees of employers and employees. All plans should clear through the appropriate employment agency. . .

Planning for Production and Labour Requirements.—On the factor of funds and advance planning of production and labour requirements, the Committee stated:

We maintain that appropriation of funds should be made only for specific programs. The huge sums recently voted by Congress have proved an embarrassment to educators suddenly called to expand far in excess of their plans and are definitely demoralizing to educational and training standards. Training on the job places the training costs on industry where they belong and relieves the public from the expense of training and equipment.

Employers must become accustomed to add to their advance planning of the material side of production, advance planning of needed workers by categories and in time to permit of training.

In that section on "Defence" of the Executive Council's report, which was adopted, labour's relation to defence industrial requirements were further specified. Among the principles set forth in that report were the following:

That labour should be represented on all defence agencies dealing with matters affecting labour's welfare, and that such representation means selection by the group concerned.

That there should be equal representation of employers and employees on advisory groups connected with employment control.

That should wartime conditions develop, the following principles become imperative:

(*a*) universal obligation to service for defence—industrial or military—under the democratic conditions.

(*b*) labour should have representation on all policy making and administrative agencies and draft boards.

(*c*) that labour standards and other provisions for social welfare must be maintained under emergency conditions as essential to efficient production as well as to national morale.

Opposition to Awarding Government Contracts to Firms Violating Labour Laws

To the Committee on Legislation were referred a number of resolutions urging amendment of the Walsh-Healey Public Contracts Act to prohibit the awarding of contracts by the United States Government or its departments to concerns which have been found to have denied their employees the right to

organize and to bargain collectively. The Committee approved this proposed amendment and was supported by the convention.

Abolition of Merit Rating in State Unemployment Insurance Laws

There were two resolutions which called for legislation to prohibit merit rating under state unemployment insurance laws. One of these requested the endorsement by the convention of national legislation to prohibit employers' merit rating in connection with unemployment insurance but to permit in appropriate cases, after complete elimination of employees' contributions, horizontal reduction of employer contributions.

The adopted recommendation of the Legislation Committee was that this resolution be referred to the Executive Council with instructions to make a study of this subject and to take such action as seems most advisable to secure the elimination of "Employers Experience Rating" plans without injury to the workers or the unemployed.

Another adopted resolution urged the enactment of legislation to secure the benefits of unemployment insurance for agricultural workers.

Opposition to Increased Working Hours

In a report, which was adopted by the convention, the Committee on the Shorter Work Day, advocated opposition to any lengthening of hours. The report stated that the defence program accorded the first chance in eleven years "to put the unemployed back to work" and declared:

> There is no actual shortage of man power. On the contrary, a marked over-supply of labour exists. With millions still unemployed, there can be no valid argument advanced for lengthening hours on the basis of inadequate man power. About 2,000,000 men and women have gone back to work since the defence program started in May, 1940. There is a shortage reported of men for certain highly skilled and specialized jobs—toolmakers, loftsmen, coppersmiths, riveters for airplanes and others. Overtime at overtime pay will help here. Also, training on the job. Any general lengthening of work hours will not solve the problem.

Two resolutions proposing application of six hour work shifts to plants employed on defence contracts and to the rearmament program were referred to the Executive Council for study and action.

Among the many speakers to address the convention were Miss Frances Perkins, Secretary of Labor, and Mr. Edward A. Jamieson, president of the Vancouver-New Westminster and District Trades and Labour Council and fraternal delegate of the Trades and Labour Congress of Canada. The limits of space preclude a summary of their addresses as well as summaries of various committee reports and other resolutions.

CONVENTION OF CONGRESS OF INDUSTRIAL ORGANIZATIONS

Declaration on Preservation of Peace and Democratic Institutions—Demand for Guarantees of Collective Bargaining on Government Contracts—Recommendations on Industrial Training for Defence

THE third constitutional convention of the Congress of Industrial Organizations was held in Atlantic City, November 18-22, 1940, with 438 delegates in attendance, representing 35 national and international unions, 8 national organizing committees, 32 state industrial union councils, 114 city and county industrial union councils, and 108 local industrial unions.

In addressing the convention Hon. Thomas Taggart, Mayor of Atlantic City, stated that "in the past your conventions have been followed closely by the people of this nation. Now the eyes of the people all over the world will be focused on your deliberations, because every major move of the United States today holds the greatest interest among the other nations of the world."

Address of President Lewis

Expressing the thanks for the welcome accorded the delegates, President Lewis, paid tribute to the leadership of the late William Carney and as a mark of respect asked the delegates to stand and observe one minute's silence.

Mr. Lewis drew attention to the achievements of the organization, which he stated were "made possible by the faith and energy and the collective enterprise and loyalty of its members" and warned against internal discord. He denounced reports appearing in the public press to the effect "that the policies of C.I.O. are conceived and endorsed and supported, and encouraged, and administered by Communist philosophy, or Nazi philosophy, or Fascist philosophy, or any other philosophy," declaring such to be lies.

In advising the delegates of his decision to relinquish the office of president of the C.I.O., he urged them to preserve their union and "when you elect a new president don't elect him unless you think you can agree with him and entrust him and support him, because otherwise you will pay a price, and worst of

all the men and women who pay you will pay a price."

Report of Committee on Officers' Reports

The report of the Committee on Officers' Reports was divided into four major sections, viz., (1) organizational and administrative functions; (2) legislative activity; (3) national defence; and (4) unity of labour.

Under the first heading the committee reported that "the organization had met its severest tests during the past year and has come through them with greater strength and understanding than ever before." A review of the organizational work of the Congress was presented, and in this connection the committee stated "our affiliates in Canada, facing directly all the rigors that labour must undergo in a nation actually at war, have consolidated their ranks in the Canadian Congress of Labour in order to serve the workers in their time of crisis. This Congress will be joined by all our affiliates in the Dominion."

Dealing with legislation, the committee contended that the C.I.O. had saved the Wagner Act and the Wage Hour Act "from crippling amendments."

In regard to national defence, the committee referred to the policy enunciated by the executive board in June, 1940, and calculated "to preserve labour's rights under a defence program for our nation, so that that program might achieve the goal which is in the heart of every true American—to assure the security of our nation, to preserve the peace of our people, and not to become involved in the present horrible war raging in Europe."

Referring to labour unity, the committee stated that "unity in the labour movement can be accomplished only if the unions in the C.I.O. can continue to organize the unorganized workers in the mass production and basic industries along industrial lines. And it must be all-inclusive. It must protect and include all organizations in the C.I.O." The commitee contended that "any program for unity should involve a joint convention of all labour organizations, including those of the American Federation of Labor, the railroad brotherhoods and the C.I.O., with existing jurisdictional differences to be adjusted in such a convention." The following recommendation was submitted by the committee: that this convention continue its negotiating committee, consisting of Mr. John L. Lewis, Mr. Philip Murray and Mr. Sidney Hillman, with the authority to participate in any future negotiations, looking forward to real labour unity, which must be in conformity with the foregoing principles."

After a prolonged discussion, the report of the committee was unanimously adopted. In conclusion the committee paid tribute to the leadership of President Lewis, who signified his intentions of retiring from office at the close of the convention.

Constitution Amended

In the report of the committee on Constitution it was recommended that Article III, Section 6, of the constitution be amended to read:

"National or international unions and organizing committees may not be suspended or expelled except upon a two-third vote at the convention. This provision may not be amended except by a two-third vote at the convention."

Rejection of Nazism, Communism and Fascism

The convention adopted without discussion, the following declaration:

The Congress of Industrial Organizations is an American institution dedicated to the attainment of its well defined economic and social objectives.

In the words of President John L. Lewis, "we yield to no man the right to challenge our Americanism or the Americanism of the organizations which at this moment we represent; and those who infest the columns of the public press with their vile fulminations, saying that the policies of the C.I.O. are conceived and endorsed, and supported, and encouraged, and administered by Communist philosophy, or Nazi philosophy, or Fascist philosophy, or any other philosophy, they lie."

We neither accept or desire—and we firmly reject consideration of any policies emanating from totalitarianism, dictatorships and foreign ideologies such as Nazism, Communism and Fascism. They have no place in this great modern labor movement.

The Congress of Industrial Organizations condemns the distatorships and totalitarianism of Nazism, Communism and Fascism as inimical to the welfare of labor, and destructive of our form of government.

The Congress of Industrial Organizations must organize the unorganized and build up and strengthen our unions. We must work for a greater and better America. In this great task we must not be diverted by strange, foreign doctrines opposed to our concept of industrial and political democracy.

There is room for all of us in this great movement to work for these noble ideals and sound objectives.

We highly recommend that the Congress of Industrial Organizations continue to carry on in the spirit of real American trade unionism to secure economic justice and social security, and to make of this country a better place in which to work and in which to live.

Preservation of Democratic Institutions

As a substitute for a number of resolutions submitted by various affiliates on subject of the "preservation of peace and democratic

institutions," the committee recommended a covering resolution as follows:

(1) This Convention reaffirms its determination that this nation must not enter into any foreign entanglements which may in any way drag us down the path of entering or becoming involved in foreign wars. Eternal vigilance by organized labor will be the basic guarantee that a repetition of 1917 will be avoided and that peace and security for our nation will be preserved; and

(2) The Executive Board of the C.I.O. at its meeting in June, 1940, unanimously adopted a policy relating to national defence and stated that the Congress of Industrial Organizations, its officers, constituent unions and membership are fully prepared to discharge our responsibilities in the approaching national emergency to the best interests of the United States of America. The Executive Board made it clear and declared in unequivocal terms that we will defend the free institutions of this republic, under which the Declaration of Independence and the Constitution give us the greatest democracy on earth—a government of the people, for the people, and by the people. This policy is reaffirmed in clear unmistakable terms.

The Congress of Industrial Organizations and its millions of members and the members of their families are determined to protect and defend this nation not only against our foreign enemies who may dare to attack us directly but also against forces within our nation who place the profits of their financial and industrial enterprises above the well-being of the millions of common people.

(3) Labor believes that national defence means the creation of a nation of strong, healthy and well-fed people employed at work at decent and substantial wages and dedicated to the belief that the democratic way is the best way of living. Labor believes that national defence means the continued growth and expansion of powerful industrial unions which will protect and defend the interests and status of their members to achieve economic security. Labor believes that national defence means the vigilant protection and constant safeguarding of the exercise by all of our cherished civil rights of speech, press, assembly, and worship. Labor believes that ignoring these fundamental principles and limiting our nation's activities to the building of mere armouries or aeroplanes, tanks and guns will not serve but rather will defeat the basic interests of national defence.

This substitute resolution was adopted by unanimous vote of the convention.

Guarantees of Collective Bargaining

The subject matter of five resolutions dealing with guarantees of collective bargaining in government contracts, loans and purchases was covered by a substitute resolution submitted by the committee. This resolution in part was as follows:

(1) The Congress of Industrial Organizations vigorously reaffirms its determination to obtain from the federal government a promulgation of a national policy that no government contracts be awarded or loans be made to and no gold or silver be purchased from any employer who does not comply with the laws of the nation which have been enacted for the benefit and protection of labor;

(2) This policy can be effectively enforced only through the issuance by the President of the United States of an Executive Order which would:

(*a*) Compel all agencies and departments of the United States government to deny government contracts or loans to and to refuse to purchase gold or silver from those who are not complying with orders of the National Labor Relations Board or with the orders of any other administrative body charged with the enforcement of labor laws; and

(*b*) Apply the same policy to the contracts and loans which have already been obtained under our national defence program.

(3) This Convention condemns the action of the government officials in awarding government contracts and loans to scores of anti-labor corporations such as Bethlehem Steel Company, Ford Motor Company, and the Phelps-Dodge Corporation, while these companies refused to comply with the labor laws of the nation and deny to their employees their right to organize into unions of their own choosing.

National Labour Relations Act

Four organizations presented resolutions dealing with the National Labour Relations Act, but the subject was covered by the following substitute resolution submitted by the committee:

(1) That the C.I.O. hereby expresses its unalterable opposition to any amendments to the National Labor Relations Act at the present time;

(2) That C.I.O. calls upon the administrators of the Act to strengthen their procedures for enforcement, to avoid all compromise and to give workers the full benefit of collective bargaining through industrial unionism;

(3) That C.I.O. calls upon Congress to appropriate sufficient funds to the Board to assure the effective administration of this legislation;

(4) That C.I.O. affiliates be cautioned to use the machinery of the Act only as an aid to sound organizing activity; and

(5) That the C.I.O. expresses its conviction that the labor policy in national defence embody the tested and proven principles of the National Labor Relations Act guaranteeing to workers the right to organize into unions of their own choosing without interference by employers and requiring employers to bargain collectively with the freely chosen representatives of their employees.

Industrial Training for Defence

The convention adopted a resolution requesting the Federal Government in its industrial training for national defence to:

(1) adjust training programs to needs that can be clearly foreseen and calculated.

(2) make a thorough-going examination of the need for additional workers so that the training programs may be adjusted thereto.

(3) make effective in each program on Federal, state and local levels, the participation of organized labor in the determination of policy and practice of the national defence training programs.

Other Resolutions Adopted

Among the recommendations contained in other adopted resolutions were:

Requesting the continuation on an adequate basis the Works Progress Administration and that those employed on W.P.A. projects be assured all their rights of collective bargaining.

Calling upon the administration to implement its platform pledge to hold a national conference of the leaders of labour, industry, the government, farmers and consumers to agree upon ways and means to end unemployment.

Supporting a comprehensive youth education and training program.

Development of the wage structure, working conditions, and a shortening of the work day and work week.

Continuation of the C.I.O. policy of co-operation with farm groups.

Opposition to any form of discrimination, whether political or economic, based upon race, colour, creed or nationality.

Supporting legislation intended to prohibit the imposition of state poll taxes as a condition to the exercise of the franchise in federal elections.

Opposing all amendments to the Wage-Hour Law intended to weaken the law and urging an extension of the provisions to cover groups now exempted.

Recommending the adoption of the La Follette-Thomas Oppressive Labour Practices Bill.

Upholding the administration and operation of the federal social and labour legislation.

Seeking the enactment of a national unemployment compensation system "on a uniform federal basis with extended coverage to all workers, adequate benefits, low eligibility standards for part time employees, limited disqualification, and repeal of employer merit or experience rating."

Endorsing an old age pension program based upon a flat pension of $60 per month with supplementary allowance to wives up to a maximum of $90 per month for each married couple with a qualifying age limit of 60 years and eligibility to all persons; the system to be administered through a single federal organization with the additional funds to be secured by taxation.

Extension of the merit system throughout civil service.

Adoption of a national health program, including insurance for medical care on a federal basis, cash benefits for temporary disability to workers, and construction of needed hospitals throughout the country. C.I.O. unions were asked to assist in the formation of general medical co-operatives in their communities.

Revision of the tax structure and enactment of legislation eliminating all forms of consumer taxes, direct or indirect, application of a genuine excess profit tax, abolition of tax-exempt securities, imposition of progressive tax rates "upon upperbracket corporate and personal incomes," and increased inheritance taxes.

Labour representation on government agencies.

Development of co-operative organizations.

Granting collective bargaining to all government employees.

Establishment where necessary of apprenticeship systems in industries under the joint control of organized labour and management, according to the standards set up by the Federal Committee on apprenticeship.

Adoption of an adequate unemployment insurance bill for seamen.

Election of Officers

The officers elected were: President, Philip Murray, Washington, D.C.; Vice-presidents, Emil Rieve, New York, N.Y., Sherman H. Dalrymple, Akron, Ohio, R. J. Thomas, Detroit, Mich., Frank Rosenblum, New York, N.Y., Reid Robinson, Denver, Colo., Joseph Curran, New York, N.Y.; secretary-treasurer, James Carey, Washington, D.C. In addition to the elected officers, the executive board of the C.I.O. consists of one representative from each of the affiliated central organizations.

ANNUAL CONVENTION OF BRITISH TRADES UNION CONGRESS

THE British *Ministry of Labour Gazette* for October contained a summary of the proceedings of the annual convention of the British Trades Union Congress, from which the following information has been taken.

The seventy-second annual Trades Union Congress was held at Southport on October 7, 1940, and the two following days. The president was Mr. W. Holmes, chairman of the General Council.

The number of delegates appointed to attend the Congress, as shown in the statistical statement compiled by the General Council, was 645; the number of organizations affiliated to the Congress, including those organizations with an aggregate membership of 108,000, which did not appoint delegates, was 176, with a membership of approximately 4,867,000 at the end of 1939.

After addresses by the president and by Mr. C. R. Attlee, M.P., the Congress proceeded to consider the General Council's report, taking in connection therewith a number of resolutions prepared by the General Council or proposed by affiliated unions.

Much of the discussion was concerned with matters arising out of the war, and a special resolution, carried by an overwhelming majority, recorded the inflexible resolve of the Congress to go on with the struggle against the aggressor Powers; approved the measures taken by the General Council to safeguard the interests of trade unionists and to enlist the active co-operation of the organized workers, through their unions, to make the fullest use of the country's man-power and industrial equipment; expressed appreciation of the Council's efforts to obtain for the trade unions a fuller recognition of their claim to represent the working people in all matters affecting industry and their conditions of life and labour; paid homage to those who, in daily

hazard of their life, have maintained the national defences and communications against incessant enemy attacks; expressed the sympathy of Congress with the victims of enemy attack; and called for the provision of adequate shelter against air raids, for arrangements to meet the needs of those rendered homeless and left without resources in bombed areas, and for the organization by the Government of arrangements for the safety and comfort of those compelled to seek shelter outside their homes.

Among the subjects dealt with in other resolutions which were adopted by the Congress were the allowances to men in H. M. Forces and their dependents; the substitution of blinds for permanent black-out arrangements in workshops in view of the effect of the latter on the health of the workers; the disregard by certain Local Authorities and other employers of the provisions made by Parliament in respect of conscientious objectors to military service; the working of the National Arbitration Tribunal and the effects of its findings on trade union aims and conditions; the restrictions imposed upon the trade unions by the Trade Disputes and Trade Unions Act, 1927; the Anomalies Regulations in relation to the conditions for the payment of unemployment benefits to married women; the income limit for National Health Insurance; the reform of the laws relating to workmen's compensation; the payment of National Health insurance benefit in addition to workmen's compensation to workers who are incapacitated; the welfare of young children in war-time; and the preparation of plans to deal with the effects of the diminution of armament manufacture after the war.

On the last day of the Congress Mr. Ernest Bevin, M.P., Minister of Labour and National Service, appealed for every possible effort to expedite the production of armaments and equipment in order to shorten the war, and gave particulars of further provisions which were being made for the welfare of workers engaged in or transferred to munitions production.

Mining Accidents in British Columbia in 1939

The annual report of the Minister of Mines, British Columbia, for the year ending December 31, 1939, indicated that there were 22 fatalities in all phases of metalliferous mining during that period. "Ordinary care", states the report, "would have averted most of these fatalities as few were due to abnormal or dangerous conditions, but were due to a dangerous method of doing routine work."

Coal Mining.—During 1939, 2,976 persons were employed in and around coal mines. Two fatal accidents occurred during the year as compared with ten for 1938.

The ratio of fatal accidents per 1,000 persons employed was 0·67 as compared with 3·37 for 1938. In 1937 the ratio was 3·17; in 1936, 2·84; in 1935, 1·67; in 1934, 2·07; in 1933, 0·97; in 1932, 2·21; in 1931, 1·22; and in 1930, 11·62. The average for the ten-year period being 3·34.

The number of fatal accidents per 1,000,000 tons produced during 1939 was 1·35; during 1938 the figure was 7·63; in 1937, 6·92; in 1936, 5·94; in 1935, 4·21; in 1934, 4·45; in 1933, 2·37; in 1932, 5·21; in 1931, 2·81; and in 1930, 28·64. The average for the ten-year period being 7·65 per 1,000,000 tons of coal mined.

Trade Unions Registered Under Trade Unions Act

The report of the Secretary of State of Canada for the fiscal year ending March 31, 1940, contains a statement from the Registrar's Branch of that department which shows that seven trade unions registered under the Trade Unions Act. The seven unions registering were: The Canadian Waterfront Workers' Association, Vancouver, B.C.; the Longshoremen's Union of Windsor, Nova Scotia; the Steel Workers' Local No. 1, Saint John, N.B.; the National Union of Railwaymen, Winnipeg, Man.; the Longshoremen's Union of King's County, Nova Scotia, Wolfeville, N.S.; the Kelly Douglas and Co., Ltd., Employees' Association, Vancouver, B.C.; the W. H. Malkin Company's Warehouse Employees' and Truck Drivers' Association, Vancouver, B.C.

According to an announcement made recently by the Honourable J. L. Ilsley, Minister of Finance, National Housing Act loans approved in November, 1940, numbered 400 and aggregated $1,221,252. All loans were to finance single family dwellings.

This increase now brings total National Housing Act approvals to above $65,000,000, and the number of housing units provided for to 19,287.

New applications received continue to exceed the number received last year. In November, 1940, these numbered 330 against 319 in the corresponding month in 1939.

Of the 400 dwelling units financed in November, 1940, approximately 27 per cent were financed by loans of $2,500 or less, 56 per cent by loans of $3,000 or less and 75 per cent by loans of $3,500 or less. The number of small 90 per cent loans approved to finance dwelling units valued at $2,500 or less was 59, and the average loan for the month was $3,053.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, OCTOBER, 1940

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting November 1 was 12,392, the employees on their pay-rolls numbering 1,364,720 persons.

(2) The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were employed in the period under review. The number of unions reporting for October was 1,971 having an aggregate membership of 262,922 persons, 5·0 per cent of whom were without employment on November 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of November, 1940, as Reported by Employers

Industrial employment showed pronounced, contra-seasonal expansion at the beginning of November, continuing the uninterruptedly favourable movement in evidence since the first of April. During the intervening months, the forces of the co-operating establishments have been increased by some 267,400 men and women, while the index, based on the 1926 average as 100, has risen by over 24 per cent to 139·2 at November 1; this advance exceeds that reported in the same period in any other of the twenty years for which statistics are available. The index at the latest date was the highest so far recorded, the previous maximum having been that of 136·2 at October 1, 1940. The figure for November 1, 1939, was 123·6.

The Dominion Bureau of Statistics tabulated returns from 12,392 establishments employing 1,364,720 persons at the beginning of November, an increase of 28,539 or 2·1 per cent over their October 1, 1940, staffs. As already stated, this improvement is contrary to the usual seasonal trend from October to November; accordingly, the index of employment, when corrected for seasonal influences, considerably advanced, the adjusted figure rising from 129·6 in the preceding month, to 133·2 at the beginning of November.

Manufacturing showed further improvement, reversing the usual seasonal movement in the late autumn. The gain resulted in the establishment of a new all-time high level of employment. From 143·8 at October 1, the index rose to 144·6 at the beginning of November, when it was over 18 per cent above the November 1, 1939, figure of 122·1, the previous maximum for that date. The greatest expansions in the month under review were reported by iron and steel plants, which enlarged their working forces by some 9,600 men and women. On the other hand, there were substantial seasonal losses in fruit and vegetable canneries and lumber mills; over 6,400 persons were released from the former and some 2,100 from the latter group.

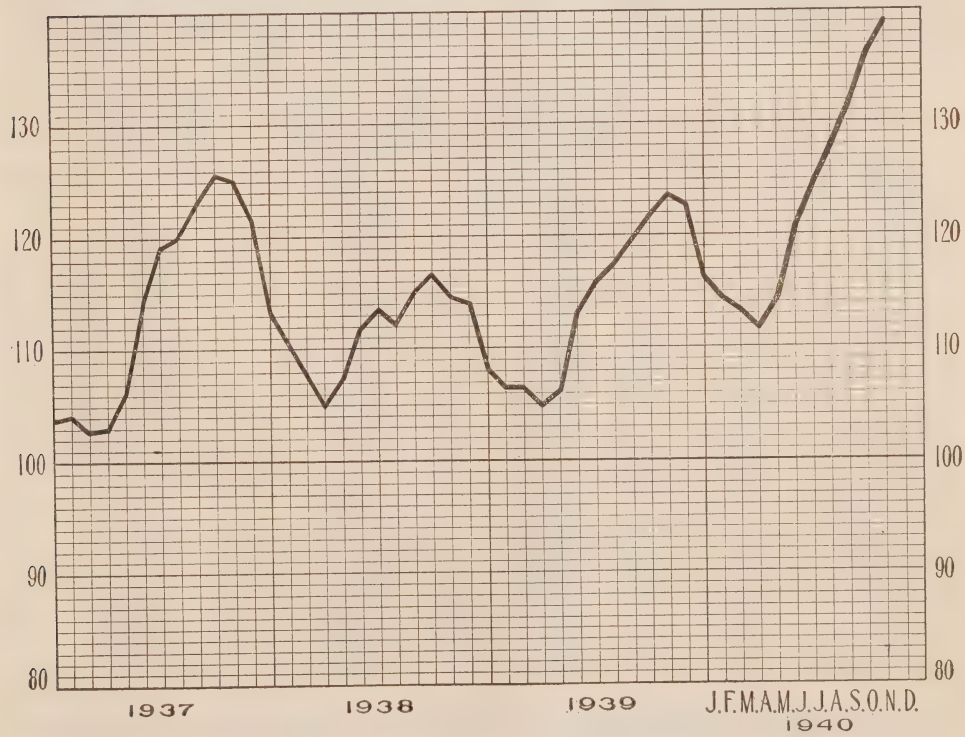
Among the non manufacturing industries, logging was decidedly more active as the season progressed, the co-operating camps furnishing work for 23,200 additional employees; with two exceptions, (viz., 1937 and 1939) this was the largest November 1 increase in the years for which data are available. Services, trade, mining, building and road work also afforded more employment, but steam railway operation and construction and maintenance released employees, in accordance with the custom at November 1 in previous years.

A fuller analysis of the situation in the various industries as at November 1, 1940, is given, following the text dealing with conditions in the economic areas and the leading cities.

For November 1 of last year, 11,914 employers had reported staffs aggregating 1,206,183, an increase of 18,914 persons, or 1·6 per cent, as compared with their October 1, 1939, returns. Manufacturing, logging, trade and mining had then shown considerable gains, while transportation and construction had released a larger number of employees.

In recent years of the record, the unadjusted indexes at November 1 have been as follows, (1926=100):—1940, 139·2; 1939, 123·6; 1938, 114·6; 1937, 125·2; 1936, 111·0; 1935, 107·7; 1934, 100·2; 1933, 91·3; 1932, 84·7; 1931, 103·0; 1930, 112·9; 1929, 124·6; 1928, 118·9 and 1927, 108·8.

Employment in Financial Institutions



For some months, statistics of employment have been collected from banks, trust companies and stock market operators. For November 1, 1940, 402 firms and branches in these lines of business reported staffs aggregating 33,550 persons, compared with 33,689 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade industries bring the total number of employees included in the November 1 survey of employment to 1,398,270 in 12,794 establishments, and slightly lowers the index of 139·2 in the industries above enumerated, to 138·3; when the employees of the co-operating financial organizations were added to the figures for October 1, 1940, the index was lowered from 136·2 to 135·5. The November 1, 1939, index had stood at 123·6 without the figures from financial institutions, and at 123·2 when they were included.

Estimates of Total Number of Wage-Earners in Employment and Unemployed

The Social Analysis Branch of the Dominion Bureau of Statistics prepares monthly estimates of the total number of wage-earners, of those in employment and those unemployed throughout the Dominion. The estimates are based upon the census definition of wage-earners as one who has or has had a job from an employer in any field of work, including the following and all other classes of industry: agriculture, fishing, trapping, forestry, mining, manufacturing, construction, transportation, communications, trade, finance and services—professional, public, domestic, personal, etc., etc. Also according to the definition given in the census volumes, the unemployed are those

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

who have at one time had gainful employment but are no longer employed. This definition automatically excludes young persons just leaving school and others who have never had a job; persons who have retired; those living on income; those reporting themselves at the census in the class, "No occupation"; employers and persons working on their own account are also excluded.

It may be noted that the estimated number of wage-earners shows some variation from month to month, the figure expanding or contracting in response to seasonal, secular and cyclical influences. The variation is largely at the expense of the workers classed as "on their own account"; it is, however, also true that when employment is active, either generally or in a particular industry, persons not normally belonging to the wage-earning class (in the broad sense of the word), will take positions, later to retire therefrom without actively seeking work at other periods, and without experiencing the privations frequently associated with unemployment. An illustration of such cases may be found during the canning season, when work of this nature will call forth a considerable body of workers who do not ordinarily look for employment outside their homes in other parts of the year; another example is the employment of students and others in summer hotels during the active season, and in retail trade during the Christmas rush.

It should be noted that the information available does not permit allowance to be made in these calculations for enlistments in the armed forces since the outbreak of war. Thus the estimates of the total number of wage-earners include some enlisted men who were unemployed wage-earners prior to enlistment. The estimates of wage-earners in employment are entirely exclusive of enlisted men, but the estimates of unemployed wage-earners include a considerable number of previously unemployed wage-earners who have now enlisted. Since enlisted men are not included as wage-earners, there is in these figures an overstatement of the total number of wage-earners and also a corresponding overstatement of the number of unemployed wage-earners. Accordingly, the estimates of unemployment in recent months are exaggerated by the number of enlisted wage-earners who were without jobs when they joined the active forces. Such factors as unrecorded emigration within the last year or two may have an effect on figures based on the Census, which is now nine years away; no adjustment can be made for those factors.

The following table shows, in thousands, the estimated total of wage-earners, and of those employed and those unemployed, in recent months, together with figures for September in the period, 1928-1939.

September	Total Estimated Number of Wage-earners (in thousands)	Estimated Number of Wage-earners in employment (in thousands)	Estimated Number of Wage-earners unemployed (in thousands)
1928	2,461	2,434	27
1929	2,623	2,576	47
1930	2,683	2,388	295
1931	2,583	2,144	439
1932	2,465	1,829	636
1933	2,495	1,909	586
1934	2,528	2,058	470
1935	2,591	2,184	407
1936	2,630	2,267	363
1937	2,812	2,587	225
1938	2,748	2,402	346
1939	2,806 1/	2,506 2/	300 3/
1940	2,962 1/	2,805 2/	157 3/
1940—			
January	2,732 1/	2,355 2/	377 3/
February	2,725 1/	2,338 2/	387 3/
March	2,695 1/	2,304 2/	391 3/
April	2,720 1/	2,353 2/	367 3/
May	2,794 1/	2,489 2/	305 3/
June	2,843 1/	2,568 2/	275 3/
July	2,872 1/	2,634 2/	238 3/
August	2,910 1/	2,709 2/	201 3/
September	2,962 1/	2,805 2/	157 3/

1/ Includes previously unemployed men who have enlisted. 2/ Excludes enlisted men. 3/ Includes enlisted men who were previously unemployed wage-earners.

The total estimated number of wage-earners increased by some 52,000 between August and September; this figure in recent months has been higher than in any other month for which an estimate has been made. The estimated number in employment, at 2,805,000, was also greater than in August, 1940, or any earlier month for which an estimate has been prepared.

The estimated number unemployed was 157,000, a decrease of 44,000 from the preceding month, and of 143,000 from September, 1939; the latest figure was the lowest for September in any year since 1929. The proportion of unemployed in the total estimated wage-earning population was 5·3 per cent, as compared with 13·8 per cent in January, 1940, and 6·9 per cent in August, 1940. In September, 1939, the percentage of unemployment calculated from these estimates had been 10·7.

Employment by Economic Areas

Seven of the nine provinces shared in the upward movement indicated at November 1. The exceptions were Saskatchewan and British Columbia, where seasonal losses moderately lowered employment; the declines, however, were below average. Industrial activity in the various provinces generally continued at an exceptionally high level.

Maritime Provinces.—There were increases in employment in Prince Edward Island, Nova Scotia and New Brunswick, resulting in a large contra-seasonal advance in the Maritime Provinces as a unit. Returns were received from 870 employers in this area with 99,526 workers on their payrolls, compared with 95,471 at the beginning of October. Manufacturing as a whole showed moderate curtailment; additions to staffs were recorded in vegetable food and some other plants, but lumber, animal food, pulp and paper and iron and steel factories were slacker, the losses in some cases being seasonal in character. Among the non-manufacturing divisions, heightened activity was indicated in transportation, construction and trade, and there were pronounced seasonal increases in logging camps.

Little general change had been recorded at November 1, 1939, by the 833 co-operating establishments, whose payrolls had included 87,250 men and women; the index was then some sixteen points lower than at the latest date, when industrial activity was greater than at November 1 in any other year for which information has been prepared.

Quebec.—Further important expansion was shown in Quebec, chiefly in logging, although manufacturing, building and road work and trade also afforded more employment. On the other hand, there were losses in transportation and railway construction and maintenance, while mining, communications and services showed little general change. Within the manufacturing group, the lumber, vegetable food and pulp and paper divisions reported a

[1] The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

falling-off, in some cases of a seasonal character; there were, however, increases in the chemical, electrical apparatus, iron and steel and some other classes.

The 3,112 employers furnishing returns enlarged their forces by 17,176 persons, bringing them to 426,384 at November 1. This gain, amounting to 4·2 per cent, brought the index to 148·7, a new, all-time maximum. Activity was much greater than at November 1, 1939, when a considerable advance had also been indicated in the 2,959 reporting establishments, whose staffs had numbered 375,.718.

Ontario.—The trend in Ontario was again favourable, raising employment generally in the province to a new high level. The 5,361 firms whose data were tabulated had 569,654 employees, or 6,618 more than in the preceding

month. The average change from October to November in the nineteen preceding years for which statistics are available has been a decline, so that the latest advance is contra-seasonal; it was, however, not equal to that recorded at the beginning of November in 1939.

At the date under review, there were substantial gains in logging, as the camps gradually opened for the winter's operations. Mining, services and trade showed moderate improvement from October 1, while there was continued expansion in manufacturing. This took place chiefly in iron and steel, but increased activity was also shown in the leather, rubber, textile, beverage, chemical, clay, glass and stone, electrical apparatus, non-ferrous metal and miscellaneous manufacturing divisions. On the other hand, the food and lumber industries reported seasonal reductions in staffs, those in the former being particularly marked. Construction and maintenance also released employees. The index at the latest date stood at 142·5, a new maximum; this figure was 18 points higher than at November 1 of last year, when statistics had been received from 5,212 employers with 494,488 men and women on their paylists.

Prairie Provinces.—There were seasonal decreases in employment in Saskatchewan at November 1, 1940, but the movement was upward in Manitoba and Alberta. Returns were compiled from 1,751 firms in the Prairie Provinces, having 157,065 employees, as against 155,043 at October 1. Manufacturing, logging, coal-mining, building and retail trade afforded more employment, while there were declines in communications, transportation and highway and railway construction and maintenance. Most of the gain in manufacturing took place in food and iron and steel factories. The general improvement in this area was contra-seasonal, the trend having been retrogressive at November 1 in thirteen of the nineteen preceding years for which data are available. The index was higher than in any other month since November, 1931, standing at 119·7, compared with 112·7 at November 1, 1939. Statements had then been tabulated from 1,696 establishments, employing 147,137 workers; this was a decerase of 4,691 from their October 1, 1939, payrolls.

British Columbia.—A seasonal contraction in employment was recorded in British Columbia; the staffs of the 1,298 employers furnishing returns aggregated 112,091, compared with 113,423 in the preceding month. The reduction (which was below the average at November 1 in the years since 1920), took place largely in manufacturing, railway construction, transportation and mining. In the group of factory employment, there were important, seasonal reductions in food canneries; lumber mills were also quieter. On the other hand, iron and steel and some other classes were brisker. Employment generally was more active than at November 1 of last year, when 1,214 establishments had reported a total working force of 101,590 persons, compared with 104,424 in the preceding month. The index then stood at 115·5, as compared with 126·3 at November 1, 1940, when it was higher than in any other November for which data are available.

Table 1 gives index numbers by economic areas.

Employment by Cities

Additions to staffs were recorded in Montreal, Quebec City, Toronto, Ottawa, Hamilton, Windsor and Winnipeg, while there was a seasonal falling-off in Vancouver. In each of these centres, the volume of employment was greater than at the beginning of November of 1939; in Montreal, Quebec, Toronto and Ottawa activity was at the maximum for the record. In Vancouver, the index was higher than in any other month except October 1 and September 1, 1940; the figures for Hamilton and Windsor were exceeded only by those for one month in 1929; while in Winnipeg the favourable comparison goes back to 1930.

Montreal.—Further improvement of a contra-seasonal nature took place in Montreal at November 1, when 2,955 persons were added to the payrolls of the 1,803 co-operating firms, who employed 193,685. Services, trade, building and manufacturing showed heightened activity, the largest increases being in the last-named, mainly in iron and steel factories; chemical, food and electrical apparatus works also reported gains. On the other hand, shipping and road construction were dull. A moderate increase had been noted at the same date of last year; the index was then many points lower than at the latest date, when the figure, at 124·3, established a new maximum. Statements for November 1, 1939, had been received from 1,718 establishments providing work for 171,936 men and women.

Quebec City.—Continued advances were made in Quebec, according to 217 employers of 20,751 persons, compared with 20,156 at October 1. Construction, transportation and manufacturing showed gains, while services and trade were rather quieter. Employment was more active than in any other month for which data are available, the index being decidely higher than at the beginning of November, 1939, when the 211 co-operating business enterprises had employed 15,523 workers, practically the same number as in the preceding month.

Toronto.—There was a substantial increase in the payrolls of 1,834 firms in Toronto, who had 175,804 men and women in their employ, a number greater by 2,787 than in their last report. Most of the expansion took place in manufacturing; in this division, printing and publishing, rubber, textile, lumber, iron and steel and other heavy industries showed improvement, that in iron and steel being most pronounced. Services and trade also afforded more employment, but construction was not so active. A larger advance had been registered at the beginning of November of a year ago, when the index was, however, nearly eighteen points lower; the 1,766 employers making returns for November 1, 1939, had reported staffs aggregating 150,920, compared with 146,697 in the preceding month.

Ottawa.—In Ottawa, improvement was shown in manufacturing, particularly in the leather, textile and iron and steel divisions; transportation, building and trade were also rather brisker. The 237 establishments furnishing data employed 17,923 persons, as against 17,499 at October 1. Employment, at a new maximum for this record, was in decidedly greater volume than at the same date in 1939, when the trend had been downward, according to information from 230 employers of 15,316 workers.

Hamilton.—Industrial activity again increased in Hamilton at November 1; the 334 co-operating firms reported 43,854 employees, as compared with 43,478 at the beginning of October. Manufacturing afforded more employment, mainly in the iron and steel group. Moderate gains also took place in construction, transportation and trade. Greater expansion had been recorded at the beginning of November of last year, but the index was then much lower than the latest figure of 134·4. The November 1, 1939, paylists of the 331 reporting employers had included 36,771 men and women.

Windsor.—The situation in Windsor showed a further improvement; 195 establishments reported 26,082 persons in their employ, compared with 24,568 at the beginning of October. The increase took place mainly in the automobile and related industries; construction and trade, on the other hand, were rather slacker. A larger gain had been indicated at the same date of a year ago, but employment was then at a decidedly lower level. Statistics for November 1, 1939, had been tabulated from 195 firms, whose staffs aggregated 19,414.

Winnipeg.—Employment advanced in Winnipeg, according to 538 employers with 47,035 workers at the beginning of November, as compared with 46,107 in their last report. Manufacturing was brisker, especially in the food divisions; construction and trade also showed a moderately upward movement, while transportation was quieter. Figures furnished by 530 concerns for the first of November of last year showed that they had 43,325 men and women on their payrolls; the employment index then stood at 99·3, compared with 107·5 at the date under review. This is the highest figure since the end of 1930.

Vancouver.—The movement was seasonally downward in Vancouver, where the 568 co-operating establishments had 43,500 persons on their staffs, or 557 fewer than in the preceding month. Manufacturing was quieter, mainly in the food division, and transportation showed a decline, while other industries reported little general change. Industrial activity generally was at a higher level than at the beginning of November of last autumn, when curtailment had also been indicated by 522 firms, whose employees had numbered 38,361, a reduction of 329 from October 1, 1939.

Employment by Industries

Manufacturing.—Employment in manufactures continued to expand; although the improvement was on a smaller scale than in recent months, it is particularly interesting in that it is contra-seasonal, the trend at November 1 having been downward in fifteen of the nineteen earlier years of the record. The 6,762 co-operating establishments reported 744,144 employees, or 4,071 more than in the preceding month. This increase was not equal to that reported at the same date in 1939, when industry was in the initial stages of its response to war-time demands. However, in the intervening months the movement has with one exception been consistently favourable, the upswing resulting in the establishment of successively new, high levels for the curve of employment.

The unadjusted index (1926=100), rose from its previous maximum of 143·8 at October 1, 1940, to a new high of 144·6 at November 1; this figure was 18·4 per cent above that of 122·1 at November 1 of last year. Since the latest increase, as already stated, was contrary to the usual seasonal trend, the seasonally-corrected index gained substantially, rising from 139·4 at the beginning of October, to 143·3 at the date under review.

Further marked improvement was shown in iron and steel plants at November 1, 1940, the advance being on a scale rarely exceeded in any month in the twenty years of the record, and never exceeded in any earlier November. The animal food, textile, rubber, beverage, clay, glass and stone, chemical, electrical apparatus, non-ferrous metal and miscellaneous manufacturing industries also afforded more employment than at the beginning of October. On the other hand, lumber, pulp and paper

and vegetable food factories released employees, the declines being mainly of a seasonal nature.

For November 1, 1939, 6,472 manufacturing establishments had reported 626,375 employees, compared with 613,684 in the preceding month.

The unadjusted indexes of factory employment, (calculated on the 1926 average as 100), have been as follows at the beginning of November in recent years: 1940, 144·6; 1939, 122·1; 1938, 110·9; 1937, 119·0; 1936, 107·7; 1935, 103·5; 1934, 92·8; 1933, 86·5; 1932, 81·7; 1931, 88·8; 1930, 104·6; 1929, 117·2; 1928, 115·1 and 1927, 104·9.

Animal Products—Edible.—Slaughtering and meat-preserving plants reported greatly increased activity, but seasonal contractions were indicated in dairies and fish-canneries. Statistics were received from 333 manufacturers, employing a staff of 33,806, as compared with 33,608 in the preceding month. This increase, which took place largely in the Prairie Provinces, compared favourably with the decline registered at the corresponding date last year, when employment was at a much lower level.

Leather and Products.—There was a falling-off in footwear factories at November 1, but other leather plants were busier. The 340 firms furnishing data reported 24,856 workers, as against 24,757 at October 1. The index was slightly lower than at the same date in 1939; larger additions to staffs had then been noted, following the outbreak of war.

Lumber and Products.—Seasonal contractions, involving more employees than were released in the autumn of last year, were indicated in the lumber group, where employment was, however, in greater volume than in November of 1939, or of any other year since 1929. The shrinkage at the date under review took place principally in rough and dressed lumber mills, while furniture, container, vehicle and some other wood-using works showed improvement. A combined working force of 56,080 men and women was employed by the 989 co-operating manufacturers, as compared with 58,216 at the beginning of October. There were decreases in all five economic areas.

Musical Instruments.—Thirty-six musical instrument manufacturers reported 2,232 persons on their payrolls, or 61 more than at October 1. Employment was brisker than at the beginning of November, 1939, when little general change had been recorded.

Plant Products—Edible.—Fruit and vegetable canneries showed very marked, seasonal reductions in their payrolls, but the chocolate and confectionery, sugar and syrup and some other divisions of this industry were brisker. The forces of the 576 co-operating firms included 46,410 employees, or 6,414 fewer than in their last return. Employment declined in Quebec, Ontario and British Columbia, notably in Ontario, while greater activity was reported in the Maritime and Prairie Provinces. The general curtailment, like the gains which preceded it, involved many more workers than were released at the corresponding date last year; the index number then, however, was rather lower than at the date under review.

Pulp and Paper Products.—The trend of employment in this group was downward, according to data from 717 establishments with 75,162 men and women on their payrolls, as compared with 75,679 at the beginning of October. Moderate improvement was recorded in printing and publishing houses, but pulp and paper mills were slacker. The largest losses were in Quebec. A general advance had been indicated at the beginning of November a year ago, but the index was then over seven points lower.

Rubber Products.—Employment in rubber goods showed a further moderate increase at November 1; information was compiled from 52 firms with 15,005 employees, as against 14,806 in their last report. Activity was above its level at November 1, 1939, when a smaller gain had been noted.

Textile Products.—Woollen, silk, knitting, garment, and some other textile factories reported heightened employment; 1,252 manufacturers enlarged their payrolls from 132,266 at October 1 to 132,901 at the date under review. A larger increase had taken place at the beginning of November last year, when the index was many points lower.

Beverages.—Further improvement was recorded in beverage plants, 151 of which furnished statistics showing 10,796 persons on their payrolls, as compared with 10,495 at October 1. The gain was reported mainly in Ontario. Curtailment had been indicated at the corresponding date last year, and employment was then quieter.

Tobacco.—There was little general change in tobacco manufacturing at the beginning of November, when the 47 co-operating establishments employed 8,757 men and women. A slight falling-off had been shown at November 1, 1939, when the index was lower.

Chemicals and Allied Products.—In this group, statements were furnished by 331 plants employing 26,094 persons, or 696 more than in their last report. The index was many points higher than at November 1, 1939, although a larger gain had then been recorded.

Clay, Glass and Stone Products.—Moderate increases were noted in brick, glass and stone product manufacturing. Activity in this group generally was at a higher level than at November 1, 1939, when the trend had also been upward. The forces of the 222 employers from whom information was received had risen since October 1 by 267 persons, to 13,050 at the beginning of November, 1940; this figure is larger than any other reported since 1930.

Electric Light and Power.—Employment in the production of electric light and power showed a falling-off, 216 workers being released from the payrolls of the 103 co-operating manufacturers, who employed 18,631 persons. An increase had been indicated in this industry at November 1 of last year, but the index was then rather lower.

Electrical Appliances.—There was another advance in electrical apparatus works, 128 of which had 23,685 employees, or 563 more than at October 1, 1940. A favourable movement had also been in evidence at the same date in 1939; employment then, however, was in much smaller volume.

Iron and Steel Products.—Automobile and other vehicle, machinery, crude, rolled and forged, structural iron and steel, foundry and machine shop, fire arm, tool, sheet metal and other iron and steel works showed further increases in personnel. The general gains were the largest reported in any November of the record, having rarely been exceeded in any month; employment in this division reached the highest level yet attained. Statements were received from 980 manufacturers whose staffs aggregated 199,364, as compared with 189,724 at October 1, 1940. Most of the advance took place in Ontario, but the tendency was also favourable in Quebec and the Western Provinces.

Non-ferrous Metal Products.—Data tabulated from 207 firms in the non-ferrous metal group showed that they employed 33,925 workers, or 580 more than at October 1. The increase occurred largely in smelters and refineries and in the manufacture of lead, tin, zinc and copper products. The volume of employment was greater than at the same date of 1939, or any other year of the record .

Non-metallic Mineral Products.—There was a falling-off in activity in non-metallic mineral products factories, 99 of which released 82 persons from their staffs, bringing them to 14,035 at the beginning of November. The index was higher than at November 1 of last year, although the tendency had then been upward.

Logging

Statistics were tabulated from 431 firms employing 76,562 men, or 23,205 more than in the preceding month. This advance was decidedly larger than that reported at November 1 in any other year for which data are available, except 1937 and 1939, greatly exceeding the average gain recorded at that date in the years since 1920. The index, at 258·6, was considerably above its level of last autumn, although it was lower than at November 1, 1937. There were increases at the date under review in all provinces, those in Quebec being most extensive.

Mining

The mining of coal and of metallic ores afforded more employment, but quarrying and other non-metallic mineral production were quieter. Statements were received from 424 mine operators, with 81,730 employees, a number greater by 805 than in their last report. Of the total staff indicated at the date under review, 26,317 members belonged in coal-mining, 18,530 in the extraction of other non-metallic minerals, and 44,883 in metallic ore mining. A smaller increase had been recorded at the same date in 1939, and the index then was slightly below its level at the time of writing.

Communications

Telephones and telegraphs showed moderate, seasonal contractions; the companies and branches making returns had 24,146 workers on their payrolls, a loss of 89 since October 1. The index of employment was a few points higher than at November 1, 1939, when a larger falling-off had been noted.

Transportation

Street Railways and Cartage and Storage.—There was a further increase in activity in local transportation, according to 308 firms whose staffs aggregated 32,636 at the beginning of November, as compared with 32,434 in the preceding month. Employment was in greater volume than at the corresponding date in 1939, the tendency then having been downward.

Steam Railways.—Statistics were tabulated from 102 divisional superintendents and other employers in the railway operation group, whose payrolls were reduced by 1,338 persons, to 63,516 at November 1. The most extensive contractions were in Quebec and the Prairie Provinces. Employment was in practically the same volume as at the beginning of November, 1939, when a much greater decline had been indicated.

Shipping and Stevedoring.—Improvement was noted in water transportation, 125 companies employing 17,850 workers, as compared

with 17,681 in the preceding month. The increase took place in the Maritime Provinces, while elsewhere there were seasonal losses. A smaller decrease, on the whole, had been shown at November 1 last year, but the index then stood at 86·1, compared with 94·8 at the date under review.

Construction

Building.—There was a further large increase in building, 4,428 persons being added to the forces of the 953 co-operating contractors, who had 59,474 employees; activity was greater than at the beginning of November in 1939, or indeed than in any month in the years, 1931-1939. There were advances at the date under review in the Maritime Provinces, Quebec and the Western Provinces, while in Ontario the tendency was downward.

Highway.—Work on highways and streets slightly increased, the largest gain being in Quebec. Statements were tabulated from 425 employers, whose staffs, standing at 60,660, were larger by 506 persons than at October 1, 1940. The index, at 157·6 at the beginning of November, was lower than at the same date in 1939, although a pronounced contraction had then been indicated.

Railway.—Seasonal curtailment of railway construction work was generally recorded, the most marked reductions occurring in Ontario and Saskatchewan. The forces of the 29 companies and divisional superintendents furnishing returns declined from 32,168 persons at October 1, to 26,358 at the beginning of November. This shrinkage exceeded that registered at the corresponding date in 1939, but employment was then in slightly less volume.

Services

Hotels and restaurants were seasonally quiet, while there was a small gain in laundering and dry-cleaning establishments, according to 611 firms employing 32,924 persons, or 329 more than at the beginning of October. The index, at 148·8, was higher than at November 1, 1939, when a decline, on the whole, had been indicated.

Trade

The trend of employment in trade was again seasonally upward, 2,061 men and women being added to the personnel of the 2,136 retail and wholesale houses furnishing returns, whose staffs aggregated 144,720. The increase took place mainly in the retail division, wholesale trade showing only a slight advance. The index stood at 148·9, compared with 140·2 at November 1, 1939, when the reported gain had not been so extensive. Further pronounced expansion in employment may be expected during the next few weeks, in preparation for the Christmas and holiday trade.

TABLES

Index numbers of employment by economic areas and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of October, 1940

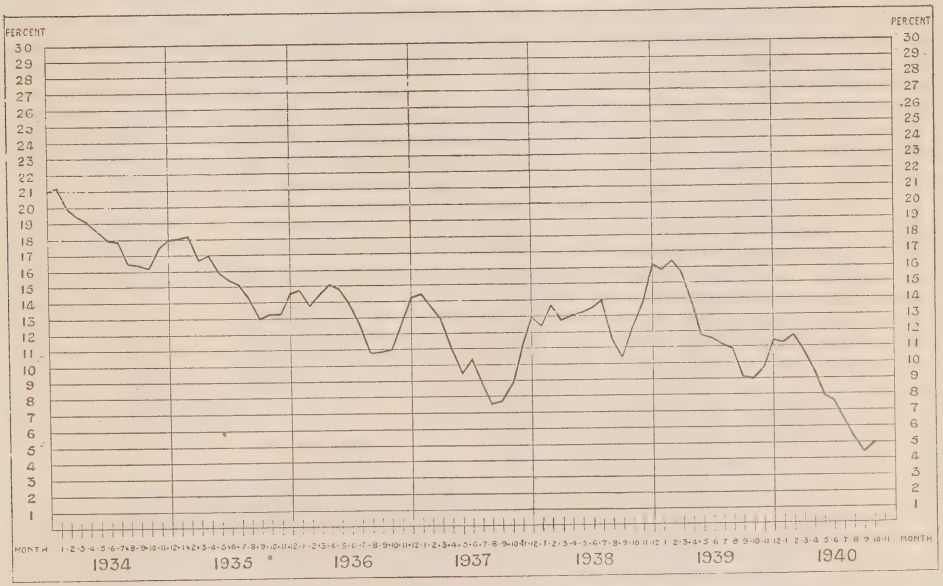
Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle on account of illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

At the close of October returns were tabulated from 1,971 trade union organizations, with a combined membership of 262,922 persons, of whom 13,136 or a percentage of 5·0 were reported as unemployed, contrasted with percentages of 4·4 in September and 9·0 at the end of October, 1939. While the volume of work afforded trade union members during the month under review declined slightly from that registered in the preceding month, the October unemployment percentage was the lowest reported since the corresponding month of 1928. The October decline was largely due to reduced activity among building tradesmen and steam railway employees and was the first decrease in employment since February. British Columbia unions indicated that slightly better conditions prevailed during October than those reported in September, the returns reflecting increased activity, especially among lumber workers and miners. Alberta unions registered a nominal gain in work afforded owing to improvement in coal mining, while Nova Scotia union reports reflected a fractional gain only. Nominal increases in unemployment were manifested in returns received from New Brunswick and Quebec unions. Ontario members reported a moderate employment decline due largely to reduced activity among building tradesmen, wood

workers and steam railway employees. Employment reductions among Manitoba members were small, being mainly due to some contraction among garment workers. Moderate reductions among Saskatchewan unions were reported. These resulted from reduced activity for steam railway employees. Comparison of the reports received for the month under review with those received in October, 1939, indicated that substantial gains for coal miners and increased activity among iron and steel tradesmen accounted for the marked advance in employment for Nova Scotia members. Pronounced expansion in the employment volume also, was indicated by Quebec reports, increased activity for building tradesmen and substantial employment recovery in the iron and steel trades being largely responsible for the advancement in that province over the situation reported in October, 1939. Improvement among iron and steel tradesmen contributed largely to the noteworthy gains reported by Ontario members over October, a year ago. In British Columbia the gains were also noteworthy, many of the trades participating in these. New Brunswick and Saskatchewan unions reported a slightly better situation. Members in Manitoba indicated a tendency towards reduced activity on a moderate scale, while Alberta reports reflected fractional recessions only.

A separate compilation is made each month of unemployment among trade unions in the largest city in each Province, with the exception of Prince Edward Island. Returns tabulated in October from unions in Regina and Edmonton reflected slight increases in employment from September. Montreal, Toronto, Winnipeg and Vancouver members registered minor recessions, while Halifax and Saint John unions indicated moderate declines in work afforded during the month under review. A considerably higher level of activity than that registered in October, 1939, was indicated in reports received from Montreal and Halifax unions. Advances of noteworthy proportions were also in evidence among Toronto and Vancouver members. Moderate increases in activity prevailed in Saint John and Regina. The only cities to report employment contraction in this comparison were Edmonton and Winnipeg and the recessions in these cities were small.

From the chart which accompanies this article, and shows the trend of unemployment by months from January, 1934, to date, it will be seen that the curve during October rose slightly, thus indicating minor contractions in employment from September conditions. The level of the curve rested considerably below the point shown for the corresponding month of 1939, thus indicating substantial employment gains over the situation as reported by trade unions a year ago.



Returns were received during October from 587 unions in the manufacturing industries. These organizations reported a combined membership of 105,280 persons, 4,879 or a percentage of 4·6 being unemployed, contrasted with percentages of 4·4 in September and 10·3 in October, 1939. Conditions in the manufacturing industries as a whole showed little change from that reported in September and comparisons made in the various industries with returns received in September indicated little variation from the preceding month. Leather workers reported heightened activity on a small scale. A nominal upward tendency was reflected in reports received from iron and steel and printing tradesmen. Other organizations manifesting favourable tendencies, though indicating minor gains only, were bakers and confectioners, textile and carpet workers, tailors, jewellery workers and general labourers. Unions whose returns indicated a fully engaged situation in October, as was reported in September, were brewery workers, cigar and tobacco workers, electric current employees, mine, mill and smelter men, fur and gas workers. Metal polishers reported the same percentage of idleness as in September. Nominal reductions in employment from the preceding month were manifested by pulp and paper mill workers, hat, cap and glove workers, meat cutters and butchers, rubber workers and glass workers. Declines in moderate degree were indicated by garment workers, especially in the Province of Manitoba. Substantial recessions were reported by wood workers, a result which was due principally to much quieter conditions reported by these unions in Ontario. Comparison of the reports for the manufacturing industries during the period under review with those received for the corresponding month in 1939, when 10·3 per cent of the members were reported as unemployed, disclosed pronounced expansion in the work afforded members in the iron and steel trades. Marked advances were also noted among hat, cap and glove and leather workers. Viewed from a percentage standpoint, glass workers indicated important gains, but as their membership is not large, advances in this trade did not materially affect the situation in the manufacturing industry as a whole. Reduced unemployment of noteworthy proportions was registered by papermakers and general labourers, while gains of more moderate degree were reflected in returns received from unions of printing tradesmen. A nominal upward movement from October a year ago was noted among brewery workers, cigar and tobacco workers, bakers and confectioners, electric current employees, fur work-

ers, metal polishers and tailors. Mine, mill and smelter men and gas workers reported adequate work, which was also the case in October, 1939. The percentage of unemployed members registered by garment workers remained identical with the return received in the corresponding month a year ago. Textile and carpet workers, meat cutters and butchers, jewellery and rubber workers all recorded slight declines. Noteworthy recessions were in evidence among wood workers and, as in the previous comparison, these were due to reduced employment for these workers in Ontario.

During October reports were received from 58 unions of coal miners, with a a combined membership of 21,593 persons, of whom 559 or a percentage of 2·6 were reported as idle, compared with percentages of 4·6 at the close of the preceding month and 3·7 per cent at the end of October, 1939. Comparison of these returns with those tabulated in September indicated that reductions in unemployment of noteworthy proportions occurred among British Columbia miners. Alberta unions reported moderate gains in work afforded over the preceding month. Adequate work was provided New Brunswick members, as in September, while fractional improvement only was indicated by Nova Scotia unions. Comparison with October, 1939, when 3·7 per cent of the members were without work, disclosed gains of noteworthy proportion by Nova Scotia members. Minor advances in work afforded were reflected among British Columbia miners, while Alberta unions registered moderate declines in activity.

Reports were received from 229 unions in the building and construction trades during October. These organizations reported a combined membership of 29,519 persons with 2,922 reported as idle, a percentage of 9·9, contrasted with 7·1 per cent in September and 20·5 per cent in October, 1939. A steady advance in employment was recorded by these trades from the close of March to the end of September. The October unemployment percentage, while moderately higher than that registered in September, was the lowest for any October since 1928. Electrical workers, plumbers and steamfitters and hod carriers and building labourers reported slight increases in employment from the preceding month. Nominal declines in activity were indicated by steam shovelmen, while reductions of moderate degree in work afforded were registered by carpenters and joiners, bricklayers, masons and plasterers and painters, decorators and paperhangers. Viewed from a percentage standpoint a sharp drop in work available was indicated by bridge and structural iron workers, tile layers, lathers and roofers and granite and stonecutters, but as the combined membership of these groups is not large these changes did not materially affect the building group as a whole. When conditions for building tradesmen were compared with those reported in the corresponding month of 1939, when 20·5 per

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

cent of the members were shown as unemployed, it was noted that pronounced expansion in work afforded had occurred among carpenters and joiners, painters and decorators, hod carriers and building labourers, plumbers and steamfitters. High percentage gains were in evidence amongst steam shovelmen, whose membership is, however, small. Heightened activity, though affecting comparatively few members, was also reflected in returns received from bridge and structural iron workers and tile layers, lathers and roofers. Bricklayers' unions indicated an unchanged situation from that prevailing for these tradesmen in October, 1939. A nominal upward movement was registered among electrical workers, when compared with conditions a year ago and moderate declines in activity were reported by granite and stone cutters.

At the end of October reports were tabulated from 834 unions in the transportation industries. These organizations indicated a combined membership of 72,061 persons, 3,211 or 4·5 per cent of whom were registered as idle at the end of the month, compared with percentages of 3·4 in September and 5·5 in the corresponding month of 1939. Over 80 per cent of the entire group membership is included in the steam railway division. The level of employment for these members was slightly lower than that registered in September. Among navigation workers a moderate reduction in employment was recorded, while a fractional decline only was noted among street and electric railway employees. Teamsters and chauffeurs were slightly better engaged. Comparison of October returns with those received in October, 1939, indicated that employment for workers in the steam railway division tended in a favourable direction, though the advance was small. Moderate gains were in evidence amongst teamsters and chauffeurs and heightened activity on a small scale was reported by navigation workers. Street and electric railway employees indicated an unchanged situation from that prevailing in October, 1939.

Reports were tabulated at the close of October from 4 unions of retail shop clerks, with a combined membership of 1,855 persons. The percentage of unemployment stood at 0·1, compared with 0·2 in September and with a fully engaged situation in the corresponding month of last year.

From unions of civic employees 81 reports were received, combining a membership of 9,575 persons. These unions reported 0·1 per cent as idle on the last day of October, contrasted with a slightly better position in September and 3·7 per cent in October, 1939.

Reports were tabulated during the month under review from 139 unions in the miscellaneous group of trades. These unions reported a combined membership of 10,221 persons, of whom 454, or a percentage of 4·4, were idle, contrasted with percentages of 3·9 at the close of the preceding month and 6·2 at the end of October, 1939. Minor advances in employment from September were reflected in reports received from barbers, stationary engineers and firemen and unclassified workers, while unions of hotel and restaurant and theatre and stage employees indicated a tendency towards slightly reduced activity. A considerably higher employment level than that prevailing in October, 1939, was noted among unclassified workers. Heightened activity, though the gains were small, was registered, also by stationary engineers and firemen. A nominal upward movement was reflected among theatre and stage employees. Hotel and restaurant workers indicated moderate declines in work afforded from the corresponding month of last year, while barbers reported fractional recessions.

During October reports were tabulated from 5 unions of fishermen, whose membership totalled 2,832. Of these, 232, or 8·2 per cent, were registered as unemployed. This percentage compared with 5·0 per cent at the end of

TABLE 1.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1929.....	4·0	1·6	7·7	4·3	7·1	5·3	6·4	5·9	**5·7**

September. Noteworthy gains, however were reported over October, 1939, when 16·0 per cent of these workers were unemployed.

At the close of October, 4 unions of lumber workers and loggers were tabulated. The combined membership of these unions was 2,123 persons, of whom 179 or a percentage of 8·4 were listed as idle. At the close of September the unemployment percentage for these workers was 14·5 thus indicating that a substantially better situation prevailed in the month under review than that reported in the preceding month. Important gains also were registered for this class of worker over October, 1939, when 20·7 per cent of the members were reported as being without work.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1939, inclusive, and also the percentages of unemployment for October of each year from 1929 to 1938, inclusive, and for each month from October, 1939, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for October, 1940

During the month of October, 1940, reports from the offices of the Employment Service of Canada showed a decline of nearly 28 per cent in the average daily placements effected from those of the preceding month, but a gain of more than 40 per cent over those of the corresponding period last year. In comparison with September, construction and maintenance, farming and manufacturing registered losses, by far the largest being in construction and maintenance, where highway and building contracts, particularly those for National Defence projects, were nearing completion, this resulting in a far smaller demand for workers. Logging and services showed appreciable gains, while that in transportation was more moderate. A slight increase was also recorded in mining, and a minor decline in trade. In comparison with October, 1939, all groups registered more numerous placements, except mining, where a very small decrease was recorded, services and construction and maintenance recording the most favourable expansion, the gains in the remaining groups being of moderate proportions and fairly well distributed among the logging, transportation, farming and manufacturing industries. A slight gain, also, was shown in trade.

The accompanying chart shows the trend of employment since January, 1938, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Employment Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the trend of the curve of vacancies and of placements in relation to applications was downward throughout the month, though much less pronounced during the latter half, while at the close of October the levels attained were more than 16 points and 14 points higher, respectively, than those shown at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 68·8 during the first half and 65·2 during the second half of October, 1940, in contrast with ratios of 53·3 and 48·8 during the corresponding periods of 1939. The ratios of placements to each 100 applications during the periods under review were 62·8 and 61·3 as compared with 51·1 and 46·6 in the corresponding month of 1939.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during October, 1940, was 2,150, as compared with 2,983 in the preceding month and with 1,487 in October a year ago.

The average number of applications for employment received daily by the offices during the month under review was 3,213, in comparison with 3,933 in September, 1940, and with 2,923 during October last year.

The average number of placements made daily by the offices of the Service during October, 1940, was 1,992, of which 1,342 were in regular employment and 650 in work of one week's duration or less, as compared with a total daily average of 2,758 during the preceding month. Placements in October a year ago averaged 1,421 daily, consisting of 958 in regular and 463 in casual employment.

During the month of October, 1940, the offices of the Service referred 53,636 persons to vacancies and effected a total of 51,789 placements. Of these, the placements in regular employment were 34,899, of which 28,687 were of men and 6,212 of women, while placements in casual work totalled 16,890. The number of vacancies reported by employers was 39,572 for men and 16,323 for women, a total of 55,895, with applications for work numbering 83,525, of which 61,622 were from men and 21,903 from women. Reports for September, 1940, showed 71,581 positions available, 94,389 applications made and 66,192 placements effected while in October, 1939, there were recorded 37,157 vacancies, 73,057 applications for work and 35,505 placements in regular and casual employment.

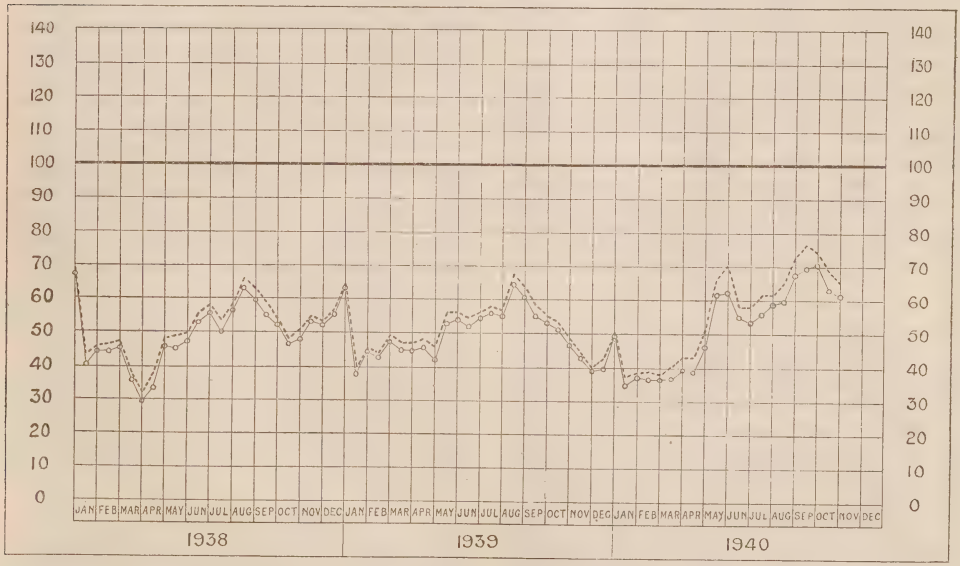
The following table gives the placements effected by the offices of the Employment Service each year, from January, 1930, to date:—

Year	Placements		
	Regular	Casual	Totals
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940 (10 months)	269,976	126,595	396,571

NOVA SCOTIA

During the month of October, positions offered through employment offices in Nova Scotia were nearly 6 per cent less than in the preceding month, but nearly 231 per cent above the corresponding month of last year. Placements were over 6 per cent fewer than in September, but nearly 238 per cent above October, 1939. The large increase in placements over October of last year was almost entirely due to work on National Defence projects, although services and trade also showed improvement. The changes in all other groups were unimportant. Placements by industrial divisions included mnaufacturing 49; logging 62; construction and maintenance 2,907; trade 70; and services 909, of which 716 were of household workers. There were 2,892 men and 169 women placed in regular employment.

NEW BRUNSWICK



Orders received at employment offices in New Brunswick during October called for nearly 11 per cent more workers than in the preceding month and over 10 per cent more than during the corresponding month of last year. There was an increase in placements of nearly 12 per cent when compared both with the preceding month and with October, 1939. With the exception of a moderate decrease in construction and maintenance all groups showed gains in placements over October of last year, of which the largest were in services and logging. Industrial divisions in which most of the placements were effected during the month were logging 83; construction and maintenance 286, and services 898, of which 505 were of household workers. During the month 329 men and 101 women were placed in regular employment.

QUEBEC

There was a decline of over 42 per cent in the number of positions offered through employment offices in the Province of Quebec during October, when compared with the preceding month, but an incerase of nearly 92 per cent in comparison with the corresponding month of last year. Placements were nearly

APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

44 per cent fewer than in September but over 87 per cent above October, 1939. All industrial divisions participated in the increase in placements over October of last year, the gains in logging, construction and maintenance, transportation and services being quite substantial. The improvement in manufacturing also was fairly important. Placements by industrial divisions included manufacturing 536; logging 3,663; farming 128; transportation 1,411; construction and maintenance 4,089; trade 125; and services 4,779, of which 4,306 were of household workers. Placements in regular employment numbered 8,869 of men and 2,393 of women.

Ontario

Positions offered at the employment offices in Ontario during October called for nearly 5 per cent fewer workers than in the preceding month, but over 38 per cent more than during the corresponding month of last year. There was a decrease of 5 per cent in placements when compared with September, but an increase of nearly 32 per cent in comparison with October, 1939. When comparing placements by industrial divisions with October of last year the only decline was in logging. Of the gains in all other groups the most important were in building construction, services, manufacturing, and farming. Placements by industrial divisions included manufacturing 2,278; logging 2,006; farming 1,950; mining 195; transportation 419; construction and maintenance 5,482; trade 529 and services 5,285, of which 3,258 were of household workers. During the month 9,479 men and 1,888 women were placed in regular employment.

Manitoba

Opportunities for employment, as indicated by orders received at employment offices in Manitoba during October, were nearly 3 per cent fewer than in the preceding month and over 25 per cent below those of the corresponding month last year. There was a decrease also in placements of nearly 2 per cent when compared with September and of 26 per cent in comparison with October, 1939. A substantial decline in the highway division of construction and maintenance accounted for the decrease in placements from October of last year for the province as a whole. This loss was partly offset by a fairly large gain in farming. Smaller increases were reported in services and manufacturing, and a loss of nominal proportions in logging. Placements by industrial divisions included manufacturing 147; logging 209; farming 869; construction and maintenance 852; and services 998, of which 711 were of household workers. There were 2,045 men and 377 women placed in regular employment.

Saskatchewan

Orders received at employment offices in Saskatchewan during October called for over 25 per cent fewer workers than in the preceding month, but nearly 34 per cent more than during the corresponding month of last year. There was a decrease in placements of nearly 23 per cent when compared with September, but an increase of over 39 per cent in comparison with October, 1939. When comparing placements by industrial groups with those made during October of last year, the largest increase was in the building division of construction and maintenance, with fairly substantial gains in services and manufacturing. The only decline of importance was in farming. Industrial divisions in which most of the placements were effected during the month were manufacturing 132; farming 400; construction and maintenance 636; trade 92 and services 997, of which 606 were of household workers. During the month 942 men and 396 women were placed in regular employment.

Alberta

There was a decline of nearly 19 per cent in the number of positions offered through employment offices in Alberta during October when compared with the preceding month, but an increase of over 68 per cent in comparison with the corresponding month of last year. Placements were over 15 per cent fewer than in September, but 68 per cent above October, 1939. Farm placements were considerably higher than in October of last year and there were somewhat smaller increases in logging, services, construction and maintenance and manufacturing. There was a small decrease in mining and nominal changes only in all other groups. Placements by industrial divisions included manufacturing 125; logging 604; farming 1,688; construction and maintenance 450 and services 925, of which 598 were of household workers. Placements in regular employment numbered 2,691 of men and 411 of women.

British Columbia

Employment opportunities, as indicated by orders received at employment offices in British Columbia during October, were nearly 9 per cent fewer than in the preceding month, but nearly 28 per cent more than during the corresponding month of last year. Similar percentages of change were reported in placements under both comparisons. With the exception of a small loss in trade, all industrial divisions participated in the increase in placements over October, 1939, the largest gains being in services, manufacturing, transportation and construction and maintenance. Placements by industrial divisions included

manufacturing 361; farming 145; transportation 205; construction and maintenance 1,696; trade 108 and services 1,389, of which 882 were of household workers. There were 1,440 men and 477 women placed in regular employment.

Movement of Labour

During the month of October, 1940, the offices of the Employment Service of Canada made 34,899 placements in regular employment, 21,076 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of those availing themselves of this opportunity 1,338 were granted the Employment Service reduced transportation rate, 1,124 going to centres within the same province as the despatching office and 214 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4.00, is granted by the railway companies to bona fide applicants at the offices of the Employment Service, who may desire to travel to distant employment, for which no workers are available locally.

Transfers at the reduced rate in Quebec during October numbered 223, of which 52 were provincial and 171 interprovincial. The entire movement consisted of bushmen, 52 being sent from Montreal to LaTuque and 171 from Hull to various lumbering centres—83 to Pembroke, 66 to Sudbury and 22 to North Bay. Offices in Ontario, during October, granted 864 reduced rate certificates, all provincial. These for the most part were issued to workmen bound for the lumbering districts of the province, although some labourers, as well as skilled tradesmen, were sent to National Defence projects. Of the bushmen, 99 went to Fort William, 388 to Port Arthur, 25 to Sault Ste. Marie, 27 to Timmins and 143 to Sudbury, the despatching centres being Fort William, North Bay, Port Arthur, Sudbury and Toronto. The remainder of the movement consisted of 9 carpenters, one tilelayer and 2 plumbers, sent by Fort William to points within its own zone, 5 sawmill operators, 4 miners, 2 cookees and 151 labourers by Port Arthur, likewise to points within its own zone, and 3 carpenters, 2 pipefitters and 3 millwrights by Toronto to North Bay, the majority of these men being placed on National Defence projects. Workers taking advantage of the Employment Service reduced transportation rate in Manitoba during October were 63 in number, 21 of whom were bound for provincial situations and 42 for employment outside the province. Provincially, Winnipeg despatched 6 farm hands, 11 bushmen, one truck driver and 3 carpenters within its own zone. The interprovincial movement, too, which almost entirely originated in Winnipeg, consisted of the transfer of 35 bushmen, 3 bricklayers, one farmhand, one blacksmith and one cookee to Port Arthur, while Dauphin sent one machinist to Fort William. In Saskatchewan during October the movement of labour was very small, there being one pipelayer sent from Regina to Yorkton and one mechanic from the same office to Portage la Prairie. Reduced rate certificates were granted in Alberta to 49 persons travelling to provincial employment. These were issued by the Edmonton office to 37 bush workers, 2 sawmill hands, 4 mine workers, one welder, one labourer and one housemaid, proceeding to various points within the Edmonton zone, and to 3 cookees sent to Lethbridge. In British Columbia during October, 137 persons were conveyed at the reduced rate to provincial positions, the entire movement taking place from Vancouver, where 77 carpenters for National Defence projects and 7 mine workers were sent to points within the zone, while 53 carpenters, also for National Defence work, were despatched to New Westminster.

Of the 1,338 persons who travelled at the Employment Service reduced transportation rate during October, 559 journeyed over the Canadian National Railways, 755 over the Canadian Pacific Railway and 24 over the Temiskaming and Northern Ontario Railway.

In order to facilitate the movement of harvest labour within the Prairie Provinces, there was, in addition to the 2·5 cent rate referred to in the above, a special rate afforded by the railway companies, effective from August 1st this year and terminating October 15th. Under this arrangement the railway companies granted a special rate of 1·5 cents per mile to all applicants upon presentation of a certificate supplied by the offices of the Employment Service in Manitoba and Alberta, the movement being confined entirely to the localities within their respective provinces. The labour movement under this plan for August and September has been outlined in the two previous issues of the LABOUR GAZETTE. During the first fifteen days of October, however, there were transfers within Alberta of 39 harvest workers, 28 of whom travelled by the Canadian National Railways and 11 by the Canadian Pacific Railway.

(4) Building Permits Issued in Canada During October, 1940

The October report of building permits compiled by the Dominion Bureau of Statistics includes returns from 174 of the 204 municipalities in Canada which have systems for issuing such permits and of this number 166 reported detailed operations. The remaining 8 advised that no permits had been issued during the month of October while

30 municipalities had failed to report at the close of November 12.

The total value of permits reported as issued in the month of October is $12,154,271. Revised values for the month of September include returns from 194 municipalities and aggregate $10,408,205. Reports were received from all of the original 58 municipalities and show a value of $8,466,440 for October. The corresponding revised value for September for all 58 municipalities is $6,478,610, while the October, 1939 value was $5,623,900.

The total value of permits issued by all municipalities during the ten elapsed months of the current year is $93,877,588. The value for the 58 municipalities for the same period is $66,268,702, while their corresponding value in 1939 was $49,539,913.

During the month of October new construction of all types amounted to 78·4 per cent of the total value, while the percentage of new residential construction was 42·1.

TABLE II.—RECORD OF BUILDING PERMITS AND THEIR INDEXES, TOGETHER WITH AVERAGE INDEXES OF WHOLESALE PRICES OF BUILDING MATERIAL, 1926-1940. (1926-100).

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF NOVEMBER, 1940

Reports of Superintendents of the Employment Service

THE employment situation at the end of November was reported by the Superintendents of the Employment Service to be as follows:—

Frost and snow having put an end to ploughing in the Maritime Provinces, farming was confined chiefly to general routine chores and the cutting of firewood. Fishing was quieter thna usual, although fair catches of oysters, haddock and cod were reported. Fresh fish was greatly in demand, especially tomcods which the ranchers were purchasing for fox feed. Lumbering, which was carried on in various localities, was quite active, although the cutting of pit-props had been partially delayed, owing to the difficulty of securing contracts. All coal mines in the New Glasgow area operated six days per week each, while those in Cape Breton and vicinity worked from five to six days. Manufacturing showed practically no change, as nearly every plant was working steadily with a full staff and no idleness was recorded by the iron and steel industry. Building construction progressed favourably, although little new work was starting. Passenger and freight traffic by rail was normal, but by motor, handicapped through unfavourable weather, while ice in the Miramichi had held up river traffic. Wholesale and retail trade showed steady employment, due largely to Christmas buying, with collections fair. Requests were numerous in the women's division for both casual and regular domestic help, especially competent maids for household service.

Very little farm work was under way in the Province of Quebec, but logging was most active, especially at Hull, La Tuque, Sherbrooke and Val d'Or and the winter season appeared promising for experienced bushmen.

Factories in all industrial centres operated at full capacity, particularly paper, garment, fur, textile, woollen and silk mills and those engaged in filling war contracts. Construction material was also in good demand, owing to the amount of building under way. Some important undertakings had been completed and employment considerably reduced at Chicoutimi, but at Montreal, Levis, Quebec, Sherbrooke and Thetford Mines, work in this line was very brisk. Road construction continued at Hull. Transportation was active and trade showed expansion. Many requests were reported for maids for hotel and domestic service, but the tendency of the applicants in some districts was towards factory work, which was more remunerative.

There was little farming being done in Ontario, although some requests for winter workers had been received; wages, however, remained steady. Logging was active, but the demand was confined mostly to skilled men, there being an insufficient number of pulp cutters and other experienced bushmen to fill existing vacancies. Mining was quiet. Industrial conditions showed almost no change, all iron and steel plants being particularly busy, as well as others engaged on war contracts. Skilled workers in these trades continued to be in demand and to overcome the scarcity in various localities, suitable men had been transferred in from outside points; however, an urgent demand still exists for mechanics, lathe hands, tool and die makers, planer hands and milling machine operators. A few plants had started inventory taking, but the majority was running on full time. A large number of boys and girls had been absorbed in local industries and there was a continued influx of men from country districts looking for factory work. Inclement weather had slowed down outside construction and labour on highways consisted chiefly of maintenance work. Buildings at many military training centres had been completed, except for some special alteration or finishing still to be done. Nearly all skilled tradesmen, however, were steadily employed. As the close of navigation was approaching, water transportation was much slacker. Trade, both wholesale and retail, reported increased sales. Orders for domestics in the women's division continued steady and calls for cooks and cooks-general exceeded the supply. Factory orders were fair, although many were for juniors. Some clerical help also was placed and hotels and restaurants were busy, thus stimulating the demand for waitresses.

The call continued in the Prairie Provinces for men for winter work on farms, with sufficient applicants at hand to fill all needs. At Lethbridge, the removal of beets to the factory progressed rapidly, double shifts speeding the work day and night. Numerous requests for bushmen were reported at Winnipeg, but fewer in Alberta. Lumber shipments, however, through Lethbridge, averaged 10 cars daily—a stable year round figure. Mining was more active, owing to the colder weather. Coal shipments through Coutts, Alberta, to Northern Montana averaged 420 cars weekly, while considerable activity was shown also in the Crow's Nest Pass, through which coal was being sent to British Columbia, Washington, Flin Flon, Manitoba, and Kapuskasing, Ontario. Construction was somewhat less in volume, as various National Defence projects neared completion, although nearly all skilled men in these trades were employed. Satisfactory progress on water and sewer lines in connection with airport construction also was being made. Manufacturing industries were running well. Trade was fair, but a lack of suitable applicants in the women's division created a problem there, which was difficult to overcome.

The majority of requests for farm help in British Columbia consisted of those for men under the Farm Placement Plan. Logging camps, saw and shingle mills continued to operate on high scale production and the cutting and shipping of Christmas trees was in progress. Figures released for October showed that the export of lumber for British Columbia was considerably higher than during the previous month, there being an increase of nearly 25,000,000 board feet. The herring catch at Nanaimo had filled the 30,000 ton quota for the season, but at Prince Rupert the run had not yet started, although indications were that it was near, as small shoals had been sighted. Mining was steady. Building was less active, as winter weather had caused the shut-down of much outside construction. Requests for building tradesmen continued to be influenced by lack of lumber and, as a result, a large number of men was available at Vancouver, most of whom were ready to go elsewhere if needed. Shipyards were busy at Prince Rupert, but the waterfront was quiet, although fairly large consignments of frozen fish were arriving every week from Alaska for transhipment East. At Victoria, the demand for help in the shipyards was very light, but a good week had been experienced on the waterfront, making it necessary to obtain additional longshoremen in order to speed up the work. At Vancouver, exports from the entire province were reported as being slightly higher than those of the corresponding period of 1939. Placements of women were largely in household service, nevertheless some were placed in hotels and restaurants and a few in clerical positions.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

AUGUST-SEPTEMBER RECORD

The British *Ministry of Labour Gazette* for October summarizes the August-September employment situation as follows:

The number of persons who were registered at Employment Exchanges in Great Britain as wholly unemployed on September 16 was approximately the same as at August 12, being 613,671 at the former date as compared with 613,156 at the latter date. At September 11, 1939, the corresponding total was 1,052,218.

At September 16, there were also 185,000 workers registered as on short time, or otherwise temporarily suspended from work on the understanding that they were shortly to return to their former employment—an increase of 30,620 as compared with August 12. The corresponding total at September 11, 1939, was 227,099.

The number of unemployed casual workers on the register (i.e., workers who normally seek their livelihood by jobs of short duration) was slightly less at September 16 than at August 12. It was 31,175 at the former date and 31,916 at the latter. The corresponding figure for September 11, 1939, was 51,611.

The number of applicants for unemployment benefit or allowances on the registers at September 16 was 683,156, as compared with 619,507 at August 12, and 1,144,404 at September 11, 1939.

The only industry in which there was a considerable increase in unemployment between August 12 and September 16 was coal mining.

The number of insured persons, aged 16 and over, recorded as temporarily suspended from work on September 16 on the understanding that they were shortly to return to their former employment represented 1·3 per cent of the total number of insured persons, aged 16-64, at July, 1939, compared with 1·1 per cent at August 12, and 1·5 per cent at September 11, 1939. Among persons insured under the general scheme, the corresponding percentage was 1·4 at September 16, compared with 1·1 at August 12 and 1·6 at September 11, 1939. Among persons insured under the agricultural scheme, the percentage was 0·1 at all three dates.

The number of insured casual workers, aged 16 and over, recorded as unemployed on September 16, represented 0·2 per cent of the total number of insured persons at July, 1939, the same as at August 12, compared with 0·4 per cent at September 11, 1939.

United States

Total non-agricultural employment in the United States in October, 1940, exceeded all levels since 1929, according to a report issued on November 29, by Miss Frances Perkins, Secretary of Labour. Excluding the increase in the armed forces of the country, it was stated that more than 250,000 workers were returned to employment in non-agricultural occupations during October, constituting the largest gain registered in October during the past 12 years.

The following paragraphs taken from the official report indicate the employment situation in the United States to be as follows:

The major portion of the gain in non-agricultural employment from September to October was in manufacturing industries, in which the rise of 2 per cent or nearly 180,000 workers was in sharp contrast to the seasonally expected decline of 0·4 per cent or 34,000 workers. Wholesale and retail trade establishments reported a seasonal gain of 57,000 in October and employment on construction projects increased by 41,000. In the Federal, State, and local government service, not including the armed forces, the increase of more than 30,000 was due primarily to the hiring of approximately 10,000 additional workers in Navy Yards and arsenals and more than 20,000 persons on selective draft boards. Transportation and public utility companies showed a net gain of approximately 4,000 workers and in the mining group 5,000 additional workers were added over the month interval. In the finance, service, and miscellaneous group there was a decline of approximately 60,000, due in large measure to seasonal recessions in resort hotel, recreation, and amusement activities.

The succession of monthly increases which have been reported since February of this year raised the October, 1940 estimate of non-agricultural employment to nearly 37,000,000. This total does not include employees on C.C.C., W.P.A., and N.Y.A. jobs or the members of the National Guard inducted into service in recent months.

Compared with October of last year employment in non-agricultural industries has increased by 1,150,000. The major portion of the gain in total non-agricultural employment over the year interval was in manufacturing industries, in which approximately 500,000 additional workers found employment. Transportation and utility firms were employing approximately 46,000 more workers and wholesale and retail trade establishments

showed a gain of about 70,000 over the year. Employment on construction projects was 148,000 higher in October, 1940 and a gain of 35,000 was registered in the finance, service, and miscellaneous groups. In the group of mining industries employment was 19,000 less than in October of last year.

The gains in factory employment and pay roll continued to be found in the great majority of the industries—72 of the 90 manufacturing industries regularly surveyed showing increased employment, and 70 reporting larger pay rolls over the month interval. The gains were more pronounced in the durable goods group of manufacturing industries, which has been more directly affected by defence activities, than in the non-durable goods group. Employment in the durable goods group rose 4 per cent from September to October, while the non-durable goods group showed a gain of only 0·4 per cent. With but three exceptions all of the durable goods industries reported gains in employment, the only declines being of seasonal character in the tin-can, brick, and marble industries.

The gain of 57,000 in the trade group reflected the usual seasonal expansion in wholesale and retail trade from September to October. Retail stores reported an employment increase of 1·7 per cent. Department stores took on 3·2 per cent more workers; variety stores 3·3 per cent; women's ready-to-wear 5·9 per cent; men's and boys' clothing 4·2 per cent; and family clothing 5·6 per cent. Shoe stores showed a 2·5 per cent decline after the large September increase of nearly 25 per cent. Employment in jewellery stores gained 4·0 per cent, stores dealing in farmers' supplies, 1·8 per cent, while those handling fuel and ice curtailed their forces by 1·6 per cent.

Wholesale trade establishments reported an employment increase of 1 per cent.

Private building construction employment increased 4·0 per cent from September to October and weekly pay rolls increased 6·5 per cent. The current employment gain was larger than any October increase recorded in the previous 8-year period, the average October gain since 1932 being 0·8 per cent.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, p. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1934, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935", which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages:

The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislature, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for government supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully compiled with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

War Contracts

All contracts awarded by the Department of Munitions and Supply are subject to labour conditions for the protection of the workpeople concerned.

In the case of building and construction contracts, the labour conditions included fair wages schedules based on the rates current in the particular district where the work is being performed, and provide that the working hours shall not exceed eight per day and forty-four per week.

In the case of contracts for the manufacture and overhaul of aircraft, the labour conditions include one scale of minimum wage rates which has been approved for all work of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and a separate and higher scale for all such contracts undertaken in Western Canada (comprising the area from Fort William to the Pacific Coast). These contracts are subject also to a working week of not more than forty-eight hours, provision being made that any necessary and authorized overtime work shall be paid for at a rate of not less than one and one-half times the regular rate.

Contracts for shipbuilding and repair are all subject to labour conditions including fair wages schedules based on the rates current in the district where the work is being executed. Provision is made for the observance of working hours of not more than forty-eight per week and for a wage rate of not less than one and one-half times the regular rate for any overtime that is necessary and authorized by the Dominion Government inspector in the plant.

Contracts for the manufacture of equipment and supplies for the defence forces are subject to the "B" labour conditions of the Fair Wages Order in Council referred to in the introduction to this article.

As complete lists of the contracts awarded by the Department of Munitions and Supply are being issued weekly through the office of the Director of Public Information, and are being published in the press, this information will not be duplicated here. Particulars of the contracts which have been awarded recently by various other departments of the Government of Canada, however, appear hereunder:—

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE.—The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

NATIONAL HARBOURS BOARD

Construction of repairs to concrete retaining wall at Victoria Pier, Montreal Harbour, P.Q. Name of contractors, Gunite and Waterproofing Ltd., Montreal, P.Q. Date of contract, October 9, 1940. Amount of contract, $2,785. A fair wages schedule was included in the contract as follows:—

	Per hour
Air chipper operators	$0 61
Blacksmiths	0 60
Carpenters and joiners	0 77
Cement finishers	0 61
Cement and concrete mixer operators:	
Steam	0 61
Gas. or electric	0 55
Cement gun operators	0 50
Cement gun nozzlemen	0 85
Compressor operators, gas. or elect.	0 55
Drill runners	0 50
Drivers	0 40
Drivers, horse and cart	0 55
Drivers, team and wagon	0 75
Labourers	0 44
Hod carriers	0 50
Pipefitters—surface temporary work	0 55
Plumbers and steamfitters	0 85
Riggers, general	0 55
Timbermen and cribmen (measuring, scribing, and, by the use of the axe, adze, etc., cutting and fitting timber)	0 50
Watchmen	0 35
Motor truck drivers	0 45
Motor truck drivers and truck	1 45

DEPARTMENT OF PUBLIC WORKS

Construction of a model testing basin for the National Research Council's laboratories, Ottawa, Ont. Name of contractor, Mr. Alex. I. Garvock, Ottawa, Ont. Date of contract, November 23, 1940. Amount of contract, $122,199 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Blacksmiths	0 70
Blacksmiths' helpers	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators—steam	0 70
Gas. or electric	0 55
Compressor operator, gas. or elec	0 55
Drill runners	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 80

	Per hour
Engineers on steel erection	0 85
Engineers, operating steam:	
Single or double drums	0 70
Three or more drums	0 80
Firemen, stationary	0 50
Hoist operators, gas. or electric	0 55
Labourers	0 45
Lathers (metal)	0 70
Linoleum layers	0 60
Motor truck drivers	0 50
Motor truck drivers and truck	1 45
Ornamental iron workers	0 60
Painters (spray)	0 85
Painters and glaziers	0 70
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Powdermen	0 55
Roofers, felt and gravel: patent; comp.	0 50
Rodmen, reinforcing steel	0 55
Sheet metal workers	0 85
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators, gas	1 00
Structural steel workers	0 85
Watchman	0 40
Waxers and polishers (floor)	0 50
Welders and burners—acetylene or elec.	0 70
Welders and burners on steel erection	0 85

Construction of new pavilions and dining room building, etc. at Deer Lodge Hospital, Winnipeg, Man. Name of contractors, The Winnipeg Supply and Fuel Co., Ltd., Winnipeg, Man. Date of contract, November 19, 1940. Amount of contract, $139,800 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos Insulation workers	$0 75
Brick and hollow tile layers	1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators—steam	0 80
Cement and concrete mixer operators—gas. or electric	0 55
Drivers	0 42½
Driver, horse and cart	0 55
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 85
Engineers, operating steam:	
Single or double drums	0 90
Three or more drums	0 95
Engineers on steel erection	0 90
Firemen, stationary	0 55
Hoist operators—tower, (gas. or elec.)	0 55
Labourers	0 42½
Lathers (metal)	0 75
Lathers (wood)	0 70
Motor truck driver	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 85
Painters and glaziers	0 70
Plasterers	1 10
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Plumbers and steamfitters' helpers	0 50
Roofers, felt and gravel; patent; comp.	0 45
Rodmen, reinforced steel	0 50
Sheet metal workers	0 70
Shingles, wood or asbestos (walls)	0 85
Structural steel workers	0 85
Terrazzo layers	0 75
Terrazzo layers finishers and helpers	0 60
Tile setters, asphalt (floors)	0 85
Tile setters, (ceramic)	1 05
Watchmen	0 35
Waxers and polishers (floors)	0 45
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators—gas	1 00

Construction of pavilions at Hospital, Ste. Anne de Bellevue, P.Q. Name of contractor, Mr. Edouard Leger, Outremont, P.Q. Date of contract, October 21, 1940. Amount of contract, $115,577.00 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 88
Carpenters and joiners	0 77
Cement finishers	0 61
Cement and concrete mixer operators:	
Steam	0 61
Gas. or electric	0 55
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 85
Elevator constructors	0 91
Elevator constructors' helpers	0 64
Engineers, operating, steam:	
Single or double drums	0 72
Three or more drums	0 80
Engineers on steel erection	0 83
Firemen, stationary	0 55
Hod carriers	0 50
Hoist operators—tower (gas. or elec.)	0 72
Labourers	0 44
Lathers (metal)	0 85
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 66
Painters and glaziers	0 70
Plasterers	0 88
Plumbers and steamfitters	0 85
Roofers, felt and gravel; patent; comp.	0 55
Roofers, sheet metal	0 75
Rodmen, reinforced steel	0 61
Sheet metal workers	0 75
Structural steel workers	0 83
Terrazzo layers	0 66
Terrazzo layers finishers and helpers	0 55
Tile setters (asphalt)	0 60
Tile setters (ceramic)	0 77
Watchman	0 35
Waxers and polishers	0 60
Welders and burners on steel erection	0 85

Construction at Halifax, N.S. Name of contractors, Angus Robertson, Ltd., Montreal, P.Q. Date of contract, October 24, 1940. Amount of contract, approximately $138,282.30.

A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 45
Boatmen (rowboat)	0 40
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gas. or electric	0 50
Compressor operators (gas. or elec.)	0 50
	Per hour
Divers (full day's pay to be allowed whether employed full or part time.)	14 00
Diver's tenders (full day's pay to be allowed whether employed full or part time.)	5 00
	Per hour
Drivers	$0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Electricians (inside wiremen)	0 95
Engineers, operating steam: single or double drums	0 65
Engineers, crane (steam, gas. or elec.)	0 70
Firemen, stationary	0 45
Hoist operator—tower, (gas. or elec.)	0 50
Labourers	0 40
Machinists	0 70
Machinists' helpers	0 45
Motor boat operators	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Painter (spray)	0 75
Painters and glaziers	0 65
Pipefitters (surface—tem. work)	0 53
Pipelayers, caulkers and solderers	0 50
Pile driver and derrick foremen	0 75
Pile driver and derrick engineers	0 65
Pile driver and derrick men (rigging, setting and signalling)	0 55
Pile driver and derrick firemen	0 45
Pile driver and derrick labourers	0 45
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 95
Powdermen	0 50
Pumpmen	0 50
Riggers (general)	0 55
Road roller operators (steam or gas.)	0 65
Roofers, felt and gravel; patent; comp	0 45
Rodmen, reinforced steel	0 50
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators (gas.)	1 00
Timbermen and cribmen (measuring, scribbing, and, by the use of the axe, adze, etc., cutting and fitting timber)	0 50
Watchmen	0 35
Welders and burners—acetylene or elec.	0 70

Excavation, grading, road bottoming for the new annex laboratories for the National Research Council, Ottawa, Ont. Name of contractors, Messrs. Whitmore and McArthur, Russell, Ont. Date of contract, October 11, 1940. Amount of contract, approximately $4,154. A fair wages schedule was included in the contract as follows:—

	Per hour
Drivers	$0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	1 45
Road grader operators (gas.)	0 55
Road roller operators (steam or gas.)	0 70
Steam shovel engineers	1 00
Steam shovel firemen	0 60
Steam shovel cranemen	0 75
Steam shovel oilers	0 50
Shovel operators (gas.)	1 00
Tractor operators	0 55
Watchmen	0 40

Construction at Sydney, N.S. Name of contractors, Hall Construction Co., Ltd., Halifax, N.S. Date of contract, October 30, 1940. Amount of contract, $59,160. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 90
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gas. or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 70
Electricians (inside wiremen)	0 70

Plasterers' helpers	0 45
Powdermen	0 50
Pumpmen	0 50
Plumbers and steamfitters	0 80
Motor truck driver	0 45
Motor truck driver and truck	1 45
Roofers—shingles (wood, asbestos)	0 85
Sheet metal workers	0 75
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators—gas	1 00
Tractor operators	0 50
Watchmen	0 35

Development at Aylmer, Ont. Name of contractors, Towland Construction Co., Ltd., London, Ont. Date of contract, November 9, 1940. Amount of contract, $325,511.50. A fair wages schedule was included in the contract as follows:—

	per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 60
Blackshpiths' helpers	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators (gas. or elec.)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Labourers	0 40
Motor truck driver	0 45
Motor truck driver and truck	1 45
Road grader operators:	
Gas	0 50
Horsedrawn	0 45
Including team	0 80
Road roller operators—gas. or steam	0 65
Shovel operators—gas	1 00
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Tractor operators	0 50
Watchmen	0 35

Development at Dorval, P.Q. Name of contractors, Dibblee Construction Co., Ltd., Montreal, P.Q. Date of contract, November 14, 1940. Amount of contract, $445,450.13. A fair wages schedule was included in the contract as follows:—

	per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Carpenters and joiners	0 77
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Engineers, crane (steam, gas. or elec.)	0 72
Firemen, stationary	0 55
Labourers	0 44
Motor truck drivers	0 45
Motor truck drivers and truck	1 45
Road grader operators (horsedrawn)	0 45
Road grader operators (including team)	0 80
Road grader operators (gas.)	0 50
Road roller operators (steam or gas.)	0 65
Steam shovel engineers	0 99
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators—gas	0 99
Tractor operators	0 50
Watchmen	0 35

Erection of a combined light and dwelling at the light station at Chebucto Head, N.S. Name of contractor, Mr. James P. Kelly, Halifax, N.S. Date of contract, November 18, 1940. Amount of contract, $8,500. A fair wages schedule was included in the contract as follows:—

	per hour
Cement finishers	$0 60
Cement and concrete mixer operators—gas. or elec.	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Hoist operators—tower (gas. or elec.)	0 50
Firemen, stationary	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Labourers	0 40
Carpenters and joiners	0 70
Painters	0 65
Brick and hollow tile layers	1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Plumbers and steamfitters	0 95
Shinglers (wood)	0 70
Road grader operators:	
Horsedrawn	0 45
Including team	0 80
Gas	0 50
Watchmen	0 35

Construction of a road at the Light Station at Chebucto Head, N.S. Name of contractors, Atlantic Construction Co., Halifax, N.S. Date of contract, November 21, 1940. Amount of contract, $5,375. A fair wages schedule was included in the contract as follows:—

	per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 45
Cement and concrete mixer operators:	
Steam	0 65
Gas. or elec.	0 50
Compressor operators (gas. or elec.)	0 50
Dragline operators (steam or gas.)	1 00
Dragline firemen	0 60
Dragline oilers	0 50
Drill runners	0 50

	Per hour
Drivers	0 40
Driver, team and wagon	0 75
Labourers	0 40
Motor truck drivers and trucks	1 45
Motor truck driver	0 45
Powdermen	0 50
Road grader operators—gas	0 50
Road roller operators—steam or gas	0 65
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators, gas	1 00
Tractor operators	0 50
Watchmen	0 35
Pilelayers, caulkers and solderers	0 50

Construction at Regina, Sask. Name of contractors, Dominion Bridge Co., Ltd., Winnipeg, Man. Date of contract, November 22, 1940. Amount of contract, $9,412.90. A fair wages schedule was included in the contract as follows:—

	per hour
Carpenters and joiners	$0 75
Electricians (inside wiremen)	0 90
Engineers, operating steam:	
Single or double drums	0 70
Three or more drums	0 75
Engineers on steel erection	0 85
Firemen, stationary	0 50
Labourers	0 40
Linoleum layers	0 60
Motor truck drivers	0 45
Motor truck drivers and truck	1 45
Ornamental iron workers	0 65
Painters and glaziers	0 70
Plumbers and steamfitters	0 90
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 45
Roofers, felt and gravel: patent: composition	0 45
Roofers, sheet metal	0 75
Sheet metal workers	0 75
Structural steel workers	0 85
Waxers and polishers (floor)	0 45
Welders and burners, on steel erection	0 85

Development at St. Aldwyn, Sask. Name of contractors, Dufferin Paving Co., Ltd., Toronto, Ont. Date of contract, November 22, 1940. Amount of contract, $161,086. A fair wages schedule was included in the contract as follows:—

	per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 65
Blacksmiths' helpers	0 45
Concrete mixer operators—gas. or elec.	0 50

Scales	Pritchard-Andrews Co., Ltd., Ottawa, Ont.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Pulp, Paper and Paper Products

DRYDEN, ONTARIO.—DRYDEN PAPER COMPANY LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 223) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 105).

Agreement to be in effect from June 1, 1940, to May 31, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1938, page 1405 and October, 1939, page 1059, with certain changes:

Wages: The hourly wage rates are increased by one cent per hour for all classes, with higher increases for a few classes of work.

Vacation: All employees having one or more years' service with the company to receive one week's vacation with pay, if and when operating conditions become normal.

SMOOTH ROCK FALLS, ONTARIO.—ABITIBI POWER AND PAPER COMPANY LIMITED, SMOOTH ROCK FIBRE DIVISION, AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 33).

Agreement to be in effect from May 1, 1940, to April 30, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1939, page 850, with this exception:

The hourly wage rates for the great majority of the classes of work are increased by 5 cents per hour, other classes receiving increases varying from 4 to 10 cents per hour.

KAPUSKASING, ONTARIO.—SPRUCE FALLS POWER AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 256), THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 87) AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS.

Agreement to be in effect from May 1, 1940 to April 30, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1939, page 851, and October, 1937, page 1152, with these exceptions:

Hourly wage rates are increased by 2 cents per hour.

Vacation: All hourly paid permanent employees with one year's service to be entitled to one week's vacation with pay.

The following benefits for employees with one year's service who enter military or naval service on active duty were provided for the period October 1, 1939 to October 1, 1940, with the understanding that consideration of such benefits be made for further six months' periods: Any such employee will, after honourable discharge, be given an opportunity, if he applies within 30 days of such discharge, of returning to an occupation as nearly comparable to his former occupation as circumstances permit, providing he is physically and mentally fit for employment. If not fit for such occupation, every effort will be made to place him on other work he may be capable of doing. Married employees and those with dependent blood relatives will be paid the difference between their monthly pay from the Government, including all allowances, and their monthly wages or salary from the Company (adjusted according as the operating unit in which he was employed works full or part time). Single employees with no dependent blood relatives will be paid the difference between their monthly pay and allowances from the Government and 75 per cent of their monthly wages or salary from the company (adjusted according as the operating unit in which he was employed works full or part time).

FORT WILLIAM, ONTARIO.—ABITIBI POWER AND PAPER COMPANY, LIMITED, FORT WILLIAM DIVISION, AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 232), THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 132) AND OTHER UNIONS.

Agreement to be in effect from May 1, 1940 to May 1, 1941, and thereafter from year to year, subject to notice.

Preference in employment and in laying off to be given to union members. All permanent employees whose wage rates are fixed by this agreement are to become and remain union members.

Hours: Both the paper mill and the pulp mill are not to operate more than 6 days per week except that when considered necessary by the Company to provide stock to keep the paper mill running or for any other reason, the pulp mill may operate on Sundays. Hours for both day and tour workers: 8 per day, 48 per week.

Overtime for day workers: time and one-half. Overtime for tour workers when engaged in other than tour work, time and one-half. All work by both day and tour workers on Sundays and three holidays, time and one-half.

Minimum hourly wage rates for some classes: wood yard—sawyers 59 cents, drum barkermen, conveyermen, oilers, wood handlers 56 cents; groundwood mill—stone sharpeners 83 cents, grindermen 64 cents, screenmen 63 cents; sulphite mill—chippermen 59 cents, sulphite cooks $1.03, blowpit men 56 cents, screen and deckermen 59 cents; beater room—beater engineers 90 cents, broke beatermen 56 cents; paper machine room—machine tenders $1.41, back tenders $1.23, third hands 97 cents, fourth hands 72 cents, fifth hands 68 cents, broke hustlers 56 cents, clothing man 95 cents, tour oilers 63 cents; finishing room—weighers 59 cents, finishers and truckers 56 cents; core room—coreman 61 cents, helper 56 cents; steam plant—water tenders 82 cents, steam engineers 79 cents, firemen 70 cents, coal handlers 59 cents; electrical department—switchboard operators 82 cents, motor tenders 77 cents, armature winder 88 cents, repairman 86 cents; pulp testers 56 cents; auto truck driver 59 cents, yard labourers 56 cents; mechanical—machinists (lathe hands) welders and pipefitters 82 cents, carpenter 84 cents, millwrights 82 and 84 cents, millwrights' helpers 68 cents. (These rates are 2 cents per hour higher than in the previous agreement.)

An apprenticeship system is in effect in the mechanical trades, apprentices to be paid from 35 per cent of journeyman's rate during first year to 85 per cent during fifth year.

Grievances which cannot be settled by the company with the union will be referred to a joint arbitration board, the chairman of which will be appointed by the federal Minister of Labour if the representatives of the parties cannot agree on a chairman. The decision of this board to be final and binding.

FORT WILLIAM, ONTARIO.—THE GREAT LAKES PAPER COMPANY LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 257), THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 39) AND THE INTERNATIONAL BROTHERHOOD OF OPERATING ENGINEERS (LOCAL 865).

Agreement to be in effect from May 1, 1940 to May 1, 1941, and thereafter from year to year, subject to notice.

Preference to be given union members when hiring new men and when it is necessary to lay off men. All permanent employees whose rates are fixed by this agreement are to become and remain union members.

Hours: 8 per day, a 48 hour week for all workers.

Overtime: time and one-half for day workers and for tour workers when engaged on other than tour work; time and one-half for all work on Sundays and four specified holidays.

Vacation: permanent employees with one year's service to receive one week's vacation with pay.

Hourly wage rates for some classes of work: wood yard—sawyers 50 cents, labourers 56 cents; ground wood mill—sharpeners 69 cents, grindmen 58 cents, wet machine and pressman 56 cents, screenman 58 cents, others 56 cents; sulphite mill—cooks 97 cents, cooks' helpers 66 cents, acid makers 82 cents, blowpit men

57 cents; chipper—labourers 56 cents; broke beatermen 56 cents; finishing room—truckers and checkers 62 cents, finishers 57 cents, coreman 57 cents; laboratory—testers and samplers 56 cents; electrical—switchboard operators 86 cents, maintenance men 84 cents; yard labourers 56 cents; boiler house—shift engineers 86 cents, firemen 71 cents, coal handlers 56 cents; mechanical—millwrights, machinists, blacksmiths, tinsmiths, pipefitters 84 cents, mechanics' helpers 66 cents, oiler 58 cents; paper machines—machine tender $1.80 and $1.92, back tender $1.63 and $1.75, third hand $1.23 and $1.32, fourth hand 77 cents, fifth hand 67 cents, sixth hand 57 cents, clothingman $1.23, rewinderman 75 cents, oilers 66 cents, beater engineers 91 cents to $1.04. (These wage rates are 2 cents per hour higher than those of the previous agreement.)

Seniority to be observed in giving preference of employment.

Employees leaving the Company to serve in His Majesty's forces, will be guaranteed their seniority without any break and their own jobs when returning, if still capable of performing same.

Any disputes which cannot be settled between the union and the Company will be referred to a joint arbitration board whose decision will be final. If the representatives of the parties cannot agree on a chairman for this board he will be appointed by the federal Minister of Labour.

PORT ARTHUR, ONTARIO.—PROVINCIAL PAPER LIMITED, PORT ARTHUR DIVISION, AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 239), THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 40) AND THE INTERNATIONAL UNION OF OPERATING ENGINEERS (LOCAL 865).

Agreement to be in effect from May 1, 1940 to April 30, 1941, and thereafter from year to year, subject to notice.

Preference in employment and when laying off men to be given to union members. All employees whose rates are fixed by this agreement to become and remain union members.

Hours for both time and tour workers: 8 per day, a 48-hour week, except teamsters who may work 9 hours per day.

Overtime: time and one-half for day workers and for tour workers when engaged on other than tour work. Time and one-half for all work on Sundays and four specified holidays.

Hourly wage rates for some classes in the paper mill: clay and size operator 60 cents; beater room—engineers 93 cents, head furnishers 60 cents, helpers and broke beater 56 cents; paper machines—machine tenders $1.10 and $1.32, back tenders 92 cents and $1.14, third hands 84 cents and 90 cents, fourth hands 69 cents and 70 cents, fifth hands 62 and 64 cents, broke hustlers 56 cents, oilers 65 cents, helpers 56 cents; baling press operator 58 cents; finishing room—operators (stack) 80 and 82 cents, helpers 58 cents, cutter men 61 cents, roll finishers 63 cents, core makers 57 cents, truckers 56 cents, cutter girls 43 cents, counter girls 46 cents. Hourly wage rates for certain classes in the sulphite mill: wood room—knife grinder 71 cents, chipper men 56 cents, sawyers and labourers 56 cents; acid makers 73 cents; digester house cooks 92 cents; blow pit operators and screen room operators 56 cents; bleacher men 75 cents; sulphite machine room—back tenders 59 cents, others 56 cents, groundwood mill—grindermen 57 cents, others 56 cents, yard labourers and teamsters 56 cents; mechanical crew—mechanics 82 to 84 cents, helpers 68 cents, oilers 58 cents, apprentices 30 cents minimum. Boiler house—engineers 86 cents, firemen 71 cents, coal men 56 cents, turbine operators 79 cents; electricians 84 cents, electrical operators 82 cents.

Vacation: employees who have been steadily employed for a year or more before May 1 to receive a week's vacation with pay.

Seniority to be observed in giving preference of employment.

An apprentice system is in effect in the mechanical trades, apprentices to be paid from 35 per cent of journeyman's rate in first year to 85 per cent during fourth year.

Any dispute which cannot be settled between the Company and the union will be referred to a joint arbitration board, the chairman of which will be appointed by the Minister of Labour if the representatives of the parties are unable to agree on one.

PORT ARTHUR, ONTARIO.—THUNDER BAY PAPER COMPANY AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 249), THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 134) AND THE INTERNATIONAL BROTHERHOOD OF OPERATING ENGINEERS (LOCAL 865).

Agreement to be in effect from May 1, 1940 to May 1, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one summarized above for the Abitibi Power and Paper Company, Fort William Division, except for the wage scale and vacation.

Vacation: permanent employees with one year or more service to have one week's vacation with pay if the Abitibi newsprint mills have operated 75 per cent or over, 3 days if these mills have operated between 50 and 75 per cent and no vacation if less than 50 per cent.

Hourly wage rates for certain classes: paper mill—machine tenders $1.67 and $1.70, back tenders $1.49 and $1.52, third hands $1.14, and $1.16, fourth hands 72 cents, fifth hands 67 cents, sixth hands 56 cents, oiler (day) 84 cents, shift oiler 60 cents, clothier $1.09, broke beater 56 cents, weighmen 60 cents, finishers 56 cents, rewinder men 64 cents, coreman 59 cents; groundwood mill—grindermen 59 cents, oiler 57 cents, wood truckers and bull screen 56 cents; sulphite mill—cooks 97 cents, screen men 59 cents, blow pit men 56 cents; boiler house—engineers 86 cents, firemen 71 cents, coal handler 59 cents; wood room—sawyers and chippermen 59 cents, labourer 56 cents; mechanics—machinist and tinsmith 84 and 86 cents, millwrights 84 and 89 cents, blacksmiths, pipefitters and electricians 84 cents, mechanics' helpers 68 cents, yard labourer 56 cents. (These are increases of 2 cents per hour in most cases.)

PINE FALLS, MANITOBA.—MANITOBA PAPER COMPANY, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 245), INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 101) AND OTHER UNIONS.

Agreement to be in effect from May 1, 1940 to May 1, 1941, and thereafter from year to year, subject to notice.

The terms of this agreement as to preference in employment, hours, overtime, apprenticeship, are similar to those of the agreement summarized above for the Abitibi Power and Paper Company, Fort William Division. Wages and vacation provisions in this agreement are:

Vacation: permanent employees with one year or more service with the Company to be given one week's vacation with pay if the Abitibi newsprint mills have operated 75 per cent or over, 3 days if operating ratio is 50 to 75 per cent and no vacation if operating ratio is less than 50 per cent.

Hourly wage rates for certain classes: paper mill—machine tenders $1.70, back tenders $1.52, third hands $1.15, beater engineers 99 cents, fourth hands 72 cents, fifth hands 67 cents, sixth hands 56 cents, oilers 67 cents, clothing man 83 cents, cleaners and swipers 56 cents; wood room—knife grindermen 59 cents, chippermen and oilers 57 cents, others 56 cents; slasher—sawyers 56 cents, wood handlers 56 cents; grinder room—stone sharpeners 87 cents, grindermen 83 cents, bull screens 56 cents; sulphite mill—cooks and acid makers $1.08, cooks' helpers 77 cents, blow pit 58 cents; mixing room—stock runners 70 cents, broke beatermen 56 cents; finishing room—finishers and coremen 56 cents, electric trucker 68 cents; steam plant—teamsters 57 cents, labourers 56 cents, locomotive engineer 83 cents, locomotive firemen 68 cents; mechanical—machinists, blacksmiths, carpenters, masons, pipefitters, millwrights, tinsmiths 82 to 90 cents, mechanics' helpers 67 cents; electrical—tour electricians and repairmen 82 to 90 cents, substation operators 83 cents. (The wage rates are 2 cents per hour higher than the previous rates with greater increases for a few classes.)

Manufacturing: Metal Products

SYDNEY, N.S.—DOMINION STEEL AND COAL CORPORATION LTD., SYDNEY STEEL PLANT DIVISION, AND THE STEEL WORKERS ORGANIZING COMMITTEE, LOCAL 1064.

Agreement reached following report of Board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, July, 1940, page 662 and October, page 1004). Agreement to be in effect from September 4, 1940 to September 4, 1941, and thereafter from year to year, subject to notice.

The Corporation recognizes the union as the collective bargaining agency for employees who are members of the union. No discrimination to be shown on account of union membership.

The Corporation will deduct from wages and pay over to the union, union dues from those employees who so authorize it.

Hours: 8 per day.

Overtime: time and one half except when a man works extra time on account of absenteeism and in case of certain seasonal work. Exception is also made when necessary for the rail mill to roll beyond the usual time, when straight time may be paid to the operating staff for one hour on the rolling operation and 1½ hours on the cooling tanks, provided that the conditions making such extra work necessary are outside the normal control of management. Time and one half for work on Sundays and statutory holidays to the employees of the following shops: roll, electrical repair, electrical general, locomotive repair, pattern, outside carpenter, car repair, blacksmith, boiler, pipe, machines, outside mechanical, foundry, carpenter.

Wages: the basic rates effective on July 1, 1940, are to remain in effect, but effective September 4, 1940, a bonus of 15 cents per shift of 8 hours or 2 cents per hour for any part of shift worked is to be paid. It is further provided that if the index number (all items) as published in the LABOUR GAZETTE shows an increase of 10 per cent as at December 31, 1940, over the figure as at June 30, 1940, then the parties are to re-open and adjust the bonus payment.

Other factors being relatively equal, seniority to prevail when increasing or decreasing staff.

Any employee who enlists or is called into the military, naval or air service of the British Empire during the war and who within 90 days after his honourable discharge from such service registers for employment with the corporation shall for the purpose of seniority rights be considered to have been in continuous service with the corporation during the time he was so engaged in the services of the British Empire.

Disputes which cannot be settled by the department committee (of employees) and the department superintendent or by the union with the management shall be referred to an umpire appointed jointly by the union and the management of the corporation.

MONTREAL, QUEBEC.—CANADIAN VICKERS LIMITED AND THEIR EMPLOYEES OF THE BOILER SHOP, INDUSTRIAL DEPARTMENT (MEMBERS OF THE INTERNATIONAL BROTHERHOOD OF BOILER MAKERS, IRON SHIPBUILDERS, WELDERS AND HELPERS, LOCAL 271) (BOILERMAKERS).

Agreement reached as a compromise following report of the board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, October, 1940, page 1007) and the strike reported on page 1245 of this issue. Agreement to be in effect from November 9, 1940, to November 8, 1941, and thereafter from year to year, subject to notice.

The Company recognizes the shop committee as the sole bargaining agency for the employees as long as the committee represents a majority of the employees covered by this agreement. No discrimination against any employee on account of activity in the meetings of the committee or of the union above mentioned.

Hours: for day shift—8½ per day, 4½ on Saturdays, a 47 hour week; for night shift—10 per night, 5 nights per week, a 50 hour week. It is agreed that three 8 hour shifts may be worked if men available and if the management so desires.

Overtime: time and one half; double time for work on Sundays and seven specified holidays. Night shifts to be paid 5 cents per hour extra. In case of three shifts being worked, the shift between midnight and 8 a.m. to be paid the 5 cents per hour extra.

The wage rates established in this agreement are to be retroactive to August 10, 1940.

Minimum Wage Rates	Cents per Hour
Layers Off	75
Boiler Makers Class 1	75
Boiler Makers Class 2	65

Apprentices—Second Year	35
Apprentices—Third Year	40
Apprentices—Fourth Year	45
Apprentices—Fifth Year	50

Apprentices to be under 18 years to start and must have the education and ability necessary to take the five year course.

Helper apprentices class 2, to be under 18 years to start, to be classified as helper apprentice class 1 after one year's experience and as helper after two years' experience.

Seniority to be considered when necessary to reduce the staff.

Minor disputes or grievances will be negotiated between the management and the shop committee. In case of a deadlock over the carrying out of the terms of this agreement or the interpretation of any of its clauses, the matter will be referred to the federal Minister of Labour who may set up a conciliation committee upon which the company and the shop committee will be represented, the decision of this committee to be binding.

Transportation and Public Utilities: Water Transportation

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES AND THE CANADIAN SEAMEN'S UNION.

Agreement reached following the strike reported in the LABOUR GAZETTE, May, 1940, page 443, conciliation by the Department of Labour (LABOUR GAZETTE, July, 1940, page 669) and during the proceedings of the board established under the Industrial Disputes Investigation Act. (LABOUR GAZETTE, May, 1940, page 415). Agreement to be in effect from June 24, 1940 to March 15, 1942, and thereafter from year to year, subject to notice, but may be revised after January 1, 1941.

The Companies recognize the union as the sole collective bargaining agency for the unlicensed personnel employed. The companies, in co-operation with the union agree to give preference to the employment of union members, but the actual selecting and hiring of seamen to be in the discretion of the master and/or chief engineer of the vessel.

Hours not to exceed 12 per day. Only necessary work may be done between Saturday noon and Monday at 6 a.m. or on eight holidays. (Necessary work is routine duties of men on watch essential for the safe navigation or the moving or placing of the vessel and work necessary for the loading or unloading of cargo). In laying up or fitting out, hours not to exceed 9 per day, 6 days per week.

Overtime: any work in excess of 12 hours in any day is to be compensated for by time off, as soon as possible. Any work, other than necessary work done between noon Saturday and Monday morning or on any of the eight holidays, to be paid for extra at 45 cents per hour or at the hourly rate, whichever is higher. For work required on Sundays or holidays for the purpose of expediting laying up or fitting out to be paid at overtime rate (45 cents per hour or the hourly rate, whichever is higher) in addition to the regular wage.

Minimum monthly wages (which are retroactive to the opening of the 1940 navigation season); wheelsman $87.50; watchmen, lookout and patrol, deck watch $70; deckhand $62.50; oilers $87.50; firemen $80; coal passers $62.50; second cook $65; porters $57.50; first cook (Canaler) $117.50; first cook (Upper Lakers) $127.50. (These rates are $7.50 per month higher than last year's rates except in case of wheelsmen for whom the rate is $10 per month higher.) Should a Company employing men on a monthly basis fail to provide either meals or sleeping accommodation, the Company will pay 40 cents for each meal and $1 for each day's sleeping accommodation which is not so provided.

If any member of a crew is required to do work usually done by longshoremen he shall be paid the local longshoremen's hourly rate (but in no case less than 40 cents per hour) in addition to his regular wage, and if such work is done on Sundays or holidays, the rate will be time and one half.

At the close of navigation, when a vessel is laid up, the Companies to furnish transportation to all members of the unlicensed personnel who have been in the Company's employ for four months or more during the season, to their homes or for 500 miles, whichever is the lesser.

Any grievances may be presented to the master of the vessel by the ship's delegate. Union representatives to be allowed by the companies to board vessels for union business but not to engage in negotiations over any dispute with the officer in charge of the vessel.

A Maritime Adjustment Board to be formed, one member representing the Company, one the union and the third chosen by these two, or if they cannot agree by the federal Minister of Labour. Should either party fail to nominate their representative within 15 days of the date of the agreement, such representative was to have been named by the Minister of Labour. Disputes are to be referred to this board, whose decision will be final.

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES AND THE NATIONAL SEAMEN'S ASSOCIATION OF CANADA (AFFILIATED WITH THE CANADIAN BROTHERHOOD OF SHIPS' EMPLOYEES).

The agreement which was summarized in the LABOUR GAZETTE, June, 1939, page 625, was renewed with six companies for the 1940 navigation season. From April 1, 1940, a new monthly wage scale became effective; wheelsmen $85, watchmen $70; deckhands $60, oilers $85, firemen $80, trimmers $60, cook steward (Upper Laker) $127.50, cook steward (Canaler) $120, second cook $60, porter $55.

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES AND THE MERCANTILE MARINE OFFICERS' GUILD OF CANADA (AFFLIATED WITH THE CANADIAN BROTHERHOOD OF SHIPS' EMPLOYEES).

The agreement which was summarized in the LABOUR GAZETTE, June, 1939, page 626, was renewed with five companies for the 1940 navigation season. From April 1, 1940, a new monthly wage scale became effective; mate (Upper Lakers) $180, second mate (Upper Lakers) $140, mate (Canalers) $170, second mate (Canalers) $127.50.

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES AND THE CANADIAN BROTHERHOOD OF MARINE ENGINEERS (AFFILIATED WITH THE CANADIAN BROTHERHOOD OF SHIPS' EMPLOYEES).

The agreement which was summarized in the LABOUR GAZETTE, June, 1939, page 626, was renewed with five companies for the 1940 navigation season. From April 1, 1940, a new monthly wage scale became effective: second engineer (Upper Lakers) $170, second engineer (Canalers) $160, third engineer $120.

MONTREAL, QUEBEC.—A CERTAIN TUG COMPANY AND THE NATIONAL SEAMEN'S ASSOCIATION OF CANADA, THE CANADIAN BROTHERHOOD OF MARINE ENGINEERS AND THE MERCANTILE MARINE OFFICERS GUILD OF CANADA (ALL AFFILIATED WITH THE CANADIAN BROTHERHOOD OF SHIP'S EMPLOYEES) (SEAMEN, MARINE ENGINEERS AND OFFICERS).

The agreement which was summarized in the LABOUR GAZETTE, June, 1939, page 626, was renewed for the 1940 navigation season, with the following new monthly wage scale: master $215, chief engineer $175 for second class certificate and $140 for third class certificate, second engineer $100, fireman $67.50 for coal burner and $57.50 for oil burner, deckhand $52.50, cook $57.

Collective Labour Agreements Act, Quebec Amendments

The following agreements, amendments and corrections of agreements have recently been made obligatory by Orders in Council and are summarized in the next article:—

Bakers, Quebec (amendment).
Shoe Industry, Province (amendments).

Paper Box (Uncorrugated) Industry, Province (amendment).
Lithographing Industry, Province.
Furniture Industry, Province (amendment).
Building Trades, Three Rivers (amendment).
Building Trades, Sorel (amendment).
Building Trades, St. Hyacinthe (amendment).
Building Trades, Sherbrooke (correction of amendment).
Building Trades, Montreal (correction).
Building Trades, Montreal (amendment).
Hardware Stores, Quebec (amendment).
Dairy Employees, Quebec (amendment).
Clerks and Accountants, Jonquière (amendment).
Garage Employees, Quebec (amendments).

Industrial Standards Acts

The following schedules have recently been made binding by Order in Council and are summarized in a special article below.

ONTARIO

Hard Furniture Industry, Province of Ontario.

SASKATCHEWAN

Bakers, Regina.

ALBERTA

Foundry Industry, Edmonton.
Bowling Alley Pinsetters, Calgary.

COLLECTIVE AGREEMENT ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Agreement Act was assented to June 22, 1940, and was summarized in the LABOUR GAZETTE, August, 1940, page 812. It replaces the Collective Labour Agreements Act, 1938. Agreements and regulations under the "Collective Labour Agreements Act," the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Agreement Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act made obligatory on all employers and employees in the trade, industry, commerce or occupation throughout the province or within the district determined in

the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date the Order in Council is adopted. The Order in Council may be amended or revoked by a further Order in Council on the recommendation of the Minister of Labour after consulting the parties to the agreement and after the required notice has been published in the *Quebec Official Gazette*. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette*, the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues from May, 1938, to July, 1940. Proceedings under the Collective Agreement Act are noted in the issues beginning August, 1940.

Recent proceedings under the Act include the extension of one agreement, the correction of two agreements and the amendment of fifteen other agreements, all of which are noted below. A request for the extension of a new agreement affecting barbers and hairdressers at Three Rivers was published in the *Quebec Official Gazette* of November 16. Requests for the amendment of certain agreements were published in the *Quebec Official Gazette* as follows: the fur industry (wholesale) at Montreal in the issue of November 2; clerks and accountants at Jonquière, retail trade at Quebec, the leather tanning industry throughout the Province, printing trades at Quebec, in the issue of November 23; the work glove manufacturing industry throughout the Province and all building trades agreements throughout the Province in the issue of November 30. In addition, Orders in Council were published in the *Quebec Official Gazette* during November approving or amending the constitution of eight joint committees and others approving the levying of assessments by nine joint committees, as listed below.

Manufacturing: Vegetable Foods

BAKERS AND DELIVERYMEN, QUEBEC.—An Order in Council, approved October 26 and published in the *Quebec Official Gazette*, November 2, amends the previous Orders in Council for these trades (LABOUR GAZETTE, January, 1940, page 68) by extending the term of the agreement from November 1, 1940, to January 1, 1941.

Manufacturing: Fur, Leather and Products

SHOE INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved November 7 and published in the *Quebec Official Gazette*, November 9, extends the terms of the agreement (LABOUR GAZETTE, October, 1937, page 1156, March, 1938, page 335, June, page 691, December, page 1423, July, 1939, page 728, October, page 1065 and September, 1940, page 971) to December 7, 1940.

A further Order in Council also dated November 7 and published in the same issue of the *Quebec Official Gazette*, makes a number of amendments to this agreement, such amendments to become effective December 7, 1940, and the agreement to continue in effect to December 6, 1941, and thereafter from year to year, subject to notice.

The classification of factory employees (male and female), is revised, and in addition the agreement now also covers three new classes: (*b*) office employees, chauffeurs, caretakers and watchmen; (*c*) shippers, inspectors, examiners, elevator operators and employees who correct defects in shoes during the course of manufacture; (*d*) all other employees (male and female) working inside or outside the factory and who are not included in the general factory classification. For these three classes (*b*, *c* and *d*) instead of three zones as for the general factory trades, the province is divided into four zones, zones I and II corresponding to zones I and II for the factory trades (that is, the Island of Montreal and within five miles of it is zone I; and the city of Quebec and within 5 miles of it is zone II) but zone III is other municipalities of 3,000 or more and within 5 miles of them; and zone IV, municipalities of less than 3,000.

The minimum hourly wage rates for the general factory trades are unchanged. The following minimum hourly rates are set for the new classes now included: (*b*) for office employees, chauffeurs, caretakers and watchmen—25 cents in zone I, 22½ cents in zone II, 20 cents in zone III and 15 cents in zone IV.

Zone	Percentage of employees	Cents per hour	Percentage of employees	Cents per hour	Percentage of employees	Cents per hour
For class (c) described on previous page—						
I	60	26	25	22	15	17
II	60	24	25	20	15	15
III	60	22	25	18	15	13
IV	60	20	25	16	15	12
For class (d) described on previous page—						
I	65	23	15	19	20	14½
II	65	21	15	16½	20	12½
III	65	20	15	15½	20	12½
IV	65	19	15	14½	20	12½

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (CORRUGATED PAPER) INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved November 14, and published in the *Quebec Official Gazette,* November 16, amends the previous Orders in Council for this industry (LABOUR GAZETTE, February, 1939, page 218, March, page 335, June, page 628 and February, 1940, page 172).

The minimum hourly wage rates for the first six months of employment are the same as the minimum rates for all in the original agreement. The minimum hourly wage rates after six months' experience are increased by 5 cents per hour for the following classes: foremen, corrugating machine operators, printing operators, slitting operators, slotting operators, flap cutting operators, bar creasing and slotting operators, helpers on corrugating machine, feeders and tailers, bundling and tying; the rates for the other ten classes are unchanged; stationary enginemen and stokers are no longer included. The minimum average for male employees is increased from 32, to 35 cents per hour. The wages for male employees in force on September 30 are to be increased by 2 cents per hour from October 1, 1940, for all employees of six months' service and for others when they have completed six months' service. The minimum hourly rates for female employees are unchanged but the average minimum wage for female employees is increased by one cent to a minimum of 26 cents per hour.

PAPER BOX (UNCORRUGATED PAPER), PROVINCE OF QUEBEC.—An Order in Council, approved October 31, and published in the *Quebec Official Gazette,* November 9, amends the previous Order in Council (LABOUR GAZETTE, April, 1939, page 528, September, page 950 and May, 1940, page 496), by replacing the word "gluers" by the term "hand fed table gummers."

Manufacturing: Printing and Publishing

LITHOGRAPHING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved November 28, and published in the *Quebec Official Gazette,* November 30, makes obligatory the terms of an agreement between the Canadian Lithographers Association, Province of Quebec Branch, and the Amalgamated Lithographers of America, Local 27.

The agreement is to be in effect from December 1, 1940, to December 31, 1942, and thereafter from year to year, subject to notice, and applies to the whole Province of Quebec. The jurisdiction comprises the production of lithography by lithographic, planographic, photolithographic or gelatine processes, whether direct or offset and whether in trade plants or any other establishments. It does not, however, include: office executives and clerks, salesmen, building maintenance men, elevator operators, cleaners, shippers, chauffeurs and other employees not actually engaged in the processes of production of lithography, nor employees in the binding and finishing departments, such as cutters, binders and finishers.

Hours: for both day and night shifts not to exceed 9 hours per shift, nor 44 hours per week; for the day shift this may be either a 5 day or a 5½ day week; for the night shift, 5 nights per week. (In the previous agreement regular hours were 45 per week.)

Overtime: all time worked before or after the regular hours in each shop to be considered overtime; time and one half for first three hours overtime Mondays to Fridays; all other overtime including work on Saturdays (except Saturday morning when part of regular week), Sundays and seven or eight holidays, double time.

No piece work shall be done in any shop.

Minimum hourly wage rates for day work: Art Department—artist (reproducers only), commercial, general letterers and engravers $1.05, letterers and engravers on drug label work 72 cents, poster (crayon) $1.15, poster (letterers) 90 cents, process (colour correctors) $1.27; Camera Department—camera operators (commercial) 65 cents, camera operators (process and colour) $1.05, projection machine operators $1.05; Plate-making Department—commercial transferers 90 cents, colour transferers and provers $1.05, photo-composograph and step and repeat operators $1.05, vacuum frame and contact negative operators 61 cents and $1.05, stone polishers 61 cents, plate grainers 61 and 77 cents; Press Department—on presses up to 12 by 19, journeymen pressmen 63 cents; on presses over 12 by 19 and up to 20 by 30, pressmen 79 cents (one colour) and $1.05 (two colours), feeders and feeder attendants 34 to 45 cents; on presses over 20 by 30 and up to 22 by 34, pressmen 84 cents (one colour) $1.05 (two colours), feeders and feeder attendants 34 to 45 cents; on presses over 22 by 34 and up to 36 by 48, pressmen $1.05 (one colour) $1.16 (two colours), feeders and feeder attendants 37 to 53 cents; on presses over 36 by 48 up to 44 by 52, 38½ by 58½ and 41 by 55½, $1.10 (one colour) $1.32 (two colours) $1.42 (three colours), feeders and feeder attendants 38 to 58 cents; on presses larger than above, pressmen $1.21 (one colour) $1.37 (two colours), feeders and feeder attendants 40 to 63 cents; on four colour presses, pressmen $1.58 and $1.38, feeders and feeder attendants 38 to 58 cents; on direct

rotation and web offset presses, pressmen 98 cents, feeders and feeder attendants 38 to 58 cents, on flat bed presses (stone) pressmen 90 cents, feeders and feeder attendants 38 to 58 cents. Wages for helpers: from 20 cents during first six months to 33 cents after one year. Special rates may be fixed by the parity committee for any handicapped employees.

Minimum hourly wage rates for night work are 15 per cent higher than for day work.

Apprentices: in the press department, one apprentice for 3 journeymen and one apprentice for each four additional journeymen; in all other departments, one apprentice for 4 journeymen and one apprentice for each 5 additional journeymen.

Wages per hour for apprentices for day work: Art Department and Camera Department —from 20 cents during first six months to 57 cents during second half of fifth year, improvers 65 cents during first half of first year to 94 cents during second half of second year; Plate-making Department—from 20 cents during first year to 94 cents during second half of sixth year; Press Department—an apprentice must serve as feeder before taking charge of a press and beginning his apprenticeship, when he shall begin at not less than wages he received as a feeder and each six months shall receive an increase equal to one ninth of the difference between the feeder's wages and the journeymen pressman's rate as determined for the size of the press operated. The rates for night work are 15 per cent higher than for day work in all cases.

The wage rates are in most cases from 5 to 10 cents per hour higher than in the previous agreement, but it is further provided that any lithographic employees who have not benefitted by the terms of this scale are to receive an increase of 3 per cent.

In any shops where the prevailing number of hours per week are less than the above established and/or the regular prevailing wages are higher than the minimum rates established in this agreement, such prevailing hours may not be increased, nor such higher prevailing wages reduced.

Manufacturing: Miscellaneous Wood Products

FURNITURE INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved November 14, and published in the *Quebec Official Gazette,* November 16, amends the previous Order in Council (LABOUR GAZETTE, December, 1937, page 1386, February, 1938, page 214, October, 1938, page 1170, January, 1940, page 69, February, page 172 and October, page 1075).

The term of the agreement is extended from November 16, 1940, to September 1, 1941, and thereafter from year to year, subject to notice.

The names of five firms are struck off the list of manufacturers parties to the agreement and the names of ten others added. The Association of the Employees of J. W. Kilgour & Bros., Ltd., Beauharnois, at one time a party to the agreement is struck off, leaving the following two orzanizations as the representatives of employees: La Federation Catholique Nationale du Meuble (The National Catholic Federation of Furniture Workers) and L'Association Ouvrière Catholique de Beauharnois (The Catholic Workers' Association of Beauharnois).

Most provisions of the agreement have been revised, and the following is a summary of the complete agreement as now in effect.

The agreement is in effect throughout the Province of Quebec, which is divided into three zones: zone I is the Island of Montreal; zone II, the Province of Quebec except zones I and III; zone III the county of Chicoutimi, the town of Rivière-du-Loup and the municipalities with less than 3,000 population, provided the establishments in such territory do not employ more than 50 workmen.

The industrial jurisdiction includes furniture for dining rooms, bed rooms, living rooms, kitchen, offices, schools, restaurants and taverns, also wood lawn and porch furniture. (Upholstered furniture is not mentioned.)

Hours: 55 per week.

Overtime (except for shippers, maintenance and repair men and boiler firemen) time and one quarter.

Minimum hourly wage rates, effective from November 1, 1940, for employees (male and female) working in the manufacturing of furniture, etc. and also for boiler firemen, shippers, maintenance and repair men; in zone I, 18 cents per hour, with a minimum average rate of 39½ cents; in zone II, 15 cents per hour, with a minimum average of 34½ cents; in zone III, 12 cents per hour, with a minimum average of 29 cents. In computing the average wage, that part of any employee's wages which exceeds 55 cents in zone I, 50 cents in zone II and 45 cents in zone III shall not be considered. Piece rates to be high enough to enable workers to earn the above minimum rates.

Construction: Buildings and Structures

BUILDING TRADES, THREE RIVERS.—An Order in Council, approved November 5, and published in the *Quebec Official Gazette,* November 16, amends the Orders in Council for these trades (LABOUR GAZETTE, August, 1940, page 866, June, page 609 and May, page 497) by adding another contractor to the parties to the agreement.

BUILDING TRADES, SOREL.—An Order in Council, approved November 14, and published in the *Quebec Official Gazette,* November 16, amends the previous Orders in Council for these trades (LABOUR GAZETTE, October, 1938, page 1172 and November, 1938, page 1299) by adding three contractors to the parties to the agreement.

BUILDING TRADES, ST. HYACINTHE.—An Order in Council, approved November 5, and published in the *Quebec Official Gazette,* November 9, amends the previous Order in Council for these trades (LABOUR GAZETTE, August, 1940, page 867) by providing that professional employers who are recognized by provincial and municipal authorities to be bona fide contractors may pay the carpenters and joiners 5 cents per hour less and the painters, bricklayers, plasterers and masons 10 cents per hour less than the regular established rates for these trades, making the minimum hourly rates payable by these contractors: carpenters and joiners, 45 cents in zone I and 35 cents in

zone II; painters, paperhangers and glaziers, 40 cents in zone I and 30 cents in zone II; bricklayers, masons and plasterers, 55 cents in zone I and 45 cents in zone II.

The wage schedule is amended to provide 35 cents per hour for millwrights.

The agreement is to be in effect until April 30, 1942, and thereafter from year to year, subject to notice.

BUILDING TRADES, SHERBROOKE.—A correction to the Order in Council, summarized in the LABOUR GAZETTE, July, 1940, page 731 and previous issues mentioned therein, corrects the rate for maintenance men in churches, colleges, etc. in the county of Arthabasca to read $17.30 for journeymen in zone I instead of $17.50.

BUILDING TRADES, MONTREAL.—A correction to the Order in Council which was summarized in the LABOUR GAZETTE, July, 1940, page 732 and November, page 1203, was published in the *Quebec Official Gazette,* November 23. It does not affect the summary as given in the LABOUR GAZETTE.

An amendment to this same agreement was approved October 31, and published in the *Quebec Official Gazette,* November 9. By this amendment "La Section des entrepreneurs en tôlerie et toiture de l'association des Marchands du Canada" (The Sheet Metal and Roofing Contractors' Section of the Merchants Association of Canada) is added to the parties to the agreement.

Trade

HARDWARE AND PAINT STORES, QUEBEC.—An Order in Council approved November 28, and published in the *Quebec Official Gazette,* November 30, amends the previous Order in Council for these stores (LABOUR GAZETTE, April, 1940, page 391) by including in the jurisdiction establishments (wholesale and retail) whose main business is the sale of washing machines, electrical refrigerators, stoves, etc.

DAIRY EMPLOYEES, QUEBEC.—An Order in Council, approved November 27, and published in the *Quebec Official Gazette,* November 30, amends the previous Orders in Council (LABOUR GAZETTE, July, 1938, page 799, July, 1939, page 729 and August, 1939, page 862) by adding another dairy to the parties to the agreement.

CLERKS AND ACCOUNTANTS, JONQUIERE, KENOGAMI, ARVIDA AND ST. JOSEPH D'ALMA.—An Order in Council, approved November 27, and published in the *Quebec Official Gazette,* November 30, amends the previous Orders in Council for these workers (LABOUR GAZETTE, July, 1939, page 730, January, 1940, page 69, October, page 1076 and November, page 1203), by extending the agreement from December 8, 1940, to January 19, 1941.

GARAGES AND SERVICE STATION EMPLOYEES, QUEBEC.—*See* below under "Service: Custom and Repair."

Service: Custom and Repair

GARAGE AND SERVICE STATION EMPLOYEES, QUEBEC.—An Order in Council, approved November 27, and published in the *Quebec Official Gazette,* November 30, amends the previous Orders in Council for these workers (LABOUR GAZETTE, June, 1938, page 696, December, page 1174, February, 1939, page 218, April, page 435, May, page 529, June, page 630, July, 1940, page 734, October, page 1076) by extending the period of the agreement to November 28, 1940.

A further Order in Council, approved November 28 and published in the *Quebec Official Gazette,* November 30, renews the agreement to November 28, 1941, and thereafter from year to year, subject to notice.

Hourly wage rates: in zone I the rates for journeymen mechanic, fitter, machinist, electrician, body man, wheelwright, blacksmith, welder, painter and upholsterer are increased from 3 to 5 cents per hour, making the following rates effective for these trades in zone I: class A 50 cents, class B 46 cents, class C 44 cents, journeyman for first year 40 cents, storage battery man 44 cents, glazier 44 cents, greaser 38 cents, vulcanizer 38 cents. The hourly wage rates for apprentices in zone I are increased by one cent per hour making the rates from 16 cents during first year to 32 cents during fourth year. The hourly wage rates for servicemen, gas sellers, car washers, etc., are increased by 2 cents per hour to 22 cents for beginners and 27 cents after one year's experience. In zone II, the hourly rate for qualified workmen (mechanics, fitters, machinists, electricians, body men, wheelwrights, blacksmiths, welders, painters, glaziers, upholstery makers, battery men, oilers and vulcanizers) is increased by 3 cents, to 33 cents per hour, and for assistants an increase of 2 cents, making their rate 27 cents per hour; apprentices in zone II are increased by one cent, making their rates from 11 cents per hour during first year to 26 cents during fourth year. For service stations in zone II the rate (except for beginners) is increased by one cent, to 26 cents per hour.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved or amended by Orders in Council and published in the *Quebec Official Gazette,* November 2, 9, 23 and 30:

Shoe industry, Province.
Fur industry, Quebec.
Dress industry, Province.
Retail stores, Magog.
Building trades, Hull (amendment).
Aluminum industry, Arvida.
Building trades, Hull (amendment).
Retail stores, Quebec.

Notices were published in the *Quebec Official Gazette,* November 2, 9, 16 and 30,

that authorization was given by Orders in Council for the joint committees to levy assessments on employers and employees, parties to the following agreements:

Men's clothing, Province.
Grocers and butchers, Sherbrooke (amendment).
Sash and door industry, Jonquiere.
Civic employees, St. Joseph d'Alma.
Retail stores, Magog.
Bakers, Quebec (amendment).
Garage employees, Quebec.
Building trades, Joliette (amendment).
Barbers and hairdressers, Valleyfield.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and of amendments to them are given in the LABOUR GAZETTE, October, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Manufacturing: Miscellaneous Wood Products

HARD FURNITURE INDUSTRY, PROVINCE OF ONTARIO.—An Order in Council, dated October 24, and published in *The Ontario Gazette*, November 2, makes binding the terms of a schedule governing the hard furniture industry throughout the province of Ontario, from October 15, 1940, to October 15, 1941.

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, March, 1940, page 285, with these exceptions:

All those producing church, theatre and other products not commonly recognized to be case goods are exempted from the schedule.

The minimum hourly wage rates for those beginning to work in the industry when under 21 years of age and who have had less than 4 years' experience, remain unchanged for the first year of employment, but the minimum rates of the previous schedule are increased by one cent per hour, for the next three years. For all other employees (skilled, semi-skilled and unskilled) the minimum rates of the previous schedule are increased 2 cents per hour from October 15, 1940, with a further increase of 2 cents per hour to come into effect April 1, 1941.

Saskatchewan

Manufacturing: Vegetable Foods

BAKERS, REGINA.—An Order in Council, approved October 26 and published in *The Saskatchewan Gazette*, November 15, amends the schedule for this industry (LABOUR GAZETTE, July, 1940, page 736) by certain minor changes which do not affect the summary as published in the LABOUR GAZETTE.

Alberta

Manufacturing: Metal Products

FOUNDRY INDUSTRY, EDMONTON.—An Order in Council, dated November 13, and published in *The Alberta Gazette*, November 15, makes binding the terms of a schedule governing the foundry industry in the city of Edmonton and within 10 miles of the city post office.

The schedule is to be in effect from November 25, 1940, to November 24, 1941, and thereafter during pleasure".

The foundry industry includes (without limitation) the founding of iron, steel, aluminum, brass and bronze.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. However, the daily limit may be exceeded by one hour, provided the weekly limit is not exceeded by more than 3 hours; such extra hours are payable at straight time. In any case where the consecutive hours during which an employee is employed are less than three hours, he shall be paid for three hours.

Overtime: all work other than above to be paid at time and one-half for first three hours in any day and double time thereafter. Work on Sundays and seven specified holidays, double time.

Minimum hourly wage rates: journeymen 65 cents, improvers 55 cents, cupola men 40 cents during first three months and 50 cents thereafter, casting grinders 50 cents.

One apprentice allowed to each shop and one additional apprentice for each six journeymen moulders and coremakers or fraction thereof employed. One apprentice patternmaker allowed to each shop and an additional apprentice for each six journeymen patternmakers or fraction thereof employed. Apprentices to serve four years after which they shall be classed as improvers for one year. Apprentices to be paid from 20 cents per hour during first six months to 37½ cents during eighth six months.

Service: Recreational

BOWLING ALLEY PINSETTERS, CALGARY.—An Order in Council, dated November 13, and published in *The Alberta Gazette*, November 15, makes binding the terms of a schedule for bowling alley pinsetters in the city of Calgary from November 25, 1940, to November 24, 1941, and thereafter "during pleasure".

Hours: 9 per day, 54 per week, with a 24 hour period free each week.

Overtime to consist of all hours in excess of above hours.

Wages: for five pins 2¾ cents per line; for ten pins, 3½ cents per line. From September 1 to April 30, if wages of an employee on the above basis are less than $10 per week, he shall be paid at least $10 for that week.

PRICES, RETAIL AND WHOLESALE IN CANADA, NOVEMBER, 1940

Cost of Living, Prices of Staple Articles and Index Numbers

THE new official index number of the cost of living advanced about three quarters of one per cent in November as compared with October. The most important increase was in the food group which was 2·5 per cent higher due to substantial advances in the prices of butter and eggs. The fuel group and the home furnishings group showed minor increases, that in the former being due to higher prices for coal in several localities. The rent, clothing and miscellaneous groups were unchanged. Comparative figures for the "total index" at certain dates are 107·8 for the beginning of November; 107·0 for October; 103·8 for November, 1939; and 100·8 at the beginning of August and September, 1939. The advance since the outbreak of war was therefore 6·9 per cent. The most important advances during this period were in the clothing group about 14 per cent, fuel 10 per cent, food and home furnishings about 9 per cent.

The index number was constructed on the basis of a survey of the expenditure of 1,439 families of wage earners and salaried workers with incomes between $450 and $2,500 in 1938. The average expenditure was $1,453.80 divided as follows: Food (31·3 per cent) $443; shelter (19·1 per cent) $269.50; Fuel and Light (6·4 per cent) $90.50; Clothing (11·7 per cent) $165.80; Home Furnishings (8·9 per cent) $125.70; Miscellaneous (22·6 per cent) $319.40, including Health (4·3 per cent) $60.80, Personal Care (1·7 per cent) $23.90, Transportation (5·6 per cent) $79.30, Recreation (5·8 per cent) $82.10, Life Insurance (5·2 per cent) $73.30. Other expenditure, not directly represented in the index was $40.

The table of index numbers of changes in the cost of living published in this monthly statement from January, 1927, to September, 1940, has been discontinued and replaced by the new official cost of living index number calculated by the Dominion Bureau of Statistics. Those who have been using the old index number of the Department for special purposes and cannot immediately change to the new may bring the old series down to date each month by applying the percentage changes shown by the new index to the figure for August, 1940, for the old index. The group figures may be similarly adjusted. For the "Sundries" group figure the indexes for the new "Home Furnishings" and the "Miscellaneous" should be combined using the weights. By this method of calculation the figures of the old index for November are Food 123, Fuel and Light 148, Rent 153, Clothing 133, Sundries 161, All Items 139.

Publication of the table showing the cost per week of a list of staple foods, fuel and lighting, and rent entering into a family budget which appeared in the LABOUR GAZETTE from August, 1915, to September, 1940, has also been discontinued. The cost of the list in terms of average retail prices in 69 cities in Canada at the beginning of November was: Food $8.92; Laundry starch 4·1 cents; Fuel $2.95; Rent $6.21; and Total $18.13. The average cost of staple foods by provinces at the beginning of November was: Nova Scotia $9.04; Prince Edward Island $8.70; New Brunswick $9.17; Quebec $8.35; Ontario $8.90; Manitoba $8.64; Saskatchewan $8.34; Alberta $8.68; and British Columbia $9.74.

Wholesale Prices

The Dominion Bureau of Statistics weekly index number of wholesale prices on the base 1926 as 100 changed little week by week during

the month the high point 84·1 being for the week ended November 29 and the low point 83·6 for the week ended November 1 as compared with 83·0 for the week ended October 4. The most important changes occurred in two groups, the Vegetable Products Group which advanced 1·7 per cent during the month and the Animals and Their Products Group which advanced 1·3 per cent. In the former the increase was due mainly to advances in the prices of grains, potatoes and certain milled products and in the latter to increases in eggs, butter, milk, cheese and hides. In this group the prices of livestock, chiefly hogs, as well as fresh and cured meats were lower. Changes during the month in the other principal groups were slight. The movement in the index since the beginning of the year has been relatively slight following the sharp advance after the outbreak of war, the high point for the entire period being 84·1 for the week ended November 29. Comparative figures on a monthly basis are 81·6 for June, 1940, the low point for the year, 82·6 for January, 1940, and 72·4 for August, 1939 (pre war). Since the outbreak of war the general index has advanced about 16 per cent, consumers goods about 15 per cent, producers goods about 17 per cent, raw and partly manufactured goods 19 per cent and fully and chiefly manufactured goods about 13 per cent.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of November of sixty-five staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed

(*Continued on page 1322*)

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in Other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡ For the week ended December 1, 1940; monthly figures not yet available.

* Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 578.

(*Continued from page 1315*)

houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The list of foods for which prices are published is changed as a result of the construction of the new index number. Some items have been dropped as the cost of living survey showed that they were no longer extensively used. Other items have been added and for others the quality, grade or description has been changed. For some cases the change in description does not mean that there has been a change in quality or grade but only in the size or weight of the unit, or in the descriptive term commonly in use. Where there is a change in grade, quality, etc. there is a footnote to the table.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

Localities in the list of cities on page 1321 affected by the "standstill" rental order (LABOUR GAZETTE, October, 1940, page 995) issued on September 24 by the Wartime Prices and Trade Board are: Sydney, New Glasgow, Halifax, Thetford Mines, Ottawa, Kingston, Windsor, Brandon, Vancouver and

Victoria. The rental figures in the table for the beginning of November are, therefore, for these cities, the same as the beginning of January, 1940. (LABOUR GAZETTE, February, 1940, page 183.)

Retail Prices

Beef prices were somewhat lower at the beginning of November than at the beginning of October. Sirloin steak averaged 30·1 cents per pound as compared with 30·8 cents for October and 28·7 cents for November last year. Round steak was 26·1, 26·7 and 24·5 cents in the same comparison. Lamb was also lower averaging 27·2 cents per pound for November and 28 cents for October. Sliced breakfast bacon averaged 32·5 cents for November, 32·9 cents for October and 35·3 cents for November one year ago. The price of lard has changed little in recent months at a level considerably lower than for corresponding months in 1939. Some comparative prices are 10·5 cents per pound at the beginning of November, 10·4 cents for October and 13·7 cents for November, 1939. Egg prices were again substantially higher in all localities. The best grade advanced from an average price of 38 cents per dozen in October to 44·2 cents at the beginning of November. The price for November, 1939, was 41·9 cents. Exports in 1940 have been much greater than in 1939. Stocks in storage at the beginning of November were lower than for October and a further reduction was recorded for the beginning of December. Seasonal increases were reported for milk in some cities and the Dominion average price was fractionally higher at 11·1 cents per quart. Creamery butter averaged 32·8 cents per pound at the beginning of November, 27·6 for October and 32·6 cents for November, 1939. Production for the first eleven months of 1940 was somewhat lower than for the same period in 1939 and domestic "disappearance" of butter in 1940 was reported to be about 5 per cent higher than in 1939 but the figures for November, 1940, show a decrease as compared with the previous month. The price of cheese at 23·4 cents per pound was little changed from the level of the preceding month as compared with 22·8 cents for November, 1939. Beans were 7·1 cents per pound for November, 7 cents for October and 6·9 cents for November, 1939. Potatoes were lower in price than last year a larger crop being reported for 1940. The price per 100 pounds was $1.36 for November, $1.44 for October and $1.66 for November, 1939.

The following are the prices reported for Welsh coal, "cobbles" and "French nuts" at the beginning of November, 1940: Halifax $17.50; Charlottetown $16.40; Moncton $17; Saint John $16; Quebec $16; Three Rivers $16.50; Sherbrooke $17.50 Thetford Mines $17; Montreal $17; Ottawa $18; Kingston $17.50; Belleville $17.50; Peterborough $18.50; Oshawa $17.50; Toronto $16; St. Catharines $15.75; Hamilton $16.25; Brantford $17.75; Galt $17.50; Sudbury $19.75 Cobalt $21.50; Timmins $21.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the October issue of the LABOUR GAZETTE. Since these monthly notes are all compiled from British and foreign sources the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the LABOUR GAZETTE. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

In most of the continental European countries some measure of control over prices and distribution has been put in force. In some of these countries the publication of price data has been suspended and in other countries direct information is now unobtainable, although information contained in the publications of neutral countries is noted.

Great Britain

WHOLESALE PRICES.—The index number of the Board of Trade, on the base 1930=100, was 141·0 for September 1, an increase of 0·6 per cent for the month. The food and tobacco groups as a whole increased 2·9 per cent from the August average, but industrial materials were 0·5 per cent lower. The principal increase in any of the industrial materials groups was one of 2·4 per cent in cotton. Miscellaneous commodities showed a fall of 3·4 per cent, mainly due to price reductions for hides (native) amounting to about 40 per cent, by government order.

The *Statist* index number, on the base 1867-1877=100, was 131·6 at the end of September, an increase of 0·1 per cent for the month. The sugar, coffee and tea group showed a 3·5 per cent rise due entirely to higher prices for tea. The changes in all other groups were less than one per cent in each case.

COST OF LIVING.—The *Ministry of Labour* index number, on the base July, 1914=100, was 189 at the beginning of October, an increase of one per cent for the month. Food was two per cent higher, due to higher prices for eggs and also increases in fish and milk prices in some districts. Clothing was between one and two per cent higher, fuel and light about one per cent higher, rent and miscellaneous ntems were unchanged.

United States

WHOLESALE PRICES.—The *Bureau of Labour Statistics* index number, on the base 1926=100, was 78 for September, an increase of one point for the month. With commodities divided into three main groups (farm products, foods and other commodities), only foods showed an increase.

COST OF LIVING.—The index number of the Department of Labour and Industries of Massachusetts of cost of living in Massachusetts, on the base 1913=100, was 137·6 for October, a decline of 0·3 per cent for the month. A decrease in food prices was partly counteracted by a rise of 3·7 per cent for fuel and light.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Manitoba Court Refuses to Interfere with Possible Interpretation of Collective Agreement by Framers and Administrators made in Good Faith

On June 6 Mr. Justice Adamson of the Manitoba Court of King's Bench held that where one of two possible interpretations was being used in good faith by the framers and administrators of a collective agreement the Court should not interfere. Arriving at the same conclusion as in his former judgment given after an argument on demurrer before the trial, he dismissed with costs the action of a fireman whose name was on the seniority list of the Canadian Northern Railways with rights dating from August 16, 1916, and who, as a member of the Brotherhood of Locomotive Firemen and Enginemen, was asking to have interpreted in a certain way an agreement of May 6, 1926, between the Canadian National Railways and representatives of the Brotherhood of Firemen and Enginemen and the Brotherhood of Locomotive Engineers and called the "Montreal Agreement."

When various railways were consolidated as the Canadian National Railways in 1919, the plaintiff held a place on the firemens seniority list of one of the amalgamating railways. When disputes arose as to gains and losses of employment by men who had worked on the various systems, the agreement in question was made, creating nine seniority districts and providing that men were to be placed on seniority lists in proportion to the number employed in the seniority district on the separate lines on a fixed date in 1920. Separate lists were established for engineers and for firemen but lack of employment forced engineers to revert to the position of firemen until in 1934 there were no firemen working. Some 60 odd engineers, all of whom were firemen in 1926 but none of whom had been firemen in 1920, were placed in a group at the top of the firemen's list.

There were two questions to be decided: (1) whether, as the plaintiff fireman contended, those who had been firemen in 1920 but had become engineers before 1926 should be compelled to take their place on the firemen's list or whether they should be on the engineers' list; (2) whether the plaintiff should succeed in his argument that when these engineers reverted to being firemen the 1920 lists should have been used to apportion them on the list according to the lines on which they were employed.

As to the first question, the Court held that the Montreal agreement was concerned with the men working in 1926 when the agreement was made, at which time the defendants were all engineers. In 1920 they had been firemen. They were entitled to be placed on the engineers' list although the ratio to be listed from the various lines would be based on the 1920 figures. Mr. Justice Adamson observed that had the intention been to go back six years for the basis for the consolidated lists that would have been stated. The intention of the men who made the agreement was shown by the fact that they used the 1926 list in carrying it out. The second argument was disallowed on the ground that to list the engineers otherwise than according to their firing date would contravene the practice that had been followed for years when it was necessary for an engineer to revert to a fireman's status. The agreement did not express any intention to change it and it was felt that had a change been contemplated it would have been specifically set out. *Murphy v. Robertson et al* (1940) 3 Western Weekly Reports 401.

Claim for Back Wages under Quebec Minimum Wage Act Dismissed for Lack of Evidence and Lapse of Time

Mr. Justice McDougall of the Superior Court of Montreal on April 6 dismissed an action by a woman employed in a dress factory to recover balance of wages alleged due under the Women's Minimum Wage Act.

Since the minimum wage law made an exception to the general principle of law that parties are legally free to contract as they see fit, the Court considered that the law must be construed strictly and explicit proof be required of the plaintiff.

The plaintiff was employed by the defendants from September, 1935, to November, 1937. The Fair Wage Act came into effect on September 1, 1937, and the action was begun in April, 1939. It was not shown that the operator had complained to her employer about the wages or hours of work although there was evidence that she and other employees were dissatisfied with the amounts they were paid. The evidence was not clear as to the number of hours actually worked. The unreliable method used for recording hours was demonstrated by the fact that in two letters from the plaintiff's attorneys to the defendants dated May 4, 1938, and February 22, 1939, there was a difference of $139.25 in the sums claimed. The claim was made under an order applying to the women's dress industry but the plaintiff admitted that she was employed partly on "house dresses" for which another order fixed a lower rate.

The Women's Minimum Wage Act made no provision as to the maximum period to be allowed for making claims and it was held by the Court of King's Bench in Grover Knitting Mills v. Tremblay (LABOUR GAZETTE, 1936, p. 563) that the prescription applicable in such case was of five years. But the Fair Wage Act, 1937, repealing the former Act more than six months before the plaintiff took action, provided that actions for wages should be prescribed by six months. The Court was of the opinion that the plaintiff was precluded on this ground from maintaining the action. *Dame Deschamps v. Lupovitch et al,* (1940) 78 Rapports Judiciaires de Québec, Cour Supérieure, 455.

Proprietor of One-Man Barber Shop must Comply with Decree of Joint Committee under Quebec Collective Agreement Act

On September 21, Magistrate Marin of the District Court of St. Hyacinthe ordered the accused barber to pay $5 and costs and in default of payment to serve 15 days in jail for disobeying the decree of the joint committee legally constituted under the Collective Agreement Act which requires barbers and hairdressers in St. Hyacinthe to furnish the secretary of the committee, on request, with information necessary for carrying out the decree. The Act empowers the committee to "require under oath from any employer or from any employee. . . such information as it deems necessary."

On September 10, 1938, a decree fixing wages and hours was made binding on barber shops in St. Hyacinthe. Both the Act and the order appear to apply generally to all workers except, as set out in the Act, "agriculturists, the blind and any railway company in so far as the latter is subject to the jurisdiction of the Parliament of Canada." A general section fixes a penalty for violations in cases not provided for. The accused had operated a one-man barber shop for a great number of years. The secretary of the joint committee sent him forms to fill in giving certain information. This he refused to do, claiming to be neither an employer nor an employee and therefore not covered by the decree or the Act.

The Court expressed the opinion that had the legislature intended to exclude any other classes than those specified in the Act it would have so stated, and referred to a provision in the Quebec Civil Code that when a law is doubtful or ambiguous it is to be interpreted so as to fulfil the intention of the legislature. Here the object of the law is to regulate the remuneration of all workers whether working by themselves or for one or more employees since an "employee" is defined in the Act as an "apprentice, unskilled labourer or workman, skilled workman, journeyman, artisan, clerk and employee working individually, as a crew or in partnership." The Court observed that an employee is one who receives a salary whether from his employer or his client. The barber in question is paid by his customers and so is an employee as defined in the Act. The magistrate referred to Lazarovitch v. Court of Sessions (LABOUR GAZETTE, October, 1940, p. 1095) in which the Court of King's Bench decided that the joint committee for the shoe repair industry had no power to fix minimum prices for shoe repairs and distinguished the case of Comité Conjoint de l'Industrie de la Réparation des Chaussures v. Kotik (LABOUR GAZETTE, 1939, p. 1295) where it was held that the operator of a one-man shop was not liable to pay assessment but where the question of his being an "employee" did not arise. *Lemieux v. Payan* (1940) 78 Rapports Judiciaries de Québec, Cour Supérieure, 398.

Privy Council Rules Australian Miner's Wage Claim under Contract not Barred by Time Limit for Claims under Industrial Arbitration Act

On April 5 the Judicial Committee of the Privy Council agreed with the dissenting minority of the High Court of Australia and restored the judgment of the Supreme Court of Western Australia which had reversed a local Magistrate's judgment in a claim by a miner for wages according to the terms of the contract between him and his employer. The final judgment awarded the full wages due under a verbal contract made on the terms of an award under the Industrial Arbitration Act including that part which would have been barred by lapse of time had the right depended on the Act and not on the contract.

The worker was engaged under a contract of service containing the wage provisions of an arbitration award. Each award while in force operates "as a common rule of any industry to which it applies." The man worked for one year to September 25, 1936, and was paid wages which were alleged to be less than provided under the contract by £8 1s. 9d. On April 12, 1937, he began proceedings in a Magistrate's Court to recover this sum.

There were two defences. The first, which, if successful, defeated the whole claim, was allowed by the Magistrate but discounted by all the subsequent judges. The Magistrate did not consider the second defence.

The first defence did not enter into the Privy Council case. There the action swung on the second defence, that as to £4 12s. 11d. the claim was time-barred under s. 176 (2) of the Industrial Arbitration Act which requires claims for sums due under the Act to be brought within 12 months. The subsection reads:

> Every worker shall be entitled to be paid by his employer in accordance with any industrial agreement or award binding on his employer and applicable to him and to the work performed, notwithstanding any contract or pretended contract to the contrary, and such worker may recover as wages the amount to which he is hereby declared entitled in any court of competent jurisdiction, but every action for the recovery of any such amount must be commenced within 12 months from the time when the cause of action arose.

In the Supreme Court of Western Australia, the Magistrate's judgment was set aside and judgment was entered for the full amount claimed on the ground that the miner was entitled to his wages under his contract of employment and since there was no need to assert the right given in sec. 176, he was not bound by its limitation. On the case being taken to the High Court, three out of five judges held that the time limit applied to a worker seeking to recover wages fixed by an award whether entitled under his contract or not. Judgment was given only for the balance of the claim not barred by lapse of time, i.e., £3 8s. 10d. The two dissenting judges agreed with the Supreme Court.

The question for the Privy Council was whether the £4 12s. 11d. was time-barred by the Industrial Arbitration Act. Their Lordships, through Lord Russell of Killowen, expressed the opinion that "the second subsection presupposes the existence of a contract of employment which, as to its wages provision, is inconsistent with an industrial agreement or award and deals with such a case by giving the workman a statutory right to recover 'as wages' the amount fixed by the industrial agreement or award as the case may be. It is that statutory right alone which is subject to the time-bar of 12 months." If the workman claims against the terms of his contract but in accordance with an award or agreement he is given the shortened time limit, but the time within which he may sue to enforce the terms of his contract is not affected by the Act. The Privy Council took the view that had the intention been to change the laws of limitation to reduce from six years to 12 months the time limit for suing on a contract it would have been more clearly stated. *True v. Amalgamated Collieries of Western Australia, Limited,* N.S.W. Industrial *Gazette,* August 31, 1940, p. 180.

English Court of Appeal Holds Implied Contract Bars Collection of Wages During Illness

On July 3 the Court of Appeal allowed the appeal of the employers from a County Court judgment awarding £45 damages to a commissionaire for wages alleged to have accrued during his illness.

The plaintiff had been employed by the defendant for about three years. During that time he had three separate periods of illness for none of which he claimed payment until he saw a newspaper report of a case where the Court of Appeal had allowed wages during illness (Marrison v. Bell, LABOUR GAZETTE, 1939, p. 451).

Lord Justice MacKinnon distinguished this case from the previous decision by pointing out that here the evidence showed an implied term in the contract that the plaintiff should not be paid while sick. When the contract was made there was no discussion as to the right to wages during illness. The Lord Justice seemed to be of the opinion that if the question had been raised when the bargain was originally made the plaintiff would have indicated that he did not expect payment in such an event. *O'Grady v. M. Saper, Limited,* Ministry of LABOUR GAZETTE, August, 1940, p. 233.
